IF IT CANNOT BE DONE AS IT IS STATED.

Rochester, N. Y., Union and Advertiser. Friends of Ex-President Arthur are very much disquieted.

Of course he is not going to die! He is in the hands of a very particular physician.

His doctor does not call it Bright's Disease! No, it is stomach disorder that he is suffering from now, and every few hours he takes a cold, and from time to time many other symptoms are developed. These symptoms the public should know are really secondary to Bright's Disease.

His physicians say that everything that medical skill can do for him is

being done.

This is not so. This case is a prominent one because the general is an ex-president; and yet there are thousands of farmers quietly dying, in their farm houses, of secondary symptoms of Bright's Disease, called by every other conceivable name; thousands of workmen, likewise dying, leaving helpless families; hundreds of thousands in all walks of life who have sickened, and are likewise dying, helpless victims of powerless physicians.

Eight years ago a very well known gentleman was about to enter upon large commercial transactions, His medical adviser quietly dropped into his office one day and told his confidential clerk that be would be dead in three months, and that he ought to settle up his business affairs at once!

That man is alive and well to-day, yet he was given up as incurable with he same disease that is killing General Arthurl

Our reporter met this gentleman yesterday and in conversation about the

General's case, he said: "I will give \$5,000 to any charitable "institution in the state of New York, "to be designated by the editor of the "New York World, the editor of the "Buffalo News and W. E. Kisselburgh " of the Troy Times, if Warner's safe "cure (taken according to my direc-'tions) which cured me eight years "ago, cannot cure General Chester A. "Arthur of Bright's disease from which he is suffering."

"Now I want you to understand," he said, "that we do not profess to to make new kidneys, but we do "know from personal experience and "from the experience of many "thousands of similar cases, that we "can stop the consumption of the kid-'neys. Many a man has gone through "life with one kidney without incon-'venience. Thousands of people have "lived a majority of their life with one 'lung. They did not have a new lung " made. We do not make new kidneys, but if the kidney is not consumed too 'much we can stop disease and prolong "life if taken in time."

This offer comes from H. H. Warner, proprietor of Warner's safe cure, of

this city. 'sir, there are governors, senators, 'presidential candidates, members of 'congress, prominent men and women "all over the country whom I per-"sonally know have been cured of dis-"ease, such as General Arthur suffers "from, by our Warner's safe cure, but "owing to the circles in which they 'move they do not care to give public testimonial to the fact."

Mr. Warner is interested in General Arthur's case, because he is personally acquainted with him, and he says that it is a shame that any man should be allowed to die under the operation of old-fashioned powerful cathartics, which have no curative effects, rather than that a modern, conceded specific for kidney disease, whose worth is acknowledged world-wide, should save

"If you doubt the efficacy of Warner's safe cure," say the proprietors, 'ask your friends and neighbors about t. This is asking but little. They can tell you all you want to know."

"We have kept a standing offer before the public for four years," says Mr. Warner, "that we will give \$5,000 to any person who can successfully dispute the genuineness, so far as we know, of the testimonials we publish, and none have done it,"

Were General Arthur a poor man, unable to be left "in the hands of his physician," he would use that great remedy, as many thousands of others have done, and get well. How absurd then for people to say that everything that can be done is being done for the ex-president, when the one successful remedy in the world that has cured, or that can cure a case like his, has not been used by them.

A curious feature of the National in benzine has been added. museum in Washington is the zoological section, or the department devoted to birds' eggs. It has about 42,000 birds' eggs, packed away in little trays placed in cases along the walls of the building. The eggs in the collection vary in size from that of the tiniest numming-bird to that of the giant bird, whose remains are found in Madagascar. There is a little egg of a tiny humming-bird lying in a diminutive nest. The humming-bird that made the nest and laid the egg is the smallest bird in the world. The little egg has a length or long diameter of threehundreths of an inch. The nest is onetwentie:h of an inch across one way, and ninety-two one-hundreths the

The Chief Roadmaster of the French Government railways says the best plan yet discovered for consolidating, by the interlacing of its roots, the loose soil of newly made embankments is the double poppy. It germinates in a few days, and in two weeks grows enough to give some protection to the slope. It is an annual, but after the first year

Wood worms can be destroyed in books and woodwork by benzine. Books are locked up in a cupboard with a saucer of benzine. Furniture and carvings are placed in a tightly closed room with an open dish of benzine. New woodwork can be protected against their entry by a coating of glue.

