

ONE BY ONE.

A Direful Avalanche in Every Known Zone.

AND THOUSANDS OF PEOPLE CRUSHED BY ITS PITiless POWER.

Far up in the dizzy Alpine heights, above the line of perpetual frost, where the brilliant glitter of the snow under the midday sun seems only to intensify the cold, the Ice King would seem to hold undisputed sway. But even here the atmosphere of the more sheltered nooks.

The dry snow softens a little, the wind catches it up and tosses it about, and the star-like flakes are rolled into a tiny ball that the footsteps of a child might easily crush.

Then comes the rude blast from the mountain top and drives the ball up and down the high valley and across the vast trackless fields of snow and ice. It gathers size and strength at every turn; huge rocky boulders and mountains of ice are imbedded in the now slowly moving avalanche, which sooner or later descends with frightful velocity to the valley below.

The luckless village in its pathway is doomed! The air is thick with the falling snow! An awful rush! A roar reverberates through the mountains, and the little Swiss hamlet is swept away!

The foregoing is so applicable that we use it as an illustration. As the wind catches up the snow particles on the mountain tops so the heart catches up the blood as it passes from the kidneys and other organs, and sends it coursing through the system. As it rushes along it drops the uric acid that the unhealthy kidneys have left in the blood in the form of insoluble crystals, causing enlargement of the joints and intense inflammation in the system which is often called acute rheumatism. Eventually the joints enlarged by these crystals become stiff and painful. If these crystals are dropped in the liver they are called gallstones, if in the kidneys gravel, if in the bladder calculus or stone.

If this uric acid or kidney poison remains in solution in the blood it circulates throughout the system, causing irritation, which produces, according to the location of the irritation, pneumonia, consumption, hacking cough, heart disease, inflammations and fever, skin diseases, paralysis, apoplexy, and makes the system susceptible to colds, chills, and all the other common disorders of which uric acid is the principal cause.

The little child upon the mountain top can crush in its tiny hand the first formation of the rushing avalanche.

So, too, the calamitous results noted can be as readily prevented if the right means are used at the right time.

"But how?" our readers may ask.

Listen and we will tell you. It is a fact of medical science that the kidneys are the chief blood purifiers of the system; the chief blood poisoner is uric acid which the kidneys alone can expel. If the thousand little hair-like sewer tubes of the kidneys, through which the entire blood supply passes, the same as through the heart, are diseased they cannot separate and expel this poisonous waste matter from the blood.

Now, as another matter of scientific fact, disease of these little sewer tubes is more common than of any other delicate part of the body, and it is because Warner's safe cure, gentle and natural in its action, has such wonderful power in preventing and curing disease of these all-important tubes, that it is recognized as a great scientific specific—a power possessed by no other such remedy on earth. When the kidneys, the only blood purifying organs, become inactive and diseased, any disorder to which the system is most liable may be expected.

Then it is that trouble begins, and the doctors fail miserably because they can only treat the effects—the cause is beyond their power! Hence it is that the proprietors of Warner's safe cure claim to cure so many apparently different diseases—it and it alone reaches and cures the cause, and then, of course, the effects disappear.

We incline to the belief that their theory is correct and so recognized by scientists who have given the subject much study.

This frightful disorder is depopulating our homes faster than we are aware of. Like the avalanche of the mountain, it is causing the death of all with whom it comes in contact. It does not sweep away an entire village or hamlet at once, but one by one the people succumb to its pitiless power. The final, or terminating, cause may be given another name and be so treated, but the cause is the same, and the cause of all these effects, how many soever they may be, is the same, and for that cause there is but one rational form of treatment.

If you do not crush the avalanche as it is forming, in the manner indicated, it will certainly crush you!

Take your choice! CHICKENS for shipping to market should be dry pickled, and care taken to remove all the pin-feathers, and avoid tearing the skin. For packing, use clean, hand-thrashed dry straw. If this cannot be obtained without some trouble, clean pat straw will answer. Place a layer of straw at the bottom of the box, then one of poultry, packing snugly, backs upward, filling all vacancies with straw so that the cover will draw down snugly on the contents.

THE first planting of anything in spring should be covered very lightly. While the soil is cold from deep freezing or ice water during winter the sun warms it only a little below the surface. There is always moisture enough in early spring to bring seeds up, and once they are germinated the plants will give their roots all the needed covering by striking down into the soil when this is better for their growth.

