#### FARM NOTES.

RUINING MILCH Cows.-Milch cows are frequently very much injured and occasionally ruined by careless and harsh treatment connected with their being milked. The milk has a natural flow and should not be too somebody else," much burried for the sake of saving time; it should be drawn steadily and in correspondence with its natural flow. Some cows have very tender teats, and this fact requires the attention of the milk-man, since too rapid work would have a tendency to do in-

jury to them. But probably the most important consideration is the attention that is paid in the line of kindness; cows are frequently very sensitive, and harsh treatment either by words or act renders them exceedingly restive. A cow that is impatient does not kindly submit to rough handling, and soon the ening) but then you know, papa, I disposition is ruined by bad treat-

ment. We have known cows so restless to harsh or boisterous treatment that they would almost wholly withhold their milk. Among animals kind treatment is always appreciated. To be gentle and kind to animals inspires confidence, of manure is a liberation of carbonic and for the reason no one should be acid gas, which acts upon the soil who is subject to fits of passion, and would be harsh to them or who would be boisterous in manner, if the welfare of manure, therefore, does not depend and future good of such animals is de- solely on the amount of material added

LETTUCE. - The secrets of successful lettuce growing, says a careful observer, are early sowing, rich, well prepared soil, and giving the plants plenty of room. The seed should be sown early because being small, it must be planted shallow and hence cannot endure much drouth, and also because lettuce is a cold water plant, and so thrives better in the moist and mild weather of spring than the dry and hot weather of summer. The soil should be rich to promote rapid growth, and well prepared to facilitate the germination of the seed. As the plants of most varieties when fully developed are a foot or more in diameter, it is obvious that the rows should be rather more than a foot apart; 18 to 20 inches is a good distance. Sow the seed rather thinly in the drills, and as soon as the plants are sufficently large for use commence thinning out the rows; at first to about 2 inches apart. When the bed is passed over in this way, go over it again, thinning this time to 4 or more inches apart. By following this method, removing each time every alternate plant, the remaining ones rapidly develop and the later ones will grow to an immense size, often a foot or more in diameter. If | CAL ASSOCIATION, 663 Main Street, Burthe variety is one that heads well, the falo, N. Y. later plants will take the appearance of miniature cabbages.

st. Joseph, Mo., Still Leading All Competitors in Real Estate Deals and the Acquisition of Substantial Enterprises,

The most noticeable real estate activity continues to prevail at St. Joseph, Mo., says a correspondent of an Eastern paper. Packing houses and other industrial enterprises, among them the Louisiana Tobacco Works, are going in at a lively rate; one of the chief evidences of the growth of the city being the granting of a franchise to a syndicate of Kansas City capitalists for the construction of an extensive system of ca-ble lines, to be commenced at once, and to not required. Either sex; all ages. cost \$300,000. The best evidence, however, is in the showing of actual transactions closed in one week recently: W. A. P. McDonald bought 99 lots in Eastern Ex-tension for \$10,300. He sold 54 of them for \$10,700, and sold balance at an advance of \$20 per toot in cost. Sam Nave and J. S. Britton bought a lot in Patee's addition for \$2,000 and sold for \$3,000 in four days. W. \$2,000 and sold for \$3,000 in four days. W. H. Constable bought lot 2, block 54, St. Joseph Extension, for \$300, and sold for \$550. J. S. Blackwilder, of Chicago, bought eighty feet, southeast corner of Third and Sylvanne, for \$14,000, and has been offered nearly double that for it and refused it. J. M. Hill paid \$7,000 for northeast corner Second and Francis, and has since refused \$18,000. C. W. Brown bought two lots on St. Joseph avenue for \$1,900, and sold in six days for \$3,000. John Kelly and sold in six days for \$3,000. John Kelly bought two lots in Eastern Extension; he paid \$600; in thirty days he sold it for \$900; it has since been resold for \$1,200. J. F. Tyler bought a lot in Eastern Extension for \$125 and sold to Hubbard for \$500, who has since been offered \$700. L. E. Carter bought a lot in January in Kemper's addition for \$700. In three days after he was offered \$1,000, and since then \$2,000. He bought four lots in Robidoux addition for \$4,000; sold for \$6,000, and his purchaser sold for \$8,000. Mrs. N. M. Brewster conght three lots for \$500 and sold for \$1.150 in three days, and in four days they were resold for \$1,400. D. G. Griswold bought six lots in East St. Joseph for \$200 and sold the next day for \$750; also three others for \$200 and resold in three weeks

One of the publishers of Hoye's Directory, speaking of the Western cities and the prevailing boom, writes as follows of St. Joseph, where he has just issued the Directory for 1887: "Not only has St. Joseph increased in population at a most satisfactory rate, there being an increase in one year of 5,846, while the total population in round numbers is shown to be 60,000, but she has undergone a spirited revival that augurs the outstripping of all compe-tition. Fen years ago the city had scarcely a dozen manufactories, whereas the year '87 finds her with some 170 of all kinds, with thirteen railroads, the largest stockyards west of Chicago, some thirteen miles of streets, paved with asphaltum, and as many miles more under contract, with the electric motor soon to be in operation on two of the car lines, and the cable line an assured fact, and new enterprises springing up faily on every hand. The demand for real estate has been steady and active. For the past year St. Joseph has led almost continually the other cities of the United States in bank clearances, the per cent. of increase over 1886 reaching in one case 140.7, and up to date maintaining an average of almost 100. Down to Dec. 31, 1886, St. Joseph's jobbing houses did a business of \$110,539,000, showing an increase in the business of 1886 over that of 1865 of \$23,111,028. A fair indication of the increasing business may be sought in the fact that St. Joseph now employs a force of commercial travelers numbering 1,013

Over-Worked Women. For "worn-out," "run-down," debilitated school teachers, milliners, seamstresses, housekeepers, and over-worked women generally, Dr. Pierce's Favorite Prescription is the best of all restorative tonics. It is not a "Cure-all," but admirably fulfills a singleness of purpose, being a most potent Specific for all those Chronic Wesknesses and Diseases peculiar to west Weaknesses and Diseases peculiar to wo-men. It is a powerful, general as well as uterine, tonic and nervine, and imparts vigor and strength to the whole system. It promptly cures weakness of stomach, indigestion, bloating, weak back, nervous prostration, debility and sleeplessness, in either sex. Favorite Prescription is sold by druggists under our positive guarantee. See wrapper around bottle. Price \$1.00 a bottle, or six bottles for \$5.00.

UVILLA, W. Va., Nov. 17, 1886. Recently I bought a young horse. He was taken very ill with Pneumonia. I tried to think of something to relieve him. Concluded what was good for man would be good for the horse. So I got a bottle of Piso's Cure and gave him half of it through the nostrils. This helped him, and I continued giving same doses night and morning until I had used two bottles. The horse has become perfectly sound. I can recommend Piso's Cure for the horse as well as for N. S.
