A Wonderful Freak of Nature

is sometimes exhibited in our public exhibitions. When we gaze upon some of the peculiar freaks dame nature occasionally indulges in, our minds revert back to the creation of man. "who is so fearfully and wonderfully made." The mysteries of his nature have been unraveled by Dr. R. V. Pierce, of Buffalo, and through his knowledge of those mysteries he has been able to prepare his "Golden Medical Discovery," which is a specific for all blood taints, poisons and humors, such as scrofula, pimples, blotches, eruptions, swellings, tumors, ulcers and kindred affections. By druggists.

A word spoken in season at the right moment is the master of ages.

$500 Not Called For.

It seems strange that it is necessary to persuade men that you can cure their diseases by offering a premium to the man who fails to receive benefit. And yet Dr. Sage undoubtedly cured thousands of cases of obstinate catarrh with his "Catarrh Remedy," who would never have applied to him, if it had not been for his offer of the above sum for an incurable case. Who is the next bidder for cure or cash?

Associate with the wise, and their knowledge will cling to your skirts.

Every Woman in the Land

owes it to herself and her family to take care of her health. When she finds her health failing, and debility and weakness, undermines her strength, her surest and best remedy is Kidney-Wort. It builds up the general health, keeps the secretory system in perfect order, regulates the Kidneys and Bowels, and enables these important organs to perform their natural functions in throwing off the accumulated impurities of the body.

M. Seguin, of Paris, has patented the following process for increasing the power of resistance of iron to tension, tortion and transverse stress: The iron is dipped entirely or partly in sulphuric or hydrochloric acid, hot and diluted, or in a mixture of one part turpentine to five or six parts water. When the acid process is employed the metal is heated to a cherry red and dipped in a solution consisting of equal parts of sulphuric acid of 60° and water. When turpentine is used the solution must be continually agitated. By both methods the metal must be left in the solution until its temperature has become the same as that of the solution, and then it is at once dipped in hot water.

The new metallic compound now produced in England, known as Spence's metal, has been largely resorted to for making secure joints in water and gas-pipes—a kind of work for which it is thought, it may supersede lead on account of its being more readily applied, and of its property of expanding as it cools, enabling it to make a thoroughly tight junction without tamping. It is a peculiar kind of bronze obtained from the sulphides of various metals. It is very light, being of about one-third the specific gravity of lead; it melts at a low point, that is, at about 250° Fahrenheit; it flows freely, resists the action of water and acids, and is unaffected by atmospheric influences.

Attempts have been made in Lyons, France, to adapt the Bessemer process to the refining of copper ores by burning off the sulphur combined with the pyrites, but toward the end of the process the charge has cooled off too much. This obstacle has been overcome at Lyons by inserting a phosphor bronze which increases in temperature far beyond the copper, and at length arrives at a dazzling white heat. The phosphorus in burning disengages an enormous amount of heat, which liquefies the copper. The Bessemer operation in copper refining is simply to add a small quantity of phosphorus to the charge, and thus obtain after the combustion is all over, a cake of pure copper. A company has been formed in Lyons for the purpose of working the new process, and works have been laid down,

The Earth's Internal Heat.—Scientific men in Japan are now discussing the possibility of utilizing the internal heat of the earth. At a recent meeting of the Seismological Society read a paper in which he said that the fact that there was an unlimited supply of energy in the interior of the earth had been generally overlooked, although portions of it crop out in countries like Japan, Iceland and New-Zealand in the form of hot springs, solfatarss, volcanoes, etc. He stated that there is unlimited supply of water in hot springs within a radius of 160 miles around Tokio, and that the heat of these springs could be converted into an electric current and transmitted to the town.

A new motor driven by the explosion of small charges of gun cotton has been produced in England and is said to be applicable wherever small powers are required.

The Illustrated Railway World, referring to the production of steel rails in the United States, says that in 1874 we produced 38,250 tons of steel rails and imported 40,701 tons. In 1880 we produced 967,900 tons and imported 275,000 tons. Since the first steel rails were produced here in 1876 we have used 4,600,000 tons of them, at a cost of $184,000,000.

Could Find No Rest.

"I had acute kidney disease, bordering on Bright's disease and could find no rest day or night until I took HUNT'S [Kidney and Liver] REMEDY." Mrs. W. H. Stilson, Boston, Mass.

Many forms of kidney disease are very difficult to detect, and the symptoms are not of a marked nature. Statistics show that more than 50 per cent of the deaths arise from kidney disease, direct or incidental. HUNT'S [Kidney and Liver] REMEDY never fails to immediately relieve the worst cases.

