# FOUR ACTS PLAYED!

Sad Report About Ex-President Arthur

WILL THE FIFTH AND FINAL ACT BE A TRAGEDY?

Rochester Democrat and Chronicle.

"Dr. Lincoln who was at the funer-' "al of ex-Secretary Frelinghuysen," "says ex-President Arthur looked very" "unwell. He is suffering from Bright's" "disease. During the past year it has" "assumed a very aggravated form."

That telegram is act IV. of a drama written by ex-President Arthur's phy-sicians. In Act I, he was made to appear in "Malaria," of which all the country was told when he went to Florida.

In Act II. he represented a tired man, worn down, walking the sands at Old Point Comfort and looking eastward over the Atlantic toward Europe for a longer rest.

The curtain rolls up for Act III. upon the distinguished actor affected with melancholy from Bright's disease, while Act IV. discovers him with the disease "in an aggravated form, suffering intensely, (which is unusual) and about to take a sea voyage."

Just such as this is the plot of many dramas by play-wrights of the medical profession. They write the first two or three acts with no conception of what their character will develop in the final

They have not the discernment for tracing in the early, what the latter im-personations will be. Not one physic-ian in a hundred has the adequate microscopic and chemical appliances for discovering bright's disease in its early stages, and when many do finally comprehend that their patients are dying with it, when death occurs, they will, to cover up their ignorance of it, pronounce the fatality to have been conscious victims.

Beyond any doubt, 80 per cent. of all deaths except from epidemics and accidents, result from diseased kidneys or livers. If the dying be distinguished and his friends too intelligent to be easily deceived, his physicians perhaps pronounce the complaint to be pericarditis, pyzemia, septicæmia, bronchitis, pleuritis, valvular lesions of the heart. pneumonia, etc. If the deceased be less noted, "malaria" is now the fashionable assignment of the cause of death.

But all the same, named right or wrong, this fearful scourge gathers them in 1 While it prevails among persons of sedentary habits, - lawyers, clergymen, congressmen, -- it also plays great havoe among farmers, day laborers and mechanics, though they do not suspect it, because their physicians keep it from them, if indeed they are able to detect it.

It sweeps thousands of women and shildren into untimely graves every year. The health gives way gradually, the strength is variable, the appetite fickle, the vigor gets less and less. This lsn't malaria-it is the beginning of kidney disease and will end-who does not know how?

No, nature has not been remiss. Independent research has given an infallible remedy for this common disorder;

The hand-carving of wood for house finish and interior decoration is becoming a distinct and permanent branch of industry. For fine furniture the carving of wood has for a long time had a place, but there appears to be a prospect that to the joiners's shop and work will be added those of the carver as a means of finishing interiors, Foreign

workmen at present comprise the larger part of the workers in this industry, but the attention of native workers has been directed to it, with the result of bringing it into general notice.

The cylindrograph is an instrument o' French invention for taking panoramic photographs in connection with military surveying and the like. It is very simple in construction. A semicircular cylinder having a small lens in the centre moves on an axis, and it is provided with a dark slide of some material which will bend without breaking. When the view is to be take then lens is moved from one side of the landscape to the other. Rapidity of execution, rather than artistic effect, is the object aimed at.

"An ideally pure water," said Pro-fessor Willis G. Tucker in an address before the Albany institute, "should be clear, colorless, tasteless and odorless. though little such exists in nature, and these properties are not necessarily proof of purity. Water may be clear as crystal and yet carry typhoid fever from

a hamlet on one side of a mountain to dwellers on the other side, as in the celebrated case at Lausanne, Switzerland."

French engineers, after long and repeated experiments in drying, painting, etc., inside and outside of boilers to prevent decadence when not in use, have decided as follows: "A steam boilcaused by ordinary ailments, whereas er which is about to be unused for a these ailments are really results of time should be throughly cleaned, and, Bright's disease of which they are un- instead of drying, should be filled quite full of water."