ASHES, or potash salts, will be found excellent for the fruit trees, now that they are throwing out leaves. Later on the application of super-phosphate will be of advantage.

FARM NOTES.

SHEEP RULES.—Under the heading a "doater" says: "Never frighten sheep if possible to avoid it. This does not apply to the old ram, with mischief in his eye and thunder and lightning in cold weather. A little rye is good for puny animals of other descriptions. Separate all sick, weak, or thin ones in the fall and give them special care. If a sheep is hurt, wash the wound, bathe with turpentine and coat with tar. That night give your neighbor's dog a dose of lead. Keep a number of good bells on your sheep. It will make them feel good. Do not let the sheep spoil wool with chaff and burs. Cut tag locks in early spring. This is a matter of necessity. For scour give pulverized alum in wheat bran. Prevent by taking great care in changing from dry to green feed. Take care of the lambs—keep them in one spot as a sheepskin. Keep one two-year-old ram to fifty ewes. This is for the looks of the thing. Carefully select breeding ewes; cull out all the old and inferior stock for market. Keep at the head of the flock a thoroughbred male; feed well; breed judiciously."

The best plant at present known for consolidating, by the interlacing of its roots, the loose soil of a newly made embankment is, according to M. Cambier (of the French Railway Service), the double poppy. While the usual grasses and clovers need several months for the development of their comparatively feeble roots the double poppy germinates in a few days, and in two weeks grows enough to give some protection to the slope, while at the end of three or four months the roots, which are ten or twelve inches long, are found to have interlaced so as to retain the earth far more firmly than those of any grass or grain. Though the plant is an annual, it sows itself after the first year, and, with a little care, the bank is always in good condition.

ONIONS are always grown on old ground, and as a preparatory crop carrots are the best. Four or five pounds of seed to the acre is best, as much of the seed falls to grow, from the effect of the smut or some similar cause, which destroys the vitality of the seed before it breaks through the soil. Plow as shallow as possible—not over four inches—deep plowing being the cause of scullions. The blight is caused by lice, and will show during a spell of very hot, dry weather. To grow the immense crops reported in this country, the land must be very rich. It was formerly the custom to grow onions continuously on the same ground, but now, due to the smut and maggots, the land must be changed after a few years' cropping.

AS the young grass is beginning to shoot keep a close watch on the onion crop. Of all crops the onion soonest succumbs to the intrusion of grass and weeds.

By ENSLAGE and partial sowing a fifty acre farm can be made to keep fifty cows and team.

Use the Frazer Axle Grease, 'tis the best in the world—it will wear twice as long as any other. Ask your dealer for it, and take no other.

The man who is not content where he is, would never have been content somewhere else, though he might have liked it better.

In hundreds of cases, Hood's Sarsaparilla, by purifying and enriching the blood, has proven a potent remedy for rheumatism. Hence, if you suffer the pains and aches of this disease, it is fair to assume that Hood's Sarsaparilla will cure you. Give it a trial.

Work to-day, for you know not how much you may be hindered to-morrow.

The best cough medicine is Piso's Cure for Consumption. Sold everywhere. 25c.

He pulsat a long rope, who waits for another's death.

So FOWL THEY COULDN'T PULLET.—At a little private dinner, partly a very tough fowl is served. Each one in turn tries to dissect it, and the hostess is filled with mortification. However, she recovers herself, and says quietly:

"Well, I warned you every way."

"How is that?"

"Did I not tell you that the pullet would be my piece de resistance?"

A Wonderful Machine and Offer. To introduce them we give away 1,000 Self-operating Washing Machines. No labor or washboard. Best in the world. If you want one, write The National Co., 27 Der St., New York.

One to-day is worth two to-morrow.

FITS: All Fits stopped free. Treatise and 25¢ trial bottle of Dr. Kline's Great Nerve Restorer, free by mail. Send to Dr. Kline, 931 Arch St., Phila., Pa.

Nothing tends to enlarge the mind so much as travelling.

Nothing like Cass's Ashby Cure for Dropsy, Gravel, Bright's, Heart, Urinary or Liver Diseases, Nervousness, etc. Cure guaranteed. Office, 311 Arch St., Phila. \$1 a bottle, 5 for \$5.00. Druggists. Try it.

