IT is a popular mistake to suppose that the bulk of uncleared new land is undrained. Except in bogs and swamps, which settlers always avoid when they can, there is a natural system of underdraining through the channels opened by decaying tree roots, through which surface water percylates very much as it does in the artificial underdrains. On an undrained surface hardened by long cultivation water runs off rapidly; and it is here that floods are most likely to occur. In an experience of many years we have uniformly found that deep underdraining caused the water to run off slowly. It soaks into the soil, and this requires times. The underdrain only takes the excess of water above the point of saturation. It is something like absorbing water from the pressure of a sponge as compared with the same quantity passing off from a hardened, smooth surface. The effect of deep underdrains is very different from that of large and numerous open drains. These last do help the water to run off rapidly, while the underdrain retards it. The draining of a bog or swamp where there is no outlet except as water dries out may sometimes cut off the source of a sprig; but, if it does, the remedy is easily applied. Dig a deep hole or well in the line of the underdrain which it may run through. This will hold a reservoir of much better water than can be got from the bog, and as good as from any spring that finds its source in it. At all events we can not afford to maintain swamps, with their unhealthful malaria, as a means of keeping up our water supply.

SUGGESTIONS FOR THE COW STABLE.

-We like to feed each cow about onehalf bushel of rye meal just before calving, commencing by giving a hand tul of meal in a gallon of boiling water to a feed, at first, and increasing the quality daily, commencing about two weeks before calving. If the udder should become sore, swollen and inflamed, bathe it every two hours during the day with hot soap-suds, rubb ng it long and gently, and drying with a woolen cloth. The last thing at night, apply lard as hot as she can bear it, rutbing it well. For sore teats, wash clean with warm water, and apply glycerine. For an obstruction in a teat, use a silver milking tube. The best way to manage a fresh-calved cow, as far as the cow berself is concerned, is to allow the calf to suck for two to five days, or until you are quite sure the udder is all right. Then take away the calf and milk the cow five times a day for awhile, especially if she is fed liberally for milk. Garget and milk fever are the two ailments most to be dressing of oil, vinegar, salt and pepfeared in a fresh cow. The former is per. Be sure and remember in mixing produced by overfeeding with concentrated of stimulating food, like cotton | for oil, a miser for vinegar, a wise man seed, or corn meal. The best remedy to my knowledge is, one ounce sallpetre | Use at least twice as much oil as vinein the feed. Use this medicine two or gar. three times and frequently foment the udder with hot soap-suds. Anything that interferes with the condition of the cow after calving may produce milk-fever. Exposure, too much exercise or nervous excitement, are all sufficient to bring on an attack, and a recovery is of rare occurrence. It is "the ounce of prevention" in this case, as in so many others, that is worth the pound of cure. Keep the animal quiet for a week before and after calving, and nurse her well.

Do not attempt to use kerosene and water together, as the two liquids will not mix. Hence some plants may be sprayed with pure kerosens, and others with the water. If the kerosene be first mixed with milk or strong soapsuds, and water then added, an emulsion may be obtained that will be well mixed. Many plants are often killed by improper modes of making the emulsion, and too much care in regard to the use of kerosene cannot be taken.

WHERE old peach trees have borne but little fruit, and the main limbs show evidence of decay, cut them back, so as to allow of an entire new growth. Provided the borer be not allowed to establish itself, and the soil be kept clean, the peach tree will endure any amount of cutting back. Wood a year.

THE earliest Lima beans, which are usually found near the lower parts of the vines, should not be picked until enough shall have been allowed to dry for seed, as next season they will produce earlier than the higher grown

A FAST horse is not the best for the plow or cultivator, as such horses not only soon exhaust themselves but the driver also. The best work can usually be done with a slow animal, as the grass and weeds can thus more easily be destroyed.

A good preventive of hog cholera is said to be as follows: For a herd of twenty-five head give twice a week of bran about one peck; salt, one quart; wood ashes, one peck; soda, quarter of a pound, and about one tablespoonful of carbolic acid; all mixed well.

WHEN the animals are turned out to grass provide them with salt freely and regularly. Many good farmers prefers placing rock salt where stock can get to it at all times. When this is done the animals will never take more salt than is good for them.

DENMARK butter makers reckon on in quick oven in thirty minutes. wheat bran, oats and rape cake as first class butter foods; barley as second class food; while peas, rye and linseed cake are placed as low as third class,

If hens are confined to keep them out of the garden, dig up the earth in their yard once in a while. They like the carpet and floor with insect powder. to scratch in the moist earth, and need the exercise.

REPEATED croppings of leguminose crops may so exhaust the soil, as to a teacupful of warm, not hot, water render it what is called "clover" or It should then be swallowed as quickly "bean sick," This condition may be as possible. If in ten minutes vomitremedied by the growth of other crops for several years.

HOUSEHOLD.

