## LIKE HIS FATHER,

### He Was Afflicted With Stone in the Bladder.

Mr. S. W. Hicks, of Pleasant Valley, Duchess county, N. Y., the son of Mr. E. S. Hicks, whose name may have appeared in this journal in connection with an article similar to this, was, like his father, afflicted with Stone in the Bladder, only that his case was more serious than his father's. The father advised the son to write to Dr. David Kennedy, of Rondout, N. Y., who, he said, would tell him what to do. Dr. Kennedy replied, suggesting the use of KENNEDY'S FAVORITE REMEDY, which had worked so successful in the father's case. Mr. Hicks, who had been assured by the local physicians that they could do nothing more for him, tried "Favorite Remedy." After two week's use of it he passed a stone ¾ of an inch long and of the thickness of a pipe stem. Since then he has had no symptoms of a return of the trouble. Here is a sick man healed. What better results could have been expected? What greater benefit could medical science confer? The end was gained; that is surely enough. Dr. Kennedy assures the public, by a reputation which he cannot afford to impair, that the FAVORITE REMEDY does invigorate the blood, cures liver, kidney and bladder complaints, as well as those diseases and weaknesses peculiar to females.

Thousands of grateful people voluntarily testify in letters to Dr. Kennedy, with a warmth and fullness of words which mere business documents and certificates never possess, what "Favorite Remedy," the great specific for blood, liver and kidney disorders, has done for them and their friends.

# SCROFULA

**Usually develops in early life, and is a peculiar morbid condition of the system, usually affecting the glands, often resulting in swellings, enlarged joints, abscesses, thickening of the lips, enlarged neck, sore eyes. A scrofulous condition is often hereditary, but bad diet, too free use of fat meats, bad air, want of sunshine and nourishing food will induce it. Some people are troubled with scrofulous swelling of the glands, and with ulcers and kernels, which may cause very little pain; others may have inward scrofula, scrofula of the lungs, scrofula of the spleen, scrofula of the kidneys, and scrofula of the bones. BURDOCK BLOOD BITTERS will drive away any case of scrofula and not to appear in another place, for their action on the blood and bowels will carry the disease entirely from the body.**

## RHUBARB CULTURE.

Rhubarb, like our currant bushes, will grow almost anywhere and under any treatment, and consequently receives more ill-usage than any other "green thing growing." But for this reason it should not be supposed that when growing under neglect and abuse it will do its best and produce as abundant crops and of equally good quality as when good treatment is given. After it is once planted rhubarb requires little cultivation, but it must have at all times, deep, rich soil, the richer the better. In field culture the roots are planted about four feet apart each way, and cultivated like any hoed crop. In the family garden they should be planted two or three feet apart, in a single row, at least four feet distant from other plants.

It may be raised from seed, but as there is little reliance in the seedlings being of the same variety as the parent plants, division of the roots is the method of propagation usually adopted. Any piece of root with a bud or crown will grow if planted about two inches deep in mellow soil firmly pressed around it. Roots may be planted in autumn or early spring. Plantations are usually renewed every four or five years, yet when a liberal dressing of manure is given every fall the roots will produce a crop for an almost indefinite period. Heavy manuring, clean cultivation, and liberal space are the essential requisites for raising large, succulent rhubarb. The varieties best known are the Linnæus, grown extensively for market as well as home use. It is early, very productive, and of a brisk, spicy flavor. Its principal fault is that it seeds so freely that unless all flower stalks are cut off as soon as they appear the crop deteriorates rapidly. Victoria is later, has large leaves and stalks, and requires a rich, rather heavy ground for its best development. Paragon is a new variety originated in England, and now introduced here. The stalks are bright red, heavy, and produced in quick succession and great abundance. It is earlier, of more delicate flavor, and decidedly less acid than any other variety we are acquainted with. But its most remarkable and most valuable qualification is that it does not produce flower stalks, to which fact its great productiveness is mainly attributable, all the strength of the plant being used for the development of its leaves.

