Rochester, N. Y. Post-Express. A gentleman who has spent the summer abroad, said to our reporter, of plumage comes more regularly and is that the thing that impressed him most of all was the number of holidays one encounters abroad and the tion we know not, only judging by prelittle anxiety the people display in the conceived opinions on other matters of

Mr. H. H. Warner, who was present at the time, said, "This is the first summer in years that I have not ment on the water. Been too busy," "Then, I suppose you have been advertising extensively?"

"Not at all. We have always heretofore closed our laboratory during the increase of lice and parasites, as July, August and September, but this summer we have kept it running day and night to supply the demand, which has been three times greater than ever before in our history at this season.' "How do you account for this?"

"The increase has come from the universal recognition of the excellence of our preparations. We have been nearly but when the cold winds of November, en years before the public and the sales are constantly increasing while our newspaper advertising is constantly liminishing. Why, high scientific and medical authorities, now publicly conede that our Warner's safe cure is them sulphur in their food a few times the only scientific specific for kidney and liver diseases and for all the many diseases caused by them."

"Have you evidence of this?" "Abundance! Only a few weeks ago Dr. J. L. Stephens, of Lebanon, Ohio, a specialist for the cure of narcotic, etc., habits told me that a number of eminent scientific medical men had been experimenting for years, testing and analyzing all known remedies for the kidneys and liver, for, as you may be aware, the excessive use of all narcotics and stimulants destroys those organs, and until they can be restored to health the habits cannot be broken up! Among the investigators were such men as J. M. Hall, M. D., Prestdent of the State Board of Health of Iowa, and Alexander Neil, M. D., Professor of Surgery in the college of Physicians and Surgeons and president the position of the house and yard can of the Academy of Medicine at Columbus, who, after exhaustive inquiry, reported that there was no remedy known to schools or to scientific inquiry equal to Warner's safe cure!"

"Are many persons addicted to the

use of deadly drugs?" "There are forty millions of people in the world who use opium alone, and there are many hundreds of thousands in this country who are victims of morphine, opium, quinine and cocaine. They think they have no such habit about them—so many people are un-conscious victims of these habits, They have pains and symptoms of what they call malaria and other diseases, when in reality it is the demand in the system for these terrible drugs, a demand that is caused largely by physicians' prescriptions which contain so many dangerous drugs, and strong spirits, and one that must be answered or silenced in the kidneys and liver by what Dr. Stephens says is the only kidney and liver specific. He also says that moderate opium and other drug eaters, if they sustain the kidney and liver vigor

with that great remedy, can keep up these habits in moderation." "Well does not this discovery give you a new revelation of the power of

safe cure?" "No, sir; for years I have tried to convince the public that nearly all the diseases of the human system originate in some disorder of the kidneys or liver, and hence I have logically declared that if our specific were used, over ninety per cent, of these ailments would disappear. The liver and kidneys seem to absorb these poisons from the blood and become depraved and diseased." "When these eminent authorities

thus publicly admit that there is no remedy like ours to enable the kidneys and liver to throw off the frightful effects of all deadly drugs and excessive use of stimulants it is an admission of its power as great as any one could desire; for if through its influence alone the opium, morphine, quinine, cocaine and liquor habits can be overcome, what higher testimonial of its specific power could be asked for?"

"You really believe then, Mr. Warner, that the majority of diseases come from kidney and liver complaints?"

"I do! When you see a person mop-ing and groveling about, half dead and half alive, year after year, you may surely put him down as having some kidney and liver trouble,"

"The other day I was talking with Dr. Fowler, the eminent oculist of this city, who said that half the patients who came to him for eye treatment were affected by advanced kidney disease. Now many people wonder why in middle life their eye sight becomes so poor. A thorough course of treatment with Warner's safe cure is what they need more than a pair of eye glasses. The kidney poison in the blood always attacks the weakest part of the body; with some it affects the eyes; with others the head; with others the stomach or the lungs, or rheumatic disorder follows and neuralgia tears them to pieces, or they lose the powers of taste, swell or become impotent in other functions of the body. What man would not give his all to have the

vigor of youth at command?"
"The intelligent physician knows that these complaints are but symptoms; they are not the disorder, and they are symptoms not of disease of the head, the eye or stomach, or of virility, arily, but of the kidney poison in the blood and they may prevall and no

pain occur in the kidneys." It is strange that the enthusiasm which Mr. Warner displays in his appreciation of his own remedy, which restored him to health when the doctors said he could not live six months, should become infectious and that the entire world should pay tribute to its power. For as Mr. Warner says, the sales are constantly increasing, while the newspaper advertising is constantly diminishing. This speaks volumes in praise of the extraordinary merits of his preparations.

