### BLAINE ON RETALIATION.

He Thinks the Matter Should be Held Back Until After Election.

NEW YORK, Sept. 4.—The Mail and Express' correspondent at Ellsworth, Me., obtained Mr. Blaine's views on fishery policy as follows: The fishing season is over. Nearly all the American vessels have re-turned, and Canada will have none to operate upon until the summer of 1880. In the is a matter of supreme indifference to the fishermen. Therefore it is better not to clothe the present president with any addi-tional powers, since he has shown his utter nai powers, sin stency to deal with the general subject. But let him carry out the present law, as he is bound to do, and this alone may bring Canada to her senses and secure us justice at her hands. For Republicans to vote for the bill reported by Mr. Belmont's committee in the house would be a confession by them that the president's refusal to carry out the present law was justified, and would put a power in his hands which he would wield for partisan purposes. It is much bet-ter to let the matter lie over till the new administration shall come in, which will be better prepared to handle the matter, free from the excitements of our political contests and in ample time to protect every in-terest. To allow the president now to stop the export business of Canada through the United States would seriously interfere with several of our home transportation lines, especially those leading to Portland, and correspondingly depress the entire commerce of that port. It would also afford Canada a pretext for increasing her demands in realiation for such inhibition, and render more difficult the general settlement by ne-gotion. The rights of the Pacific coast should also be remitted to the new administration.

idly. Many of his actions were extremely human. To see him sitting at his little table, napkin around his neck and knife and fork in hand, eating his dinner, was a sight worth seeing, and has been enjoyed by millions of people. Crowley has been the prime favorite of all the young people of New York and the star attraction for visitors to the city. His cage has been the Mecca of thousands daily, and during his illness the keepers have been overwhelmed by anxious inquiries by mail and in person.

Master Crowley was donated to the menag-erie by the Liberian minister. He had bought him in Liberia from the master of a coasting vessel, who had picked him up somewhere near the mouth of the Congo river, on the west coast of Africa. It is in this vicinity, and especially south of the river's mouth, that the native haunts of the chimpanzee are to be found.

The fire originated in a room occupied by three men who had been drunk and when they went to bed left a kerosene lamp burning. It is supposed that in some manner this became overturned and exloded.
