

FARM NOTES.

HINTS FROM NATURE FOR THE HEALTH OF HENS AND THEIR EGGS.—It is an old experience of mine that eggs ranking highest in vitality come from fowls which roam over an unlimited range, and, outside of clean and insect-free quarters, are given the least amount of care, and but little food (or none during the summer) besides what they find on their foraging expeditions. The demands of the egg-mill for raw material keep the bird active and in good health, and prevent the injurious accumulation of fat. Fresh eggs from fowls thus kept, if properly packed in bran or saw-dust, give a good chance to hatch even after a journey clear across the continent. The breeder who surrounds his flock with conditions similar to those found in nature, who scorns the use of artificial methods and feeds, will hear very little complaint of poor "hatches," or of chicks such as a heavy dew, a light rain or a hot sun can kill.

THE manner in which corn is harvested varies greatly in different parts of the country. In a few sections the leaves below the ears are first stripped off while green, and tucked in small handfuls between the stalks of a hill to dry, when they are gathered and bound into large bunches and stored away, making a small amount of the best possible corn fodder. Afterward the tops are cut off just above the ears and cured in small shocks, leaving the bare stalks standing to support and ripen the ears. Where this topping is done before the ear is well out of the milk and the grain has hardened it must to some extent rob the latter of nourishment, of which at this period a large proportion comes from the sap in the top.

THE most general and the better plan is to cut the stalks later on a little above the ground, and stand them up in shocks to cure. In this way the whole of the fodder is secured, and the grain gets the benefit of the sap already in the stalk, besides absorbing additional matter from the atmosphere. From eighty to one hundred hills may be put in a shock, which should be tied around with coarse twine two-thirds of the way from the ground to prevent the loose stalks from being blown about by the wind. Threshing the stalks to gather the grain has been advocated in some quarters, but as yet has not become at all common.

A RECENT experiment in feeding hogs on a mixed diet showed that a pound of dressed pork cost 5.42c., but the value of the manure left over was 2.27c., or nearly one-half the cost of the food. The value of skim milk when used as a part of the allowance for hogs is 1.8 cents per gallon. Heavy hogs do not sell as readily as do those of medium weight. A 300-pound hog is better fitted for thelard-tub than for the table. Small hogs are always preferred, those weighing about 150 pounds each producing a better quality of meat than those that are heavier.

THE uncovered manure pile is a great breeder of flies and a nuisance near a house. But it may also be objectionable from its economic aspect. Flies are great scavengers, but in destroying the offensiveness of manure they destroy much of their fertilizing value. It is better far to avoid both evils by covering manure piles as quickly as made with fresh earth, which is an effective absorbent and deodorizer.

THE scarcity of feed in the fall is often the cause of great losses to farmers, mainly because it tempts them to pasture young clover. This is the dearest of all feeds. A clover plant cropped in August or September has its growth so checked that it cannot stand the winter, and will not grow so vigorously next spring. It is better to buy grain for cows, and feed liberally of the growing corn-pod, rather than turn stock on young clover.

LOOK to the winter shelter now. The more exposed the animal during cold weather the more food required. All the warmth of the body must come from the food, and no animal can fatten except on the food left over from that required for bodily warmth. Shelter is equivalent to food in that respect, and the more comfortable the stock the lower the cost and the greater the gain.

SWEET cream and sour cream when churned together will not produce good butter, yet it is safe to say that a large majority of farmers' wives hold the cream for a week in order to collect a sufficient quantity for a churning. This matter of saving cream is what throws so much inferior butter on the market. When churning is done it is best to have the whole of the cream of the same quality.

Now that the animals are becoming free of the torments of insects they will fatten readily, and will gain much faster in weight than in winter. Feed them liberally and get them as far ahead as possible before cold weather comes on, as it can be done at less cost at this season than later on. Matured stock should be fattened and got out of the way early, in order to make room for the growing animals.

