WEAK AND NERVOUS WOMEN.

How Strength of Nerves and Health o Body May Easily be Obtained,
Women are great sufferers from nervousness, weakness, nervous prostration, and
exhaustion. They droop and languish under household cares and work which never They retire tired and wake tired

and unrefreshed; they are worn out and exhausted in nerve and vital power, and have no strength or energy.

Fortunately—and it would almost seem a dispensation of divine Providence to over-worked humanity-there are medi-cines which restore lost nerve forces, rebuild the weakened system and re-establish health, strength and energy. These medicines, which are purely vegetable, have been combined into a wonderful remedy known as Dr. Greene's Nervura Nerve Tonic, which is kept by all druggists at \$1 per bottle. This truly wonderful remedy is without doubt the greatest discovery of

the century, and is the best strengthening and invigorating remedy ever known. For nervous and physical exhaustion, weak, tired, and languid feelings with no power or ambition for exertion, it is a sovereign remedy and absolutely certain cure. In cases of sieeplessness and nervous irri-tability its use will be followed by calm repose and natural, refreshing sleep. For nervousness, nervous debility, exhausted vitality, despondency, and depression of the mind it is a perfect specific. For ma-laria, neuralgia, rheumatism, paralysis, numbness, trembling and insanity it is the only positive and recognized remedy. It never fails to cure nervous and sick headache, weaknesss and pain in the back or side, palpitation of the heart, apoplexy, epileptie fits, hysteria, St. Vitus's dance, dyspepsia, indigestion, loss of appetite, constipation, biliousness, kidney and liver

Other medicines may be offered by drug-gists, but do not be persuaded to try uncertainties, when by the use of this wonderful remedy you can certainly be cured. Should your druggist not have Dr. Greene's Nervura Nerve Tonic, he will get it for you if you insist upon having it. Dr. Greene, its discoverer, is the great special st in the cure of nervous and chronic diseases, and he may be consulted by those using this remedy, or by any sufferer from diseases, free of charge, at his office, 35 West 14th et. New York, personally or by letter.

"Don't Marry Him!"

"He is such a fickle, inconstant fellow, you will never be happy with him," said Esther's friends when they learned of her engagement to a young man who bore the reputation of being a said flirt. Esther, however, knew that her lover had good qualities, and she was willing to take the qualities, and she was willing to take the risk. In nine cases out of ten it would have proved a mistake; but Esther was an uncommon girl and to every one's surprise Fred made a model husband. How was it? Well, Esther had a cheerful, sunny temper and a great deal of tact. Then she enjoyed perfect health and was always so sweet, neat and wholesome that Fred found his own home most pleasant, and his own wife more agreeable, than any other being. As the year passed and he saw other women of Esther's age grow sickly, faded and queru-lous, he realized more and more that he had "a jewel of a wife." Good health was half the secret of Esther's success. She retained her vitality and good looks, because she warded off feminine weaknessess and ailments by the use of Dr. Pierce's Favor-

What is Scrofula

It is that impurity in the blood, which, accumu ting in the glands of the neck, produces andightly kimps or swellings; which causes painful running sores on the arms, legs, or feet; which levelopes ulcers in the eyes, ears, or nose, often causing blindness or deafness; which is the origin of pimples, cancerous growths, or the many other manifestations usually ascribed to "bumora". It is a more formidable enemy than consumption or cancer alone, for scrofula combines the worst possible features of both. Being the most ancient, it is the most general of al! diseases or affections, or very few persons are entirely free from it. How can it be cured? By taking Hood's Sarsa. parilia, which, by the cures it has accomplished, often when other medicines have failed, has proven itself to be a potent and peculiar medicine

BRIGHT'S DISEASE, DIABETES, and DISEASES.

BRIGHT'S DISEASE, DIAMETES, and kindred maladies, have been very largely treated, and cures effected in thousands of cases which had been pronounced beyond hope. These diseases are readily diagnosticated, or determined, by chemical analysis of the urine, without a generally be successfully treated at their homes. The study and practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs.

GAUTION.

These diseases should be treated only by a specialist thoroughly familiar with them, and who is competent to ascertain the exact condition and competent to ascertained by a careful chemical and microscopical examination of the urine), for medicines which are curative in one stage or condition do positive injury in others.

Being in constant receipt of numerous inquiries for a complete work on the nature and curability of these maladies, written in a myle to be easily understood, we have published a large, Illustrated Treatise on these diseases, which will be sent to any address on receipt of ten cents in postage stamps.

We, many years ago, established a Special Department for the treatment of these diseases, under the management of some of the most skillful physicians and surgeons on our Staff, in order that all who apply to us might receive all the advantages of a full Council of the most experienced specialists.

WE OFFER NO APOLORY.

We offer no apology for devoting so much attention to this neglected class of diseases, believing that no condition of humanity is too wretched to merit the sympathy and best services of the noble prefession to which we belong. Why any medical man, intent on doing good and allevisting suffering, should shun such cases, we cannot imagine. Why any one should consider it otherwise than most honorable to cure the worst cases of those diseases, we cannot understand; and yet of all the other maladies which afflict mankind there is probably none about which physicians in general practice know so little. We shall, therefore, continue, as herefolore, to treat with our best consideration, sympathy, and skill, all applicants who are suffering from any of these celicate diseases.
