FARM NOTES.

SAVING VEGETABLE SEEDS .- If there are many varieties of the same vegetable in a garden, it is impossible to save the seeds of some in an unmixed state. Sweet corn and all of the squash family, are quite sure to "mix." On the other hand, peas and beans rarely cross. If one saves seeds of any vegetables, let it be of the best. Instead of leaving the last peas on the vines for seed, set apart a portion of a row for seed, and let none be picked from it. By proper care, the quality of a vegetable may be improved. In gaving lima beans, we have for several years selected only those with four beans in the pod; as a consequence, the greater number of pods in the whole crop now have four beans. The selection of the first ripened and best formed tomatoes for seed will have a marked effect upon future crops, and this is the case with all other vegetables. If one has a choice melon ; he would preserve in its purity, the surest method is to fertilize a few female flowers. Take a shedding its pollen, remove the corolla, to expose the stamens. Select a female flower that is just ready to open, but has not been visited by insects; open it and apply the stamens to the pistil of that flower. Cover the flower thus operated upon by a bit of muslin until the fruit begins to grow.

REMEDY FOR POTATO BUGS .- One exchange tells of a farmer who has tried a new remedy for potato bugs ment he and his hired men found every men killed this crop and at night another crop was killed, though not so large; tend to bugs, as a spring bug, he un-derstends, breeds from 300 to 500 dur- university. ing the potato season. He thinks it would be a good plan to dip the pieces of potato in Paris green, as it would save the work of killing them,

KEEP THE STABLE CLEAR OF FLIES .- One of the greatest hindrances "Never mind, you shan't go down to thrift during hot weather is the an- town with me when I go; see if you novance caused by flies. This is true do?" Shortly afterward the firm mothboth in field and stable. In the former | er and boy go down town together. we cannot, in any considerable degree, control them. but in the latter we can, The better class of stables should be provided with screens. By this mode, fumigation being practiced to drive the flies out, the stock may be quite well protected. The placing of small vessels of chloride of lime about the ceiling will sometimes answer the purpose of keeping them out of the building. If a decoction of lycopodunm (sometimes called wolf's-claw), which is the largest of the European mosses, be placed in a bladder, the neck being supplied with a quill nozzle, by means of which the liquid can be sprinkled

The modes of purifying water are either mechanical or chemical, according as the impurities are in suspension

or in solution. From suspended impurities, causing more or less turpidity, water is purified by subsidence and by filtration. On the large scale subsidence is carried on in reservoirs; on the small scale, in water-butts, tanks and cisterns. The process is necessarily slow. The deposited matter, remarks the author of Water, and Water Supplies, should be periodically removed. In semi-barbarous countries muddy water is sometimes fined or cleared by the addition of the mucilaginous pulp of certain fruits, after the manner of which Europeans clarify wine, coffee, etc., by the addition of white of egg or of isinglass. The glairy matter slowly coagulates, enclosing the suspended matters as in a net, leaving the fluid clear. Filtration is conducted on the largest scale through gravel and sand, through spongy iron also-on the small scale through spongy iron, carbide of iron, charcoal, sponge, clotb, paper, some other material being occasionally employed. The chief objection to filmale flower of the same kind that is tration is the liability of a portion of the impurities to decompose and to increase instead of decrease the impurities of water subsequently passed through the filters. To prevent such an unfortunate result the filters must be duly cleansed. Large filters are of necessity kept in order; household filters are, to say the least, liable to be neglected.

A geological discovery of some interest has been made at Nazzano, not far with success. He procured a number from Rome. The gigantic skull of a of boards and placed them here and whale of the Pliocene period was found there among his potatoes, and on the imbedded in yellow sand, which is boards were placed raw potatoes sliced. This mollusks. This relic of It will cure entirely the worst form of Female Com-At noon on the first day of the experi- past ages must have been stranded on the shore, and gradually covered by piece of potato covered with bugs. The sediment. DYSPEPSIA

Causes its victims to be miserable, hopeless, confused, and depressed in mind, very irritable, languid, and drowsy. It is a disease which does not get well of itself. It requires careful, persistent attention, and a remedy to throw off the causes and tone up the digestive organs till they perform their duties willingly. Hood's Sarsaparilla has proven just the required remedy in hundreds of cases. "I have taken Hood's Sarsaparilla for dyspepsia, from which I have suffered two years. I tried many other medicines, but none proved so satisfactory as Hood's Sarsaparilla." THOMAS COOK, Brush Electric Light Co., New York City.

Sick Headache

"For the past two years I have been afflicted with severe headaches and dyspepsia. I was induced to try Hood's Sarsaparilla, and have found great rellef. I cheerfully recommend it to all." MRS. E. F. ANNABLE, New Haven, Conn.

Mrs. Mary C. Smith, Cambridgeport, Mass., was a sufferer from dyspepsia and sick head-ache. She took Hood's Sarsaparilla and

ACAM so common to our best female population. plaints, all Ovarian troubles, Inflammation and Ul-ceration, Falling and Displacements, and the conse-quent Spinal weakness, and is particularly adapted to the Change of Life,

to the Change of Life, It will dissolve and expel tumors from the Uterus in an early stage of development. The tendency to can cer-ous humors there is checked very speedaly by its use. It removes faintness, flatulency, destroys all craving for stimulants, and relieves weakness of the stomach. It cures Bloating, Headaches, Nervous Prostration, Gen-sral Debility, Siegelessness, Depression and Indigrestion. That feeling of bearing down, causing pain, weight and backache, is always permanently cured by its use. It will at all times and under all circumstances act in harmony with the laws that govern the Female system. For the cure of Kidney Complaints of either ser this

For the cure of Kidney Complaints of either sex this compound is unsurpassed. Price \$1. Six bottles for \$5.