M. Pasteur is believed to have solved the question of the preservation of wine, which has long been a matter of great difficulty in France, and for which salicylic acid was used till it was probibited as a penal offence. Now however the discoveries of M. Pasteur have shown how wine may be safely preserved without the addition of any chemical whatsoever. After minutely studying the microbes which cause the fermentation in wine or the deterioration of its quality, notably the microbe that imparts a bitter taste to Burgundy, M. Pasteur discovered that all mischief could be prevented by simply warming the wine for a few moments. Boiling is not necessary—a heat of 132° to 142° Fahr. is sufficient, but of course the wine must be kept in closed vessels, and no air allowed to approach. For private persons who are doubtful about a few bottles of wine nothing is easier than to carry out this method. If the bottles are well corked, it suffices to immerse them in a saucepanful of cold water, which must be gradually warmed up to about 140° Fahr. This will completely destroy the germ within the wine without in any way injuring its flavor and quality.

The age of paper appears to be approaching. Among the innumerable things made from this material is that of pipes. The process is as follows: Strips of paper, the width of which corresponds with the length of one pipe section, are drawn through melted asphalt, and wound upou a mandrel. When the pipe thus made has cooled, the mandrel is withdrawn, and the inside is covered with a kind of enamel, the nature of which comprises the main secret of the invention, and is therefore not made known. The outside is painted with asphalt varnish, and dusted over with sand. It is stated that such a pipe will resist some 2000 pounds internal pressure, though the thickness of the stuff is only about one-half

Confession of the Late Dr. Dio Lewis

Thousands of people all over this country will hear with keen regret of the death of Dr. Dio Lewis. For many years he has been the inspiration of good health to thousands and has ministered comfort to those who would very sadly have missed his cheering words. Dr. Lewis was one of the most genial and inspiring of men. He did not believe very much in taking medicine, making hygiene a great hobby and insisting that if a person would live right there would be little necessity of medi-Mr. Warner also said, "My dear all things else being noticeable, he tion. said, "If I found myself afflicted with a serious kidney disorder I would use Warner's safe cure," Adding, "The truth is the medical profession stands dazed and helpless in the presence of more than one kidney malady, while the testimonials of hundreds of intelligent and very reputable gentlemen, hardly leave room to doubt that the proprietors of that remedy have fallen upon one of those happy discoveries which occasionally bring help to suffering humanity. I am not so narrow that I cannot gratefully recognize the precious value of relief in the form of medicine." Dr. Lewis met with an 663 Main Street, Buffalo, N. Y. accident which injured him so that erysipelas set in and carried him off. His testimonial, coming as it did from a free, frank and open heart, is a very Important confirmation of what so many thousands have said of the remedy he so highly commended.

HOUSEHOLD.

WHEN necessary to thoroughly sweep a carpeted room, first dust carefully and remove all the furniture that can easily be carried out. Brush out around buttons of tuffed furniture, and cover closely with unbleached cotton sheets and keep for this purpose. Dust and remove all ornaments, and cover everything that must remain. Use salt or washed tea-leaves to sprinkle over the floor and sweep with a short and even stroke. Let dust settle thoroughly, and then wipe off paint and woodwork before returning furniture.

To keep ice in the sick room, cut a piece of flannel about nine inches square and secure it by ligature about the mouth of an ordinary tumbler so as to leave the cup shape depression of flannel within the tumbler to about half its depth. In the flannel cup so formed pieces of ice may be preserved many hours, all the longer if a piece of flannel from four to five inches square be used as a loose cover to the ice cup. Cheap flannel with comparatively open meshes is preferable, as the water easily drains through it and the ice is kept quite dry.