THE color of butter is largely influenced by the breed and the food, but butter color is not objectionable if made of a harmless substance. It deceives the purchaser, however, as many purchasers buy butter because of its yellow color who would not buy it if the butter were sent to market as originally made, and uncolored, on the farm.

OF the different kinds of hay clover is conceded to be the best, as it is well balanced in these elements necessary for growth and production. No food is complete; but, however, where clover is fed liberally and a moderate allowance of grain is added the results are usually satisfactory, provided good quarters are provided and the sanitary conditions completely with.

LOG CABINS, lacking elegance, were yet comfortable homes. Health and happiness were found in them. The best of the available remedies used are given to the world in Warner's Log Cabin Remedies made by Warner of Safe Cure fame. Regulate the Regulator with Warner's Log Cabin Sarsaparilla.

HOUSEHOLD. HOT POT.—The way of making this dish is pretty much the same, whatever the ingredients. The meat is laid in first, plentifully seasoned with pepper and salt, then onions sliced (these had better be just blanched before using, as they are too strong for most people raw) and then sliced potatoes, and so on till the dish is full, finishing off with potatoes sliced a little thicker than those in the layers. Everything, from game, poultry, etc., to roast or uncooked beef and mutton, may be used. I have been told that salt pork is excellent this way but have never tried it. The exact proportions of the Liverpool hot pot, are I fancy, known to no one outside the profession, but they are made with a layer of chicken mixed with mushrooms, oysters, sweetbread, and a little ham, the onions blanched, and the potatoes sliced instead of sliced. The meat in this case has been previously cooked, like the vegetables. This is a very convenient way of cooking up scraps, as game may be substituted for the poultry, with poultry livers in large dice, truffles if handy, in which case be very careful about the onions, in short, almost anything may be used, and it has the further advantage of not spoiling if kept waiting, so long as the oven in which it is cooked is not too fierce. Like Irish stew, it makes a capital lunch to send out to sportsmen in the shooting season, as it keeps its heat well. It is cooked in a dish made for the purpose, in which it is sent to the table. The more refined hot pot of white meat, etc., usually has a cover instead of crisping the top of the potatoes. If made of raw meat, especially beef, it is excellent, but requires a long time to cook properly. Three hours are not too long, as it must be done slowly or it will be dried up.

HOW TO MAKE GOOD BREAD.—Emma T. Gray, in *Godey's*, gives the following recipe for making good bread: "The test of good dough is that it should rise upward instead of spreading. But sometimes this latter effect is produced by its not having been made sufficiently stiff, therefore the necessity of thorough kneading. The pan in which bread is placed and the baking are important items. A good-sized pan is 12 inches long by 4 wide and 4 deep. Bread placed in this size pan would require about an hour to bake. After leaving the oven an hour remove from the pans and place on a clean towel or napkin. If the crusts are desired to be soft, dampen thoroughly another napkin, and closely cover the top of the loaves. When cold put the bread into the tightly closing tin boxes or stone jars. The boxes should not be too large. A great variety of these can be purchased at house-furnishing stores. Some boxes serve as pretty ornaments when seen through a glass-doored china closet. For four large loaves will be required the following: Four quarts of sifted flour—more may be needed, which experience must test—two cakes of compressed yeast dissolved in a large cup of warm water, one tablespoonful of salt, one of sugar and one of butter, one quart of warm water. After half of the flour is placed in the wooden kneading bowl add the sugar, salt and butter, and enough boiling water to mix all together. This being done add a quart of warm water and the yeast, slowly stirring the remainder of the flour. Kneading all thoroughly, cover with a thick towel and leave in a warm room until morning. In hot weather bread had better be made and baked on the same day, as if allowed to stand too long it becomes sour. When sufficiently light to place in the pans flour well the baking boards and hands, but after the dough becomes smooth use as little flour as possible. Fold it over and knead thoroughly for half an hour. Set the pans in a warm place and allow the loaves to rise about forty minutes before baking."

