### BEFORE IT IS BORN.

### Some Startling Statements, of General Interest.

Dr. Oliver Wendell Holmes, on being asked when the training of a child should begin, replied, "A hundred years before it is born."

generation is responsible for the condition of the race a hundred years from much or little water or no water at ali; pow?

is this wonderful generation the natural result of the proper diet and medicines of a hundred years ago?

It is conceded in other lands that most of the wonderful discoveries of in from ten to fifteen minutes of taking the world in this century have come from this country. Our ancestors were reared in log cabins, and suffered hardships and trials.

But they lived and enjoyed health to a ripe old age. The women of those days would endure hardships without carbon, is very heating to the blood, apparent fatigue that would startle and agencies that will cool the blood those of the present age.

Why was it?

One of the proprietors of the popular remedy known as Warner's Safe Cure, has been faithfully investigating the cause, and has called to his aid scientists as well as medical men, impressing | half pint of sugar, one tablespoonful of upon them the fact that there cannot butter, three eggs, one large or two be an effect with a cause. This inves- small lemons. Put the sugar and the tigation disclosed the fact that in the boiling water in a saucepan on the olden times simple remedies were ad- stove, mix the cornstarch smooth with ministered, compounded of herbs and roots, which were gathered and stored the mixture thickens, then beat in the in the lofts of the log cabins, and when butter. Reserve the whites of two sickness came on, these remedies from | eggs for the top, have the other white nature's laboratory were used with the and the three yolks well beaten with best effects.

olden time preparations affect the peo- is taken from the oven spread this on ple of this age, who have been treated, top, and replace in the oven to brown under modern medical schools and for a few moments. Serve cold. codes, with poisonous and injurious drugs. This test has been carefully pursued, until they are convinced that the preparations they now call Warner's Log Cabin remedies are what our much abused systems require.

Among them is what is known as Warner's Log Cabin sarsaparilla, and they frankly announce that they do not consider the sarsaparille of so much value in itself as it is in the combination of the various ingredients which together work marvelously upon the system. They also have preparations for other diseases, such as "Warner's Log Cabin cough and consumption remedy," "Warner's Log Cabin hair tonic." They have great confidence that they have a cure for the common disease of catarrh. which they give the name of "Log Cabin rose cream." Also a

"Log Cabin plaster," which they are confident will supplant all others, and do not wash it, put it over the fire in a liver pill, to be used separately or in connection with the other remedies.

We hope that the public will not be disappointed in these remedies, but will reap a benefit from the investigations, and that the proprietors will be drain it in the cold water, beat it in

THE valuable qualities of lemonade seem not to be generally known; as a stomachic corrective, as well as a strengthener of the nervous system,

there is nothing better. Sufferers from rheumatism know its value, and if taken regularly three times a day and at Are we to infer from this that this least half a gill at a time, it will relieve if not cure gout, and can be taken in it is not unpleasant, and one soon becomes used to it, and would rather drink it than pure water. ### FARM NOTES.

THE Holstein cow"Shadeland Boon." from June 6 to July 6 (31 days) produced 125 pounds and 12 ounces of unsalted butter, or over four pounds per day. This is the most remarkable record known. It required about 14 pounds of milk (about seven quarts) to each pound of butter. During seven days of the time she produced a fraction less than 32 pounds of butter, and zave 400 pounds of milk. For two days she lacked only two ounces of prolucing five pounds of butter per day, which was made from 14.18 pounds of milk for each pound of butter.

ASHES should never be left exposed to the rains. They should be kept under cover or scattered at once over the land. The potash in ashes is very soluble, and is easily dissolved out. By carefully preserving the ashes they may potatoes, or on fields deficient in ilkaline substance. They should never be added to the manure heap.

PASTURES should be grazed down, and no tall grass or weeds should renain. Not only is it injurious to allow the weeds and grass to remain, but stock will be inconvenienced in wet leasons unless the frosts come early. Dry pasture should be preferred in ainy weather. Tall grass is very inurious to sheep, getting them wet and :ausing distemper.

A NEW weather prediction has been ncrease before many storms, indicat- dessert, although the title is so very ng disturbance of the upper atmosphere hours before the meteorological nstruments show any change. The lercer the storm the more is the strength of the scintillations increased.

To detect oleomargarine, says a welltnown chemist, mix oleomargarine with a strong solution of ammoula at a temperature of boiling water, and it will produce a thick froth, while pure outter, under the same conditions. forms only a few bubbles.

Young rye gives a rich color to the milk, and promotes the flow. For late pasturage it is excellent, but should not be fed exclusively. In the winter season succulent food is best obtained from ensilage, but the rye can be used until frost freezes the ground.

WHATEVER tends to promote the these ingredients together, form them general health and thrift of the tree into rounds, and bake them in six patty will also free both tree and fruit from pans, blight and scab. Good drainage will aid in accomplishing this; so will more open planting of trees, which allows more sunshine among the branches- m xture of soap and powdered chalk the great vitalizer and giver of life.

hot. Quarter of a pound of macaroni how do I know he don't give milk?" five or six persons. This dish is useful when half a bottle of claret remains from a meal.