When you bury an old animosity never mind a tomorrow.

ARE you careful to clean out your houses frequently—at least once a week? Hen houses should be kept so clean that when entering them at night not the slightest odor can be detected. Don't forget to make frequent and generous applications of lime wash, together with sulphuric acid and carbolic acid.

LIMESTONE BOLL is well adapted to tobacco, raising a leaf that burns white and with an agreeable flavor.

A RARE ARTISTIC TREAT.—Omaha Girl—"Is this Mile. Highnote you have so much about a new prima donna?" New York Girl—"Yes, and all New York is just crazy over her." "You have heard her many times, I suppose?" "Only once. Her repertoire is not large yet, but it is sublime. Why, the night I heard her she sang in moire, the front embroidered with pearls and gold, the design being of rows of pines; the bodice was cut square, and she wore natural hiles of the valley plumed with diamonds. Oh, it was lovely!"

No LIGHT USED.—A farmer in England, returning home rather late one night, discovered a young man with a lantern under his kitchen window, when he asked his business there, said he had only come a-courting.

"Come a what?" asked the farmer.

"A-courting, sir. I see courting Mary."

"But what do you want with a lantern?" asked the farmer; "I never used one when I was a young man."

"No, sir," was the young man's reply, "I don't think ye did, judging by the looks of the missis."

FOGG—"Professor Romanes declares that the brains of women weigh less than those of men."

Mrs. F.—"The insulting creature!"

"Why, my dear, what are you saying? For my part, I think the professor is quite complimentary to your sex."

"Complimentary?"

"Certainly. You will observe that he admits, by inference, as it were, that the dear creatures really have brains; otherwise, why should he say 'weigh less?' Whatever his weight must exist. Are you following me, my love? I declare, if she hasn't left me right in the midst of my argument."

SHEEP graze very closely, and should not be allowed on grass that is backward in growth or where the field is not well covered, unless such grass be undesirable.

AS the young grass is beginning to shoot keep a close watch on the onion crop. Of all crops the onion soonest succumbs to the intrusion of grass and weeds.

By ENSLAGE and partial sowing a fifty acre farm can be made to keep fifty cows and team.

Biliousness

Is more general at this season than any other. The bitter taste, offensive breath, coated tongue, sick headache, drowsiness, dizziness and loss of appetite make the victim miserable, and disagreeable to others. Hood's Sarsaparilla combines the best anti-bilious remedies of the vegetable kingdom, in such proportion as to derive their best medicinal effects with the least disturbance to the whole system. This preparation is so well balanced in its effects that it brings about a healthy action of the entire human organism, restores the appetite, and overcomes that tired feeling. Try it this season.

"I have taken not quite a bottle of Hood's Sarsaparilla and must say it is one of the best medicines for giving an appetite and regulating the digestive organs, that I ever heard of." Mrs. N. A. STANLEY, Canastota, N. Y.

HOOD'S SARSAPARILLA

Sold by all druggists, \$1; six for \$5. Prepared only by C. I. HOOD & CO., Apothecaries, Lowell, Mass.

100 Doses One Dollar

YOUNG Frankman (who has been button-holed on the street by Gimlet, the bore, and entertained with a description of that gentleman's emotions on being presented with a gold-headed cane by the appreciative natives while United States Consul to the Cannibal Islands, an account of his great-grandfather's exploits in the Revolutionary War, and kindred topics)—"I say, old man, how do you get rid of a bore?"

Gimlet (who does not see the application)—"Oh, such people never have delay enough to take a hint, and as you can't hurt their feelings I simply bow and walk away."

Young Frankman—"Ah, thanks." (Bows and walks away.)

"I'm going to speak my mind at that meeting to-night, and don't you forget it," said an irate Metropolitan clubber to his wife.

"Going to speak it plainly, are you, dear?" she asked, quietly.

"Yes, I am; I'm going to speak my mind, my whole mind, and nothing but my mind!"

"What a short speech it will be," she said.

OLD GENTLEMAN—"Here, sir, you are a regular fraud! My hair's coming out as bad as ever! This stuff isn't worth a continental."

Barber—"I didn't promise that it would keep your hair from coming out. I said it would preserve your scalp. Your scalp's all there, isn't it?"