BAKED REED-BIRDS .- Clean and draw them nicely, season to suit the taste, and wrap each bird separately in a piece of pure white paper which has been well greased with good butter; put them in a pan and bake in a stoveoven, or, what is better, if you have it, an old-fashioned Dutch oven. But the best way, according to our mind, is to take, say, one dozen prime reed-birds, and as many potatoes (as nearly of one size as possible) as you have birds. Split the potatoes in halves, leaving the skins on, and with a knife hollow out the heart or centre of each until the cavity is large enough to hold a bird. Now season the bird to suit the taste and put it in the hollow of the potato, placing the two halves of each together and securing them in place by means of small skewers, using two for each potato. When all the birds are thus prepared put them into a pan and bake them in the oven. When done you will have a dish to boast of. The potatoes absorb all the julces and steam as they escape from the bird in the cooking, so that nothing of the flavor that belongs to it is lost.

SCALLOPED. - Take fresh or canned tomatoes, I qt.; butter, 1-4 fb,; breadcrumbs, 1 tb.; brown sugar, 2 oz.; pepper, 1 teaspoonful; salt, 3 teaspoonfuls; onion (grated) 1. Put a layer of bread in a baking-dish, then a layer of peeled. sliced tomatoes, and cover with bits of butter, a little of the onion, pepper salt, and sugar; then another layer of bread, and so on, having the last layer of bread and leaving enough of the pepper, etc., to sprinkle over it. Bake canned tomatoes three-quarters of an hour, and fresh ones twice as long.

Green tomatoes are excellent either fried or stewed with vinegar, brown sugar, and a high seasoning of salt, pepper, and powdered spice.

MILK AS A SUMMER DIET .- A Very important element of summer diet is milk, but it must be taken in moderation and carefully. Drink it slowly in small mouthfuls, and if there be any tendency to dyspepsia beat the milk a few moments to break the butter globules and render it easier of digestion. Skimmed milk and fresh buttermilk are infinitely preferable to ice water as cooling and refreshing summer drinks. Icewater dyspepsia is a complaint which is very general, though its cause is but little understood.

BEAN SALAD. - Wax beans make a delicious salad. Choose young beans, remove the strings, break in inch-long pieces, and cook in salt and water. While still warm cover them with a salads the old saying: "A spendthrift for salt and a mad man for mixing.'

WHITE FRUIT CAKE .- One pound of flour, one pound of sugar, one pound of butter, one pound blanched almonds, three pounds citron, one grated cocoanut, flour and beef suet chopped fine, five well-beaten eggs, half a nutmeg grated, a little ginger or spice and some salt; roll out the paste, put it into a cloth, fill it with gooseberries and sugar and let it boil three hours. This is an English recipe.

SPONGE BISCUITS FOR DESSERT .-Take half a pound of flour, three-fourths pound sifted sugar. Beat the whites of six eggs by themselves, add the beaten yelks and toss them together. Put in them a little grated lemon peel, then the sugar, and flirt well with an egg whisk. Stir in the flour with a wooden spoon and put the mixture in small patty-pans to bake, with sifted sugar to glaze, sprinkled over the top.

HARICOT MUTTON .- Make a good gravy by boiling the trimmings, seasoning with pepper and salt. Strain, add carrots, parsnips and onlons previously boiled tender. Slice them in, then pepper and salt the mutton, boil it brown, put it into the gravy along with the vegetables and stew all together.

A PIE FOR DYSPEPTICS .- Four ashes should be used freely in the peach | tablespoonfuls of oatmeal to one pint orchard, and ground bone applied once of water; let it stand for a few hours until the meal is swelled. Then add two large apples pared and sliced, one cup of sugar, and one tablespoonful of flour and a little salt. Mix all well together and bake in a buttered dish. This makes a very fine dish, which may be eaten safely by the sick or well.

> GOOSEBERRY PUDDING .- Make a paste of flour with one teaspoonful of cream of tartar in it, and beat two minutes; one-half cup of cold water with one-half teaspoonful of soda and a little salt in it; stir thoroughly, then add one cup of flour. Flavor with

> LILY CAKE. -Two cups of sugar and one cup of butter mixed together, one cup of sweet milk, one-half teaspoonful of soda, one cup of cornstarch. two cups of flour, one teaspoonful of cream of tartar, whites of five eggs. Flavor, and frost with chocolate frost-

CREAM CAKE .- Beat to a froth one cup of sugar and three eggs; on this pour one cup of sweet cream, then stir in one and one-half cups of flour in which one half teaspoonful of soda and two of cream of tartar are thoroughly mixed. Flavor with lemon and bake

For the destruction of moths, pursue the following plan: Take the tacks from the carpet, fold it back, and wash the floor underneath in strong suds in which a tablespoonful of borax the carpet and floor with insect powder, and re-tack.

Quite as good an emetic as any is mustard. The dose is a teaspoonful in ing is not produced, drink another teacupful of warm water.