### "Love Sees No Faults,"

it has been said; but, when a woman is dragged down, emaciated, wan, and a shadow of her former self, with never a cheerful word, she can be no longer beauti-ful or lovable. Nature may have been generous in her gifts, and endowed her with all the charms of her sex, but disease has created in unpareness and stolen the roses from crept in unawares and stolen the roses from her cheeks, the lustre from her eye, and the sunshine from her heart. But to be well again lies in your own power. Take Dr. Pierce's "Favorite Prescription," it will cure you; thousands have been cured by it, Nothing equals it for all the painful maladies and weaknesses peculiar to women. Price reduced to one dollar. By druggists.

There is no duty that is not to be seasoned and set off with cheerfulness.

The great diaphoretic and anodyne, for colds, fevers and inflammatory attacks, is Dr. Pierce's Compound Extract of Smart-Weed; also, cures colic, cramps, cholera diarrhoa and dysentery, or bloodyflax. Only 50 cents.

# As every thread of gold is valued, so s every minute of time.

\* \* \* A disease of so delicate a na ture as stricture of the urethra should only be entrusted to those of large experience and skill. By our improved methods we have been enabled to speedily and perma-nently cure hundreds of the worst cases. Very gratefuly yours, JOHN BLACKBURN, MANCHESTER (Ing.) Dec. 24, 1883. Two years later am perfectly well.

to None genuine without a bunch of grees Hops on the white label. Shun all the vile, poisonous stuff with "Hop" or "Hops" in their name.

M. Follett, a Brooklyn mechanic, has invented a wonderful sewing machine, which, it is claimed, will do eighty per cent. more work than any machine now in the market. An experiment with steam power moved it with a speed of 2,200 stitches in a minute, and was started and stopped instantly. It is simple in construction, is easily opera-ted, and sews all kinds of fabrics, from leather to fine linen.

The largest deposits of salt on the Pacific coast are found in Nevada, according to the Scientific American, The most remarkable of these deposits is that on the Rio Virgen, a few miles north or the Colorado river, in the extreme southern corner of that State. A formation occurs at this point consisting of rock salt, resting on, and to some extent intermixed with, a sedimentary granite, and of such magnitude that it may be said to constitute a notable portion of the mountain itself.

It has been observed in Russia that extreme cold converts tin into a semicrystaline mass containing large cavities. In one instance the pipes of a church organ were so altered by cold as to be no longer sonorous.

THE PROPLES' VEGETABLE TONIC, VINEGAB BITTERS, is playing the mischief with the Devil's beverages, fired up with cheap rum. All the diseases which those demoniac nostrums aggravate under pretence of relieving, such as Indigestion, Sick Headache, Constipation, Rheumatism, Gout, Pulmonary affections, and Fevers, are cured by this Great Herbal Antidote.

Improvement in Chimneys .- The Only Temperance Bitters Kno best chimneys are made by inclosing hard baked glazed pipes in a thin wall of bricks. Such chimneys will not only draw better than those made in the usual way, but there will be less danger from defective flues. A four inch brick wall between us and destruction by fire is a frail barrier, especially if the work is carelxssly done, or the mortar has crumbled from the joints. To build the chimneys with double, or eight inch walls, makes them very large, more expensive, and still not as good as when they contain the smooth round flues. To leave an air chamber between them for ventilating is better than to open directly into the smoke flue, because it will not impair the draught for the fire, and there will be no danger of a sooty odor in the room when the circulation happens to be downward, as it will occasionally. The outside chimney, if there is one, should have an ex tra air chamber between the very outer wall and the back of the fire-place to save heat, a precautton, that removes to a great extent, the common objection to such chimneys. A very large per cent. of fires come from defective flues.

A project is on foot for establishing a pneumatic tube between Brussels and Paris. The time letters and cards will take in transmission by this method is estimated at half an hour. It is also proposed to make parallel tubes connecting London and the French capital, the time of transmission in this case being a full hour, and the total cost to get them into working order is set down as under 5,000 pounds sterling. If these tubes act without getting clogged the telegraph revenue may expect to fall off, and the policy of running new lines in the metropolitan district on account of the new sixpenny messages will be questioned.

Our greatest glory is not in never falling, but in rising every time we fall,

# Rheumatism

We doubt if there is, or can be, a specific remedy for rheumatism; but thousands who have suffered its pains have been greatly benefited by Hood's Sarsaparilla. If you have failed to find relief, try this great remedy.

