Cumberland Colony, South Jersey.

THREE HOURS BY RAILROAD FROM NEW YORK .- HAVING FOR A MAR-KET THE CITIES OF NEW YORK, PHILABELPHIA BROOKLYN.JER-

SEK CITY, CAMDEN, CAPE MAY, ATLANTIC CITY. LONG

BRANCH, ETC. view." In grasping at shadows we often lose the reality. In no instance s this trulsm better illustrated than in that of looking for a new home. The glowing pictures of the possibilities of the far West have been portrayed with such skillful touches of both pen and imagination as to cause very many to overlook the vastly travel. Now any fool can sell goods in better possibilities at their very that territory." doors almost. They go hundreds or thousands of miles only to thoughtfully, "I think I will start you find that in grasping at a shadow they have lost a comfortable home amid pleasant surroundings. To illustrate our meaning let us take Cumberland Colony, in New Jersey. Here is a tract of land, within a mile or two of the celebrated Vineland district, enjoying with that equal advantages of soil a station on one of the main New Jer- etchings you read of so much in the sey railroads. Possessing for markets the two great cities of Philadelphia and New York, and in addition that of Atlantic City, the most noted seaside resort on the Jersey coast, its summer population approximating 70,000 people. With a soil responding quickly and generously in all garden and horticultural products to the skill and industry of the husbandman. With timber in plenty for lumber, fuel, and fencing. With good water, bealthful climate, of easy access, low prices and easy terms. In a nut-shell, these are the advantages of Cumberland Colony. Compare them with those of the much advertised and "boomed' sections of California or the northwest, and their value is enhanced by the comparison. Then take into account the fact that this tract is almost at you doors; that it can be reached at a small expenditure of time you are still within visiting distance of your old home and friends, and the evening and ate two dishes." much vaunted glories of the West sink inte nothingness. We cite Cumberland Colony not so much for the purpose of advertising its good qualities, as to emphasize the fact that there are many | We have to pay more than double the places in the East possessing all the advantages of California, and also the additional ones of the easy and eheap access to the looker after a will make you feel any more at home, home, and nearness to the scenes sir," and faces which bind him to the place he has called home. It may be asked why are not lands sit- apartment overhead) .- "I say, old feluated as are those of the Cumberland low, you must have been awfully full Colony not sold years ago, if they are last night. Druggists \$1 obtain notes far above the upper limit of human hearing Mr. Francis Galton has devised a whistle blown by hydrogen gas, and he has made such an instrument 0.14 inch long and 0.04 in diameter which gives a sound of 312,000 vibrations per second. Mr. Galton's whistle has constructed with the object of testing the hearing power of insects, which, as is well known, have very

Dr. Julien came to the following to result from neglect and lack of proper attention to such cases. conclusion in regard to the life of stones, defining life as the period during which the stone presented a decent appearance. Coarse brown- inches deep will raise a big crop of decent appearance. Coarse brownstone, best used out of the sun, from five to fifteen years. Laminated fine brownstone, from twenty-five to fifty years. Compact fine brownstone, from one to two centuries. Nova Scotia stone will probably last from fifty to one hundred years. Ohio sandstone, the best of the sandstones, 100 years; Caen atone, from thirty-five to forty years; coarse dolomite marble, forty years; coarse dolomite marble, forty years; fine marble sixty years; pure inches deep will raise a big crop of corn.

"What a lovely complexion.

"What a lovely complexion." we often hear persons say. "I wonder what she does for it?" In every case the purity and real loveliness of the complexion depends upon the blood. Those who have sallow, biotchy faces may make their skin smooth and healthy by taking enough of Dr. Pierce's "Golden Medical Discovery" to drive out the humors lurking in the system. years; ane marble sixty years; pure calcareous marble, fifty to 100 years; granite, from seventy-five to 200 years, according to variety.

According to the best scientific authority on the interior finishing of dwelling houses, wall paper should not be manufactured, as has always been the case heretofore, in a manner to be perfectly air-tight. The reason of this is that, hygienically considered, the blood, and is cured by Hood's Sarsaparilla, walls of a house like the materials of which purifies and enriches the blood and gives clothings hould be porous, having free intercourse with the open air. It is also believed that waterproof paper, such as has come into such extensive use, causes increased dampness of the wall, the stoppage of all circulation of air necessarily preventing their drying
