And Some of His Officers Greatly Agi tated-His Discoveries. ST. LOUIS, July 25 .- The Globe-Democrat prints an article that says that in a recent trip over his southwestern roads Mr. Gould made discoveries which are said to have greatly surprised him, and caused

considerable uncasiness among some of his trusted officers. Notwithstanding the shrewdness of Mr. Gould, the article says, there were in his confidence some persons who were making lively work with his profits. In his southern trip Mr. Gould discovered that the price paid for railroad ties at Bald Knob, Gulliver and Forest City, Ark., was from twenty-one to twenty-three cents apiece, and when compared with the price paid to Contractor The Pietures contained in this 512,000.00. for less than \$12,000.00. This is proving a most fascinating book to the public. In t is examined everything that in any way affects the problem of life, or sets conditions upon success in any part of our country, or upon any B miness or Profession. Young men and women beginning life will find the book of great value, and it infuses fresh life into older persons. of great value, and it infuses fresh life into older persons. Cowan, he found that the company had got the worst of it to the extent of ten cents per tie.

In Texas Mr. Gould is said to have learned that wes for which his road had paid 38 cents apiece, had been supplied to contracors within ten; miles of Texarkana for 25 cents, while in other parts of Texas the cost to the contractor had been from 28 to 30 cents. Mr. Gould further learned that this corner in the tie market scooped in not only the Iron Mountain but the Missouri, Kansas and Texas, Chicago, Burlington and Quincy, the Rock Island, and even others, and that the corner had been nurtured for three years. The number of ties for which exorbitant prices had been paid exceeded 10,000,000, and the Missouri Pacific is said to have lost about \$1,000,000. It is alleged that there were some changes in the subordinate departments of the road as the result of this discovery.

MR. GOULD MUCH SURPRISED THREE THOUSAND MEN TO BE SHUT OUT AT NEWARK, N. J.

All Work to be stopped on August 1-Decrease of Membership in New Eng- , land-Other Matters.

NEWARK, July 25.-It is probable that on the first day of August the 3,000 men employed in the leather factories of this city will become idle.

All the firms will stop work on hides and skins on that date for one month, and as the knights of labor understand that this is the beginning of an attack on their or-der the men in every department will quit work with the workers on hides, instead of remaining to finish up their work.

Twenty-seven Newark factories are in the New Jersey leather manufacturers' association and five are not. The latter will work during August. A gentleman who understands the question thoroughly said that when the shops did resume on September 1 it would not be with union men, as it had been resolved o crush the knights. The main cause of this resolve is the strict rules of the unions against the employers and the interference of men of other trades who know nothing about eather.

It is absolutely necessary to close the shops, however, as the leather market is overstocked. If the bosses are sussessful n the fight against the knights it means ower wages, although they are low enough low. Beam-house men, who work overtime, earn \$18 a week, and \$12 a week is a fair average in all departments. In order o get the best labor higher wages should be paid. It was said by another gentleman, largely

nterested in the trade, that no final action had been taken on the labor question, and what is eventually done will depend upon onclusions reached hereafter.

BRITONS WILL BE CITIZENS

The Queen's Jubilee Trouble in Boston Leads to a Naturalization Movement. Boston, July 24 .- A movement of no ittle significance politically, and one of the utgrowths of the recent demonstration against the use of Faneuil hall for the ueen's jubilee, is the plan undertaken by he various British and Scottish associalons in the state for naturalizing their nembers and all other British subjects who may be eligible to citizenship. Those nterested in the movement say that the roposed action is necessary for their own rotection, and, furthermore, is a duty, too ong neglected. The first steps in the direction of the

proposed plan were taken at a meeting folowing that of the executive committee of the queen's inbilee. Thirty-four organiza-tions were represented. An executive board was elected to carry out the idea in view. This board is composed of James Weymes, Jr., president of the Scotch charitable association; John Kinnear, secretary, royal chief of the order of Scotch clans; J. Haire of the British-American club, and Messrs. Coreell and Arnold, Grand Depuies of the Sons of St. George. Among the active promoters of the movement are several large Boston merchants of British origan, in whose employ are many of their wn countrymen, whom they expect to inluce to become citizens.

It is calculated by careful estimate that here are at least 27,000 unnaturalized Britishborn men in the states, a large propor tion of whom are located in the large cities