WET AND DRY DEVILS.—Wet Devil: Score any pieces of poultry, game, etc., and spread them with a mixture of butter and mustard (or else use "devil" paste or curry paste). Mix a teaspoonful of cayenne with one of pounded sugar, the juice of a lemon, a glass of wine (either sherry or port, according to your meat), a glass of either walnut or mushroom catsup, and a teaspoonful of any good stock. Lightly grill the meat, heat the gravy all but the boiling point, lay in the meat, and serve all together very hot, with pots of butter on ice. Dry Devil: mix an ounce of butter with about a teaspoonful of made mustard, salt, cayenne, and a few drops of lemon or lime juice, or, if preferred, chili vinegar. Score the flesh to the bone, rub the above mixture thickly in and cover the meat, and broil lightly over a very clear fire. Mutton and beef bones are also excellent this way.

SCOTCH SCONES.—One pint of flour, one half teaspoonful of sugar, one fourth teaspoonful of salt, one teaspoonful of baking powder, one large teaspoonful of lard, one egg, nearly half a pint of milk. Sift together the flour, sugar, salt and baking powder. Rub in the lard cold, and add the beaten egg and milk. Mix into a dough just stiff enough to handle. Flour the board, turn out the dough, give it one or two quick kneadings to complete its quality, roll it out with a rolling pin to half an inch in thickness, cut with a sharp knife into squares the size of soda crackers, fold each in half to form a triangle, and bake on a hot griddle for eight or ten minutes. Brown on both sides.

STEWED BEETS.—Boil them first the usual way, then scrape and slice them, put them into a stewpan with a piece of butter rolled in flour, some boiled onion and parsley chopped fine, and a little vinegar, salt and pepper. Set the pan over a hot fire and let the beets stew for a quarter of an hour.

A SUNDAY SCHOOL teacher had given a lesson to a little girl to commit to memory. At the next session of the school she desired the child to repeat the lesson, but as she hesitated, the teacher read it over and said, "Now, what is it?" "That's it," replied the little girl, innocently, "just as you said it."

"MR. DE BLINKS is a very intellectual young man," said a young lady to a gentleman who had called to see her. "Do you think so?" "Why of course. It seems to me that he is a very hard thinker."

"IS THERE going to be any music at the church festival to-night?" asked Snooks of the pastor. "I do not know," responded that dignitary, who had been many times snubbed by the leader. "I do not know, but the choir will sing!"

SLEEPY YOUNG MEN.—Philadelphia aunt (severely)—As I glanced into the parlor last evening I saw you with a young man's arm around you. Chicago niece (calm)—Yes, aunt. I was waiting for you to pass the door to see us. Young men are very sleepy nowadays, and one can't have too many witnesses.

Any odd pieces of silver may be utilized, if for plating metallic articles, by placing them in an ounce of nitric acid, boiling them for an instant. The acid having dissolved the silver, throw in a good handful of common salt to kill the acid, then make into a paste with common whiting. The paste is to be applied with wash leather dampened in water. The silver surface will be maintained for years.

Dangerous Tendencies Characterize that very common complaint catarrh, the result of dropping from the head into the bronchial tubes or lungs, may bring on bronchitis or consumption, which reaps an immense harvest of deaths annually. Hence the necessity of giving catarrh immediate attention. Hood's Sarsaparilla cures catarrh by purifying and enriching the blood, restoring and cleansing the diseased organs. Try the genuine medicine. "Hood's Sarsaparilla cured me of catarrh, soreness of the bronchial tubes, and terrible headache." R. GIBSON, Hamilton, Ohio.

Hood's Sarsaparilla Sold by all druggists. \$1.00 per bottle. Prepared only by C. I. HOOD & CO., Apothecaries, Lowell, Mass. 100 Doses One Dollar

HE KNEW.—Sunday School Teacher—How tell me what is duty? Little Wren—It's something you don't pay unless you have to.

