

FACETIE.

A MEMBER of the Royal College of Surgeons has discovered that a man's right leg is longer than his left. Nature never makes a mistake. A man always uses his right leg when he reaches for a tramp or a chrome peddler, or for an obnoxious suitor for his daughter's hand.

"No indeed," said Mrs. Parvenu—"No! I don't think she is a fine-looking woman at all. She may have nice eyes, but, mercy me, she's got no physiognomy!"

"Ah," sighed Brown, "this life is full of disappointments." "Yes," replied Fogg, glancing significantly at Mrs. F., "and some disappointments are full of life."

"I'd hate to be in your shoes," said a woman as she was quarrelling with a neighbor. "You could not get into them," sarcastically replied the neighbor.

A SCIENTIST says that in the moon a nut falling from a bough would crash through a man like a bullet. That settles it; we shall never go to the moon to gather nuts.

Another Life Saved. J. C. Gray, of Dadeville, Ala., writes us: "I have been using your DR. WM. HALL'S BALM FOR THE LUNGS, and I can say, of a truth, it is far superior to any other lung preparation in the world. My mother was confined to her bed four weeks with a cough, and had every attention by a good physician, but he failed to effect a cure; and when I got one bottle of your DR. WM. HALL'S BALM FOR THE LUNGS, she began to mend right away. I can say in truth that it WAS THE MEANS OF SAVING HER LIFE. I know of five cases that DR. WM. HALL'S BALM has cured, and my mother is better than she has been for twenty years."

A FRUGAL schoolmistress once owned a fine mince pie. It was of the make of 1876, and had grown a beautiful green mould on the edges of its crust. It was the frugal lady's daily custom to toy with the pie at the conclusion of the mid-day meal, and say archly, "If nobody wants any pie I won't eat it. One day a new boarder said, 'I want a piece of pie.'" "Why—why—what do you want of it?" inquired the frightened lady. "I want to make a donation to the historical society."

JIM CURTIS and Tom Morton, two New York dudes, while they were going home from the club, were talking about the lightning killing so many people in Pennsylvania the other day. "I've got a mortal dread of lightning," said Curtis. "Eva been struck by lightning?" "Nevah; but my aunt was killed by a thunderbolt. It was dreadful." "I expect so; but she didn't suffah much, did she?" "You can't have any idea how dreadful it was. She hadn't made her will, you see, and another fellow got all the property. Naw, she didn't suffah at all. I was the suffahwah."

The Splendor of Dress and the artificial effects of cosmetics, no matter how deftly applied, can never make beautiful or attractive one who is subject to emaciation, nervous dyspepsia, or any form of female weakness. These must be reached by inward application, and not by outward attempts at concealment, and the ladies may take hope from the fact that thousands of their sisters have made themselves more radiant and beautiful by the use of Dr. Pierce's "Favorite Prescription" than they could ever hope to do by the aid of the appliances of the toilet.

Bend the back to the burden. Only Thirty-six Per Cent. of those who die from consumption inherit the disease. In all other cases it must be either contracted through carelessness, or, according to the new theory of tubercular parasites, received directly from others as an infectious disease. But in either case, Dr. Pierce's "Golden Medical Discovery" is a positive remedy for the disease in its early stages. It is a remedy that is dangerous. If you are troubled with shortness of breath, spitting of blood, night-sweats or a lingering cough, do not hesitate to procure this sovereign remedy at once.

There was ne'er such what naething was left. The cleansing, antiseptic and healing qualities of Dr. Sage's Catarrh Remedy are unequalled. Sharp stomachs mak' short graces.

Our readers will notice in this week's issue of this page, a change from the small advertisement of Le Page's Liquid Glue, showing the small can or bottle. Instead of the simple announcement of its merits, those who use it, amount of sales, how simple can be obtained, etc., the Russia Cement Company perform a praise worthy act in revealing a fraud which is the more contemptible, because it affects only the smallest size for family use (of bottle goods), and therefore affects those who are obliged to buy in small quantities rather than those who are able to stand the imposition. In addition to the statements of the advertisement, which we have from good authority are exact in details, we have it from sources unquestioned through the press, by show cards, &c., of other places as receiving endorsements from high government officials, are entire fabrications with not even the color of truth. In point of fact, the Smithsonian Institution (as well as other Government Departments) have used, and still use, LE PAGE'S LIQUID GLUE exclusively, reason for which is found in its containing no acid, while we are informed all others have an acid base; and in its superior strength. At New Orleans, on a Biehle Testing Machine, butted, registered 1613 pounds before parting. LE PAGE'S LIQUID GLUE does not need our special praise; the fact that such manufacturers as the Pullman Palace Car Co., have adopted it shows its worth to every workman, and for every family in the land.

FARM NOTES.

