

BROWN'S IRON BITTERS

THE BEST TONIC.

It is invaluable for Diseases peculiar to Women, and all who lead sedentary lives. It does not injure the teeth, cause headache, or produce constipation—other from medicines do. It enriches and purifies the blood, stimulates the appetite, aids the assimilation of food, relieves heartburn and belching, and strengthens the muscles and nerves.

For Intermittent Fevers, Lassitude, Lack of Energy, &c., it has no equal.

The genuine has above trade mark and crossed red lines on wrapper. Take no other.

Made only by BROWN'S CHEMICAL CO., BALTIMORE, MD.

Items of Interest.

Seven hundred and eighteen miles of underground wire have been laid by the Chicago authorities. To these, it is said, the Western Union Company will add 500 miles and the Baltimore and Ohio Company 250 miles.

The richest colored man in Philadelphia is John McKee, a real estate dealer, who is estimated to be worth between \$200,000 and \$800,000. There are two or three others in the same city whose fortunes run up into the hundred thousands.

One of the new laws of Nebraska prohibits the marriage of divorced persons within six months after the granting of the decree, in order to allow time to be given for setting aside said decree by proper legal proceedings.

Washington is likely to get mixed about names. There are Dean Manning of New York and Van Manning of Mississippi, Lamar of the latter State and Lamont of New York; Vielo (pronounced Vealy), a Representative from New York, and Vilas (pronounced Vil-as), the Postmaster-General.

One of the most remarkable facts brought out by the oceanic researches made by the British ship Challenger is the probability that all oceanic islands are of volcanic origin; in all the researches made no indications were found of submerged land over these areas.

A new alimentary substance, the seeds of the Bolivian cotton tree, has attracted the attention of the Academie des Sciences. It is rich in nitrogenized substances, and contains 23 per cent. of fibrin and 6 of casein. M. Sacc thought that flour from the seed would be very suitable for pastry and sweets. It is likely to be used in sugar making as a substitute for carbonic acid.

There is now living in Pickens county, Ga., a man who during the rebellion donned his wife's dress, kept his face closely shaved and wore a big sun bonnet, in order to avoid being conscripted and sent to the front. The officers in search of recruits frequently visited the house and asked his wife where her husband was, and at the very moment he could be seen working in the field in female garb. By the time he had worn out seven of his wife's dresses, he became tired of masquerading, enlisted and became a good soldier.

A Pittsburgh writer makes the assertion that in fifty years, or perhaps in half that time, coal will not be carried from the mines to its place of destination in bulk, but only its actual heat energy will be transported, and that by wire, a process which, he says, can be accomplished by converting the coal into heat, the heat into motion, and the motion into electricity; a storage battery at Cincinnati would take it up as fast as generated at the mines, and from this battery it could be taken and converted back into motion and heat, or changed into light.

A Mexican historian makes a new attempt to show that America was discovered in the fifth century, A. D., by a party of Buddhist monks from Afghanistan, of whom one, Hwui Shan, returned to Asia after an absence of forty-one years. A short account of the land which he visited, supposed to be Mexico, was included in the official history of China. There is proof that Hwui Shan actually visited some unknown Eastern region, and the traditions of Mexico contain an account of the arrival of monks.

A watchmaker in Milwaukee has trained a common canary bird to sing faultlessly. "We won't go home 'til morning." As soon as the bird was born his education began, and by hearing this tune played to him three or four times a day for eight months he acquired it perfectly; but there his acquirements end. He never heard another tune.

Whenever a member of a certain old Virginia family dies, the male representative of the older branch thereof, just before the hour for interment, buries a dagger into the heart of the dead to assure himself of no reawakening. The dagger used is one sacred to the purpose, and has been devoted to its use for many generations. The custom originated because of the burial alive of a member of the family and an inherited tendency to a peculiar form of heart disease.

Except for those who may have wealthy friends living in the interior in a favorable locality, Australia has been practically found to be not a suitable place for invalids. Any one who has made acquaintance with a bush hotel would be slow to recommend it as a residence, even to a man in health, and would certainly advise an invalid to avoid it. The most eminent physician in Melbourne has recently stated that out of hundreds with weak lungs who had consulted him during a period of twenty-five years, not one of those who remained or the coast had materially profited.

