### AGRICULTURE.

ONLY healthy cows produce good milk. They must never be heated, or in any way misused or unduly excited. Regularly in the time of milking, and

by the same person, secures the best results. Insist on cleanly habits in milkers. Filthiness is disastrous to both producer and consumer.

Do not feed your cows upon whey, inrnips, or cabbage; they are always injurious to milk.

Only tinpails are suitable to be used by dairymen. All milk should be carefully strained; doing so from the pail, through a wire strainer, is not sufficient; It should be strained through cloth also, otherwise the whole will be injured. There cannot be too great care as to

cleanliness in handling milk. All pails and cans should be kept absolutely clean. This is best secured as follows: The pails and cans, when taken new from the shop, must be carefully washed with soap and water. If sour whey is put in the cans, they should first be washed with cold water and then with Boap and water. In every instance the pails and cans should receive a thorough scalding with boiling water, and once a week they should be scoured with salt. Covers should be left off of cans until

ready to start for the factory. The milk should be stirred in the cans with a dipper to expose it to the air, and remove all animal heat. Cans of milk should be set upon the ground, or in cold water, and should always be protected from the rain. All milk should be delivered at the factory before eight o'clock A. M.

Mixing of milk at different temperapractice produces sour milk, and sour milk makes sour patrons.

Factory accounts, weighing scales. etc., are always open to the inspection of pations. Owners and patrons have a mutual interest, and the desire is to make the factory net its patrons more for their milk than they can get in any other way. Facilities in the location and arrangements of building and machinery, in its curing room and abundant supply of cold water, are always perfect. Factories secure the services of experienced, first-class cheese makers, It only remains for all concerned to heartily co-operate, and satisfactory results are assured.

POTATOES intended for seed should, after digging, be exposed as much as possible to light until danger from trosts require their removal to the cellar or pit. If they could be kept in a light room upstairs at a uniform temperature would be better than any other course that can be devised. Cellars are usually Co., Burlington, Vt. kept too warm, and they are always too dark for this purpose. Long before time for planting, the early kinds of potatoes will need sprouting and when the first sprout from an eye is removed. any that come after will be much less vigorous.

As a proof that deversified farming pays, the experience of Colonel Richard Peters, of Atlanta, Ga., may be cited: On one of his farms last year he made

# FANOY COOKING AND HEALTH, --- That !

what might be called "lancy cooking bitter opposition to them, steel hans is appreciated by many is evidenced by the exorbitant wages commanded by the cooks of our best restaurants, hotels "vigorous boycotting" of the steel nail and clubs, and the avidity with which all who are able to avail themselves of Wheeling appears to have had but little the products of these autocrats of the effect, as the demand upon the nail kitchen; but that good plan cooking is mills in the Wheeling and Pittsburgh comparatively rare among the mass of districts is almost exclusively for steel our housekeeping population is an un- nails. As a result of this tions; do we not know also that the steel nails are being made in increasing impression of a well-cooked dinner is a amounts, and even those mills which most potent aid to digestion, and do we have heretofore refused to make steel stop to realize how grievously this aid nails or have made them but sparingly to health is neglected?

### Wonders Never Cease.

Prof. C. Donaldson, New Orleans, La., proprietor of Museums, who suffered eighteen years with rheumatic pains, states he has spent ten thousand dollars to get cured. After trying doctors, famous baths, electric appliances and legions of liniments without relief, he tried St. Jacob's Oil, which completely cured him. It is a wonderful remedy, he says, and he has sold his crutches.

A noble part of every true life is to learn how to undo what has been wrongly done.

### The Best Butter Color

The great unanimity with which dairymen of high reputation have adopted, in preference to auything else, the Improved Butter Color made by Wells, Richardson & Co., of Burlington, Vt., tures should be carefully avoided. This is remarkable. It shows that the claims of imitative colors are baseless; wise dairymen will use no other.

> It is one of the worst errors to suppose that there is any other path of in the Head. It is easily applied with satety except that of duty.

### Beautiful Chromo Cards Free.

Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

The virtue of prosperity is temperance, the virtue of adversity is fortitude.

WITH Ely's Cream Balm a child can be treated without pain or dread, and with perfect safety. Try the remedy. It cures Catarrh, Hay Fever and Colds the finger and gives relief from the first application. Price 50 cents. At druggists, 60 cents by mail. Ely Bros., Owego, N. Y.

### The more we help others to bear their burdens the lighter our own will

be, Two Wives Made Happy. OBANGE, MASS., May 23 1883. "My wife was troubled with catarrh of the bladder, intense pain in kidneys and loins, urinating with great agony. Six bot-tles of HUNT'S [Kidney and Liver] REME-DY completely cured her."-H. S. Fuller, New Home Sew. Mach. Co.

