A NEW VI W OF CONSUMPTION. And One WI h Appeals to Common

Sense - Carable Cases. is not always I lung origin."

'How so? (That is it then?" Many case of consumption are secondary. The disease itself prevails

of approach?" "If you dip ar finger in acid you

burn it; do you ot?" "Yes." "If you we this burnt finger

"Precisely! Now then for my method, which ommends itself to the

reason and ju ment of every skilful practitioner. If the system is run down by excesses, anxiety continual exposure, or or passed out of the system, it burns, ulcerates and fi ally destroys the lung. Is this clear?" "Perfectly!

"Perfectly out how do you prein the system?

"Irregularitie of the liver and kid-

would treat such case

"No, but I will he lungs are only diseased as an effect dishis acid or kidney poison in the blod. After having exhausted all authorzed remedies to exhausted all authored remedies to correct this acid endition, I was compelled, in justice my patients, to use Warner's safe cust though a proprietary remedy, it isnow recognized, I see, by leading physicans, by Presidents of State Boards of Halth and by insurance physicians, as a cientific and the only specific for those great organs in which over ninety present. which over ninety percent. of disease originate or are sustand." "Is this form of testment success-

"It is wonderfully s, and for that reason I am only too willing that you should announce it to the world of consumptives."

Note by the Publishers:—We have received the above interview from H. H. Warner & Co., Rochester, N. Y., with the request that we publish it for the good of suffering people. In a foot note to their letter they say:

"The experience of Dr. Clark is not strange to us. In our correspondence we have found that many thousands of peop'e are suffering from what they think is Consumption, whereas the real diffiulty is with the liver and kidneys, proven by the fact that when these organs are restored to bealth by the use of Warner's safe cure, the consumption disappears, and so does uremic or kidney poisoning, which causes so many symptoms of diseases that the human system is subject to. The same may be said of rheumatism, caused by an acid condition of the system. We insist upon what we always have claimed, if ou remove the cause, the system will soon perfect the work already begun. Mrs. Kev. Dr. Theodore Wolf, of Gettysourg, l'a., wife of the editor of the Lutteran Quarterly, said her friends thought her 'far gone with Consumption, but after a thorough treatment with Warner's safe cure, she says: 'I am perfectly well. We can cite thousands of such cases, but one is enough. If you publish the above article, kindly send us a marked copy.

We glally give place to the article, for if we can in any way stay the ravages of Consumption, which carries away so miny millions yearly, it is our bounden duy so to do.]—PUB.

Pull up the corn-roots and put them when plowing in the spring, and will entail but little labor if gathered now before the ground is frozen. If chopped to pieces so much the better, but even if thrown in the barnyard entire they can be put to more service than to attempt to rot them in the ground, which is a slow process.

By carefully weighing a small sample of wheat, counting the number of kernels in such sample, and multiplying by the number of times the weight of such sample is contained in the weight of a bushel, we have found that of good, plump kernels there are 650,000 to plump kernels there are from 650,000 to 750,000 m a bushel. Accordingly one bushel of seed to the acre will allow from fourteen to seventeen karnels to the square foot, or one plant to every third inch in either direction. If all the seed grew this would be quite thick enough, as one plant often sends up a dozen or more stalks.

Horses hard at work need blanketing while at rest at the season nearly or quite as much as they do in winter, when colder weather sweating. Whenever with sweat he is liab if chilled by exposure put a horse in his state to eat, even if he has very short time.

FARM NOTES

THE FRUIT HARVEST. -The earlier the variety of apple or pear, the shorter, as a rule, the interval between maturity "Many per and die of Consumption who could early be cured," says Dr. S. C. Clark, Watertown, N. Y., "If while with winter kinds, it may be sevthey would grat it right. I have a eral months. Winter apples differ new view of ledisease. Consumption among themselves, in the time of picking. Those which, lik the Rhode Island Greening, began to fall soon after maturity, should be gathered first, while others may be left until there is everywhere, the best practitioners danger of severe frost; a light frost does refuse to attr ite it entirely to inheri- not injure them. Baskets of convenient tance or the ather. If a person lives size with a little hay in the bottom may in the most vorable climate in the world and has my tendency to lung weakness, if ctain conditions exist in handle to allow it to be hung to a the system, nat climate, however favorable, will ot prevent development of the disease. The disorder in such open by a stick. Self-supporting ladcases is only secondary symptom in the lungs of she other ailment, and can never be red until approached through its some."

"Yes, doctor but what is the method of approach?"

open by a stick. Self-supporting ladders and step-ladders of different lengths, should be used in preference to common ladders to lean against the tree. When the fruit is mature it will readily part from the tree, no force being required. Early apples may be ing required. Early apples may be placed in a barrel at once, while the late ones may be laid in beaps for two or three weeks to be covered with straw when there is danger of freezing. Here every second th the acid, what is they part with some moisture, the skin the result?"

"Why, coulent inflammation, festering and evel hal destruction of the finger."

