AGRICULTURE.

B SALT NECESSARY?-Dr. Julius Lehmann says: "Of special importance is of all the organs engaged therein, inducing them to discharge saliva, gastric juice and all other digesting liquids --but also since it serves in the stomach as the material for hydrochloric acid, which is one of the most powerful means of digestion," Again: "The action of salt consists mainly in keeping the various constituents of the blood in a soluble condition, and also to exchange for other salts present therein its own constiuents, thus forming certain combinations, which have their particular office to perform in the blood. Moreover, in consequence of the physical character, it introduces into the blood from other parts of the body, the required amount of water, so that the blood remains in its vessels is in an easy, movable condition," The following is from the report of a French government commission on the question of teeding salt to domestic animals: 1. That salt ought to be given to replace the saline parts washed out of the food by boiling, steaming. etc. 2. That it counteracts the ill effects of wet food and meadows to sheep and prevents rot among them. 3. That it increases the flow of saliva and hastens fattening.

LIVE STOCK NOTES .- March is a trying month for live stock, and they will need extra care until the pastures produce sufficient herbage. All animals should be kept from exposure to the long, cold storm. We have seen many flocks and herds that were obliged to be in deep mud continuously through the spring. The yards should be properly drained, and the floors of the sheds and feeding rooms kept dry. Horses have heavy work at this season, and need to be fed and groomed accordingly. Much depends upon the driver; let him be patient and gentle. Fretting horses are never doing their best. Milch cows thrive when kept clean and fed with an abundance of wholesome food. Let the milking be done by careful hands, otherwise new cows will be spoiled, and old ones dried off. Early lambs, with their dams, need warm pens. As the days grow warmer, the ticks get more active. Dip the infested sheep in one of the preparations sold for the purpose. For lice on calves, pigs or fowls, nothing is better than grease or kerosene .-Speak now for June pigs. Give brooding hens clean nests, with food close at hand.—Be an "early bird" in the spring.

THE USE OF BONES. - The bone industry of this country is an important one. The four feet of an ordinary ox will make a pint of neatsfoot oil. Not a bone of any animal is thrown away. Many cattle shin bones are shipped to Europe for the making of knife handles, where they bring \$40 per ton. The thigh bones are the most valuable, being worth \$80 per ton for cutting into tooth-brush handles. The foreleg bones are worth \$30 per ton, and are made into collar-buttons, parasol handles, and jewelry, though sheep's legs are the staple for parasol handles. The water story of the pig-nothing is lost except the squeal.

WHEN a man milks a cow he should net attempt to smoke a cigar at the same time. A young man out in the country tried it, and got along well enough until he lowered his head and touched the cow's flank with the lighted end of his weed. The next instant himself and cigar were dreadfully 'put out,'
The cow introduced about two tons weight into one of her hind legs, and then passed it under the milker's jaw. When he ceased whirling around and when the myriads of stars he saw bad disappeared, he said farming was the hardest work a man could put his hands

Nur culture has not received the attention which it deserves, especially chestnuts. These are more palatable and nutritious than many much more popular articles of food, and could be grown in quantity and with pecuniary profit. There are several improved varieties, of large size and good quality, which can be grafted successfully on con.mon stocks of trees. There are thousands of scres in this and other States that are stocked with chestnut trees which are worth but little, that might be cleared, and sprouts one year's growth top-grafted at proper distances, and all else kept down. In six or ten years they would yield more reliable and profitable crops than some occupying much more valuable ground.

COLTS are the most profitable stock to raise upon a farm. A good colt will easily bring \$75 or \$100 at a year old. It is then at its most profitable condition. All risks of rearing are escaped and the money can be put to better use than keeping it in the colt for sale afterwards. There is no other way of making \$100 so easily on a farm. But to rear colts one must have good sound mares, free from blemish and well cared for and taught to care for the colt well. day, to get their system into a cool, healthful state.

T. MERHAN stated that fungus in grapes, like that in the curl of peach leaves, is one of the causes of rot. Again, there are germs floating in the air that are enemies. He has known of protecting grapes from these germs by using paper bags. Paper bags were pronounced a sure and safe means of protection by a representative of the Horticultural Society of New Jersey. The bags are allowed to remain on until the fruit is ripened. The best time to bag the fruit is when it is about half

A PARAGRAPH is going the rounds of the exchanges to the effect that "if places infested by mice be plentifully treated, especially the holes, with Scotch snuff, the pests will disappear."

CALEDONIANS .- Arabi Bey was visiting his picket lines one evening when he espied through a field-glass a party of Highlanders deploying in the distance. "Allah-ma-goozle!" be exclaimsalt, not only for the entire process of tance. "Allah-ma-goozie!" he exclaim-digestion --since it increases the action ed. "What's that?" A French officer, acting as his aid, informed him that they were a detachment of the enemy's troops. "Thanks be to the prophet, we shall succeed," cried the Egyptian leader. "England is too poor to furnish breeches for the soldiers.

Bernard Murphy, Champion Youth Walker of Australia, says in the Melbourne Sportsman: "On Monday previous to the match with Ormes, of Sydney, I was attacked with 'stitch.' I could not walk another yard, and gave up all hope of winning. I was advised to try St. Jacob's Oil. I did so, rubbing a little on my side. I have not been troubled since, and won my match.