Wonderful Popularity. The fact that the sale of Dr. Pierce's Pleasant Purgative Pellets exceed that of any other pill in the market, be it great or small, is on account of the fact that they are tiny, little, sugar-coated granules, and that in most cases one little "Pellet" is sufficient for a dose; that they are purely vegetable and perfectly harmless; and for constipation, biliousness, sick headache, and other ailments arising from derangement of the liver, stomach or bowels, they are absolutely a specific. A gentle laxative or active cathartic, according to size of dose.

Buttermilk thickened with ground oats and corn meal is excellent for the small pigs.

Use the great specific for "fool in head" and catarrh—Dr. Sage's Catarrh Remedy.

It is said that there are over 8000 different kinds of insects in the United States, and 310,000 different kinds in the world.

A Madman at Large! He is a well-known citizen and his nearest and dearest friends do not suspect his insanity. How do we happen to know about it? Listen! his appetite is gone, he is low-spirited, he don't sleep well, he has night-sweats, he is annoyed by a hacking cough. These symptoms are the forerunners of consumption and death, and yet he neglects them. Is it any wonder that we call him a madman? If you care his friend tell him to get a bottle of Dr. Pierce's Golden Medical Discovery without delay. It will cure him if he takes it in time. It will not miraculously create new lungs when the old ones are nearly gone, but it will restore diseased ones to a healthy condition. Tell him about it, and warn him that in his case delay means death.

All plants that remain over during the winter, such as holly hedges, may receive a thick mulch of manure to advantage.

Frazier Axle Grease. One greasing with Frazier Axle Grease will last two weeks, all over the world, says days. Try it. It received first premium at the Centennial and Paris Exposition.

It has been estimated that an average of five feet of water falls annually over the whole earth.

Rupture cure guaranteed by Dr. J. B. Mayer, 831 Arch St., Phila., Pa. Ease at once, no operation or delay from business, attested by thousands of cures after others fail, advice free, send for circular.

A ball of cut steel mounted upon a stem of black enamel is a favorite hat pin.

Nothing Cures Drops, Gravel, Bright's, Heart, Diarrhea, Urinary, Liver Disease, Nervousness, Ac., like Canan's Kidney Cure. Notice, 831 Arch St., Phila. \$1 a bottle, 6 for \$5. At Druggists. Cures the worst cases. Care guaranteed. Try it.

Amber-Covered opera glasses are novel and beautiful.

If You Are Sick With Headache, Neuralgia, Rheumatism, Hypertension, Biliousness, Blood Humors, Kidney Disease, Constipation, Female Troubles, Fever and Ague, Sleeplessness, Partial Paralysis, or Nervous Prostration, use Paine's Celery Compound and be cured. In each of these the cause is mental or physical overwork, and to give more brilliant and durable colors. Ask for the Diamond and take no other.

Paine's Celery Compound A Dress Dyed A Coat Colored Garments Renewed FOR 10 CENTS. A Child can use them! Unequalled for all Fancy and Art Work. At druggists and Merchants. Dye Book free. WELLS, RICHARDSON & CO., Props., Burlington, Vt.

Will Cure You! Sold by druggists. \$1.00 per bottle. Prepared only by WELLS, RICHARDSON & CO., Burlington, Vt. For the Aged, Nervous, Debilitated.

A WET HEN. "I CALLED, sir, to see if you didn't want to get your life insured," said the agent, taking a seat and preparing to pull out a lot of papers. "I don't think I want to get my life insured nearly so much as you do," replied the lawyer in a determined voice, opening a drawer.

MRS. M.—Wonderful presence of mind Mrs. C. has, hasn't she? Mrs. B.—How so?

"Why yesterday morning she heard a noise in her husband's room, and going in found him hanging himself. "Good gracious! and did she cut him down in time?" "No. She let him hang."

BRANDRETH'S PILLS purify the Blood, stimulate the Liver, strengthen the Kidneys, regulate the Bowels. They were introduced in the United States in 1835. Since that time over fifty millions of boxes of BRANDRETH'S PILLS have been consumed. This, together with thousands of convincing testimonials from all parts of the world, is positive evidence of their value.

