LONG SUFFERING

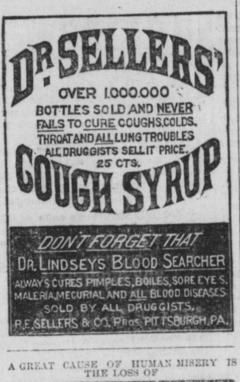

From Stone in the Bladder.

It is by no means strange that Dr. David Kennedy, of Rondout, N. Y., should have received the following letter. By reading it you will see in one minute why James Andrews was thankful :

one minute why James Andrews was thankful: Dr. D. Kennedy, Rondout, N. Y. Dear Sir-Until within a recent date, I had for several years suffered greatly from Gravel, called by doctors the Brick dust Sediment. For about a year past this sediment has not passed off in the usual quantity, but has accumulated, causing me untold pain. Having heard of Dr. David Kenne-dy's EAVORITE REMEDY I tried it, and after using about one and one-haif bottles I voided a stone from the bladder, of an oval shapa, 7-16 of an inch long, and rough on its surface. I send you the largest piece, that you may see of what it is composed. Since then I have felt no pain. I now consider myself cured, and cannot express my thankfulness and gratitude for so signal a de-liverance from a terrible disease. You have my consent to use this letter, should you wish to do so, for the benefit of other sufferers. Yours truly, IAMES ANDREWS, No. 10 Marshal St., Ida Hill, Troy, N. Y. Dr. Kennedy's "Favorite Remedy" is especially

Dr. Kennedy's "Favorite Remedy" is especially offered as a trustworthy specific for the cure of kidney and liver complaints, constipation and all disorders arising from an impure state of blood.

To women who suffer from any of the ills peculiar to their sex "Favorite Remedy" is constantly proving itself an unfailing friend-a real blessing. There is no more agonizing class of disease, and none more certain "not to get well of itself" than the disorders of the kidney and bladder. The only medicine that affords speedy relief, and permanent cure of such affections is Dr. David K sunedy's "Favorite Remedy," of Rondout, N. Y.

ANHOOD A Lecture on the Nature, Treatment and Radical Onre Seminal Weakness of Spermitorrhoes, in-fuced by Self Abuse, Involuntary Emissions, Impo-tency, Nerrons Debility, and Impediments to Mar-iare generally; Consumption, Epilepsy and Fits;

tency, Nervons Debility, and Impediments to Mar-riare generally; Consumption, Epilepsy and Fits; Menai and Physical measacity, etc., by ROBERT outive RWELL, M. D. The world renownad anthor in this admirable lec-ture clearly proves from his own experience that the awful consequences of Self-Abuse may be effectually removed without dangerous sargical operations, bougies, instruments, rings or cordial; pointing out a mode of ourse at once certain and effectual, by which every sufferer, no matter what his conditions may be, may care himself chiaply, privately and radically. Tais lecture will prove a boon to thous nds and thousands.

LORILLARD'S PARADISE.

A BEAUTIFUL GAME PRESERVE AND FASHIONABLE RESORT.

The Area of the Property Now Includes 6,000 Acres To Be Stocked with Deer and Fish-Buildings

and Roads.

Latter d.

"The recent stormy weather has retarded us some in our work on the park," said one of the men, "but you can see that we are getting along finely." The park referred to was the new game preserve along the Erie, to be known as Truxedo park. Its central point is at Lorillard's Station, about thirty-nine miles west from Jersey City. The large gang of men now employed upon the grounds are making rapid progress in their work, and it is expected that the park will be open for visitors by the 1st of next June. As the original plans, as well as others more recently formed, are being carried out, the great extent of the project becomes more apparent. The park will, through the membership of the association now forming, represent many hundred thousand dollars in wealth. The organization will be limited to 200 members, each of whom must necessarily possess a small fortune to enable him to meet his share of the expense. The park will be strictly a fashionable resort, where members of the association can indulge in winter as

well as summer sports. WHAT THE SUPERINTENDENT SAYS.

The correspondent met Mr. Josiah Patterson, Mr. Lorillard's general superintendent, who has had charge of the land for many years. "The project will be carried out in full according to the plans formed," said the superintendent. "Mr. Lorillard's tract here originally embraced about 5,000 acres, but he secured for this park 1,000 acres more from the Sterling Mountain company, so that the area of the property now includes 6,000 acres. The park will be all in Orange county, but a portion of it runs right along the Rockland county line." The grounds are to be well stocked with deer and birds, twenty-two crates of quails for the purpose having arrived from the west last week. Truxedo lake, from which the park takes its name, is already well stocked with black bass, which wore put in by Mr. Patterson some twelve years ago. The bass is a very gamy fish, and will allow no other member of of the finny tribe to live in the same water with it. This lake covers about 300 acres and nestles among the mountains. Its water is clear and sparkling, and the fish might well feel happy in their fine quarters if it were not for the anglers' hook and line. For some years past sportsmen have been allowed to fish in the lake upon a payment of a certain fee, but now the water will be kept strictly private, only members of the association, or those persons who are so fortunate as to live within the limits of the park, being allowed the privilege of putting in their lines. In addition to this lake there is another and smaller sheet of water in the vicinity called "Little Nigger pond," which abounds in pickerel, and numerous streams throughout

