

HOUSEHOLD.

USEFUL HINTS.—To clean black silk, sponge on both sides with weak ammonia water, then roll up on a roller and leave until thoroughly dry.

A tablespoonful of ammonia in one gallon of warm water will restore the color of carpets.

Alum and plaster of paris, mixed with water and used in a liquid state, form a hard composition and a useful cement.

Dry buckwheat flour if repeatedly applied will entirely remove the worst grease spots on carpets or any other woolen cloth, and will answer as well as French chalk for grease spots on silk.

Unslacked lime is excellent for cleaning small articles in steel, such as jewelry, buckles and the like.

To make imitation ground glass which steam will not destroy, put a piece of putty in the shape of a pad; well clean the glass first and then put it all over. The putty will exude sufficiently through the muslin to render the stain opaque.

CORN MEAL MUFFINS.—Warm one pint of milk; work one cup of flour into a smooth paste, and stir into the milk, when it is warm, not hot; add one tablespoonful of compressed yeast and one teaspoonful of salt; mix well together, and then add enough corn meal to make a thin batter; let it rise over night; in the morning add one scant teaspoonful of corn meal dissolved in tepid water and one of malted butter; bake in muffin rings.

BOSTON PLUM PUDDING.—One loaf of baker's bread cut in thin slices and buttered; butter the pan well; put a layer of bread and raisins, a little cinnamon, nutmeg and sugar, then a layer of buttered bread, and continue until the pan is full, put milk enough around it to soak it over night; cover it with a plate to keep it down; before putting it in the oven, beat from three to seven eggs, according to the size of the pudding; milk enough to have it moist, but not to have it run over in the oven.

OATMEALS.—The Scotch and Irish oatmeal are undoubtedly superior to the domestic, but the American method of furnishing it steamed or partly cooked saves time and trouble.

FEATHER CAKE.—Beat to a cream half a cup of butter and two cups of sugar, one cup of milk with a teaspoonful of soda dissolved in it; beat well together, then add one cup of flour, with two teaspoonfuls of cream of tartar rubbed in it, and the well beaten yolks of three eggs.

SALMON SALAD.—An appetizing salmon salad is made by filling the salad bowl with layers of finely chopped fresh cabbages and of salmon picked into very small pieces. Pour over it a rich dressing. Some salad makers of repute say that each layer should be seasoned by pouring two or three tablespoonfuls of the dressing over it, and others believe the better way to be to make the dressing thin enough so that when it is all poured over the top it will drain slowly through.

SALT-RISE BREAD.—Take half a cup of sweet milk; let it stand on the stove until scalding hot, stir in Indian meal until it is as thick as a custard; let it stand where it is warm until it looks light, about five or six hours; the next morning take warm water and flour, the same as salt rising; stir in your meal and milk, and they will raise in about an hour. There is no need of sour bread if you make it this way.

MACARONI AND TOMATOES.—Use, instead of water to cook them in, some soup stock; allow half a dozen tomatoes of medium size for half a pound of macaroni; boil the macaroni, which you have broken in small bits, and when it is almost tender, add the peeled and sliced tomatoes; season well with pepper and salt. Even without the soup stock the combination of tomatoes with macaroni will be found to be an improvement, at least as a variety in the preparation of the latter.

SCALLOPED POTATOES.—Paro your potatoes and slice thin, put a layer of them in your pudding pan, then a layer of bread crumbs, a little salt, pepper and butter, then another layer of potatoes, bread crumbs, etc., until your pan is most full, pour on milk to moisten, cover it, but in the oven and bake one hour.

FRID BREAD CAKES.—Take any pieces of bread you may have left after meals, soak them in milk and water until perfectly soft; mash fine; add two eggs, a pinch of soda, salt to taste, and enough flour to make them fry nicely; drop by spoonfuls into hot butter or lard. These are inexpensive and good.

CHOICE FIG CAKE.—A large cup of butter, two and a half cups of sugar, one of sweet milk, three phits of flour with three teaspoonfuls of baking powder, the whites of 16 eggs, a pound and a quarter of figs (the choicest), well floured and cut in strips like citron; no flavoring.

Do You Suffer

From rheumatism? If so, read the following "voluntary tribute" from a reliable, conscientious man: "During the fall and winter of 1884, I had a slight attack of rheumatism which, however, passed off toward spring, but the following winter it reappeared with greater severity. Not desiring to become crippled I thought I would try Hood's Sarsaparilla. I took three bottles in all, and I am pleased to say the rheumatic pains ceased, my appetite and digestion became better, and my general health greatly improved." Wm. Scoon, Geneva, N. Y.

