

HOUSEHOLD.

PUFF-PASTE.—One quart of pastry flour, one pint of butter, one tablespoonful of salt, one of sugar, one and a quarter cupfuls of ice water. Wash the hands with soap and water, and dip them first in very hot and then in cold water. Rinse a large bowl or pan with boiling water, then with cold. Half fill it with cold water. Wash the butter in this, working it with the hands until it is light and waxy. This frees it of the salt and buttermilk and lightens it so that the pastry is more delicate. Shape the butter into two thin cakes, and put in a pan of ice water to harden. Mix the salt and sugar with the flour. With the hands rub one-third of the butter into the flour. Add the water, stirring with a knife. Stir quickly and vigorously until the paste is a smooth ball. Sprinkle the board lightly with flour. Turn the paste on this and pound quickly and lightly with the rolling-pin. Do not break the paste. Roll from you and to one side; or, if easier to roll from you all the while, turn the paste around. When it is about one-fourth of an inch thick wipe the remaining butter, break it in bits, and spread these on the paste. Sprinkle lightly with flour. Fold the paste, one third from each side, so that the edges meet. Now fold from the ends, but do not have these meet. Double the paste, pound lightly, and roll down to about one-third of an inch in thickness. Fold as before, and roll down again. Repeat this three times if for pies, and six times if for vol-au-vents, patties, tarts, etc. Place on the ice to harden when it has been rolled the last time. It should be in the ice-chest at least an hour before being used. In hot weather if the paste sticks when being rolled down put it on a tin sheet and place on ice. As soon as it is chilled it will roll easily. The less flour you use in rolling out the paste the tenderer it will be. No matter how carefully every part of the work may be done, the paste will not be good if much flour is used.

STEWED DUCKS.—Clean and truss but omit the stuffing. Sprinkle the bottom of a pot with onion and a little green sage. Lay in the ducks; cover with thin slices of salt pork, and pour in a large cupful of cold water. Fit a tight top on the pot and set where the contents will not boil less than an hour. Stew slowly two hours and one-half before raising the lid, then turn the ducks and leave until tender, probably for an hour or more. Lift the fowls to a hot dish to keep warm, strain the gravy, thicken with browned flour, boil up and pour, partly on the ducks, partly into a bowl. An excellent method of disposing of tough fowls.

A VIRGINIA SOUP.—A quart and a pint of liquor in which a corned ham was boiled, cooled, skimmed and strained; one cup of milk, four well-beaten eggs, two tablespoonfuls of corn starch, eight Boston crackers, split and dipped in hot milk, a tiny bit of soda in the cup of milk. Heat the milk to boiling, and stir in the parsley, the corn starch, and with cold water, and the pepper; boil again, take out a cupful and mix it gradually with the beaten eggs. Have the milk ready with the eggs and all back into the soup kettle. Heat almost to the boil, stirring all the while, and pour into the tureen lined with the split and dipped cracker. The soup is far better than might be expected.

STEAMED POTATOES.—Cook in your steamer with the skins on until they are mellow to the heart and the skin crack all over. Take these off, lay the potatoes in a deep dish, press each one hard enough to crack it, and pour over them a cupful of rich hot milk in which has been stirred and boiled a tablespoonful of butter rolled in a teaspoonful of prepared flour. Pepper and salt to taste.

ROAST STUFFED SPRING DUCKS.—Take two very fine spring ducks, singe and draw them well; save the livers and chop them fine. Fry in butter a few chopped shallots, 6 ounces of bread without crust, and 2 or 3 yolks of raw eggs, with salt, pepper and chopped parsley. Stuff your ducks with this; truss them fine and roast about one hour, adding some broth to the dripping. Grease off well and strain over the ducks. Serve apple sauce separate.

LEMON ICE.—Prepare about a quart of syrup at a moderate heat; when cool, add the rind of 4 lemons, half pint of lemon juice, and some vanilla; reduce with water to about 20 degrees, and let the whole infuse for about 14 hours. Strain through a fine sieve; put into a freezer and freeze in the ordinary way.