Talking piano is a Viennese invention, not long since exhibited. Many words which would be recognizable by the vowels they include even if their consonants were set aside were articulated with considerable distinctness, but the production of the consonants was a very different matter, and had not the operator announced what the machine was about to say it would often have been rather difficult to make out the meaning of the unearthly sounds it emitted. As an illustration of the process by which tone is formed and brought forth, the workings of the piano are not without interest; its usefulness in other directions cannot readily be divined.

We are sole agents for Centre county for Dr. D. Clain's corset, the best 50 cent corset in the world—Bee Hive.

CONSTIPATION!

There is no medium through which disease so often attacks the system as by Constipation, and there is no other ill flesh is heir to more apt to be neglected, from the fact material inconvenience may not be immediately felt from irregular action of the bowels. When there is not regular action the retention of decayed and effete matter, with its poisonous gases, soon poisons the whole system by being absorbed into it, causing piles, fistula, headache, impure blood and many other serious affections. **BURDOCK BLOOD BITTERS** will immediately relieve, and one bottle positively cure or relieve any case of Constipation.

"Was troubled for a year with torpid liver and indigestion, and after trying everything imaginable used **BURDOCK BLOOD BITTERS**. The first bottle revived me and the second cured me entirely."—J. S. Williamson, Rochester, N. Y.

HARDWARE

JAS. A. HARRIS & CO.

ARE SELLING—

REAPER SECTIONS AND REAPER SECTIONS AND REAPERS, REAPERS, RAKES, FORKS, SCYTHES, ROPE BLOCKS, SPROUTS HAY FORKS, &c.

AS WELL AS ALL KINDS OF HARDWARE, TO MEET THE DEMANDS IN THIS LINE.

DR. LINDSEY'S BLOOD

FOR THE SEARCHER CURE OF

ALL DISEASES ARISING FROM AN IMPURE STATE OF THE BLOOD. CURES ULCERS, ERISIPELAS, SCROFULA, DEBILITY, CUTANEOUS DISEASES, SORE EYES, PIMPLES ON THE FACE, SALT RHEUM, MERCURIAL DISEASES, AND ALL OTHERS OF THIS KIND. IT IS PURELY VEGETABLE PREPARATION, COMPOUNDED FROM THE FINEST ROOTS, HERBS AND LEAVES, WHICH NATURE HAS PROVIDED FOR THE CURE OF MAN. FOR SALE BY ALL DRUGGISTS, EVERYWHERE.

SELLERS' LIVER PILLS. CURE LIVER COMPLAINT, CONSTIPATION, SICK-HEADACHES, FEVER AND AGUE, AND ALL DISEASES OF THE STOMACH AND LIVER. SOLD BY ALL DRUGGISTS 25 CENTS PER BOX. R. E. SELLERS & CO. PROP'S. PITTSBURGH, PA.

GOOD NEWS TO LADIES.

Great inducements offered. Now's your time to get up orders for our celebrated **Gold Band** and **Gold Band** corsets. **THE GREAT AMERICAN** 25c. P. O. Box 255.

Crowl's Patent Iron Roofing

IS THE ONLY DOUBLE CAPPED CORRUGATED ROOFING, AND IS THE ONLY ONE PREPARED BY THE MANUFACTURERS READY FOR USE.

J. A. REESMAN, Centre Hall, Pa., Agent.

Millheim Planing Mill.

Furnishes and Keeps on Hand SASH, FLOORING OF ALL KINDS, SIDING, SHUTTERS, BLINDS, MOULDING OF ALL KINDS, STAIR-RAILING, &c., &c., &c.

Terms Reasonable, and all Orders Promptly attended to.

23 1/2ly ABRAHAM CONFER & SON

DOYLE AND HIS DRAGONS.

No living naturalist knows so much about dragons as Doyle. Next to fairies he has studied them more than any other province of animated nature. For the most part they have been hostile to man to the extent of habitually dining on human virgins, and many knights since St. George have sought to win fame and the favor of the rescued maidens by defying them to single combat. Our artist shows us not the combat itself, which has perhaps been so often treated by medieval painters as to be incapable of fresh presentation, but the preface and the last scene. Thus the historic dragon of Wantley, roused by the loud challenge of the champion who defies him from the summit of the rock, is issuing from his craggy lair with an aspect suggestive of irritated feeling and bad language, which reminds us of the felonious inmate of a London slum once visited by Dickens, who looked out of window, angrily demanding: "What the adjective substantive do you want here?" The end of the combat, under the title of "The Return of the Dragon-slayer," is a favorite subject with Doyle, who evidently commemorates several distinct events of this kind—for whereas in one the dragon slain is dragged by the tail, in others he is led in captivity by his conqueror (in one case with the knight's pocket handkerchief tied over the dragon's eye, injured in the conflict); and in a drawing which we remember as exhibited a few years ago, the reptile's longitude was such that, although he extended along an entire street, his tail was still round the corner. But in all cases the knight carnoles proudly through the town, amid the applause of the populace and the greetings of civic functionary, dame, and demoiseille—everybody admiring and congratulating, except another knight, who preserves a lofty and disdainful aspect, to show how lightly a warrior of his prowess esteems such feats.