SOUTH BOSTON, MASS., May 12, 1883.
"I was recommended to use HUNT'S [Kidney and Liver] REMEDY for general debility in my family. I find it just as recommended—a medicine of great value."—Geo. W. Scolon, Watchman, South Boston Car Stables.

Only Temperance Bitters Known.

VINEGAR BITTERS

No other medicine known so effectually purges the blood of deep-seated diseases.
Millions bear testimony to its wonderful curative effects.
It is a purely Vegetable Preparation made from the native herbs and roots of California, the medicinal properties of which are extracted therefrom without the use of Alcohol.
It removes the cause of disease, and the patient recovers his health.
It is the great Blood Purifier and Life-giving Principle; a Gentle Purgative and Tonic; a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to.
The Alterative, Aperient, Diaphoretic, Carminative, Nutritious, Laxative, Sedative, Counter-Irritant, Sudorific, Anti-Bilious, Solvent, Diuretic and Tonic properties of VINEGAR BITTERS exceed those of any other medicine in the world.
No person can take the BITTERS according to directions and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.
Bilious, Remittent, Intermittent and Malarial Fevers, are prevalent throughout the United States, particularly in the valleys of our great rivers and their vast tributaries during the Summer and Autumn, especially during seasons of unusual heat and dryness.
These Fevers are invariably accompanied by extensive derangements of the stomach, liver and bowels. In their treatment, a purgative, exerting a powerful influence upon these organs, is absolutely necessary.
There is no cathartic for the purpose equal to Dr. J. WALKER'S VINEGAR BITTERS, as it will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.
Fortify the body against disease by purifying all its fluids with VINEGAR BITTERS. No epidemic can take hold of a system thus forearmed.
It invigorates the Stomach and stimulates the torpid Liver and Bowels, which render it of unequaled efficiency in cleansing the blood of all impurities, imparting new life and vigor to the frame, and carrying off without the aid of Calomel, or other mineral medicine, every particle of poisonous matter from the system.
Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspepsia.
Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Goitre, Scrofulous or Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Diseases, WALKER'S VINEGAR BITTERS has shown their great curative powers in the most obstinate and intractable cases.
For Inflammatory and Chronic Rheumatism, Gout, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, the Bitters have no equal. Such Diseases are caused by Vitiated Blood.
Mechanical Diseases.—Persons engaged in Paints and Minerals, such as Plumbers, Typesetters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S VINEGAR BITTERS.
For Skin Diseases, Eruptions, Tetter, Salt Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-worms, Scald-head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations, Humors and diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of the Bitters.
Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuges, no anthelmintics, will free the system from worms like the Bitters.
For Female Complaints, in young or old, married or single, at the dawn of womanhood, or the turn of life, this Bitters has no equal.
Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
In conclusion: Give the Bitters a trial. It will speak for itself. One bottle is a better guarantee of its merits than a lengthy advertisement.
Around each bottle are full directions printed in different languages.

HUMOROUS.

PRESIDENT JEFFERSON—"You carried out those measures of economy I told you about?"

Head of Department—"Yes, sir. I sold all the cane seat chairs and got wooden ones, and I made the boy take back the new office broom my luxurious predecessor ordered and told him to do the sweeping with a shovel."

"That's right. Retrenchment is the order of the hour. But that, I hope, is not all."

"Oh, no. I discharged the woman who washed the office towels. We can shake them out and dry them in the sun."

"Ah! How easy it is to save the people's money when one is in earnest about it. How much have you saved thus far?"

"About $17.50."

"Good! Raise Mike Mulligan's salary to $3,000 a year."

FIRST PPILADELPHIA PHILANTHROPIST—"Is it true that you are to erect temperance fountains in the public squares?"

Second Philadelphia Philanthropist—"I was thinking of it."

"I should like to help you in that good work. Your intention was to have iron fountains, I believe."

"Yes."

"If there are two of us we can afford to have put up handsome ones. Now, why not marble fountains, with statues and——"

"Oh, it would not do at all."

"Why not, pray?"

"Schuylkill water would so discolor the marble that people would be afraid to drink it."

A YOUNG girl, who seems to know what she is talking about, objects to the criticisms which make it appear that those of her sex who are true and womanly are scarce; and she wishes to know whether it is necessary, when a young lady is receiving company in the the parlor, that she shall lug in beefsteaks, washtubs, scrubbing brushes and smoothing irons, in order to convince a lot of ninnies of young men that she can work in the kitchen.

AN EXILED Canadian incidentally strayed out of his room in a Western hotel and in a moment of abstraction fell down the ten-story elevator well. They got up what they could of him and laid it out on a sofa.

"Don't disturb me," the exiled Canadian faintly gasped, while an expression of great ecstasy played over his features. "Ah! I haven't felt anything like it since I used to ride a toboggan in my own dear native land."