Cream Balm an 20 years from tarrh and catarrh -D. T.

IT ANNOYS

"THOMAS, you have disobeyed your old grandfather." 'No I didn't ma." "Yes you did. Have you not been

in swimming?" "Yes, ma." "Didn't I hear him say to you not to go in swimming?"

"Oh, he didn't tell us that, he only came out and said: 'Boys I wouldn't go in swimming,' and I shouldn't think he would, an old rheumaticky man like

him; but he didn't say nothin' about

our going in swimming."

"Don'T you love the smell of a good cigar?" inquired an Austin antipode of Vanderbilt of Gus De Smith. "You bet I do," replied Gus, his face

brightening with anticipation. "Have you got ten cents about your person?" inquired the first speaker again.

"Yes, what of it," asked Gus. "Well you give me ten cents, and that with the money I have will purchase a prime cigar."

"But what will I get?" "Why, you'll get the smell which you say you dote upon so much."

A YOUNG Texas lady of a violent temper, just about to be married, was found weeping by a friend.

"Why do you weep, Fanny? Your future husband is one of the most kind hearted men in the world," asked the friend.

"I know it, but I can't help feeling sorry for the poor devil. I have such a tender heart that it makes me cry to think how I'll boss him around. The poor man has no idea what he is going to suffer at my hands," and once more the eyes of the kind-hearted woman were filled with brine,

BILLINGS (meeting Baxter who is walking rapidly along the street)-"Helloa Baxter, why this rush?"

Baxter-"I am walking fast to keep that fellow Staggs from catching up with me. He's an awful bore. So long.

Billings (meeting Staggs, who is walking slowly)--"Honoa, old fellow, why are you poking along this way?" Staggs-"To keep from catching up with that fellow Baxter. He's the

worst bore in town."

JINKS-"I don't believe I will be home before eleven o'clock to-night, my dear. You see it's initiation night at our lodge." Mrs. Jinks-"You expect to be home before twelve then, I suppose? "Eh, yes; about eleven or halfpast." "Well, in that case you will be awake, and I won't need the key." "The key?" "No. The masque ball closes about midnight." Jinks didn't go.

"Now, lovey," said old Bilkins' wife the other morning as he started to go down town to attend to business, what is ooh going to give wifey for a birthday gift?" (He only gets that kind of taffy once a year.)

"Oh, you shall have a nice hood, if ou like."

"Oh, hoods are so cheap, petty." "Well, the kind of hood I want to ve you costs thousands of dollars."

Nor long since Gus de Smith took a stroll through the Austin graveyard. When he came out of the graveyard be looked very serious. Gilbooly meeting him asked him what was the matter. "Nothing, only I was thinking that the Austin husbands must light all the fires in the mornings."

"What makes you think that?" "Well, I see so many of them are burned to death. I noticed on three or four tombstones: 'Peace to his ashes,'

Will not soil the clothing nor stain the skin. Hall's Hair Renewer. Try it.

"Ayer's Pills cured me of stomach and liver troubles."-D. W. Baine, New Berne, N. C.

ENFANT TERRIBLE—"Pa, is sister Sue jointed like the doll you gave me Christmas?" Father—"Certainly not, Cleopatra Maria. "Why do you ask?" Enfant Terrible—"Cause last night at the musicale, when she got in the middle of the crowd, Dr. Dibbles asked with the mark of the substance of the substanc of the crowd, Dr. Dibbles asked if he

could take her apart for a few minutes,"

giving milk should not be allowed to fall off in quantity from insufficient feed. It is more difficult to increase the flow of milk after a shrinkage from the lack of full feed than to keep up a high activity of the secretion at particular time of the year, shrinkage is established, as a If it will be by repetion, it is always easy to prevent it entirely by liberal The habit will also be transfeeding. mitted to the offspring as a family characteristic that will diminish the value of the animal as a producer of milk. Give the cows extra feed as soon as the pasture begins to get short,

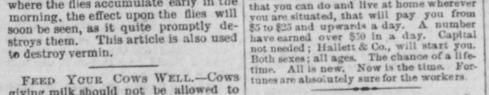

DISTEMPER in a colt takes about three weeks to run its course. All the medicine required is a slight dose of Epsom salts-say four to six ouncesand good nursing. Give warm bran mashes, linseed or oat meal gruel; keep the animal warm, and rub the legs with cloths dipped in hot water, a tablespoonful of mustard in the water would be beneficial if the legs seem to be weak and numb.

THE French, who export more pears than any other nation; cover the inside of the boxes with spongy paper or dry moss, which absorbs the moisture. Each pear is then wrapped in soft paper and placed in layers in the boxes, the largest and least mature in the bottom, filling all interstices with the dry moss. Thus they will keep a month or more. They are so closely packed that though they cannot touch each other all motion is prevented. If one decays the others are not harmed.

deepened by fall plowing, io be mellowed by a frost before a crop is planted upon it. The work can be done at any convenient time as long as the ground remains open. The furrows should be rather narrow, not thrown too flat, and ample means for the exit of water should be provided. Shallow working in spring with cultivator, disk, or spring-tooth harrow will often be found sufficient to fit fall-plowed land for spring crops.

A POULTRY breeder says farmers will feed a bushel of corn to produce six pounds of pork, worth 60 cents, while this bushel would keep a hen. She would lay at least twelve dozen eggs, which, averaging 18 cents per dezen, would equal \$2.16 and she would rear a brood of chickens worth as much more, making a total of nearly

Ir is an interesting and well estab-lished fact that bees never visit two or more classes of flowers on the same trip, but always procure a full load of heney, of whatever kind they com-mence on first, and return to the hive to unload before making a change.