ORANGE TRIFLE. -Put a quarter of a pound of sponge finger biscuit and two ounces of ratafias at the bottom of a trifle dish and pour over them, when it is cold, a syrup made as follows: Rub some lumps of a quarter of a pound of sugar on the peel of four oranges; boil this quantity with half a pint of orange juice for five minutes. Take off the peel of four oranges down to the fruit. which divide into quarters, and having taken away the pith and seeds, cut them into small pieces and put on the cakes. Over all put half a pint of rich cream whisked to a strong froth.

IRONING .- Flats should be kept in a dry cupboard, protected from dust and smoke as well as rust. In one of the full length cupboards should stand a folding ironing-board; this style of board avoids the trouble of moving things about which almost always are obtained at the cost of creating an inconvenience. "Holders" for flats should always be put away with the irons and never used for other than their legitimate purposes.

EGGS SUR PLAT .- This is a most convenient dish when a slight meal is the manufacture of a material called wanted in a hurry. Put a fire proof china saucepan on the fire or on a spirit used in Europe for covering roofs, iso- lamp. Place a lump of butter in it and lating damp walls and floors, etc. It is as soon as it melts, break in three or adapted for use on farms in making four eggs. Let them remain long tightreservoirs, or in the construction of enough for the whites to set, sprinkle bridges, and is of value in any case with salt and pepper and serve the

> VEAL CUTLETS WITH BUTTER SAUCE.—Dip each cutlet in a beaten egg, then in peppered and salted cracker dust, and fry in bot drippings to a rich golden brown. Lay each as it is done on paper to absorb the grease. Arrange on a hot dish and put on every cutlet a liberal spoonful of sauce. Make it by beating tablespoonfuls of butter to a cream with a tablespoonful of lemon juice and a tablespoonful of minced parsley.

TRY this lemon sponge; it is easy to make and is always liked. Soak one ounce of gelatine in one pint of boiling water until dissolved; then pour on it one pint of boiling water, the juice of three lemons and sugar to taste. When thoroughly mixed, beat to a white froth and add the whites of four eggs, well beaten. Beat all together until quite stiff; put in molds wet with water and set on the ice.

To serve eggs baked or shirred: Butter a deep earthern ple dish, or little china or stone dishes made expressly for this method of cooking eggs, and into it break carefully as many eggs as are required for use, without crowding; "Golden Medical Discovery" cures all dis-eases of this great gland, it follows that bit of butter on top before putting in a hot oven to set, which will require four or five minutes. A little chopped parsley or ham may be added if desired.

> KIDNEY STEW .- Take a large beef kidney, cut all the fat out, cut it up in slices; then let it lay in cold water, with a teaspoonful of salt added, fifteen minutes; wipe dry, then put it in the pot with three half-pints of cold water; let it boil two hours; half an hour before it is done add one small onion, sliced; one teaspoonful of powdered sage, a very little grated nutmeg, and pepper and salt to season well; serve hot, with mashed potatoes.

PICKLED CHICKEN .- Boll four chickens until tender enough for meat to fall from bones, put meat in a stone jar, and pour over it three pints of cold, good cider vinegar pint and a half the water in which the chickens were boiled; add spices if preferred, and it will be ready for use in two days. This is a popular Sunday evening dish; it is good for luncheon at any time.

POTATO DROP CAKES .- To two cupfuls of mashed potato add two cupfuls of warm milk, a tablespoonful of melted butter, two beaten eggs, half a cupful of prepared flour and half a teaspoonful of salt. Beat the whole very hard and drop in great spoonfuls on a greased griddle. Serve very hot as soon as they are baked.

BEFORE beginning to iron sprinkle the table plentifully with water and lay on the ironing blanket. This will hold it firmly in place and prevent all wrinkling and shoving about. Never try to iron with a blanket having wrinkles or bunches.

WHEN putting down a new carpet be sure you save the ravelings. They will furnish just the darning thread you will need when the carpet "begins to
