The mest stubborn cases yield readily to if and has not failed to Cure a single case where directions are followed. Its success has been remarkable and its cures wonder In the is the most successful preparation in the narket for CATAREH and the only one that romises an Absolute, Positive Cure. It is ruly a blessing to mankind. A Trial is all that is asked for it. Once used, it is always recommended. Send for testimonials of actua IT HAS NO EQUAL FOR

MALARIA. A POSITIVE CURE IS ASSURED. One bottle is generally sufficient for a cure. Stor taking Quinine. A trial only is asked for KRL LER'S CATARRI REMEDY. It is a SPECIFIC for all disenses arising from an impure blood and drives all eruptions from the skin. For Syphi litic complaints it is superior to any preparation in the market. One bottle will cure most of the following complaints and a continued use will vostriveLY care., Save doctor bills and try it.

RHEUMATISM. SCROFULA. SKIN ERUPTIONS. VENEREAL DISEASES. DYSPEPSIA. LOSS OF APPETITE. FEELING OF LANGOUR. BILIOUSNESS.

A WONDER IN MEDICINE

THE DETAILS OF A SERIES OF MOST MARVELOUS EXPERIMENTS.

The Action of Medicines Upon Hypnotized Patients -- Incomprehensible Phenomena in Connection with Animal Magnetism-A Problem.

Some remarkable discoveries have been recently made by French physicians in re-gard to what they call the action of medi-cines at a distance. The patients experimented on have been those either hypnotized or capable of being hypnotized; that is, they could be thrown into a sort of magnetic slumber, in which effects could be produced on others independent of their will. There is nothing specially new in magnetism nor in hypnotism, but the new facts now elicited of a nature so striking as to render credible the most seemingly absurd and impossible cases of so-called mind-reading. The experiments took place at the School of Rochefort, and in the first place on a man subject to hysteria. They were tried after a series of attacks which left him in a

state of extreme nervous sensitiveness. It metals. Silver and lead produced no result whatever. Zinc, copper, platinum, iron and steel, being applied, showed different influences, one causing pains, another trembling and another vascular congestion. But the contact of gold with the skin had a most extraordinary effect, causing an intense sensation of heat. A sleeve-button touching the face or finger of the patient caused him to utter a cry of agony. Even when applied outside of his clothing, or with the hand of the times a piece of silver or gold was slipped into his Lei witout his knowlenge. He did

turn till he had found and ejected it. INCOMPREHENSIBLE PHENOMENA.

To show that the pain was not the result heads very much to the detriment of all effect was not only a sensation of burning, but a blister of the flesh and a permanent

metal. So, also, the nitrate of mercury, similarly guarded against direct contact, while nitrate of silver and carbonate and sulphate of lead, like their originals, had no effect whatever. Ioline of potassium, wrapped in a paper and placed under the forearm, caused yawning and sneezing, thought the untaught patient, even if he had been aware what the objects were, could not possibly have known what physical action they were likely to causa. Hydrogen had an effect analogous to that produced when it is used medically.

have been the same remedy applied in a regular way. Some skeptical physicians ap-

olied mercury or opium in packets whose

ontents were unknown to the others pres-

ent, and could not be even surmised by the

patient, and always with the intolerable

CHASED BY A WATERSPOUT. A Curlous Incident of a Homeward Voy-

age from Trinidad to New York. On Tuesday, October 20, we had a sensa-

tion that woke us up a little. The Trinidad was chased by a waterspout. It was a very stormy day, with a rough sea, and raining hard. We were then in the neighborhood of latitude 27 degrees, or about 100 miles further north than Key West. Between I and 2 o'clock in the afternoon I happened out on deck, and saw just enough sun try-ing to shine to show that the sun was not

entirely drowned out. But the sun, curiously enough, was still over in the east, when it should have been to the westward of us. After cogitating over this phenome-non for a short time I started aft to look at the compass, and found nearly all the passengers gathered on the afterdeck. The com pass showed that we were moving south-

ward and heading for St. Kitts again. The passengers and all the steward's boys were watching a curious column that rose straight up out of the sea, and seemed to be chasing us. They lost no time in telling the new-comer that the column was a water-spout, and that the ship had been dodging it for the last half hour. It was said to be, when I first saw it, about two miles from the ship, and looked at that distance, about was first endeavored to study the effects of the diameter of a hogshead. The column of water must have been fully half a mile high, and from the top of it sprang a darkcolored tail, looking like smoke coming out of a chimney, but perfectly round. This upper part went up zigzag fashion as far as we could see and disappeared in the clouds. When first seen the waterspout was imme-diately in front of us, and the ship's course was changed to avoid it. Then it started after us, and we continued to dodge it for more than half an hour. At last we left it physician between the object and his skin, their was the sense of acute pain. Some-not see it break, but lost it in the distance. I asked Capt. Frazer afterward what would have been the result if we had run into not seem to be aware of the presence of the It, and he replied that the ship's going into

umn, so that a few hundred thousand tons of water would have come down on our tre Hall.

of imagination or deception, articles of our "upper works." He thought it would aluminum, bronze or other metals having not have damaged the solid parts of the the appearance of gold were placed near ship, but perhaps it was just as well not to him without producing the slightest result. give it a chance to try. The weather cleared Mercury had the effect of gold, though off in the evening, but we still had a rough more violent. When a thermometer was sea so rough, that steamer chairs would applied to the patient's person, though the not stand steadily enough on deck to be metal was hermetically sealed in glass, it used with comfort or safety. On the folcaused a violent sensation of heat. One lowing day the weather was much cooler day a thermometer was wrapped in a cloth and more pleasant, and the sea smoother. that he might not know the nature of the On Thursday, with another rough sea, we object, and placed under his forearm. The got a welcome reminder that we were approaching cooler climates. At 2 o'clock in the afternoon, when we were said to be wound. Then the compounds of the metals just opposite Hatteras, all the awnings were were tried. Chloride of gold, inclosed in a taken down. There was no further use for corked flask, had the effect of the pure them -- William Drysdale in New York Times

> The First Seal of the Confederacy. Commodore Semmes was one of the first volunteers for Confederate service. He was anxious to be afloat under the stars and bara. There being no navy he was assigned to the light-house bureau. At length he heard of a merchant steamer that could be bought at New Orleans, and was sent to examine her. He brought back a picture of the vessel, which he exhibited with great

Among the many symptoms of Dyspepsia or indigestion the most prominent are: Va-riable appetite; faint, gnawing feeling at pit of the stomach, with unsatisfied craving for food; heartburn, feeling of weight and wind in the stom-ach, bad breath, bad taste in the mouth, low spirits, general prostration. There is no form of disease more prevalent than Dyspepsia, and none so pecul-iar to the high-living and rap-id-eating American people. Alcohol and tobacco produce Dyspepsia; also, bad air, rapid cating, etc. BURDOCK BLOOD BITTERS will cure the worst case, by regulating the bowels and toning up the digestive organs. Sold everywhere.