THE WORLD'S LARGEST BARN.—The Union Cattle Company, of Cheyenne, has a cattle barn located eight miles from Omaha, which is the largest structure of the kind in the world. It was commenced in April, 1885, and \$125,000 has been expended upon it. There are accommodations for 3750 head of cattle, and the original design to provide for 8,000 head will probably be carried out during the present year. The building is 400 by 600 feet, covering five acres, and in it the cattle are fattened for market. So complete are the arrangements for feeding that one man can attend to it. All that he has to do is to turn the faucet, and the cooked meal, forced to large tanks above the barn, passes to the feeding trough in front of each animal. Forty-five men do all the work, making one man for every 200 head of cattle. It requires about 1,000 bushels of meal for each day's feeding, in addition to the hay from the prairie, which costs \$4 a ton. There is a regular system of water-works, and with it the flooring is cleaned up twice a day, requiring only seven men to do this part of the daily labor. The Union Cattle Company was incorporated about seventeen years ago. The man who composed it began on a small scale years ago, with a very little capital, too. They now have 80,000 head of cattle on the range, and have \$3,000,000 invested in the business. The stock consists of Herefords, Shorthorns and Durhams, and is continually improving by the introduction of the finest animals in the market. They are kept on the ranges in Wyoming and Montana till they are about three or four years old, when they are brought to the barn for fattening, which requires about four months.

MAKE IT A RULE that a weed shall never go to seed in your garden. The average farmer's garden of one-fourth of an acre ripens enough weed seed to supply the entire farm. It is not difficult to keep a garden clear of weeds if all the crops are planted in rows running the length of the garden, those that mature at the same time should be put near together, and as soon as past use removed, and the land thoroughly worked with the horse cultivator and some other crop planted. Keep all the garden in use, if it is only to grow sweet corn for the cows, and this planted as late as August 1st, has tasseled and set ears and produced from each square rod enough good fodder to feed two cows a day.

THE BEST INSECTICIDE.—We have several hen houses, each located in a different place in the orchard. They are double boarded, with tarred paper between, and with large windows on the south side. In each we keep a stock of hens, and by raising several broods of chickens in each there is no trouble in keeping the hens and chickens scattered all over the orchards.

We have never found a better insecticide for all classes of insects that ever come to the ground than an old hen with a brood of chicks, unless perchance it be a clutch of ducks. And our orchards, so far as the hens roam, are entirely clear from insects.

BECAUSE farm horses now have a quiet time in no good reason for slackening up in the care of them. Get a "few turns ahead" for the extra strain of spring work by putting them in good condition for it now.

RAW potatoes are not readily eaten by any stock excepting cattle. They are not good for milk cows, making thin milk and butter with little gain to it. This effect is, however, much moderated by feeding some corn meal with the roots. Cooked potatoes are eaten greedily by hogs, and unsalable potatoes are best disposed of in this way.

Early plety has often been charged with producing baldness. Carboline the great petroleum Hair renewer will restore the hair no matter what removed it. Try it.

CONSUMPTION CURED. An old physician, retired from practice, having had placed in his hands by an East India Missionary the formula of a simple vegetable remedy for Bronchitis, Catarrh, Asthma, and all Throat and Lung Affections, also a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellow-men. Actuated by this motive and a desire to relieve human suffering, I will send free of charge, to all who desire it, a full and complete treatise in German, French or English, with full directions for preparing and using. Sent by mail, enclosing postage stamp, naming this paper, W. A. NOYES, 141 Powers' Block, Rochester, N. Y.

Read the Testimony of Rev. Wm. B. Chalmers, a well-known Clergyman of Philadelphia, PA., January 12, 1888. Pastor's Study, Messiah M. E. Church.

MY DEAR SIR—I feel that I ought to make known my experience with Prof. Wm. B. Chalmers' "ACTINA" BATTERY, not only in justice to him, but also that the afflicted may learn where to look for a remedy for serious and obstinate diseases. For five years I have been suffering with great distress in my head, resulting at times in complete incompetency for work; this, together with a throat trouble causing hoarseness, rendered speaking not only laborious and painful to myself, but unpleasant to my congregation. I have used your "ACTINA" since the 25th of November, 1885. My voice is fully restored, and since using your instrument and wearing your garments I have not experienced any distress whatever in my head. Have worked 16 to 18 hours out of the 24 for the last five weeks, and never felt better in my life. My wife is also wearing the "ACTINA" and has experienced a very great relief, having suffered 3 years from general debility. My little boy of 6 winters who contracted a catarrhal trouble since an attack of scarlet fever, is using your instrument and improving. I wish you a continuation of success. Very truly and fraternally yours, WM. B. CHALMERS.

CONTAGIOUS! I am a native of England and while I was in that country I contracted a terrible blood poison, and for two years was under treatment in an out-door hospital at Nottingham (England), but was not cured. I suffered the most agonizing pains in my joints, and was covered with sores all over my body and limbs. Finally I completely lost all hope in the medical treatment of America, and was treated at Brownsville in this city, as well as by a prominent physician in New York, but without connection with the hospital. I saw the advertisement of Swift's Specific, and I determined to give it a trial. I took six bottles, and I can say with great joy that they have cured me. I am as sound and well as I ever was in my life. New York City, June 12th, 1887. J. FRED. HALPORD.