DID you ever try wetting a strip of cloth and laying it along the edge of your pies when the crust is separate and the top sags over. And also in taking bread from the oven, stand it on and without covering till it cooks, unless you are going to eat it warm. If you are, it is better to cover it.

LITTLE HOLLAND BRETZELS.—Make a dough of half a pound of flour, half a pound of sugar, the yolk of two eggs, a tablespoonful of sour cream and a tablespoonful of coriander seed. Break off little bits of the dough, roll them in round pieces and form them in little bretzels or rings.

To remove iron rust take one ounce of oxalic acid, one quart of boiling water, steep the goods, stirring until it is all out, which will be in a short time.

Fix your fences before the cattle get into your growing crops. It is much easier to prevent cattle from becoming unruly than it is to cure them of the habit after it is once formed.

CULTIVATION has so affected the tomato that the seeds are fast disappearing and bid fair to pass out of existence entirely, as in the case of the banana, leaving the propagation of the plants dependent on cuttings.

FARM NOTES.

SUMMER SOILING.—In mid-summer it is rare to find, in most sections, anything like fresh pasturage unless the summer be a wet one. If much cow is allowed to fall off at this time they will not be able to recover full flow later in the season, even if fall pasturage is abundant. The best evidence that summer soiling will help to bridge over the dry months and guarantee a good supply of milk through the summer, is the fact that farmers who have tried soiling on a small scale are ready to repeat it on a larger one. The principal objection to soiling is the extra labor it entails; but we believe that the economy in feed and in manure, where cattle are kept in the stalls and yard, will more than offset the cost of the extra labor. Of course, there should be some system in the time and method of gathering and feeding the soiling crop, and if for a dairy of twenty-five or thirty cows one man's time will be necessary to do the cutting and feeding, in connection with other attentions to the stock and stables. At the comparatively low wages at which such a one could be hired, the expense would be very slight.

A CORRESPONDENT of the New York Tribune says of the lima bean, that excellent legume which should be more generally cultivated in our farmers' gardens: "The lima bean in its earlier growth is remarkably susceptible of decay when in contact with heat and moisture, and equally so when exposed to low temperature. The best to germinate the seeds in the congenial atmosphere of a hot-bed. The old plan of placing the seeds in inverted sods will answer, but four or five beans in a five or six-inch pot is still better. Start them early to secure a good crop before autumnal nights destroy their usefulness. Success in the garden depends upon rich, light and friable. The seeds if planted direct in open ground should be soaked over night in luke-warm water and merely covered with very light soil that will not bake."

A TEMPORARY says that among the sure remedies for ridding plum and other trees from the green lice which infest them when the leaves are young and tender is the following: To one gallon of soft water add one quart of soft soap. Place the same over the fire and bring to a boil. Remove from the fire and add one pint of kerosene oil, stirring until thoroughly mixed. When cold apply with a syringe or fountain pump, which has an attachment for causing the liquid to take the form of spray. If soft soap cannot be readily obtained, hard will answer. A cheaper and more simple remedy is to dissolve two tablespoonfuls of saltpeter in a little hot water, then add two gallons of cold water, and apply in the same manner as suggested for the soap and kerosene mixture.

WEIGHING the milk is the best means of registering the capabilities and particulars of a cow and her yield. If done one day each week and noted down, the table so constructed will be a most efficient guide to the total quantity yielded, the rate of increase, the average or season's yield, the time of calving, the time of going dry, the effects of particular food, etc., while a sudden decrease is the first symptom of any disease or trouble. We can confidently speak from experience as to the benefits to be derived from even a roughly kept register of the produce.