## A SALESMAN'S OPINION.

"We sell lots of pocket-mirrors to men. No matter how they look—they want a pocket-mirror all the same. They retire every hour or so to some secret place to admire themselves. Talk of the vanity of women, indeed! It pales, sir; it fades away into insignificance by comparison with the admiration the majority of men have for their own mugs. Why, there are some half-a-dozen who, entertaining a great respect for my critical judgment of physical beauty, step in here every day to inquire how they are looking. Then it is, 'Am I pale to-day, Jim?' or 'Do you think my color is too high, Jim?' or, 'That left eyebrow is growing a trifle heavy; don't you think I'd better have it trimmed off a bit?' If I say, 'Your color is too high,' my friend is off to the barber's for a dab of powder, or—but this is a dead secret—we accommodate him in this shop. If he is too pale we tinge him up. It's wonderful, positively wonderful, sir!" "But there are different degrees of vanity among these male beauties, are there not?" "No, sir; there is but one degree, and that is the superlative, but there are different degrees of candor. Some are modest, and will declare that their mustaches or beard are always getting tangled. Now, there's a good-looking blonde railroad agent on —— street, who bought a small mirror from me the other day, which he keeps in his breast pocket. He is a glutton about his personal beauty, he is; but a real estate man, a fair, stout young person, whose office is near him, has found out that he has this glass, and begs the loan of it a dozen times a day. The percentage of those who carry pocket-mirrors is small among ladies, but eight out of every dozen men have one in the vest-pocket."

## TO CLEAN PIANO KEYS.

When the white pianoforte keys become discolored we should remove the front fall and slip of wood just over them; then lift up each key separately from the front—do not take them out—and rub the keys with a white cloth slightly damped with cold water, and dry off with a cloth slightly warm. Should the keys be sticky, first damp the cloth with a little spirits of wine or gin. Soap or washing powder should not be used. It is worth while keeping a supply of ammonia in the household in case we wish to remove finger marks from paint or require to cleanse brushes or greasy pans. A teaspoonful in a basin of warm water will make hair-brushes beautifully white; but care must be taken not to let the backs of the brushes dip below the surface. Rinse them with clean warm water and put in a sunny window to dry.

Inviolable fidelity, good humor and complacency of temper, outlive all the charms of a fine face, and make the decay of it invisible.

Fall styles of hats and caps just received at the Bee Hive.

## THE ORIGIN OF SALT.

This world was once a haze of fluid light, as the poets and the men of science agree in informing us. As soon as it began to cool down a little the heavier materials naturally sank toward the centre, while the lighter, now represented by the ocean and the atmosphere, floated in a gaseous condition on the outside. But the great envelope of vapor thus produced did not consist merely of the constituents of air and water; many other gases and vapors mingled with them, as they still do to a far less extent in our existing atmosphere. By and by, as the cooling and condensing process continued, the water settled down from the condition of steam into one of a liquid at a dull red heat. As it condensed it carried down with it a great many other substances, held in solution, whose component elements had previously existed in the primitive gaseous atmosphere. Thus the early ocean which covered the whole earth was in all probability not only very salt, but also quite thick with other mineral matters close up to the point of saturation. It was full of lime and raw flint, and sulphates and many other miscellaneous bodies. Moreover, it was not only just as salt as at the present day, but even a great deal salter. For from that time to this, evaporation has constantly been going on in certain shallow isolated areas, laying down great beds of gypsum and then of salt, which still remain in the solid condition, while the water has, of course, been correspondingly purified. The same thing has likewise happened in a slightly different way with lime and flint, which have been separated from the water chiefly by living animals, and afterward deposited on the bottom of the ocean in immense layers as limestone, chalk, sandstone and clay. Thus it turns out that in the end all our sources of salt supply are alike ultimately derived from the briny ocean. Whether we dig it out as solid rock salt from the open quarries of the Punjab, or pump it up from brine wells sunk into the triassic rocks of Cheshire, or evaporate it direct in the salt pans of England and the shallow salines of the Mediterannean shore, it is still at bottom essentially sea salt. However distant the connection may seem, our salt is always in the last resort obtained from the material held in solution in some ancient or modern sea. Even the saline springs of Canada and the Northern States of America, where the wapiti love to congregate, and the noble hunter lurks in the thicket to murder them unperceived, derive their saltness, as an able Canadian geologist has shown, from the thinly scattered salts still retained among the sediments of that very archaic sea whose precipitates form the earliest known life-bearing rocks. To the Homeric Greek, as to Mr. Dick Swiveller, the ocean was always the briny; to modern science, on the other hand, (which neither of those worthies would probably have appreciated at its own valuation,) the briny is always the oceanic. The fossil food which we find to-day on all our dinner tables dates back its origin primarily to the first seas that ever covered the surface of our planet, and secondarily to the great rock deposits of the dried up triassic inland sea. And yet even our men of science habitually describe that ancient mineral as common salt.