LOOKING AFTER THE HOUSE.—"Good bye, dear," said the wife to her husband as the train stood in the station. She was going to the country to spend a few weeks, and he was to remain behind and look after the house. "Now don't leave the house alone any more than you can help, will you, dear?"

"No, of course not." "And see that the shutters are always fastened?" "Yes." "And feed the bird?" "To be sure." "Don't forget to have the butcher leave a little fresh meat every day for Fido."

"I'll see to that." "Leave the up-stairs windows open as much as you can, won't you, dear, but don't let the rain beat in." "I'll be careful about that."

"Write to me often and tell me how everything is getting on." "Of course, I must be getting off, the train is going to start." "Well, good bye." "Good bye."

THEY had been talking of the sharp games played upon innocent by sharp men, when Green looked up and said: "Gentlemen, I don't brag about my wife being sharper than a razor, but I'll tell you what I'll do. I'll write a note, sign it with my own name, and ask her to deliver my Sunday suit to bearer for repairs. You may send it up to the house, and I'll bet you \$5 that she'll be too sharp to let the clothes go."

"We'll take that bet," called two or three voices, and there being five of them they chipped in \$1 apiece. The note was written and signed and dispatched by a messenger boy. In half an hour he returned, empty handed as to clothes, but having a note, which read:

"Come off the perch. All the clothes you have in the world are on your back." "Gentlemen," said the winner, as he pocketed his five, "let me recommend it to you as something which always wins, and as I must meet a man at 3 o'clock, I will now bid you good day."

"You think you need a wife, young man, do you?" said Mr. Kajones, as he looked at the agitated youth who was sitting on the edge of a chair and nervously handling a hat, "and my daughter would fill the bill, would she?" "She would indeed, sir," replied the young man, with a ghastly attempt to appear at ease. "As the men who start newspapers sometimes say in their prospectuses, she would fill a long-went fault—I mean, of course, a weng long felt—or, rather, a long lent walt—but, a wrong font well—indeed she would, Mr. Kajones," persisted the bewildered youth, "though I should have said, of course, a feng—"

"George," interposed Mr. Kajones, coming to his relief, "have you said anything to Laura yet?" "No, sir; I thought I ought to speak to you first."

"Well, George," said the young lady's father, kindly, "take my advice—if you can't get that prospectus untangled before you see her again, you'd better send a more experienced canvasser."

Warranted to color more goods than any other dye ever made, and to give more brilliant and durable colors. Ask for the Diamond and take no other.

A Dress Dyed A Coat Colored Garments Renewed FOR 10 CENTS. A Child can use them! Unequalled for all Fancy and Art Work. At druggists and Merchants. Dye Book free. WELLS, RICHARDSON & CO., Props., Burlington, Vt.

THE TROUBLE.—"I'm hard up, and want money badly. Ed—Why not write to some of your friends?" "That's the trouble. I have too many friends. I wish I knew a stranger."

Would You Believe The Proprietor of Kemp's Balsam Gives Thousands of Bottles away yearly? This mode of advertising would prove ruinous if the Balsam was not a perfect cure for Coughs and all Throat and Lung troubles. You will see the excellent effect after taking the first dose. Don't hesitate! Procure a bottle to-day to keep in your home or room for immediate or future use. Trial bottle Free at all druggists. Large Size 50c and \$1.

HUSBANDS—I'm afraid, my dear, that this amateur theatrical entertainment is likely to prove a bore. Wife—It may, John; but for heaven sake, remember that it is an amateur entertainment, and when the curtain drops after each act don't pick up your hat and go out.

A Curious fact has been observed by Prof. Ayrton and Perry: Soft iron when heated between a red and white heat ceases to be attracted by a magnet. When soft iron is bent between red and white hot iron it ceases to be attracted by a magnet.