THERE are many reasons why the few growers who still persist should abandon the habit of washing their sheep before shearing, and we know of not a single argument in its favor. The practice was inaugurated at an early day, and it is a relic of old times, when the wool shorn from the small flocks in the Eastern States was largely used up at home. Then it was necessary to wash either before or after shearing, to prepare it for carding or spinning. Those days are past, and both the shearer and their owners ought to be glad of it.

A GOOD smoothing-barrow run over the cornfield just before the corn comes up, if it is thoroughly done, will destroy almost every spear of grass and every weed that has shown itself, besides benefiting the corn. As this may be done rapidly it may be gone over twice or more before the corn is large enough to be dragged down and injured. It will save an immense amount of labor. Any one who has not tried this plan ought to do so. Crops sell too low to do a lick of work more than necessary.

A COMMUNITY of small farms has many advantages which are not known where large farms are the rule. The farms are better cultivated and cared for, and the whole section bears a more thrifty appearance. Neighbors are nearer and generally of the most intelligent class, while roads are better and churches, school-houses, stores and other conveniences necessary to the most advanced civilization are more numerous, and their advantages can be the more easily and conveniently enjoyed.

AN experienced raiser advises poultrymen to reduce the stock of fowls as soon as the year's hatch is well provided for, but hold on to old turkeys and old geese; they get used to the ways of the farm and are worth much more as breeders than young ones. Ducks also are good till 3 years old. A turkey is in her prime at 5, a goose at 20.

FEW farm crops take up so much potash as the potato. It is an alkaline juice that stains the hands when paring potatoes; and it is best removed by oxalic acid. This alone should be a sufficient hint as to the kind of fertilizer most needed for potatoes, and is the reason why this crop soonest fails on sandy soils, where potash is usually deficient.

Asphaltum dissolved in oil of turpentine is claimed to be one of the best parishes for smokestacks and steam pipes, as it has peculiar properties of resistance to heat.

Some carefully conducted experiments have been made in Dublin by Mr. Gerald Stoney and his father, Dr. G. Johnstone Stoney, F. R. S., on the quantity of energy expended in propelling bicycles and tricycles at different rates. Their conclusion is that "the bicycle or tricycle is probably the most economical way of using human muscles."

A recipe for rendering paper as tough as leather consists in mixing chloride of zinc with the pulp in course of manufacture. The greater the degree of concentration of the zinc solution the tougher the paper. It can be used for making boxes, combs, for roofing, and even for making boots.

When you visit or save New York City, save baggage expenses and get to the Grand Union Hotel, opposite Grand Central Depot. 600 apartment houses, fitted up at a cost of \$25 million dollars, \$1 and upwards per day. European Plan. Elevators. Hot and cold water. Railroads. Carriage and elevated railroad to all depots. Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

Cheese that is easily crumbled is digestible, and may be eaten without fear. It is the India-rubber article that gives one a fit of the blues.

If you have a Cold, Cough (dry, hacking) Croup, Canker-throat, Catarrh Dropping causing cough—Dr. Kilmner's Indian Cough Cure (syrup) will relieve instantly—Heals and cures. Price 25c, 50c and \$1.00.

Dame Fortune will never sit in your lap unless prudence and economy have recommended the seat.

THE Indians have at last made a rapid and gigantic stride towards civilization. They advocate the use of Carboline, the great Petroleum Hair product; it gives them an additional chance to collect scalps.

When Jupiter Pluvius pulls the string of a rainbow the objective point is apt target wet.

Hood's Sarsaparilla is characterized by three peculiarities: 1st, the combination of remedial agents, 2d, the proportion, 3d, the process of securing the active medicinal qualities. The result is a medicine of unusual strength, effecting cures hitherto unknown.

Continue to sow early kinds of beets for late use and for greens.

Frazer Axle Grease. The Frazer Axle Grease received medals at the Centennial, North Carolina State Fair, Paris Exposition, American Institute, New York, and others.

Blight attacks without warning; cut away the branch, or tree, as the case may be, and burn.

