The latest news of the Lehigh strike received here is that 2,000 Belgian miners have been employed in the old counry to come to this country for the pur pose of working the mines of Eckley B. tCoxe. If the Belgians come, there will probably be bloodshed in the Lebigh region, for the men there say that they might as well die fighting as starye to death.

The employes of the Reading Railroad Company have refused to handle Lehigh coal mined by non-union men, and twenty-five cars of that coal have just been side-tracked near Philadelphia. The demand has gone forth that the national taxes shall be straightway reduced. Congress meets this week. Our present system of taxation is intrenched behind vested interests and human selfishness. The result is apparently satisfactory. Paris is all animation. There are no signs of disorder and everything indicates that there will be none. After the final ballot, Mr. Le Royer, president of the senate, attended by the ministers, went to his private apartments where M. Sadi-Carnot was waiting, and

Sullivan, lord mayor, legislator, journalist, poet, has been sent to prison. Fortunately for him, he was sentenced by a magistrate, who, although bound to carry out the letter of the law, is independent of the Castle, and Mr. Bullivan has been spared the degredation of having exchanged his civic robes for a felon's garb. The brothers Timothy and Edward Harrington will be tried at Tralee before a government magistrate, at whose

hands they expect no consideration. The government, by arresting the secretary of the national league, thought, of course, to throw the league's maching out of gear, but they will soon find they have

More Bombs Found.

ELIZABETHPORT, N. J., Dec. 4 .- Great excitement was caused last night by the discovery of a bomb standing endways against the door of Charles Itgens' grocery store in that place. It was some time before some men mustered up courage to go wthin a hundred feet of the bomb. Finally they went close enough to it to see that it was a piece of gaspipe, inclosed in a wooden tubing. One end of the pipe was plugged with paper, while the other was open. It contained a black, sticky substance. The bomb was taken to police headquarters, and Chief Jennings had it placed in the yard at the rear of the station. It will be carefully examined Monday. Mr. Itgens says that he joes not understand why the bomb was placed at the door of his store. The police are at work on the case.

COMMON SENSE REASONS WHY THE IMPROVED HENLY , MONARCH , FENCE , MACHINE IS THE BEST AND HAS NO EQUAL.

1 Because the wire is stretched the full length of the field before the weaving is com Because any sized wire can be used, and either 2, 3, 4, or 5 double strands can be used. weaving all with equal facility.

Because any size, length, or style of picket, or slat, or board, can be used, weaving fa my iron pickets equally well and solid.

Because it will make a fence over rough and uneven ground, or up and down hill alike, making as good a fence as on even, level ground; and the machine being adjustable, the pickets are all woven plumb.

5 Because the Monarch machine stretches the wire tighter, thus making the strongest and best wire and picket fence.
6 Because any one, man or boy, can operate it, and there are no parts to get out of order and

7 Because it is made of the best materials, and, with proper care, will last a life-time.
8 Because the price is within the reach of every farmer.
9 Because it is the only machine that forces the slat or picket firmly against the wire, thus securing the slat in such a solid and and permanent manner that it cannot be pulled out, and breakage is impossible.

10 Because the fence made by this machine will turn all kinds of stock, and is much stronger than any barb wire fence, and completely obviates all danger of injury to stock.

11 Because by weaving past the post, and fastening the wire strands to the posts with staples, and not nailing the slats to posts, thus keeping the wood parts from coming in centact with each other, it will not hold the moisture or rot. This is a very important matter, as all beards in board fences soon rot off at post, and occasion continued expense for repeir.

12 Because all kinds of old material can be used for making new fence.

13 Because it makes the handsomest, best, strongest, and most durable fence, and is the only first-class, practical ience machine in the world.