### FARM NOTES.

MOULTING .-- Ail living things, as well as inanimate objects, undergo changes during life or existence. Our domestic birds show changes from chickenhood to maturity, afterward the annual change looked for by every observant breeder, but with what precaution and preparaconduct of business affairs. "Men boast here," he said, "that they work for years without a day off; in Europe that would be considered a the majority of poultrymen. Moulting the majority of poultrymen. Moulting is a severe drain on the system while it lasts, but after the old feathers are replaced by the new, and the birds safely through the process, the stimulus of change makes them healthier and also makes them lay with increased vigor, after being fully recuperated, for old well as to that of skin diseases. When moulting takes place early in the season, as it does when the fowls the previous year had matured early the change is usually not severe, because the weather is favorable and the fowls can find many of the delicacies that they need for feather making and recuperation and the pelting sleet and snow reach the nade ones that are slow to feather out, there is intense suffering, besides danger of contracting disease. Now see to your moulting birds, and give a week, for it is a great feather maker, also any kind of food and drink that is nutritious, strengthening and stimulat-

THERE is growing desire among the poultry raisers to change the style of poultry houses, and replace those now in use with something that can be moved. A good design has four old carriage wheels attached so that it can be moved from one part of the yard or field to another without trouble. In this way it is surprising how large a house can be moved and with what ease it can be done. The advantage claimed is freedom from a number of diseases that are always more or less present when the poultry house has stood for any length of time in one place. When a portable fence is used be changed in a very little time and the poultry made both healthy and happy by new fields and fresh earth.

THE Poland China is the favorite of the Western farmers, and it is due to the fact that the breed is not so closely inbred as are the Berkshires and Essexs. There are several strains of Poland Chinas, and they are all strong and somewhat heavy boned, which accounts for their vigor and hardiness, the strictly pure English breeds being bred fine in the bone and too close to color.

THE exterior characteristic of a good heavy draught horse are a large, deep chest, straight shoulders, a little inclined, fleshy, a thick body, yet not too much belly, straight loin, the hind quarters a little depressed, thick through the thighs, and long perineum. The horse that has a long perineum, prolonged down from the anus, and thick and short muscles of the thighs, is very strong and a good draught, aniis very strong and a good draught ani-

THE time bran can be bought cheapest is at the opening of the market for new crop wheat, as millers at that time are anxious to economize room. Bran is bulky in proportion to its weight, and for this reason many farmers have not the proper room to store it. But the thoughtful feeder will supply the necessary storing room and buy early, so as to save a considerable sum in buying ton, five ton or carload lots.

THE best way to purify wax is to add to every ten pounds of wax one quart of water and one pint of good vinegar. When all is melted strain and put in a warm place so that it will cool slowly. When cold, scrape the dirt from the bottom where it will be found all together, lcaving the wax clean and nice.

When you visit or eave New York City, save baggage expressage and \$3 carriago Hire, and stop at the Grand Union Hotel, opposite Grand Cen-

trai Depot.

600 elegant rooms, fitted up at a cost of one million dollars, \$1 and upwards per day. European Plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots, Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

The land that will maintain twenty common bred cows will maintain twenty well bred ones and the income from the latter will be considerably more than from the former.

The farmers, in their swamps, we're sure, Could find the roots and plants that cure;

If by their knowledge they only knew For just the disease each one grew.

Take courage now and "Swamp-Root" try—
(for kidney, liver and bladder commants) As on this remedy you can rely.

Vigogue and bourette are the popular Paris cloths for fall frocks.

An Awfal Doom of any nature is usually avoided by those who have foresight. Those who read this who have foresight will lose no time in writing to Hallett & Co., Portland, Maine, to learn about work which they can do at a profit of from \$5 to \$25 and upwards per day and live at home, wherever they are located. Some have earned over \$50 in a day. All is new. Capital not required. You are started free. Both sexes. All ages Particulars free. A great reward

awaits every worker. Big and little buttons are both worn on the same suit or garment.

When you have tried everything else in creation for that bald head of yours, you will probably tumble to the fact that Carboline is the only Hair producer that will do the work properly and well.

Plaid velvets are coming in vogue, but they are not pretty.