A peaceful smile slid into his face and he was gone. He never came back. He couldn't.

"PAPA, why don't you put mamma in the fire and heat her?" asked a San Carlos street cherub.

"Why, what in the world put that in your head?" asked the father.

"Why, I heard you say that you would do anything to get rid of her temper, and if you heat things it will take the temper out of them."

THREE days after Mr. T's death, his old valet, who had served him for a great number of years, died also, and people are surprised at the strange coincidence. "His master must have rung for him," was the dangerous reply.

A GENTLEMAN on horseback, finding himself at a spot where four roads met, asked a countryman who was working on one of them, where it ran to. Clodpole, raising himself from his stooping posture, scratching his head, replied with a grin: "I doesn't know where it runs to zur, we find it here every morning."

VICE VERSA.—"You foolish boy," said a mother upon discovering some India-ink pictures on her son's arm, "don't you know that they will remain there as long as you live?" "And will I live as long as they remain there?" asked the boy.

A MAN OF KNOWLEDGE.—"I swow!" exclaimed a bucolic voter at the caucus, "it beats all what Squire Wirepuller knows! Durn if he didn't tell me fust minute I come into the hall jest who I wanted to vote for, and I didn't know myself, nuther, and my mind ain't more'n half made up yet."

SPORTING ITEM.—"What are you doing with that gun?" asked a man who saw an Irish boy in the suburbs of Austin. "I am gunning for doves." "How many have you killed?" "Not any, bejabbers. I want to kill three or four at one shot, and I can niver get more than one av them together."

DE BLANK—"No, I don't feel like doing anything more. Why can't you attend to it yourself?"

Mrs. De Blank—"Because I can't; that's why. You are——"

De Blank—"Remember, my dear, it is the female mosquito that stings"

Mrs. De Blank—"Yes, the males are too lazy."

NOT ALARMING.—"Yes," said Brown, "poor Johnsbury is sinking fast. His mind is fast leaving him." "Nothing very alarming, is it," remarked Fogg, "that a man should free his mind?"

FACT IN PHYSICS.—Soon after Sir Henry Rivers took orders he was told by a friend that he would undoubtedly become a bishop. Indeed," said Sir Henry, "why so?" "Because rivers invariably go to the seas."

DEFINITION.—"What does 'in memorism' mean, pa," asked Billy. "Oh," said pa, behind his newspaper, "it's nothing. It's something you write on the tombstone of a man you are going to forget in a week."

PLEASANT.—For a man to open his wife's jewel-box, and discover a strange gentleman's hair done up as a keepsake, and then to be told by his wife, in explanation, that "it is only the hair of poor Adolphus, whom pa wanted me to marry, before I saw you, the only man I could ever think of loving!"

When the vessel La Provence, which sank in the Bosphorus, was being raised, the telephone was added to the diver's equipment. One of the glasses of the hemlet was replaced by a copper plate in which a telephone was inserted so that the diver had only to turn his head slightly in order to receive his instructions and report what he had seen. The adoption of this means of communication in diving operations will, in case of danger or accident, tend to insure safety to lives that otherwise would have been sacrificed,

In determining the equivalent of carbon by the combustion of the diamond, Prof. H. E. Roscoe employed the same arrangements as M. Dumas and Stas, but substituted Cape for Brazilian gems. Cape diamonds do not contain a trace of hydrogen, though they leave a little ash. If oxygen is equal to 15.-96, carbon becomes 11.07 M. Dumas, while communicating the above results to the Academy of Sciences, Paris, remarked that if oxygen is represented by 16, carbon becomes 12.002, that is a whole number within a one two thousandth part.

OUR DRUGGIST

Says that when a customer asks for THE BEST Spring Medicine he confidently recommends

Ayer's Sarsaparilla.

From E. S. Russell, Druggist, Nashua, N. H.
I have been in the drug and prescription business in Nashua ever forty years, and am the oldest druggist here. I was the first to introduce your valuable medicines in this city. I believe in them. Ayer's Sarsaparilla I take pleasure in recommending to my customers, well knowing it to give satisfaction. In all my experience, as a druggist, I have yet to hear the first complaint against it.

From F. & E. Batley & Co., Lowell, Mass.
Having sold Ayer's Sarsaparilla since it was first placed upon the market, we can say, after an experience covering a quarter of a century, that we have yet to learn of a case where it has failed to give satisfaction. Its merits are fully established.

From C. Way & Co., Portland, Me.
We have used Ayer's Sarsaparilla for years, and our customers are much pleased with its effects. We believe it to be one of the best medicines in the market.