"Do you think," she asked, dreamily, as he sat beside her at the circus, "that this is the same elephant I saw when I was a child?"

"No," he answered, with scornful candor; "you know elephants only live to be two hundred years old."

It won't be this year.

"WHY, Jones, what are you doing in the city?" inquired Robinson. "I thought you were going to sail for Europe on yesterday's steamer."

"I thought so, too, but a woman arrested me for breach of promise just as the steamer was about to start."

"Breach of promise! How can that be?"

"I supposed that you were a married man."

"So I am. I was arrested for breach of promise to pay a milliner's bill."

FIRST GIRL—"Miss Beauty is engaged to Mr. Smikes. Do you know him?"

Second Girl—"I do not remember him."

"If you'd ever seen him you wouldn't forget it. He's the homeliest, ugliest looking man in all Nebraska."

"He is?"

"Yes; she couldn't have found a more becoming husband anywhere. His face sets off hers gloriously."

"Aw, De Sappy, what's ailing you this morning?"

"I've weaved bad news, Fitzpercy, old fel."

"Tell me about it."

"Yestaday, I purchased a dozen high collars, doncher know."

"Well, to-day I learn that the Prince of Wales has begun to wear turndowns. It's dweadful!"

So FOWL THEY COULDN'T PULLET.—At a little private dinner, partly a very tough fowl is served. Each one in turn tries to dissect it, and the hostess is filled with mortification. However, she recovers herself, and says quietly:

Why did the Women of this country use over thirteen million cakes of Procter & Gamble's Lenox Soap in 1886? Buy a cake of Lenox and you will soon understand why.

The treatment of many thousands of cases of those chronic weaknesses and distressing ailments peculiar to females, as the invaluable Hotel and Surgical Institute, Buffalo, N. Y., has afforded a vast experience in nicely adapting and thoroughly treating for the cure of woman's peculiar ailments.

Dr. Pierce's Favorite Prescription is the outcome of the result of a great and valuable experience. Thousands of testimonials, received from patients and from physicians who have tested it in the most aggravated and obstinate cases which had baffled their skill, prove it to be the most wonderful remedy ever devised for the relief and cure of suffering women. It is not recommended as a "cure-all," but as a most perfect specific for woman's peculiar ailments.

As a powerful invigorating tonic, it imparts strength to the whole system, and to the womb and its appendages. In particular, for overworked, "worn-out," "run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," housekeepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being recognized as an appetizing cordial and restorative tonic.

As a soothing and strengthening medicine, "Favorite Prescription" is equally and is invaluable in allaying and subduing nervous excitability, irritability, exaltation, prostration, hysteria, spasms and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the womb; it induces refreshing sleep and relieves mental anxiety and despondency.

Dr. Pierce's Favorite Prescription is a legitimate medicine, carefully compounded by an experienced and skillful physician, and adapted to woman's delicate organization. It is purely vegetable in its composition and perfectly harmless in its effects in any condition of the system. For morning sickness, or nausea, from whatever cause arising, weak stomach, indigestion, flatulency, and kindred symptoms, its use, in small doses, will prove very beneficial.

"Favorite Prescription" is a positive cure for the most complicated and obstinate cases of leucorrhoea, excessive flow, painful menstruation, unnatural discharges, prolapsus, or falling of the womb, weak back, prostrated, or falling of the womb, inflammation, pain and tenderness in ovaries, accompanied with internal derangement.

As a regulator and promoter of functional action, at that critical period of change from girlhood to womanhood, "Favorite Prescription" is a perfectly safe remedial agent, and can produce only good results. It is equally efficacious and valuable in the effects when taken for those disorders and derangements incident to that later and most critical period, known as "The Change of Life."

"Favorite Prescription" when taken in connection with the use of Dr. Pierce's Golden Medical Discovery, and small laxative doses of Dr. Pierce's Purgative Pellets (Little Liver Pills, cures Liver, Kidney and Bladder Diseases. Their combined use equalizes the blood, and abolishes cancerous and scrofulous humors from the system.

"Favorite Prescription" is the only medicine for women, sold by druggists, under a positive guarantee, from the manufacturer, that it will give satisfaction in every case, or money will be refunded. This guarantee has been printed on the bottle-wrapper, and is fully carried out for twenty years.