One reason why HUNT'S [Kidney and Liver] REMEDY is so popular for the cure of diseases of the kidneys, liver and blad-der, is that it shows immediate improvement in the condition of the patient and recovery is steady and certain. Its cures have been so wonderful that physicians of all schools prescribe it in their practice.

"My wife has been a severe sufferer with "My wife has been a severe sufferer with indigestion, and kidney and liver troubles. I feared it would terminate in Bright's Disease, as there were the symptoms. She commenced using HUNT'S [Kidney and Liver] REMEDY, and found by the use of only one bottle she had been relieved."-R. S. R. Armstrong, Auburn, N. Y.

hearers with the fact that life is short, separation of the butter, and renders but forget it in their sermons.

Do Not be Discouraged

THE CHARLES A. VOGELER CO.

From the fact that the color of pure water in great bulk is blue, M. Ch. Montigny explains the predominance of this color in the scintillation of the stars just before and daring wet weather, The luminous rays, he argues, trayers-ing the air, charged with large quantities of water are necessarily tinged with the blue color of this medium. The excess of blue thus becomes an almost certain means of predicting rain. This theoretic conclusion corresponds with the results of his observations continued for several years past on the appearance of the stellar rays in connection with the state of the weather. During the months of fiue weather in the present year blue has been much less conspicious than in the corresponding months of previous years since 1876, when wet

weather prevailed. It also appears that green, which had always coincided with clear skies during the fine years before 1876, has recently again become pre-dominant. Hence M. Montigny thinks it probable that we have got over the cycle of bad seasons, and that dry weather and more normal summers may

come,

ment has been made at Kensington to determine the degree of heat which various fishes may endure. The water containing them was slowly warmed, when individuals of the several species were prostrated at the following temperature: Perch, 81°; roach, 821°; salmon, 83°; minnow, 85°; gudgeon, 851°; dace, 86°; common tench, 88°; golden tench, 88°; carp, 91°. Brandy-about which as a fish restorer much has lately

in restoring to animation the exhausted objects of the experiment.

More Work for Electricity .- One by one the instruments and processes of our fathers are being relegated to the domain of the antiquated. Now the churn must go. According to a French patent, the passage of a suitable electric Many preachers seek to impress their current through milk causes the rapid

The old-fashioned method of testing too-steel is as good a practical method as that of a careful chemical analysis. It is simply the heating and drawing under the hammer to a slender point, plunging while red-hot in cold water. and, when chilled, striking it with a hammer across the edge of the anvil. If the steel will harden, it will break, under these conditions, without bending back and forth. Steel that will harden under these conditions is not fit to temper, and will not retain a cutting edge. Steel that is so "high" that it cannot be heated red-hot and chilled in water without flying may do for some purposes, and retain a sufficiently rigid edge by air-hardening. If a piece of steel can be torged into a cold chisel, be harby dened, tempered and used, such steel is good steel, and may be relied upon for all ordinary shop-purposes.

A writer from Fiji asserts that when flocks of tern and other sea-fowl rest upon the sea the water becomes smooth, an affect which he ascribes to oil emitted by the birds.

# Beware of Scrofula

Scrofula is probably more general than any other disease. It is insidious in character, and manifests itself in running sores, pustular eruptions, bolls, swellings, enlarged joints, abscesses, sore eyes, etc. Hood's Sarsaparilla expels all trace of scrofula from the blood, leaving it pure, enriched, and healthy.

"I was severely afflicted with scrofula, and for over a year had two running sores on my neck. Took five bottles of Hood's Barsaparilla, and consider myself cured." C. E. LOVEJOY, Lowell, Mass.

C. A. Arnold, Arnold, Me., had scrotulous sores for seven years, spring and fall. Hood's Sarsaparilla cured him.

## Salt Rheum

William Spies, Elyria, O., suffered greatly from erysipelas and salt rheum, caused by handling tobacco. At times his hands would crack open and bleed. He tried various prep-arations without aid ; finally took Hood's Sarsaparilla, and now says: "I am entirely well." "My son had salt rheum on his hands and on the calves of his legs. He took Hood's Sarsaparilla and is entirely cured." J. B.