"I was afflicted with rheumatism twenty years. Previous to 1883 I found no relief, but grew worse, and at one time was almost helpless. Hood's Sarsaparilla did me more good than all the other medicine I ever had."

H. T. BALCOM, Shirley Village, Mass. "I had rheumatism three years, and got no relief till I took Hood's Sarsaparilla. It has done great things for me. I recommend it to others." LEWIS BURBANE, Biddeford, Me. Hood's Sarsaparilla is characterized by three peculiarities : 1st, the combination of remedial agents; 2d, the proportion; 3d, the process of securing the active medicinal qualities. The result is a medicine of unusual strength, effecting cures hitherto unknown. Bend for book containing additional evidence.

"Hood's Sarsaparilla tones up my system, purifies my blood, sharpens my appetite, and seems to make me over." J. P. Thompson, Register of Deeds, Lowell, Mass.

"Hood's Barsaparilla beats all others, and worth its weight in gold." I. BARRINGTON, is worth its weight in gold." I. B 130 Bank Street, New York City.

No other medicine known so effectually Millions bear testimony to its wonder-

Millions bear testimony to its women's ful curative effects. It is a purely Vegetable Preparation, made from the native herbs and roots of Califor-nia, the medicinal properties of which are ex-tracted therefrom without the use of Alcohol. It removes the cause of discuss, and the patient recovers his health. It is the great Blood Purifier and Life-riving Principle : a Gentle Purgative and Tonic;

It is the great Blood Puriler and Life-giving Principle; a Gentle Purgative and Tosic; a perfect Renovator and Invigorator of the sys-tem. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in local-ing the sick of every disease man is beir to. The Alterative, Aperient, Disphoretic, Carminative, Nutritions, Laxative, Sedative, Counter-Irritant, Sudorfic, Anti-Billous, Solvest, Diuretic and Tonic properties of VINEGAR BIT-TERS exceed those of any other medicines in the world.

These versions and dry other medicine in the world.
No person can take the Birrrass according to directions and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.
Billious, Remittent, Intermittent and Maiarial Fevers, are prevalent throughout the united States, particularly in the valleys of our great rivers and their vasit tributaries during the Summer and Autumn, especially during sensons of unusual heat and dryness.
These Vevers are invariably accompanied by extensive derangements of the stomach, liver and bowels. In their treatment, a purgative, exactly a powerful influence upon these organs, is aboutely necessary.

erting a powerful influence upon these organs, is absolutely necessary. There is no cathartic for the purpose equal to Dr. J. WALKER'S VINGGAR ENTRES, as is will speedily remove the dark-colored viscid matter with which the bowcle are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestire organs. **Fortify the body** argainst disease by purf-fying all its fluids with VINEGAR BUTTERS. No epidemic can take hold of a system thus fore-armed.

epidemic can take hold of a system thus fore-armed. It furvigorates the Stomach and stimu-late the torpid Liver and Bowsis, which reader it of unequaled efficiency in cleansing the blood of all impurities, imparting new life and vigor to the frame, and carrying off without the aid of closed poisonous matter from the system. TypePersia or Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Mouth, Billous Attacks, Paipitation of the Heart infammation of the Lungs, Pain in the region of the Kineys, and a hundred other painful symp-toms, are the offsprings of Dyspepsia. case disappeared. There have been no signs of urn, and the horse has done a mule's work on m m ever since. Jan L. FLEMING, Augusta, G

but of course the bigoted physicians will not use Warner's safe cure, because it is a private affair and cuts up their practice by restoring the health of those who have been invalids for years.

The new saying of "how common Bright's disease is becoming among prominent men !" is getting old, and as the Englishman would say, sounds "stupid" — especially "stupid" since this disease is readily detected by the more learned men and specialists of this disease. But the "common run" of physicians, not detecting it, give the patient Epsom salts or other drugs prescribed by the old code of treatment under which their grandfathers and great-grandfathers practiced !

