# AGRICULTURE.

A BUSINESS GAIT. - A good walking gait for a horse is best. Few farmers think of this; most of them want the colt to be a trotter. The trotter craze has been an awful curse to the country. It makes me sick to think of it. How many young men have gone to the bad on account of it; and what good does it all do? The horses of to day are not the equals in endurance of those of the fathers. The horses of earlier days did more and harder work, lived together and kept sounder than ours. They trot faster now, but what of that? It is a virtue, if it is, which makes vice. Teach the colt to walk, to start on a walk, and to keep on walking until it is bidden to go faster; such a colt will make a pleasant driver and last louger, and will be worth a great deal more to a sensible man. Break the colt before he is harnessed to any vehicle. It will make a safer and more easily managed animal. I have such a horse, and the other day he sayed the team because he would not run away with his mate. He walked, and turned in at home all right, with a big load of coal. The driver carelessly left them without tying, and it was cold. A fast-walking horse will go further and faster than one broken | and Hay Fever. It works like magic, to go by spurts, and do it easier and last longer. When a working-horse is pushed to a trot it will walk every chance it gets and walks slow to get its breath and rest. A driving-horse with a hght draft can trot with more ease, but a good walker on a long heat will make the time much sooner than one could suppose.

TREAT all horsas kindly, both in and out of the stable. Give them clean beds at night. Use the curry-comb lightly otherwise it is a source of great pain, especialty to thin-skinned and neryous animals. Let the heels be well brushed out every night. Whenever a stand on his feet from pain and weakhorse is washed, never leave him till he ness. As soon as he commenced using is rubbed dry; he may get a chill if Kidney-Wort he experienced immediate neglected. When a horse comes in from a journey, hot from over-driving or work, walk him about until he gets cooled off, then groom him with straw and a good brush, and rub his legs well with the hands. If possible, let the horse have some exercise every day; standing in the stable is conductive to dry and cracked feet. To cure or prevent this trouble, use beef-brine turned into the bottom of the uplifted foot, and an ountment for the hoofs composed partly of hog's lard. Water regularly, but not too soon after feeding; feed liberally, but do not overfeed. Salt at all times is in order, with wood-ashes occasionly. Good, bright oat-straw, cut and mixed with corn-meal, makes an economical, as well as a sufficient feed for horses in Winter, when doing but little hard work.

THE only kind of soil which is almost hopeless for good farming is one in which the subsoil is a quicksand. It leaches away the manure as rapidly as it is applied. It is difficult to underdrain such land, for the tile or stone

sink down and speedily choke the pas-

things, viz., either that your land needs also potash and nitrogen, or that it is already well supplied with plant food.

#### Worse Than Firearms.

The editor of an Omaha paper. in commenting on several cases in that city where children died from the effects of taking cough syrup containing morphia, remarks that opiates, poisons and unrooties are more dangerous than firearms. Mothers should note this and furthermore that different Boards of Health, after making careful analyses, have certified that the only purely veg etable preparation of this kind, and one that is in every way harmless, prompt and effective, is Red Star Cough Care. Mayor Latrobe of Bultimore, and the Commissioner of Health, have publicly endorsed this valuable discovery.

Somebody else will if I don't, This s one of the devil's best proverbs.

FOUR SCORE YEARS AND TEN have not seen the equal of Ely's Cream Balm as a remedy for Catarrh, Cold in the Head, giving relief at once, and permanent benefit. A thorough treatment cures the worst cases. Apply with the finger into the nostrils. Price 50 cents at rower ribbon is run in and out of every druggists. 60 cents by mail. Ely Bros., Owego, N. Y.

Choose those companions who administer to your improvement.

### He Knows It.

Hiram D. Maxfield, formerly of Silver Springs, R. I., has no doubt about the wonderial curative powers of Kidney-Wort. He was so afflicted with Kidney Complaint that he could not relief and at once began to grow strong and was relieved of all pain and un-pleasantness. He says: "I know I have been cured by Kidney-Wort."

The more true merit a man has, the more does he applaud it in others.

THE CHARLES A. VOGELER CONPAST, Sole Owners and Manufacturers, Baltimore, Maryland, C. S. A.

### DOMESTIC.

APRONS. - Very pretty aprons are made of a square of linen scrim, a hem of about two inches in width, and above that alternate places where the threads are drawn out about a fourth of an inch and left plain for the same distance. Into the open spaces the narthree or four threads. The ribbons are ot contrasting colors, and the border thus formed is unique. One apron made in this way has rainbow colors in the border. Another way 18 to hem the scrim both ends; in one hem run a pink ribbon to tull it on and to serve for strings, Hemstitch the other hem and embroider a spray of pink flowers on one side. Turn the other corner over on the right side of the material, young ladies. A very good apron for a maid is a clothespin spron made of two pieces of ticking the same size; these are fastened together in a band for the the upper piece of ticking make two round holes large enough to admit the hands, bind or stitch firmly around the edge. This is convenient for hanging out or taking in clothes, and the pins can be kept in it and be always ready for use. A very neat little spron can be made of the plaided crash or glass toweling. Work the alternate squares in two rows with red crewel stars, this makes a border, and if wash crewel is used the apron is very durable, and will retain its beauty after being laundried.