the park will afford excellent trout fishing. Near the station at Lorillard's the grounds are being graded and several buildings are in process of erection. One of these is to constitute an English inn, for the accommodation of visitors, and Mr. Patterson says that whoever has charge of this house will /be obliged to sign an agreement not to sell a drop of liquor. "No intoxicating liquor will be sold at any place on the grounds," he said "and no drunken or disorderly person will be allowed within the inclosure at any time. The association is not formed for the spurpose of

EDISON PHOTOGRAPHS A SOUND.

At Work on a New Phonograph That Is to Revolutionize Office Work.

Greater things are in store for the public sought to make any use of it. See here, I druggists, who are authorized have just made a photograph of the ex-pression 'Ah!'" Here the inventor produced by his manufacturers to rea strip of paper twenty-one feet long by two inches wide, from one end of which to the other was a continuous line of waves, mak-ing one "wave sound." "That is 'Ah!" re-sumed the magician. "Of course, this is only experimental, but the machine that would produce that sound would be heard five FOSTER, MARBURN & CO., Props. miles away distinctly."

"There is, then, an ultimate future for the phonograph?"

"Yes, a great one. I intend to make it of use for commercial purposes. It will be used for dictating to. In offices it will take the place of stenographers, and boys can use it. This is the machine I am now constructing. This phonograph was completed so far as it went, and gave satisfaction to all those who were then interested in it. Its mission I am about to demonstrate. The phonograph I am building will have a five-foot wheel, to be driven by steam. The sound will be transferred from the phonograph to a wheel forty times its diameter, the sound thus be-ing amplified forty times, making it forty times louder than the human voice. It will have a funnel thirty feet long. I will put it on top of this building and you can hear it talk distinctly two blocks away.

"This is only to prove the perfection of my new machine. I shall then construct the new phonograph for office use. It will be self-acting, worked by a spring. Bankers, merchants, lawyers and editors can stand up and speak to it, or can recline upon a lounge, smoke their cigars, and dictate to it at their ease. All they they have to do then is to hand it to the office boy, who, by touching a that has been said to it, which he can tran- A POSITIVE CURE IS ASSURED. that has been said to it, which he can tran-scribed at his will. If he misses anything he can spring it back, when the phonograph will repeat it over again. Whoever pos-sesses one can take it home, and if a thought, an idea strikes him, he can instantly confide it to the phonograph, and there it is for him next day. The stenographer is an expensive institution in an office. This will take his institution in an office. This will take his place as a complete registering machine."-New York World.

The Gold Fever in Dutch Guiana.

Gold-digging and cocoa-growing have put an end to the sugar industry in Dutch Guiana. I was manager of a large plantation there, but the gold fever has ruined all agricultural pursuits, and at least one-sixth of the whole population is at work in the hitherto inaccessible interior searching for gold. It has been known for many years that gold was to be found about 400 miles inland, but the intervening country is a vast forest.

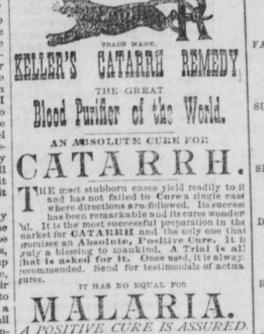

It was not until six years ago that Governor Van Sypenstein sent out an expedition which cut a road across to the gold-fields. TLES FOR \$5.00. On rea No sooner was the path cleared than there was a great rush for the little Eldorado. Encouraged by the authorities, many people explored the district and staked claims. As a result, at least out half-a-dozen men who were previously penniless have accumulated fortunes of from \$:300,000 to \$500,000 in the brief interval of five years, and with very few facilities in the way of machinery for getting at the gold. Part of the money thus made is invested in cocoa plantations and the rest is taken out of the country. At least \$1,500,000 worth of gold will pass through the custom house this year, besides the much larger amount that will be smuggled out. What is now wanted in Dutch Guiana is some American energy and some American capital to develop these promising resources. If the 10,000 Chinese cigar-makers in California would emigrate to Dutch Guiana they would be heartly welcomed. The climate is leasant, and besides gold digging they could ousy themselves in gathering the vanilla bean, the tonka bean, and various plants used for medicinal purposes that are exported in great quantities every year .--Dutch Guiana Letter.

WHIGT IS IT?

promoting temperance principles, but the fact is realized that sobriety and; good order within the limits of the park are a sential for the preservation of its good chara cter.