Anon, we hear that the patient is "comfortable." But ere long, maybe, they "tap" him and take some water from him and again the "comfortable" story is told. Torture him rather than allow him to use Warner's safe cure ! With such variations the doctors play apon the unfortunate until his shrou is made, when we learn that he died from heart disease, pysemia, septicsemia or some other deceptive though "dignified cause."

Ex President Arthur's case is not singular—it is typical of every such case. "He is suffering intensely." This is not usual. Generally there is almost no suffering. He may recover, if he will act independently of his physicians. The agency named has cured thousands of persons even in the extreme stagesis to day the mainstay of the health of hundreds of thousands. It is an unfor-tunate fact that physicians will not admit there is any virtue outside their own aphere, but as each school denies virtue to all others, the people act on their own judgment and accept things by the record of merit they make.

The facts are cause for alarm, but there is abundant hope in prompt and independent action.

A LADY IN waiting on a queen never receives less than \$50 per week, and in some cases \$75 is the figure. They have to work more hours than the girl who runs the typewriter, but they have more cash to spend on false hair.

CONSIDERING all the countless charms and accomplishments with which Providence has endowed lovely woman it does sometime seem strange that He didn't bestow on her the faculty of doing up a bundle decently.

TEACHER-Johnnie, how many times will nine go in twelve?"

Johnnie-"Once."

Farm to The Far Far

Teacher-"And how many over?" Johnnie-"Three. Two change pitchers and a change catcher.

CECESUS BUCKWORTHY, Sr. (to Ruskin de Vere, art critic)-"Now, that's what I call a fine picture; shows remarkable talent. My daughter painted that, sir, and I wouldn't take \$200 for it. Why, the paint alone cost \$150."

A wRITER asks: "Why does the modern woman tire so easily?" It is probably because the modern man imposes upon her more labor than he per-mits his horse to perform,

it is infirmity of will. "The Best is the Cheapest."

This is an old adage and the essence of wisdom. The best medicine, and the only sure cure for diseases of the liver, kidneys and bladder is the old and reliable HUNT'S [Kidney and Liver] REMEDY. Physicians endorse it highly and prescribe it in their practice.

"I have been dreadfully tronbled with diseases of the kidneys and liver during the past six months. HUNT'S [Kidney and Liver] REMEDY has made me a new man" Isaac W. Fairbrother, Providence, R. L.

One reason why diseases of the bladder and urinary organs are so difficult to cure is that they frequently have no pronounced symptoms. HUNT'S [Kidney and Liver] REMEDY is peculiarly adapted to the cure of these complaints, and goes at once to the wat of the trouble gring relief at once. seat of the trouble giving relief at once.

For Dyspersia, indication, depression of spir-its and general debility, in their various forms; also as a preventive against fever and ague and other intermittent fevers, the "Ferro-Phosphorated-Elixir of Calisaya"made by Caswell, Hazard & Co., New York, and sold by all Druggists, is the best tonic; and for patients recovering from fever or other sickness, it has no equal.

Do you want to grow salt, and at the ame time have an interesting, hand-ome ornament? The proceeding is a novel chemical experiment that may be tried by anyone. Put in a goblet one tablespoonful of salt and one spoonful of blueing. Fill the goblet two-thirds full of water, and set in a position where it will have plenty of warmth and sun-light. In a little while sparkling crystals will commence forming outside of the glass, and it is both a novel and the glass, and it is both a novel and interesting sight to watch it gradually growing, day by day, until the outside of the goblet is entrely covered with beautiful white crystals. Another vari-ation of this beautiful experiment would be to take a goblet with the base broken off and faster it is the control of the be to take a goblet with the base broken off, and fasten it in the centre of a thin piece of board, which may be round, square or oblong. After the crystals have formed on the glass, set it on a tiny wall bracket and place a bright holiday or birthday eard in front of it; this will hide the base, on which no crystals will form. After this is done fill the goblet with flowers or dried grasses, and you will have a vase which will cost comparatively little.

The magnitude of the slate industry in this country can be imagined when it is stated that the total amount produced of roofing slate alone is 500,000 squares per year. A "square" is about 100 square feet, or sufficient to cover a space 10x10 feet when laid on the roof. It covers the same area as 1,000 shin-
