THE KEYSTONE STATE.

NEWS TOPICS OF LOCAL INTEREST TO PENNSYLVANIANS.

Facts and Fancies Gleaned from Many Sources and Boiled Down to Brief Paragraphs for the Benefit of Busy Readers.

UNIONTOWN, Pa., Jan. 7.-While descend-ing the shaft in No. 2 Leisenring coal mine, this county, the rope of the cage broke, let-ting the cage fall a distance of 500 feet with William Clark, William Farn and Samuel Shearer to the bottom of the shaft, killing all three instantly.

McClure's Marderers.

WILKESBARRE, Pa., Jan. 5 .- The murderers of Paymaster McClure and Hugh Flannfgan, his body guard, have been run down at last. It will be remembered that McClure and Flannigan were on their way to Railroad Contractor McFadden's works to pay the men when they were shot dead in a lonely part of the road and robbed of \$12,000.

One of the first to be suspected was an Italian, "Red Nose Mike." He was arrested, given a hearing and discharged. Mike then went to Poughkeepsie to work, followed by three Pinkerton men, who disguised themselves as laborers. At Christ-mas Mike commenced to spend lots of money, as did two other Italians with him. Mike also sent considerable money to Italy.

The detectives at last sure of their men pounced upon them. Mike was brought to this city by Capt. Linden and Detective Fahrer. The prisoner was taken before Justice Rooney. He refused to say anything. A charge of murder was made out and he was committed to jail.

Thousands of people gathered early in front of the justice's office. Cries of "Lynch the red nosed Italian" were heard on all sides. Capt. Linden has "Red Nose Mike's" state-

ment in writing, but refuses to make it known lest it prevent the arrest of his accomplices. This much is known however: Five Italians had a hand in the murders.

The scheme was secretly concocted at a meeting held by the Italians. Three men did killed by the lookouts. Rifles and Colt's revolvers were used.

Flannigan was first shot. He was killed instantly and fell into the roadway. Mc-Clure was shot by the lookouts further up wounded, stopped.

The murderers then captured the money. The names of the two other Italians implicated are Antonio Lecki and Michael Poroeso.

Brutal Dog Fight.

CORRY, Pa., Jan. 7 .- One of the most

AN ELECTRIC SHOCK. Gigantic Swindle in Refined

Sugar. CAPITALISTS CLEVERLY DUPED.

They Invested Money in a "Process" Which Existed Only in Imagination. The Deception Kept Up by a "Blind"

Manufactory.

NEW YORK, Jap. 5.—A month ago the stock of the Electric Sugar Refining com-pany was valued in England at £117 a share. Wednesday it had fallen to £80, and the closing price Thursday was £12. The sud-den fall was occasioned by rumors flashed fraud. The nature of the rumors was that the secret process of sugar refining on which the company's fate was based had proved to be wholly mythical, and that the shareholders had been fleeced by the holders of the iron secret. The events of the last two days seem to confirm strongly the suspicions which have been raised.

The secret in question promised, when put into practice, to revolutionize the sugar trade by placing in the hands of the fortunate reholders a monopoly of the sugar refining industry of the world. By passing through a mystical process fired with electric force raw sugar was to be transformed, at a fabu-lously cheap price, into refined sugar of unequaled purity. The samples of its work were pronounced of unexampled purity by the best authorities of both continents. Sugar refiners begin to quail at the prospects the new discovery presented.

The refiners liked the sugar, but they wanted to know the process by which it was refined. This, however, Friend refused to reveal on the ground that his invention was not a patentable one. He offered, however, to explain the process if a company were formed who would buy the secret from him. For some time the inventor's secrecy caused a general suspicion of his claims, but eventu-ally the scheme was taken up by prominent speculators, and the Electric Sugar Refining company resulted. In the contract with Friend the company provided that he should be furnished with money to purchase the machinery necessary for putting the new method in operation, that on the completion of the machinery he should lift the veil from his hidden charm for the tangible considera-

tion of \$75,000, and that thereafter he should begin to turn out the product at a cost of eighty cents per ton, including all expenses. In March last Friend died, bequeathing his secret to his wife. After his death the latter went to live with her sister in Milan, Mich., and Howard remained in charge of the factory, on a salary of \$40 a week. Mrs. the killing, while two kept a lockout. Had Contractor McFadden come on the scene dur-ing the butchery he, too, would have been happy day came. Mrs. Friend wrote that New York on a new railrow Poughkeepsie bridge. the terms of the contract would be fulfilled in the early days of the new year.