VARIOUS ATTRACTIVE FEATURES. The entrance to the grounds will be sub-stantial and attractive. An immense stone archway has been constructed over a pretty stream of water that flows to the north, and the gate lodge now being built on the west side of this arched bridge is . novelty for that section of the country. It is of gray stone, taken from the -mounted as in the immediate vicinity, and its wallstare as heavy and solid as those of a fort. It is 17x34 feet in the foundation and 35 fe st hight, its design being decidedly English. A wellgraded road will lead from the entrance of the park to the lake-a distances of one and

one-quarter miles-and the drive amid beautiful mountain scenery will be a charming one in summer. On one tide of the lake will be built the club house, which will, it is stated, when completed, surpass anything of the kind in the country. It will be a handsome structure, furnisher i in all modern elegance, and very complete in its appointments. The building will have a frontage of 230 feet and a wing of 30) feet, and be four stories in height. A theatre will be added to it, so that the winter · evenings may be enlivened with the ats actions of city amusements.

A fine drive will be con structed around the lake, and numerous boat s will float npon the water in the summer season. In the winter ice-boating and to bogganing will constitute a part of the sports indulged in. Mr. P. Lorillard will have an elegant resi-

dence for himself constructed on one side of the lake, and directly opposite a house will be built for his son, P. Lorrillard, Jr. The park will attract thousands of visitors from various parts of the country, and all persons who conduct themselves properly will be al-lowed the privilege of walking about the grounds .- Nyack Cor. New York Times.

A Case of Absent-Mindedness.

"There is one pleasant feature about boxoffice life," said Treasurer Prior the other day, "and that is the absent-mindedness of people who purchase tickets. It not uni'requently happens that men or women select two seats, throw down a five or ten dollar gold piece, and walk off with the tick ets without waiting for the change. How such persons ever return for what is due then 1. They think: 'Oh, they won't remember me, and charge it up to profit and loss. This morning a lady purchased a matinee ticket and gave me a \$20 gold piece. I gave her the seat and \$19 in change. She refused to take the money, and said I had made a mistake, and-you may laugh, bat I'll swear to it on Jeffrey's Guide-I had to argue with her for three or four minutes before I could convince her that it was not a silver dollar she gave me. What stupid creatures same

women are! Later: Mr. Prior has just informed me that his cash is \$19 short.-Chicago News.

Very Sweet on the Apostles. Little Johnny Fizzletop was in a candy store with his mother. She bought some figures made of chocolafe. "Here, Johnny, are the three graces for

you. "O, ma, I'd rather have the twelve apostles. There are more of 'em."-Texas Siftings.

Yankton as an Inland Town.

It is believed that in ten years Vankton, D. T., will be an inland town. In front of the city, where the river ran twenty fees: deep five years ago, there are now 100 acrep; of land six feet above high water mark.

floral business there," was remarked to a reporter last evening by a leading florist. "That is singular. What were the circum-

stances "The funeral was that of A. T. Stewart, the famous dry goods merchant. There were the largest, the finest, and the greatest number of floral emblems sent by friends of the family ever known at any funeral in the city. All the florists had their establishments depleted, and Boston, Baltimore,

Washington, Philadelphia and other towns were called upon by the New York florists for flowers. Prices went up, and almost anything was charged and obtained for designs. The number of pieces mounted up into the hundreds, and thousands of dollars were made by the New York florists within two or three days."

"Then how was their business so completely ruined by the funeral?" inquired the reporter, mystified.

"Simply because there were so many flowers used that the bon ton declared it alto gether too common to have any flowers at all at funeral, thereafter, and for three or four years the flat was in force and florists almost starved to death. By and by, however, the Stewart funeral was forgotten, and, remembering only the appropriateness of a floral emblem, people soon got to using them again."-Cincinnati Times-Star.

Born in an Adobe Heuse.

The wife of Gen. Sheridan was born in an adobe house at Albuquerque, N. M. The house in which she first saw the light contained one small graten window, a mud chimney in the corner and a heavy door hung on wooden hinges. Major Rucker, her father, was quartermaster of that military post at the time, and the infantile years of Mrs. Sheridan were passed among the rude scene s of a frontier army camp.

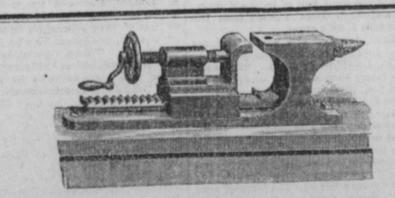

Sweet Rosebuds from the Yukon. Rosebuds, sweet and large, are an Alaska lainty. They grow in the Yukon flat lands larger than in this country, and even the seeds seem less dry and "downy" than those of temperate climes. -- Chicago Times. Thorndyke Rice, the editor of The North

American Review, is only 32.