STANTON, Mt. Vernon, Ohio. Hood's Sarsaparilla

Angora goats, the following sales: \$5000; Essex pigs, \$500; wheat, \$500: mohair, \$450; sales of Jerseys, \$3000; butter, \$2000; total, \$11,850. The expenses were \$4100. This estimate does not include butter, milk. poultry, potatoes, mutton and beef consumed in the family. If the Jerseys and goats are excluded a handsome profit remains. Good farming and choice stock have resulted, in this case, in large profits.

GEORGE SIMPSON, an English dairy-man, says that he has found that the ordinary practice of drying continuous milkers, giving from twelve to sixteen quarts of milk daily. does not answer at all. Instead of attempting to dry cows giving large quantities of milk, he now finds it better to turn them in a loose box and feed on oat straw. By this means the flow of milk is reduced. and gradually they dry themselves off without any evil effects following. The of it. practice of suddenly checking the flow of milk of good milkers by the ordinary method, has resulted, at least in this case, in three of his cows slipping their calves, within forty-eight hours after the drying process had begun.

FAR superior to the well water is that of some spring which is brought to various places in and around the farm building from a neighboring hill-side. There are very many places where pipes can be laid. There is a great loss sustained by farmers giving or allowing their stock to seek and drink water that is at the point of freezing.

Grvs a little ground feed daily to calves, and teach colts to drink milk if you have it, and give them a few quarts per day. Colts may be taught to drink Croup attacks children at night, and is milk either sweet or sour, by mixing a distinguished by a peculiar barking little corn meal m at first, If they are grained heavily while young they will always require heavy graining thereafter to keep them in good order.

IT is now asserted that the common earth worm is the cause of the gape parasite in chicks. In examiniting earth worms from a gape infected district the gape parasite was found to be coiled up in the structure of the earth worm, and upon feeding the chicks with such carth worms the disease was at once produced amongst the brood.

FLOWERS may be kept very fresh over night if they are excluded entirely from the air. To do this wet them thoroughly, put in a damp box and cover with raw cotton or wet newspaper, and place in a cool spot.

IT is said that the simplest remedy for worms in cattle, sheep and hogs is turpentine mixed with a little feed or given in linseed oil or gruel; two ounfor a cow and one-fourth or less for maller animals

The rapid growth and dense shade which buckwheat makes gives it great value as a weed destroyor. Even thusles can be kept down by it if the land is sown as soon after plowing as possi-ble, and the first thistles that appear are pulled or out with a hoe.

WHAT TO DO TILL THE DOCTOR COMES. -In frost bites use gentle friction in a warm room, using enough cold water to prevent too rapid reaction and consequent pain in the affected part. If very severe a physician should be called, as gangrene may follow. When a fighhook has entered any part of the body cut off the line, file off the flattened end and pass the hook on through the flesh as you would a needle in sewing. When persons have fainted lay them down with the head as low as possible; loosen the clothing; keep back crowding that would interfere with plenty of fresh air; sprinkle water over the face, apply hartshorn to the nose, and if long in recovering conciousness place heated cloths or plates over the stomach. sound. One of the earliest symptoms is hoarseness. Apply hot water to the throat for fifteen or twenty minutes with a sponge or hot cloth, and give powdered alum mixed with syrup in half-tenspoonful doses, repeated every twenty minutes until vomiting takes place. Keep the child warm, so that sweating may be induced. Children are apt to shove up their noses small

bodies of different sorts, which may cause serious trouble unless soon removed. This may be affected by vigorously blowing the nose or by repeated sneezing, produced by snuff, or by tickling the nose with a feather. If these fail a hairpin may be tried. When a splinter in the eye cannot be removed, bathe in cold water and bandage loosely, so as to keep the eye quiet as possible until the surgeon arrives.

FROSTED FEET.—Fifty years frosted feet, "the itching of which during warm weather toward spring" made their owner "almost wild," were cured by "thoroughly rubbing dry every night for about ten days with a cloth dipped m alcohol and then holding them as close to the fire as could be borne for a minute or more." We have found coal cil applied twice a day one of the most

oil applied twice a day one of the most effectual remedies. To relieve the in-tense itching of frosted feet, dissolve a lump of alum in a little water and bathe The barnyard is the field for winter the part with it, warming it before the fire. One or two applications is said to be a sure relief

even if you have tried many remedies

for your Kidney disease or Liver complaint without success it is no reason why you should think your disorder incurable. The most intractable cases readily yield to the potent virtues of Kidney-Wort. It is a purely vegetable compound which acts on the Kidneys, Liver and Bowels at the same time and thus cleanses the whole system. Don't wait, but get a package to-day and cure yourself.

A man ought to like his neighbors, to mix with his neighbors, to be popular with his neighbors. It is a friendly heart that has plenty of friends.