Two weeks ago Howard went west to spend the holidays at Milan. On the 24th the president of the company, W. H. Cotterill, also the road. He fell out of the buggy and was left for Milan to make arrangements for the dragged 100 yards, when the horse, badly fulfillment of the contract. He was surprised to find that Mrs. Friend now refused to unravel the secret. He insisted that even if the preparations were not complete she should pass fifty barrels of raw sugar through the process in presence of her own lawyers, but this she declined to accede to. With his

brutal dog fights ever witnessed took place first suspicions aroused President Cotterill in this city Friday night. The fight was for returned to this city, went straight to the \$5,000, and lasted one hour and fifty minutes. During the day fifteen or eighteen men ar-barriers that sheltered the mystic secret. His suspicions were fully confirmed. The wonderful machinery was of a very ordinary character, the raw sugar which had been supplied lay around untouched, and quantities of purchased refined sugar suggested the Buffalo dog got hold of the Pittsburg dog's origin of the product. Meantime the Halsteads had disappeared from the scene and "Jerry" was in sole possession. Armed with this additional information Mr. Cotterill started Wednesday night for Milan to demand immediate explanation or cause the arrest of the schemers. He was expected to reach there yesterday, and the result of his visit is looked forward to by the shareholders with breathless interest. ANN ARBOR, Jan. 7 .- Mrs. Friend executed a mortgage to William D. Harriman Friday for \$4,000, on all her real estate. Mrs. Howard executed another mortgage on the same day of \$4,000 on everything they had. Mrs. Friend and George Halstead took the train east Friday, she stating that she was going to New York. Holstead returned the next morning. Several trunks were taken from Mrs. Friend's house Saturday, and it is said she has skipped to Canada,

HEY AGREE TO FIGHT.

Kilrain's Representatives and Sullivan Approve of Articles.

TORONTO, Jan. 8 .- John L. Sullivan, acmpanied by Jack Barnett, of Boston, arrived here at 11:30 and proceeded on foot to the Rossin house, followed by an admiring throng. The principals, Charles E. Davies and W. E. Harding, representing Jake Kil-rain, Charles Johnston and John L. Sullivan, nting the latter, and E. A. Plummer and W. H. Germaine, at once adjourned to a room to arrange the terms of the proposed fight.

An agreement was reached in a comparatively short time as to the main conditions of the fight, Mr. Harding said that both parties agreed that the fight should come off near New Orleans on the 8th of July for a purse of \$20,000-the largest sum ever fought for-and the championship belt. Over this last provision there was some wrangling, but across the ocean that the company was a it was finally agreed upon by both parties. Ten thousand dollars is already up at The Clipper office in New York. An additional \$5,000 will be put up in New York on the 15th of April. The referee could not be fixed upon, and it was agreed to appoint him at the ring side. The final stakeholder is not yet chosen. Harding said that the papers would probably not be signed in Toronto, through fear of the law, but they would be signed in Hamilton or some other Canadian town. Harding will remain here for a day or two. Sullivan and his party left on the

2:50 train. Boston, Jan. 8.-Capt. Cooke, of The Police News, received a letter signed by four prominent men of El Paso, who offer big inducements to have the Sullivan-Kilrain fight take place there. They offer to deposit \$10,000 to have the fight to a finish take place there, asking gate privileges aad all attendant privileges, and guaranteeing immunity from molestation, and intimating that the railroads will make special rates. The \$10,000 can be added to the stake money. It was the intention of the pugilists and their friends to have it stipulated in the articles that the fight should take place within 100 miles of New Orleans. The offer of the Texas gentlemen will be brought to the notice of the pugilists, and there is little doubt that they will accept. The letter is signed.

"RED NOSED MIKE" REARRESTED.

He Confesses to the Murder of Paymaster McClure and His Body Guard.

POUGHKEEPSIE, N. Y., Jan. 5.-One of the men who aided in the murder of Paymaster J. B. McClure and his assistant, Hugh Flanagan, near Wilkesbarre, Pa., a short time ago, and robbed them of \$12,000, has been arrested, and has made a confession. He is an Italian, and is known as "Red Nosed Mike," He was arrested in Philadelphia on suspicion, but there was not sufficient evidence to hold him. He came from Philadelphia to this county and got work on a new railroad connecting with the

A Pinkerton detective disguised as an Italian laborer came here and secured work alongside of him. He got enough information from Mike to warrant his rearrest and induced him to visit Philadelphia again. The two men went there Wednesday night of this week. Then Mike was arrested and he made a confession of the crime, giving the names of two other Italians connected with the murder, and said they, too, were at work in this county.