## TEA AS PREPARED IN THE EAST.

The Hunnias (Himalayan natives) drink tea which comes from China in small packets, made up of the large leaves, small branches, seeds, etc., forming a mass reduced to the smallest possible size by pressure and rendered sometimes still more compact by a slight addition of sheep's blood. The Hunnias travel great distances, living only on tea and what the Hindoos call suttoo, that is, flour made from roasted beans or peas. To prepare the tea they boil the leaves for some hours—all night, in fact, if they are in camp—in a small earthen pot; then they pour out the infusion into a large basin full of hot water, adding some salt and clarified butter, (ghee) if they happen to have it. All these naturally make a kind of soup, and the native can live on it several months and undergo severe fatigue without taking any other nourishment. "The method adopted by the Mongols and other Tartar tribes for the preparation of tea in bricks is," says Johnston in his "Chemistry of Common Life," "it is believed, that which extracts from the leaves the greatest possible amount of nourishment. They scrape the tea into fine powder and boil it in the alkaline water of the steppes, adding some fat and salt, after which they pour off the liquid, leaving the deposit. They drink twenty, even forty glasses of this liquor in the day, mixing in it some honey and butter with a little roast meat; but with only a little milk instead of the meat they can subsist many weeks with this drink for sole sustenance."

## A LARGE ORCHARD.

An orchard of cocoanut trees on the ocean front of Southern Florida has cost Ezra A. Osborn, a rich Jerseyman, not less than $100,000. The orchard stretches for sixty miles along the sea, and there are in it two hundred thousand thriving trees. These trees were brought in vessels from South America, and landed by means of surf boats built for the purpose.

Shelled corn and other coarse grain wanted at the Centre Hall roller mill.

### A Queen's Opinion.

J. M. Queen writes from Johnston, W. Va., that he has been sorely afflicted for several years, but he was urged to try PERUNA, which he did, and he now feels that he is about over his trouble, and considers it the greatest medicine in the world. He says he has to go or send a distance of fifteen miles to obtain PERUNA, but it will repay him for this.

Ellwood Shallcross, former editor of the Saturday Journal, Wheeling, W. Va., says: "*Gentlemen:* Some time ago I was afflicted with a pain in my back in the region of the kidneys, and suffered considerably. Having read your advertisement, I went to Logan & Co., of this city, and purchased a bottle of PERUNA, which I took, and it resulted in the complete removal of the pain. I think I can safely recommend it as a superior panacea for pains."

Mr. Aaron Shreffler, Alma, Marion county, Ill., writes: "DR. S. B. HARTMAN & Co., Columbus, O. *Dear Sirs:* Myself and wife have taken three bottles of your medicines and received much benefit by the use of them. My wife was troubled with neuralgia, headache and weak stomach. Her headache has not troubled her for the last two weeks, and her stomach is much better. She took only PERUNA. I used both medicines, and my general health is so much improved that I feel like a new man. My stomach is very much better, and the MANALIN keeps my bowels all right. We intend to keep taking the medicines until we are permanently cured."

Evans T. Jones, Prospect, Marion Co., O., says: "After having taken medicine from different physicians of this place without any relief, I was induced to try your PERUNA, which I purchased of Cook Bros., druggists, of this place, and after using some six bottles of the same, I feel very much benefited. Am sure it will finally work an entire cure."