WAR TO THE KNIFE. - Miss Shawsgarden (of St. Louis, to Miss Breezy of Chicago)-Well, how is everything in Chicago? Dull as usual, I suppose? Miss Breezy-No, things are looking very bright. How is the pasturage in

"I was not always in this station of life," said the hack-driver plaintively as he reached for his fee. "Indeed?" 'No, sir; at one time I was a wellknown and promising lawyer." "Well how do you feel over your promotion?" was the unfeeling rejoinder.

MAKING HIM BRAVE, -- Mother anxiously)-I'm afraid you are giving the baby too much sugar, James. Father-Not at all, my dear. I want him to be full of grit.

Cool-Jones-But, my dear sir, how can you prove that it's not my umbrella? Smith-By the man who lent it to me a year ago.

SHE-What a lovely summer afternoon. How resplendent the bright orb of day hangs in the blue vault above. He-Yaas, nice day for a feller to get his hair cut.

AUTHOR.-I always test my sketches by reading them to my wife. Friend-Ah, yes, and you use those

she likes.

Author-No, those she doesn't. OUR ARISTOCRACY. - Miss Snobberly, who has just written a letter,-"Ma is a one cent stamp enough for this

letter?" Old Mrs. Snobberly, proudly-"Put on a two cent stamp, my daughter, or people will say that the snobberlys are not people of the right stamp."

CREAM SAUCE .- Melt three ounces of butter; add flour to thicken with half a pint of cream; season with pepper and salt; let it boil and serve with chicken, yeal or sweet bread.

BAKED BEETS .- Wash a half dozen smooth beets and bake them in a moderate oven for one hour; rub off the skins, baste them with butter and lemon juice, return to the oven for five

A little forethought displayed when erecting a corn crib to have it mounted on posts several feet above the ground, and these capped on the top with inverted metal pans, will save enough grain from rats and mice each year to pay for the improvement.

EIGHT drops of tincture of aconite, dropped on a piece of bread and mixed with the food at night, and next morning four drops given in the same manner, is recommended by Dr. J. R.

baking; roll it, about half an inch in thickness; spread with the fruit made smooth and seasoned; commence at one side and roll up, and steam an hour; eat with butter sauce.

\$500 Not Called For.

It seems strange that it is necessary to persuade men that you can cure their diseases by offering a premium to the man who tails to receive benefit. And yet Dr. Sage undoubtedly cured thousands of cases of obstinate catarrh with his "Catarrh Remedy," who would never have applied to him, if it had not been for his offer of the above sum for an incurable case. Who is the next bidder for cure or cash?

Sweet corn makes fine green fodder for the pigs.

A Wonderful Freak of Nature s sometimes exhibited in our public exhi-

bitions. When we gaze upon some of the peculiar freaks dame nature occasionally. indulges in, our minds revert back to the creation of man, "who is so fearfully and wonderfully made." The mysteries of his nature have been unraveled by Dr. Pierce, of Buffalo, and through his knowledge of those mysteries he has been able to prepare his "Golden Medical Discovery," which is a specific for all blood taints, poisons and humors, such as scrofula, pimples, blotches, eruptions, swellings, tumors, ilcers and kindred affections. By drug-

"Untold Agony from Catarrh."

Prof. W. HAUSNER, the famous mesmerist, of Ithaca, N. Y., writes: "Some ten years ago suffered untold, agony from chronic nasal I suffered untold agony from chronic hasas catarrh. My family physician gave me up assincurable, and said I must die. My case was such a bad one, that every day, towards sunset, my voice would become so hoarse I could barely speak above a whisper. In the morning my coughing and clearing of my throat would almost strangle me. By the use of Dr. Sage's Catarrh Remedy, in three months, I was a well-man, and the cure has been permanent."

"Constantly Hawking and Spitting," Thomas J. Rushing, Esq., 2902 Pine Street, St. Louis, Mo., writes: "I was a great sufferer from catarrh for three years. At times I could hardly breathe, and was constantly hawking and spitting, and for the last eight months; could not breathe through the nostrils. I thought nothing could be done for me. Luckity, I was advised to try Dr. Sage's Catarrh Remedy, and I am now a well man. I believe it to be the only sure remedy for catarrh now manufactured, and one has only to give it a fair trial to experience astounding results and fair trial to experience astounding results and a permanent cure."

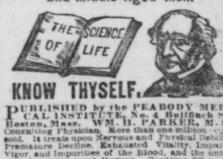

Three Bottles Cure Catarrh.

ROBBINS, Runvan P. O., Columbia Co Pa., says: "My daughter had catarrh whemes he was five years old, very badly. I saw Dr. Sage's Catarrh Hemedy advertised, and procured a bottle for her, and soon saw that it helped her; a third bottle effected a permanent cure. She is now eighteen years old and sound and heartr."
