

In order to obtain the best results in farming, rich soil and good cultivation must go hand in hand.

"Shoot Folly as She Files," says the prophet in the pro-ship. Theorgus-eyed pro-ship, however, knew the quotation intended and changed it to read: "Shoot Folly as she files," says the prophet in the pro-ship. Some authorities consider potato "the most essential food for all vegetables."

"Laugh and Grow Fat," is the precept easily preached, but not so easy to practice. If a person has no appetite, but a distressing nausea, sick-headache, dyspepsia, or any other ill resulting from indigestion of the bowels, it is impossible to get up such a laugh as will produce aldermanic corpulence.

A NEW IDEA embraced in Ely's Cream Balm. Catarrh is cured by cleansing and heating, not by drying up. It is not a liquid or snuff, but is easily applied with the finger. Its effect is magical and a thorough treatment will cure the worst cases. Price 50 cents. At 60 cents by mail. Ely Bros., Owego, N. Y.

That which causes us to lose most of our time is the repugnance which we naturally have to labor.

Ladies and HUNT'S [Kidney and Liver] REMEDY invaluable to them because it relieves them of much of the pain and suffering which they are called upon to bear. Thousands of them bless the day when they first tried it.

Mrs. A. W. Howland, of Providence, R. I., says: "I most cheerfully recommend HUNT'S [Kidney and Liver] REMEDY as a safe and reliable cure for kidney disease, and it is the only medicine I have ever found that does exactly what it is advertised to do."

A large portion of the ill that flesh is heir to arises from an impure state of the blood. By promoting a healthy action of the liver, bowels and kidneys, HUNT'S [Kidney and Liver] REMEDY purifies the blood and eliminates disease.

HUMOROUS.

DECKWATER JIM, a battered and tattered Platte, who claims to be a forty second cousin of Captain Sam, has of late taken a good deal of interest in things beyond this vale of tears. He likes to hear about heaven, the "place of the long rest," as he calls it. Cooking his old and battered plug hat on one side, and almost closing his eyes in his effort to obtain a realizing sense of this very desirable place of rest, Jim says: "White man up there no more wuk um mine—no more run um railroad."

"No, Jim, no more work at all."

"What white man do?"

"Well, Jim, play all the time on a big golden harp."

"And Injun, what he do?"

"Well, he will have a big harp, all the same as the white man."

"Guess not," says Jim, shaking his head dubiously; "Injun maybe play little on jew-harp. But what you think 'bout catch um plenty watermelon?"

And Jim opened wide both his eyes and looked as though much depended on a favorable answer to the question.

NEW MINISTER—"No, sir; I don't like those. I want congregational singing, and you will oblige me by disbanding your choir before next Sabbath. I dislike to offend you, sir, but I feel strongly on this subject."

Organist—"But choir have been used for years, and I supposed all opposition to them had ceased in this denomination."

NEW MINISTER—"I believe, sir, in keeping close to first principles. There was no choir singing in the days of the apostles."

Organist—"Of course not. The operas hadn't been written then."

MR. DE BLANK—"My dear, it is none of my affair, but if I were I'd send those striped stockings back and get them exchanged for plain ones."

Mrs. De Blank—"Why so, dear? They are very pretty."

"I know, but they are out of fashion."

"There, I knew it, you old deceiver. So that's where you spend your evenings, is it? Oh, I—"

"My dear; why, what's the matter?"

"And you said you never went to the roller-skating rink?"

"I don't. I saw that in a paper."

"Oh!"

THEY were both students in the same college. He had just conquered his bashfulness sufficiently to take her for a drive. They drove a mile through the brush, and when they had reached the city, and his little maid kept up a steady chatter, seemed to have lost the faculty of speech. At last he made a break.

"Miss Minnie, which of the Latin poets do you prefer?"

"Virgil, of course," replied Minnie, with a roguish twinkle in her eye.

"Why?" asked George.

"Because he did not waste so much time with useless preliminaries, but started right out with 'Arms and the man I sing.'"

"The reason I am so miserable," remarked a Beautiful Heiress, "is just this, I am afraid some one will marry me for my money."

"The reason I am so miserable," remarked pretty Miss Poverty, "is just this, I am afraid no one will marry me because I haven't any money."

"The story that an old gentleman in Louisville rubbed his bald head with cod oil, and now, as a result, sports a luxuriant growth of hair, is evidently a deep-laid scheme to raise the price of petroleum."

ANOTHER p'aneloid has been discovered by a Smithsonian Institute professor. We won't take the trouble to tell what a p'aneloid is. Everybody knows. Like the shark, you can serve it with greens, or use it for striking a light.

A GEORGIA farmer who owns a melon-patch has fired his shot-gun forty-one times into the darkness thus far this season, and it has been answered only seven times by yells of: "Golly, mighty! but iz gwine to git outer dis!"

"VY, ADOLPH," says Mrs. Feldersterderberger, at Long Branch. "You had helped twice time to dot sherry pies, and you will be sick." "Nedder mind," says Mr. Feldersterderberger. "I bay four dollars mit a day, und Adolph is entitled to a whole pie, anyhow."

DREAM and dumb wive.—Morse, who invented the telegraph, and Bell, the inventor of the telephone, both had deaf-mute wives, which leads a wag to observe: "Just see what a man can do when everything is quiet."

A GENTLEMAN who lives near a certain "springs" was asked whether there were woodcock in that vicinity. "There ought to be plenty," said he. "For I never heard of anybody killing any."

THE Duke of Edinburgh tried to introduce the custom of men wearing bracelets on the left arm. The custom is followed to some extent in this country, but the jewelry is made of iron.

Belts are allowed to become covered with grease, dirt and renn, or to grow dry and hard, they cannot work air-tight on the pulleys. Very often no more than twenty-five per cent. of the available power is obtained because of these neglects. Many persons think they obtain more driving power by placing a tightener against the belt; but this gain is only the equivalent of the extra surface with which the belt is brought in contact by the tightener, and in the case of a horizontal belt this will be nearly lost by friction, though on an upright belt the tightener may be useful. There is economy in working with slack belts, keeping them clean and flexible. Hard-wood belts are best softened by a wash of lukewarm soda water and a thorough scraping and oiling.

NEW realize what an enormous amount of power is stored up in coal, and how little we really utilize it. Prof. Rogers has put it neatly thus: The dynamic value of one pound of good steam coal is equivalent to the work of a man a day, and three tons are equivalent to twenty years' hard work of 300 days to the year. The usual estimate of a four foot seam is that it will yield one ton of good coal for every square yard, or about 5,000 tons for each square acre. Each square mile will then contain 3,200,000 tons, which, in their total capacity for the production of power, are equal to the labor of over 1,000,000 able-bodied men for twenty years.