T. J. Ewing, Cattletsburg, Ky., writes: "In the early part of last winter I contracted a severe cold, attended with a bad cough; then, being exposed during late flood, added to my disability. I have taken your PERUNA with good results. My cough has entirely left, soreness is gone, and am increasing in flesh.

Thomas Bradford, 314 Western Avenue, Allegheny City, Pa., writes: "I have had liver complaint for three years; I thought I would have to quit work; I have taken two bottles of your PERUNA, and am well."

S. Wolf & Son, Wilmot, Ohio, write: "We handle your goods, and they give good satisfaction."

TRADE MARK.

**KELLER'S CATARRH REMEDY,**

THE GREAT

**Blood Purifier of the World.**

AN ABSOLUTE CURE FOR

**CATARRH.**

THE most stubborn cases yield readily to it and has not failed to Cure a single case where directions are followed. Its success has been remarkable and its cures wonderful. It is the most successful preparation in the market for CATARRH and the only one that promises an **Absolute, Positive Cure.** It is truly a blessing to mankind. **A Trial is all that is asked for it.** Once used, it is always recommended. Send for testimonials of actual cures.

IT HAS NO EQUAL FOR

**MALARIA.**

*A POSITIVE CURE IS ASSURED.*

One bottle is generally sufficient for a cure. Stop taking Quinine. A trial only is asked for KELLER'S CATARRH REMEDY. It is a **SPECIFIC** for all diseases arising from an impure blood and drives all eruptions from the skin. For Syphilitic complaints it is superior to any preparation in the market. One bottle will cure most of the following complaints and a continued use will POSITIVELY cure. Save doctor bills and try it.

RHEUMATISM.
SCROFULA.
SKIN ERUPTIONS.
VENEREAL DISEASES.
DYSPEPSIA.
LOSS OF APPETITE.
FEELING OF LANGOUR.
BILIOUSNESS.
LIVER TROUBLES.
NERVOUS WEAKNESS.
FEMALE WEAKNESS.

KELLER'S CATARRH REMEDY is no patent medicine, but a safe and pleasant preparation to take and surely the greatest medical discovery of the age. One bottle rejuvenates the entire system and possesses more virtue than a half dozen bottles of ordinary patent preparations. Write for testimonials and other information.

For sale by druggists generally.

**PRICE $1.00 A BOTTLE. SIX BOTTLES FOR $5.00.** On receipt of **$5.00** by the manufacturers, SAMUEL F. KELLER & Co., Harrisburg, Pa., six bottles will be sent express paid.

TRADE MARK.

**Surface Indications**

What a miner would very properly term "surface indications" of what is beneath, are the Pimples, Sties, Sore Eyes, Boils, and Cutaneous Eruptions with which people are annoyed in spring and early summer. The effete matter accumulated during the winter months, now makes its presence felt, through Nature's endeavors to expel it from the system. While it remains, it is a poison that festers in the blood and may develop into **Scrofula.** This condition causes derangement of the digestive and assimilatory organs, with a feeling of enervation, languor, and weariness—often lightly spoken of as "only spring fever." These are evidences that Nature is not able, unaided to throw off the corrupt atoms which weaken the vital forces. To regain health, Nature must be aided by a thorough blood-purifying medicine; and nothing else is so effective as

***Ayer's Sarsaparilla,***

which is sufficiently powerful to expel from the system even the taint of **Hereditary Scrofula.**

The medical profession indorse AYER'S SARSAPARILLA, and many attestations of the cures effected by it come from all parts of the world. It is, in the language of the Hon. Francis Jewett, ex-State Senator of Massachusetts and ex-Mayor of Lowell, "the only preparation that does real, lasting good."

PREPARED BY

*Dr. J. C. Ayer & Co., Lowell, Mass.*

Sold by all Druggists: Price $1; Six bottles for $5.