"Processor! The acid, what is they part with some moisture, the sain toughens, and they keep better than when barrelled at once. Even in years of abundance, really fine fruit with ready sale, and careful assorting is more necessary than when the fruit is scarce. In barreling make two qualities for market and one of inferior fruit bu know certain acids to be disposed of at home. Red apples are developed a the body. Well, if the system is a right these acids are neutralized or cilized and carried out. ally have a bloom upon the surface, upon which much of their beauty depends, and in handling, carefully avoid rubbing this off, Fill the barrel slightoverwork, thes acids accumulate in the blood. If there is any natural ing the top layer with the stems upward, and bring the head to its place by the weakness in the lung, this acid attacks it, having a natural affinity for it, and if the cid is not neutralized lever. The barrels may be left under a shed until there is danger of freezing, shed until there is danger of freezing, when they are to be taken to the cellars.

SELECTING FLOWERS. - Flowers should be selected with especial reference to the use they are to serve. "Irregularities of the liver and kidneys create this ecess of acid and the supply can recting the wro gardion of these organs. The kidn out in quantity of this acid dail blood, would ki the stomach, the stomach, the stomach, the are all conspiring the wonder is the wonder in the wonder is the wonder in the wonder in the wonder is the wonder in the wonder is the wonder in the wo Again, the dish chosen should be of a peculiar shade of yellow. For large jars standing in a corner or some conspicuous place, nothing is finer than the perennial larkspur, cutting the stalks long and giving them the centre of the vase, with branches of double lemonyellow hollyhocks about them. A vase full of hollyhocks in yellow, scarlet and white is sure of admiration, provided the vase is large and the stalks are cut

> Cows are as liable to founder as horses, or, at least, they will show the characteristic lameness of this disease after over-feeding on almost anything. We have seen it where apples, potatoes or green corn were the articles with which the stomach was overleaded. Any such ration fed to excess will stop at once the flow of milk in the best cow, and it will take several days of careful management to restore it. If she dungs freely, keep her in a dry place, especially at night, and give light, nutritious, but easily digestible food. A cow suffering from indigestion is very liable to take cold if exposed to storms and chilly weather at night.

Militaire gives us some particulars concerning a torpedo cannon ball invented by Captain Coudray, of the navy. Four years ago the captain presented his projectile to the authorities, who at once ordered experiments to be made with it at Gaves, near Lorient. We are told that for some time past the modest inventor has been engaged in manufacturing his projectiles under the supervis-ion of a special commission named by

A Torpedo Cannon Ball. - The Avenir

the Minister of Marine. At first it H. T. Balcom, Shirley Village, Mass. was found that all the projectiles "I had rheumatism three years, and discharged at the mean velocity of 150 metres a second rebounded on striking the object at which they were fired. Time was afforded to Captain Coudray to improve his invention, and it seems that, in spite of much head-shaking on the part of the savants, he has succeed-ed in curing the defect complained of. The torpedo cannon ball, we are assured, now travels at the rate of 300 metres a second, and instead of rebounding on striking a ship, glides along its side, and never loses contact

until it explodes. The last cannon balls constructed contain a charge of 40 pounds of guncotton, although 25 pounds is said to be sufficient to blow up the biggest vessel. It is stated that these projectiles can be fired to a much greater distance than the Whitehead.

It is not generally known, perhaps, that the cork tree is really a peculiar kind of oak, the cork being the soft cellular bark lying just inside the exteterior woody covering. It is removed by making several longitudinal clefts up and down the trunk, and then girdling the latter with horizontal incisions. This operation is not perference, however, until the tree has attained a certain age, generally fifteen years, and the first crop is employed only for inferior purposes. Seven years afterward the tree will have another coating of bark, which is stripped and used for making corks, and so on, every five or seven years, according to the quality of the ground. Between the cork and the tree there is another bark that is used for tanning, but this is only removed when the tree is cut down. It is a curious fact, too, that if any portion of this inner bark be destroyed further

According to Professor J. Norman Lockyer, the English astronomer, the total number of stars of which some knowledge can be gained with the optiways had the last word. Mrs. Fogg cal aid now available is from 40,000,000 to 50,000,000. Only about 6000 are visible to the naked eye-3000 in the northern hemisphere and 3000 in the southern.

Rheumatism

We doubt if there is, or can be, a specific remedy for rheumatism; but thousands who have suffered its pains have been greatly benefited by Hood's Sarsaparilla. If you have failed to find relief, try this great remedy.

"I was afflicted with rheumatism twenty years. Previous to 1883 I found no relief, but grew worse, and at one time was almost helpless. Hood's Sarsaparilla did me more good than all the other medicine I ever had."

"I had rheumatism three years, and got no-relief till I took Hood's Sarsaparilla. It has done great things for me. I recommend it to others." LEWIS BURBANK, Biddeford, Me.

Hood's Sarsaparilla is characterized by three peculiarities: 1st, the combination of remedial agents; 2d, the proportion; 2d, the process of securing the active medicinal qualities. The result is a medicine of unusual rength, effecting cures hitherto unknown. Send for book containing additional evidence. "Hood's Sarsaparilla tones up my system, purifies my ificod, sharpens my appetite, and seems to make me over." J. P. THOMPSON, Register of Deeds, Lowell, Mass.

"Hood's Sarsaparilla beats all others, and is worth its weight in gold." I. BARRINGTON, 130 Bank Street, New York City.

Hood's Sarsaparilla Sold by all druggists. \$1; six for \$5. Made only by C. I. HOOD & CO., Lowell, Mass.