A New York Hotel. Heretofore when visiting New York we have always stopped at a down-town hotel; but this time, for a change, thought we would try an up-town house, and put up at the Grand Union, corner of Fourth Avenue and Forty-second street.

It is needless to say that heretofore we will take no more down-town hotels in ours when stopping in New York, as we have found it much pleasanter and agreeable stopping up town. The Grand Union, which is run on the European plan, with prices to suit all sized purses—having rooms ranging from \$1.00 a day up to \$5.00 a day, every department being first-class. Besides being just across from the Grand Central depot, street cars, omnibuses and elevated railways run directly past the house, enabling guests to take either of the three from any part of the city. To those who have made a practice of stopping down town when in New York, we would say, try the Grand Union, and if you don't find Mr. Garrison, the manager, a model landlord, running a model hotel at popular prices, you will be unable to find such in the land.—Railroad Record, Atlanta, Ga.

The centimetre of a manufacturing town is ten mills—more or less.

FITS: All Fits stopped free. Treatise and Medical Advice sent free. Send for free copy of Fits. Send to Dr. Kilmner, 361 Arch St., Phila., Pa.

The most abject subject is he that is ruled by a bad passion.

St. Bernard Vegetable Pills. WARRANTED PURELY VEGETABLE. The best cure for Liver and Bilious Complaints, Constipation, Headache, Dropsy, and Dyspepsia. As a Blood Purifier and Spring Medicine. It is a safe and reliable remedy for all the above ailments. Price 25c per box. Sold by all druggists, or by mail, from the proprietor, Dr. J. W. Woodbury, 361 Arch St., New York.

BUFFALO SCALES. STANDARD FIRST PREMIUM. AWARDED AT THE WORLD'S EXPOSITION, New Orleans, Louisiana, 1884. All other principal makers of Scales. Important patented IMPROVEMENTS. BEST VALUE FOR YOUR MONEY. Full particulars, address: BUFFALO SCALE COMPANY, BUFFALO, N. Y.

BOOK AGENTS WANTED FOR PLATFORM ECHOES. LIVING TRUTHS FOR HEAD AND HEART. By John B. Gough.

DREYDOPPEL'S BORAX SOAP. Cleanses, purifies and makes clothes white and sweet. Excellent for Bath and Toilet. Full pound bars only. For sale everywhere.

FITS STOPPED FREE. Lost Persons Restored. Dr. Kilmner's GREAT NERVE RESTORER. For all cases of Nervous Debility, Headache, Dizziness, etc. Price 25c per bottle. Sold by all druggists, or by mail, from the proprietor, Dr. J. W. Woodbury, 361 Arch St., New York.

PENSIONS. \$1000 REWARD. THE VICTOR. A feather duster is a delusion and a snare—it is simply a "flirt."

PISO'S CURE FOR CONSUMPTION. Cures all cases of Consumption, Cough, Spitting of Blood, etc. Price 25c per bottle. Sold by all druggists, or by mail, from the proprietor, Dr. J. W. Woodbury, 361 Arch St., New York.

MARLIN Magazine Rifle. For large or small game—all sizes. The strongest shooting rifle made. Perfect accuracy guaranteed, and the only absolutely safe rifle on the market.

TOWER'S SLICER. The Best Waterproof Coat. The FINEST BRAND SLICER is warranted waterproof, and will keep you dry in the heaviest rain. The new FINEST BRAND SLICER is a perfect creation, and covers the entire outfit. Beware of imitations. Send for prospectus to the "FISH BRAND" SLICER Co., New York, N. Y.

LYON'S Patent Metallic Stiffeners prevent boots and shoes from running over, ripping in the seams or wearing unevenly on the heels.

Scrofula

Probably no form of disease is so generally distributed among our whole population as scrofula. Almost every individual has this latent poison coursing his veins. The terrible sufferings endured by those afflicted with scrofulous sores cannot be understood by others, and their gratitude on finding a remedy that cures them, astonishes a well person. The wonderful power of

Hood's Sarsaparilla

In eradicating every form of Scrofula has been so clearly and fully demonstrated that it leaves no doubt that it is the greatest medical discovery of this generation. It is made by C. L. HOOD & CO., Lowell, Mass., and is sold by all druggists.