THE CURIOSITIES OF BURNING.

There are many curiosities of burning, of extraordinary rapidity of combustion, which would be worth detailing if we had the space. Bad building is the cause of most, for bad building means rapid destruction by fire. The party wall in the majority of old houses built in a row, and in many new, does not reach to the roof, as it should, and the space between creates a channel—almost a blowpipe—for the spread of the fire to the next, which is very difficult to deal with. It is a danger provided against by legislation (for it is known that a 9-inch brick wall will resist fire as long as it stands), but often through carelessness it is overlooked. In France, under the Code Napoleon, the building of a proper party wall has always been very strictly enforced, and even in the terrible days of the Commune there was no instance of fire spreading from one house to the other. A building with a large frontage of windows—a large shop, for instance, with showrooms on each floor—is one of the most dangerous with which the brigade have to cope. The glass soon cracks and falls out, the air rushes in, and the whole soon becomes one vast blast furnace. Perhaps the most dangerous of all are those lofty establishments of flats, which very properly go by the name of the builder's or proprietor's folly. There is no one spot in them free from or unlikely to catch fire, for they are collections of private houses, as it were, and every part of a private house is equally vulnerable, and from their great height there are neither ladders long enough or water-jets powerful enough to reach the top stories.

ELECTRICITY APPLIED TO BIG GUNS.

The revolution which electricity is destined to make in modern warfare is as yet only in its infancy. The latest invention of Mr. Maxim is, however, an earnest of the things that yet shall be. The invention is an electrical training gear, so contrived that by the simple movement of the handle the heaviest gun may be turned by a single man, and with the greatest ease, in any direction. You pull a handle to the right, and the breach of the gun moves to the right; to the left, and it moves to the left. You raise the handle, and the gun is depressed at the muzzle; you depress the handle, and the gun is raised. This training gear was applied a day or two ago to one of the 35-ton guns at Garrison Point Fort, and the preliminary trial showed that one man could train the gun with the greatest nicety. One may expect Providence to be very much on the side of the big guns when a 35-ton gun comes to be aimed at quickly moving objects as easily as if it were a pistol or a walking stick.

AN IRON CUSTOM.

The man who holds the most important government office in China is not only excused for its neglect if he can show that he was engaged in some ceremonial connected with his ancestral duties, but should one of his parents die while he is in office, he is actually obliged to retire from public life for a period of many months, no matter how critical may be the public interests thus sacrificed to an iron custom.

In dress goods and silks we challenge comparison in styles and prices—Bee Hive.

Chronic Catarrh.

C. W. Miller, of 406 South Fourth street, St. Louis, is twenty years of age, and has been a sufferer from chronic catarrh, which had become quite offensive. While he came to Dr. Hartman, two months ago he was told it would take six months to cure him. But he has progressed beyond all expectations, and nearly all signs of the disease have disappeared. Before being treated he could not breathe out of the nose, and now he has perfect control of the nasal organ. PERUNA said the business.

James Lunn, of 1310 Gay street, St. Louis, suffered from catarrh since 1870. The gentleman told the reporter the following straightforward story of his case: "I took the disease in Memphis. It commenced in my head and extended to my throat, and a bad cough followed. I went to a number of physicians, and they told me my trouble was liver disease, and one said it was palpitation of the heart that caused the cough. For the first year I have been practically blind. The doctor then administered freely his case. 'I took the disease in Memphis. It commenced in my head and extended to my throat, and a bad cough followed. I went to a number of physicians, and they told me my trouble was liver disease, and one said it was palpitation of the heart that caused the cough. For the first year I have been practically blind. The doctor then administered freely his case. 'I took the disease in Memphis. It commenced in my head and extended to my throat, and a bad cough followed.