Take a small quantity of a 2 per cent carbolic acid solution and sprinkle sheets, coverlet, and bolster, on both sides, the edges of bed curtains and the wall next to the bed. The face and neck may also be slightly wetted with the solution. Not a single gnaw or mosquito will come near.

SCOTT'S EMULSION OF PURE COD-LIVER OIL AND HYPOPHOSPHITES ALMOST AS PALATABLE AS MILK. Remarkable as a FLESH PRODUCER. Persons gain rapidly while taking it.

So disagreed that the most delicate stomach can take it. It is acknowledged by Physicians to be the FINEST and BEST preparation of its class for the relief of CONSUMPTION, SCROFULA, GENERAL DEBILITY, WASTING DISEASES OF CHILDREN, and CHRONIC COUGHS. ALL DRUGGISTS. Scott & Bowne, New York.

PISO'S CURE FOR CONSUMPTION CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes good. Use in time. Sold by druggists.

I believe PISO'S Cure for Consumption saved my life.—A. H. DOWELL, Editor Enquirer, Edenton, N. C., April 23, 1887.

Cures and Prevents Colds, Coughs, Sore Throat, Hoarseness, Stiff Neck, Bronchitis, Catarrh, Headache, Toothache, Rheumatism, Neuralgia, Asthma, Bruises, Sprains.

Quicker Than Any Known Remedy. No matter how violent or excruciating the pain the Rheumatic, Bedridden, Infirm, Crippled, Nervous, Neuritic, or protracted with distress may suffer, RADWAY'S READY RELIEF will afford instant ease.

INTERNALLY—A half to one teaspoonful in half a tumbler of water will in a few minutes cure Cramps, Spasms, Sour Stomach, Bowel and Colic, Vomiting, Heartburn, Nervousness, Headaches, Sick Headache, Diarrhoea, Colic, Flatulency and all internal Pains. Malaria in its various forms cured and prevented.

There is not a remedial agent in the world that will cure Fever and Ague and all other Fevers (called MALARIAL FEVERS), so quickly as RADWAY'S READY RELIEF. It is the first PAIN REMEDY That instantly stops the most excruciating pains, allays inflammation, and cures Congestions, Whether of the Lungs, Stomach, Bowels, or other glands or organs, by one application.

ACHES AND PAINS. For headache (whether sick or nervous), toothache, neuralgia, nervousness and sleeplessness, rheumatism, lumbago, pains and weakness in the back, spine or kidneys, pains around the liver, etc., etc., swelling of the joints and value of all kinds, the application of Radway's Ready Relief will afford immediate ease, and its cost used use for a few days will effect a permanent cure. Price, 50 cts. Sold by all Druggists.

Four Books Learned in One Reading. A Year's Work Done in Ten Days. From the Chaplain of Exeter College, and Houghton Syracus Prisoner, Oxford. Coll. Exon, Lond., Sept., 1888.

DEAR SIR—In April, 1885, you kindly advised taking dose in September. I suddenly received advice that my ordination examination would be held in a fortnight. I had only one day in which to prepare for the Exam. I should recommend a year's preparation in the case of anyone so utterly unprepared as I was; but your System had so strengthened my natural memory that I was able to review and give the gist of any book after reading it once. I therefore read Lightfoot, Proctor, Harold Browne, Mosheim, etc., and was successful in every one of the nine papers. The present Bishop of Edinburgh knows the facts. Faithful yours, (Rev.) JAMES MACDONALD, MACDONALD, [M.A.], To Prof. A. LOUISE, 227 Fifth Ave., N. Y. Per copy taught by correspondence. Send for prospectus.

FIFTY DOLLARS FOR LIFE SCHOLARSHIP BUSINESS COLLEGE, 1712 Chestnut St., Phila., Pa. Positions for Graduates. Time required, 18 months. Send for prospectus. SEND FOR THE BEST EQUIPPED. Best center of Study. Best Examinations. Write to Director.