100 Doses One Dollar

According to the San Francisco Chronicle an inventor in Stockton, in that State, has discovered a new process of preparing iron which is said to make a metal tougher and more elastic than steel. The material is to be known as wrought cast iron. It is a composition of which 70 per cent. is cast iron, most of the carbon being taken out. Its manufacture costs from 6 cents to 7 cents per pound, and the iron can be made in any ordinary iron foundry. It is said to be the strongest ever made, 100 pounds of it giving three times the strength of 150 pounds of cast steel. It is claimed that besides being tougher, stronger, and more elastic than steel, the new metal can be easily forged without the slightest danger of chipping off. Under the lathe the metal gives a shaving similar to that of wrought iron, and presents a smooth, close-grained surface. The peculiar qualities of the new substance, it is asserted, make it superior for machinery, as it can be made lighter, and yet possess the required strength. The inventor, a young mechanic, of Stockton, has already begun to make castings from it.

It has been proved beyond all peradventure that married people of both sexes suffer less from sickness and live longer than the unmarried. It is also true that in periods of epidemics more single than married persons become its victims. Professor Richard A. Procter while admitting these facts, warns sickly people against marriage mainly on account of the risk they run of perpetuating in future generations their chronic ailments.

Some of the best bolt fitting is being done with tapering holes instead of straight holes. The holes are drilled straight, but are reamed with a reamer that is slightly tapering. The bolts are turned by fixed gauge to fit. The taper is really more than .01 of an inch—or on 3 inches .03 of an inch—but is just sufficient to make a perfect fit when the bolt is home and is enough to allow a slight tap of a hammer, to start it back. Better fits can be made in this way than by straight holes, and work can be put together and taken apart much more rapidly.

The Malva tree of Central India (Bussia latifolia) bears flowers which are now being exported to Europe for their sugar, of which they contain more than half their weight. The tree resembles the oak, and a single specimen sometimes bears a ton of flowers.

Advice to Consumptives. On the appearance of the first symptoms, as general debility, loss of appetite, pallor, chilly sensations, followed by night-sweats and cough, prompt measures of relief should be taken. Consumption is scrofula of the lungs, therefore use the great anti-scrofulous or blood-purifier and strength-restorer, Dr. Pierce's "Golden Medical Discovery." Superior to cod liver oil as a nutritive, and unsurpassed as a restorative. For weak lungs, spitting of blood, and kindred affections it has no equal. Sold by druggists. For Dr. Pierce's treatise on consumption, send 10 cents in stamps. World's Dispensary Medical Association, 663 Main Street, Buffalo, N. Y.

Lazy people are abominations—dead weights to be carried upon some one's over-burdened shoulders.

The Bilious. Dyspeptic, constipated, should address, with 10 cents in stamps for treatise, World's Dispensary Medical Association, 663 Main Street, Buffalo, N. Y.

Buttermilk and lemon juice are harmless cosmetics for removing sunburn and freckles.

Youthful Indulgence in pernicious practices pursued in solitude, is a most startling cause of nervous and general debility, lack of self-confidence and will power, impaired memory, despondency, and other attendants of wrecked manhood. Sufferers should address, with 10 cents in stamps, for large illustrated treatise, pointing out unflinching means of perfect cure, World's Dispensary Medical Association, 663 Main Street, Buffalo, N. Y.

A very thin coat of what is known as French picture varnish will restore chromos and oil paintings to their original brightness.