WHITEWASH. - The following is a recipe for preparing whitewash: Take the ture. They cleanse and purify the blood very best stone lime and slack it in a close tub, covered with a cloth to preserve the steam. Salt-as much as can be dissolved in the water used for slacking and reducing the lime-should be spire, the sunlight on the corn-field." applied, and the whole mass carefully strained and thickened with a small flour mixed as a paste may be added and will give greater durability to the mass, especially when applied to the exterior of buildings. With pure lime, properly slacked and mixed with twice its weight of fine sand and sifted wood ashes in equal proportions, although any color may be made by the addition of pigments, granite, slate, freestone and other shades may be imitated, and without any detriment to the durability of the wash. This covering is very of both sexes, that are not sufficiently se-often applied, and with good effect, to vere or pronounced to have a name, but underpinning, stone fences, roofs and the walls of barns and other outbuildings. Probably the pure whitewash is more healthy than the colored, as its alkalescent properties are superior, and when used in cellars, kitchens and sleeping apartments produce salutary results. No person who regards the health of his family should neglect to fences, etc., are greatly improved in appearance by an annual coat of whitewash, and will add to their permanency much more than many would imagine. It is cheap, and so easily applied that neither expense nor labor can be pleaded against it. WEDDING CAKE .- Three pounds of butter creamed with three pounds of brown sugar, two dozen of eggs, yolks and whites beaten separately, four currants, after they have been picked Covington, Tioga Co., Pa over, wrshed and set aside to dry, two pounds of citron, sliced very thin and chopped fine, two nutmegs grated down, one tablespoonful of ground einnamon, one teaspoonful of ground mace, two pounds of sifted flour, cream butter and sugar, add yolks, then two-thirds of the flour, alternating with the whites of the eggs, then add spices. Dust the fruit flour and mix in at the very last.

For testing gold, make a liquid consisting of nitric acid, one ounce; water, left by the acid. To test silver, apply a drop of a solution of nitrie acid, three ounces: water, one ounce; and bichro-mate of potash, one-half ounce; and wipe off the drop immediately with a sponge and water. If a blood red mark "gold" is very low or less than nine

results, the metal is silver or the article is silver plated.

The statement has been made by . Protessor Tyndall, before the Royal . Institution, that the purest water he was ever able to find was obtained by melting a block of pure ice; but that even this required extreme caution to insure success. The water of the chalk districts of England he pronounces re-

markably pure, and but for its hardness, or the amount of carbonate of line held in solution, would be unexcelled. In seventeen to three, leaving a water of

#### Delicate Discases

of either sex, however induced, speedily, thoroughly and permanently cured. Com-plicated and obstinate cases of blood taints, u cers, obstructions, unnatural discharges, over on the right side of the material, and fasten with a bow of pink and dark green ribbons. These have a very dashy httle look, and are especially pretty for young ladies. A very good apron for a of twelve expert specialists in constant attendence, constituting the most complete organization of medical and surgical skill are fastened together in a band for the waist, the lower corners are rounded; in the upper piece of ticking make two Buffalo, N. Y.

> Virtue is not more exempt than vice from the ills of fate, but always contains within itself an energy to resist them, sometimes an anodyne to soothe,

some places the water is subjected to a special preparation that causes a deposit of lime, namely, by adding clear pre-pared lime-water to the chalk-water, thus causing a precipitate of carbonate of lime to the bottom of the reservoir; this reduces the salt percentage from

extraordinary beauty and purity.

then in such places such tile should always be used. We have used hemlock boards under the tile to bridge a quicksand of several feet, and the drain has done good service more than twenty years and is yet in good condition.

#### IMPLANMENTS, of every kind, even the mowers and reapers and fodder cutters should be cleaned and put in order for nse. There will be many wet days in which this may be done. Of course every farmer should have these undercover, To clean gum from gearing, kerosene oil is the best material; it will also loosen rusty screws, Every part of the machines should be cleaned, turned around and well oiled. Plows may be scoured with a soft brick and water, and will then be ready for use; harrow teeth should be sharpened and driven up tight and even and so on through all the list.

A lew loose flowers arranged in a dish or bowl, in the centre of the table, are quite an addition. It is sometimes difficult to arrange them in a wide dish, as they fall into the centre and do not show to advantage. 'To overcome this difficulty have a small network of wire with quite large meshes. This is made to fit almost any dish by means of a slidingcatch, as in a lamp-shade. The stems in this way reach the water, while the wire supports the body of the flower. Flowers will make more show in this way, as they don't depend for support on one another.

THE vegetable mould in swamps, both of a peaty character, and that containing a large proportion of earth or sand, with more or less top-sod, affords an excellent addition to composts for field and garden use. The best plan is to lay it up in a large heap, sprinkling the layers, which should be about six inches thick, with slaked lime. The lime acts promptly, and after ouce working over. t may be mixed with stable or barnyard manure, or used as an absorbent. Each layer should be whitened with the lime. but not mixed with stable manure.

THE bast which our gardeners and others find so useful for tying buds and other purposes, is an important manu-facture in Russia. In the province of Viatka, which has a population of less than two millions, there are half a mil-lion of linden or basswood trees cut down annually for the sake of the bark. The inner bark is made into mats and sacks, of which nine hundred thousand of the fotmer and six hundred thousand of the latter are sold each year.

THE agricultural papers have most thoroughly exposed the evils resulting from allowing cows to drink from stag-

AN EXCELLENT SIDE DISH. -- Cold fowl left over from dinner may help to make an excellent side dish; cut it into rather small pieces, put a large lump of butter into a saucepan; brown the meat in that; sprinkle pepper and salt and some flour over it, and when the meat is brown add half a pint of stock, which need not be very rich to be good, and a pint of canned peas; heat to the boiling point, and then serve. Mushrooms may be used in the place of peas, and the proportions given above may be regulated by the quantity of fowl which you may have.

BREAKFAST DISH. - Cut one pound of ox kidney in slices half an inch thick and put them in the bottom of a saucewhen dows have ready access to clear, fare water. Ir an animal gets out of condition and does not seem to relish its food a little pure flaxseed boiled in oats and fed two quarts at a time will generally bring them back to a sense of hunger again.

Failure after long perseverance is much pobler than never to have striven and so have incurred failure.