Hood's Sarsaparilla

In a paper read recently before the British Association, by Francis W. Webb, he describes his method of impounding the locomotive engine. The system differs from that hitherto adopted, particularly as regards the number and disposition of the cylinders. Instead of having one large and one small cylinder, three cylinders are used, viz., two small high-pressure cylinders and one low-pressure cylinder. The two high-pressure cylinders are attached to the outside frame plates immediately under the foot-plate, about midway between the leading and middle wheels, and are connected through their pistons and connecting-rods to the trailing-wheels. The low pressure cylinder is placed directly over the leading axle, and its connecting-rod is hinged to the middle pair of wheels. By this arrangement the engine is practically balanced, and is enabled to run steadily at high speeds, and the wheels being driven by separate engines, coupling-rods are dispensed with; it is not even necessary that one pair of wheels should be of the same diameter as the other. A passenger engine constructed on this principle in December, 1881, has run more than 100,000 miles, with the heaviest and quickest trains on the London and Northwestern Railway, and the commercial results, when compared with ordinary engines doing the same class of work, have been very satisfactory.

CABBAGE SALAD.—Take good-sized cabbage head and slice it very fine; make a sauce of three eggs, well beaten; three tablespoonfuls sweet cream; one teaspoonful of mustard, butter the size of an egg; six tablespoonful of vinegar, a little red pepper, put on the stove and stir slowly until it thickens; pour over the cabbage while hot. Serve it cold.

If compelled to use canned fruit that is not put up at home, seek to render it palatable thus: Open the can and drain off all the liquor. Put the fruit in a proper dish. To the liquor add sufficient sugar to make it like syrup; let it "come to a boil," but do not let it boil; then pour it over the fruit.

SHE was a crank on the subject of music. A gentleman knocked at her door and asked: "Does Mr. Smith live here?" "No sir, his room is an octave higher—in the next flat," she replied in a pianissimo tone of voice.

AT THE TELEGRAPH OFFICE.—"I want you to send this message to Miss Brown at Galveston. Her mother is not expected to live," said a Texas stranger to an Austin telegraph operator. Operator takes the message, sits down at his table and begins to send it over the wires. "Hold up! Don't give it to her so fast. She's got heart disease. Goslow. Break it to her gently."

AT MANHATTAN BEACH.—"She—'Did you hear Gilmore's concert?'" "I didn't hear all of it, you know."

"Why not?" "Because I came out before it was over. I heard a feller say that the vocalist at with going to sing forever and forever, and I couldn't stay that long, you know. I wanted to catch the 9.30 train, you know."

It seems that the young man did not know that the name of a popular song is "Forever and Forever."

If you have catarrh, you are in danger, as the disease is liable to become chronic and affect your general health, or develop into consumption. Hood's Sarsaparilla cures catarrh by purifying and enriching the blood, and building up the system. Give it a trial.

NEARLY AS GOOD, PERHAPS.

"John, I am afraid we can't go to the theatre any more," said a Chicago woman to her husband.

THE GREAT EARTHLY BOON.

The following words, in praise of Dr. PIERCE'S FAVORITE PRESCRIPTION as a remedy for those delicate diseases and weaknesses peculiar to women, must be of interest to every sufferer from such maladies. They are fair samples of the spontaneous expressions with which thousands give utterance to their sense of gratitude for the inestimable boon of health which has been restored to them by the use of this world-famous medicine.

JOHN E. SMITH, of Millbrook, Pa., writes: "My wife had been suffering for two or three years with female weakness, and had paid out one hundred dollars to physicians without relief. She took Dr. Pierce's Favorite Prescription and it did her more good than all the medicine given to her by the physicians during the three years they had been practicing upon her."

Mrs. GEORGE HENNER, of Westfield, N. Y., writes: "I was a great sufferer from leucorrhoea, bearing-down pains, and pain continually across my back. Three bottles of your 'Favorite Prescription' restored me to perfect health. I treated with Dr. Pierce's Favorite Prescription without receiving any benefit. The 'Favorite Prescription' is the greatest earthly boon to us poor suffering women."

Mrs. E. F. MORGAN, of No. 77 Lexington St., Boston, Mass., writes: "Five years ago I was a dreadful sufferer from uterine troubles. Having exhausted the skill of three physicians, I was completely discouraged, and so weak I could with difficulty cross the room alone. I began taking Dr. Pierce's Favorite Prescription and I was completely cured. In three months I was perfectly cured, and have had no trouble since. I would not be without it for any length of time. I have received over four hundred letters from physicians who have written to me in the most grateful and complimentary manner. I have described my case and the treatment used, and have earnestly advised them to 'do likewise.' From a great many I have received letters of thanks, stating that they had commenced the use of 'Favorite Prescription' and had sent the \$1.00 required for the 'Medical Adviser,' and had applied the local treatment so fully and plainly had done therein, and were much better already."

The treatment of many thousands of cases of those chronic weaknesses and distressing ailments peculiar to females, at the Invalid Hotel and Surgical Institute, Buffalo, N. Y., has afforded a vast experience in nicely adapting and thoroughly testing remedies for the cure of woman's peculiar maladies. Dr. Pierce's Favorite Prescription is the most powerful, invigorating tonic, it is so vigorous or results, in the more aggravated and obstinate cases which have baffled their skill, prove it to be the most wonderful remedy ever devised for the relief and cure of suffering women. It is not recommended as a "cure-all," but as a most perfect specific for woman's peculiar ailments.