**EMPLOYMENT.**

We will furnish permanent and profitable employment to honest, energetic men, 25 years and over, as traveling salesmen. Salary and expenses paid. Stock guaranteed first class. Address (with stamp.) P. N. NICHOLAS & CO., Nurserymen, [30s3] Geneva, N. Y.

# HARDWARE — STOVES.

In addition to our extensive stock of FARMERS, BUILDERS & BLACKSMITH supplies, we would call your attention to our stock

**Heating Stoves, Cooks & Ranges,**

We would especially suggest in Heating Stoves the
CROWNING GLORY,
FORT ORANGE,
EASTLAKE AND
WELCOME HOME.
In Cooks the REGULATOR PIONEER

A full assortment of Fire Brick and Grates on hand.
WILSON, McFARLANE & CO

**TUTT'S PILLS**

**25 YEARS IN USE.**

The Greatest Medical Triumph of the Age!

SYMPTOMS OF A
**TORPID LIVER.**

**Loss of appetite, Bowels costive, Pain in the head, with a dull sensation in the back part, Pain under the shoulder-blade, Fullness after eating, with a disinclination to exertion of body or mind, Irritability of temper, Low spirits, with a feeling of having neglected some duty, Weariness, Dizziness, Fluttering at the Heart, Dots before the eyes, Headache over the right eye, Restlessness, with fitful dreams, Highly colored Urine, and**

**CONSTIPATION.**

**TUTT'S PILLS** are especially adapted to such cases, one dose effects such a change of feeling as to astonish the sufferer.

They **Increase the Appetite,** and cause the body to **Take on Flesh,** thus the system is **nourished,** and by their **Tonic Action** on the **Digestive Organs, Regular Stools** are produced. Price 25c. 44 Murray St., N.Y.

**TUTT'S HAIR DYE.**

GRAY HAIR OR WHISKERS changed to a GLOSSY BLACK by a single application of this DYE. It imparts a natural color, acts instantaneously. Sold by Druggists, or sent by express on receipt of $1.

**Office, 44 Murray St., New York.**

A LECTURE TO YOUNG MEN ON THE LOSS OF

**MANHOOD**

A Lecture on the Nature, Treatment and Radical Cure Seminal Weakness, of Spermatorrhœa, induced by Self Abuse, Involuntary Emissions, Impotency, Nervous Debility, and Impediments to Marriage generally; Consumption, Epilepsy and Fits; Mental and Physical Incapacity, etc., by ROBERT J. CULVERWELL, M. D.

The world-renowned author in this admirable lecture clearly proves from his own experience that the awful consequences of self-Abuse may be effectually removed without dangerous surgical operations, bougies, instruments, rings or cordials; pointing out a mode of cure at once certain and effectual, by which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

This lecture will prove a boon to thousands and thousands.

Sent under seal, in a plain envelope, to any address, post paid, on receipt of four cents or two postage stamps. Address,

THE CULVERWELL MEDICAL CO.,
41 Ann St., New York, N. Y., Post Office Box 450.

PENNSYLVANIA
STATE COLLEGE.
Next Term begins September 9, 1885.

This institution is located in one of the most beautiful and healthy spots of the entire Allegheny region. It is open to both sexes, and offers the following Courses of Study:

1 A Full Scientific Course of Four Years.
2 A Full Latin Scientific Course.
3 The following ADVANCED COURSES, of two years each, following the first two years of the General Scientific Course (a) AGRICULTURE; (b) NATURAL HISTORY; (c) CHEMISTRY AND PHYSICS; (d) CIVIL ENGINEERING.
4 A short SPECIAL COURSE IN AGRICULTURE.
5 A short SPECIAL COURSE in Chemistry.
6 A reorganized course in MECHANIC ARTS, combining shop-work with study.
7 A new Special Course (two years) in Literature and Science, for Young Ladies.
8 A carefully graded Preparatory Course.
9 SPECIAL COURSES are arranged to meet the wants of individual students.

Military drill is required. Expenses for board and incidentals very low. Tuition free. Young ladies under charge of competent lady Principal. For Catalogues, or other information, address
