A terrible famine prevails at Skag ef creasing.

from Southern Minnesota about damage to crops of all kinds by drought and chinch bugs. The wheat crop is badly injured in spots, and while the general crop of the State will be fully up to the average, individual loss will be heavy. Chinch bugs are destroying the corn in most places, and that crop will be shortened considerably.

The finances of the government are beginning to cause considerable discussion and disquiet in administration circles. The prospective rebundance of revenues far exceeds the most liberal margin allowed in the calculations of the Treasury authorities. The excess of last month ran close up to twenty millions. While this is considered above a fair average from now until the reassembling of Congress, there may not be and immediate falling off, as this is the usual period for large receipts from customs and internal duties. The anticipation of the demands of the fall and winter trade is generally the cause of this increase at this season of the year.

There is bad news about the Panama canal. It is going to be a failure. The give perfect satisfaction to all who deal obligations of the company now reach as high as \$275,000,000 and the work is hardly more than begun. The fact is the enterprise is too stapendous, the ditch is too great an undertaking. Even with De Lesseps at the head of it, it appears that the announcement of the failure is only delayed a little longer to postpone the sure coming of the big of Auditor General Niles, Senator Quay financial crash. THE IMPROVED

Wanly Monarch Fance Machine

COMMON SENSE REASONS WHY THE IMPROVED HENLY . MONARCH . FENCE . MACHINE IS THE BEST AND HAS NO EQUAL.

Because the wire is stretched the full length of the field before the weaving is com Because any sized wire can be used, and either 2, 3, 4, or 5 double strands can be used, weaving all with equal facility.

3 Because any size, length, or style of picket, or slat, or board, can be used, weaving fancy iron pickets equally well and solid.

4 Because it will make a fence over rough and uneven ground, or up and down hill alike, making as good a fence as on even, level ground; and the machine being adjustable, the pickets are all woven plumb.

5 Because the Monarch machine stretches the wire tighter, thus making the strongest and best wire and ploket fence.

6 Because any one, man or boy, can operate it, and there are no parts to get out of order and

Because it is made of the best materials, and, with proper care, will last a life-time.

Because the price is within the reach of every farmer.

Because it is the only machine that forces the slat or picket firmly against the wire, thus give slat in such a solid and and permanent manner that it cannot be pulled out, and a is impossible. breakage is impossible.

10 Because the fence made by this machine will turn all kinds of stock, and is much stronger than any barb wire fence, and completely obviates all danger of injury to stock.

11 Because by weaving past the post, and fastening the wire strands to the posts with staples, and not nailing the slats to posts, thus keeping the wood parts from coming in contact with each other, it will not hold the moisture or rot. This is a very important matter, as all boards in board fences soon rot off at post, and occasion continued expense for repair.

12 Because all kinds of old material can be used for making new fence.

13 Because it makes the handsomest, best, strongest, and most durable fence, and is the only first-class, practical fence machine in the world.