Frazer Axle Grease. The Frazer Axle Grease is the best and, intrinsically, the cheapest, Don't work your horses to death by using poor axle grease. Try it.

Shirred corsages and full plastrons are all the rage.

"EUREKA!" yelled a Philadelphia inventor as he rushed into his wife's room with a "dancing darkey" toy in his hand. "I've got an improvement on

this thing and it will make my fortune. "Don't see much chance for improving that toy; it's good enough now," said his wife, suspiciously. "They are

sold everywhere and go by clockwork." "Yes, I know, I know; and that's where the improvement comes in. Clockwork gets out of order, and besides it cost money. I've got a plan to make the darkey dance up and down like mad and it won't require any clockworks at all."

"Well, that sounds a little like sense," was the rather mollified reply. "How

will you do it?" "Simple as A, B, C. I'll just connect the darkey with the mercury of a thermometer,"

Another Life Saved. Mrs. Harriet Cummings, of Cincinnati, Ohio, writes: "Early last winter my daughter was attacked with a severe cold, which settled on her lungs. We tried several medicines, none of which seemed to do her any good but she continued to get worse, and finally raised large amounts of blood from her lungs. We called in a family physician, but he failed to do her any good. At this time a friend, who had been cured by DR. WM. HALL'S BAL-SAM FOR THE LUNGS, advised me to give it a trial. We got a bottle, and she began to improve, and by the use of three bottles was entirely cured."

Shoulder seams are as short or shorter than ever.

Hood's Sarsaparilla is made only by C. I. Hood & Co., Apothecaries, Lowell, Mass. It is prepared with the greatest skill and care, under the direction of the men who originated it. Hence Hood's Sarsaparilla may be depended upon as strictly pure, honest, and reliable

# Beware of Scrofula

Scrofula is probably more general than any other disease. It is insidious in character, and manifests itself in running sores, pustular eruptions, boils, swellings, enlarged joints, abscesses, sore eyes, etc. Hood's Sarsaparilla expels all trace of scrofula from the blood, leaving it pure, enriched, and healthy.

"I was severely afflicted with scrofula, and for over a year had two running sores on my neck. Took five bottles of Hood's Sarsaparilla, and consider myself cured." C. E. LOVEJOY, Lowell, Mass.

As they were all coming out of the theatre together, young Sypher accidentaly tread on the dress of the pretty girl just ahead. "Oh, shool" involuntarily exclaimed

the young girl as she suddenly brought Young Sypher thought he saw chance for a mash.

"You needn't shoo me," he simpered, smartly; "I'm no cow."
"No," the pretty girl returned with a glance that pinned him to the side of the lobby, "perhaps not now, but you

will be when you grow up." Then she swept on, while young Sypher was so astounded that he actually forgot to light his oakum-stuffed cigarette when he got outside.

"SORRY to hear of your trouble; lenkins,"

"What trouble?" "Your misfortunes in a business

"Yes, I have been slightly unfortunate, but you could hardly call me in trouble."

"Why, I understood that you had been forced to compromise with your creditors with ten cents on the dollar." "So I did,"

"Well, that was being in trouble, wasn't it?" "Perhaps it was, but you have saddled the trouble onto the wrong horse.

"What are you driving at these days uncle Rastus?" asked a gentleman on the street.

"I'se a ocurlist, sah,"

"An oculist?" "Yes, sah; you see my boss is er smart man an' he has 'stablished hiss'f roun' de cornah from Bahnum's circus, an' when de folks rush out f'om lookin' at de three rings, an' de stage pahfo'mance an' de hippodrum an' all de animiles, an' wan's a ocurlist, I jes' takes 'em in han' at wunce, sah, an' runs 'em roun' to de offis. We'se doin' a wery la'ge business."

EMBARRASSED YOUNG MAN (who has just been presented, and who is trying hard to say something)-"I think, Miss Belleairs, that I have had the pleasure of meeting you before."

Miss Belleairs—"It is possible, but I

do not remember it." Embarrassed young man-"Was it not at Mount Desert?" Miss Belleairs-"I have never been

there." Embarrassed young man-"Neither have I." A painful pause follows.

(SCENE-Terrible railroad accident. Two friends crawling from under the debris.)

First Survivor - "Good gracious, Jack; hurry up to the nearest town and have a surgeon dress your face. Your laws and chin are frightfully lacerated."

Second Survivor-"Oh, that's nothing. I am used to it." First Survivor-"Used to it!" You certainly was never in a railroad acci-

Second Survivor-"No; but I always have been shaved at a barber's."