A Cure of Pneumonia. Mr. D. H. Barnaby, of Owego, N. Y., says that his daughter was taken with a violent cold which terminated with Pneumonia, and all the best physicians gave the case up and said she could live but a few hours at most. She was in this condition when a friend recommended DR. WM. HALL'S BALSAM FOR THE LUNGS, and advised her to try it. She accepted it as a last resort, and was surprised to find that it produced a marked change for the better, and by persevering a permanent cure was effected.

It is a mistake to put spoons in the holder handles down.

FOR DYSPYPSIA, INDIGESTION, depression of spirits and general debility in their various forms, also as a preventive against fever and ague and other intermittent fevers, the "Fraser's Phosphoric-Elixir of Calia" made by Fraser, Hazard & Co., New York, and sold by all Druggists, is the best tonic and for patients recovering from fever or other sickness it has no equal.

A piece of lemon is excellent for cleaning the hands.

LYON'S Patent Metallic Stiffeners prevent boots and shoes from running over, ripping in the seams or wearing unevenly on the heels.

A feather duster is a delusion and a snare—it is simply a "flirt."

Piso's Remedy for Catarrh is agreeable to use. It is not a liquid or a snuff. 50c.

Recycling gas may come along the outside of pipes communicating with the main street supply pipes or directly from the mains themselves, through loose soil, in quantity sufficient to produce admixtures with atmospheric air of great explosive energy within buildings. It may be well, then, to see to it that adequate provision may be made against such contingency by the proper application of asphalt or concrete between the mains and the foundations of houses.

Put pure olive oil into a clear glass bottle with strips of sheet lead and expose it to the sun for two or three weeks, then pour off the clear oil, and the result is a lubricant which will not run gum nor corrode. It is used for watches and fine machinery of all kinds.

A mass of lead in an elevated furnace in Paris was completely dissipated by a stroke of lightning, no trace of the metal being found afterward.

Hall's Hair Renewer is cooling to the scalp and cures all itching eruptions.

For ague, bilious, intermittent, break-bone, and swamp fevers use Ayer's Ague Cure.

If applied immediately, powdered starch is said to take out many kinds of fruit stains on table linen. It must be left on the stained spot for a few hours until it absorbs the stain.

Continue to sow early kinds of sweet corn.

OH! MY BACK Every strain or cold attacks that weak back and nearly prostrates you. BROWN'S IRON BITTERS THE BEST TONIC. Strengthens the Muscles. Steadies the Nerves. Enriches the Blood. Gives New Vigor.

DR. KILMER'S Stop that Cold, Cough, and Sneezing in the Throat. Arrest that Catarrh, Bronchitis or Asthma. This Remedy relieves quickly and cures permanently. It prevents Croup, Night-Sweats and death from Consumption.

The Old Doctor. A Life-Saver. Restores and quick cure. This medicine is sold by all druggists and by mail from Dr. Ward & Co., Louisiana, Mo.

THURSTON'S IVORY TOOTH POWDER. Keeping Teeth Perfect and Gums Healthy. Blair's Pills. Great English Gout and Rheumatic Remedy.

PISO'S CURE FOR CONSUMPTION. CURES WHATEVER ALL LIFE FALLS. Red Cough, Spitting of Blood, etc. Use in time. Sold by druggists.

FACE, HANDS, FEET, and all their imperfections, including Pimples, Development, Superstices, Hair, Hair Marks, Moles, Freckles, Warts, Corns, and Skin Diseases, Black Heads, Bores, Pimples and their treatment. Dr. JOHN W. WOODBURY, 361 Arch St., New York.

CONSUMPTION. There is a positive remedy for consumption, and thousands of cases of the worst kind and of long standing have been cured. Send for free copy of this valuable treatise on the disease, and receive a valuable gift.

RUPTURE. Cures guaranteed by Dr. J. W. Woodbury. The successful operation on ruptures of all kinds, tested by hundreds of cases. Send for free copy of this valuable treatise on the disease, and receive a valuable gift.

PATENTS. Obtained. Send stamp for "Inventor's Guide." BIRNBAUM, Patent Lawyer, Washington, D. C.