Accordingly, Capt. Dougherty, of the Philadelphia police, and two or three Pinkerton men, came here, and with Detectives Scanlan and McCabe, of the New York Cen

rived from Pittsburg, bringing with them a large brindle bull terrier. On the evening train a party of about the same number came from Buffalo, bringing with them a white dog. After fighting fifty minutes the foreleg, crunching the bones. But the Pittsburg dog showed wonderful staying qualities. ing on three legs, he kept working at the sides of the white dog, tearing out part of his lungs and completely chewing him to pieces. At the end of the hour and fifty minutes the Buffalo dog was dend.

Got Away with Over \$12,000.

WILKESBARRE, Pa., Jan. 7 .- It is learned that Pinkerton's detectives recovered only \$500 out of the \$12,900 stolen from Paymaster McClure by his murderers. The remainder is supposed to be in possession of "Red Nosed Mike's" accomplices, who have fled to Italy, and are being pursued there by Pinkerton men. The murderers divided the money among themselves at Philadelphia a few days after the crime.

Dynamiters Near Reading.

READING, Pa., Jan. 4 .- A quantity of dynamite was exploded on the tracks of the Philadelphia and Reading railroad at Mahanoy Plane. Four dwellings were partly wrecked. and the town was badly shaken up. The rails were torn up for a distance of twenty feet and an accident was barely averted to a fast freight train. The explosive is supposed to have been placed on the tracks by train wreckers. No one was injured.

Collieries Resuming.

ASHLAND, Pa., Jan. 4.-The collieries of the Philadelphia and Reading Coal and Iron company in this vicinity are resuming, after a suspension of several weeks. The Merrian and Bart collieries were the first to start up. The rate of wages has been fixed at 3 per cent. above the \$3,50 basis.

Warned by White Caps.

ALLENTOWN, Pa., Jan. 3. - The White Caps, or a party styling themselves as such, have made their appearance at the village of Ferndale, two miles above this city, and in the mill of the Catasauqua Manufacturing company posted notices warning some of the employes to leave by Jan. 5 or take the con-

Some of the men notified affect not to be at all scared, but others feel uneasy and are taking means to defend themselves in case the White Caps put in their appearance.

The notices have caused great excitement among the men, many of whom attach considerable importance to the doings of the mysterious visitors. The company has of-fered a reward of \$25 for information that will lead to the arrest of the parties con-cerned in putting up the notices.

Pennsylvanta Legislature.

HARRISBURG, Jan. 2 .-- The legislature convened at noon. The republican caucus slate adidates for the different senate and house offices were all elected by a party vote.

In the senate, Russell Errett, of Allegheny, was elected chief clerk; John C. Grady, of Philadelphia, president pro tem; Allen E. Smiley, journal clerk; A. T. Baum, reading

In the house, Henry N. Boyer, of Philadelphia, was re-elected speaker; John W. Mor-rison, of Allegheny, chief clerk; J. W. R. Baker, of Mercer, reading clerk; A. L. Fetteroff, of Montgomery, journal clerk; Charles E. Voorhees, resident clerk, and Harry Huha, speaker's clerk.

state, and urges the necessity of action to bring it forward to final disposal. He recommends the passage of a revenue law of the same character as the one which failed during the last legislative session.

NEW YORK, Jan. 8.-An Ann Arbor dispatch gives an astounding summary, obtained apparently from Mrs. Friend, widow of the electric sugar refiner, to the contract between Friend and the Electric company. This is the dispatch:

Mrs. Friend and the Howards are still in this city. The Detroit Journal correspondent has read the famous contract made between the Friends and the Electric Sugar company. It was drawn July 9, 1884, and executed Nov. 20, 1884. It was the most one sided contract ever seen in Michigan, perhaps. To be made binding it is witnessed, signed and sealed on each of the nineteen type written pages. By its terms Henry C. Friend and Olive C. Friend, his wife, covenant with the Electric

Sugar Refining company, the said Friends having invented a process for refining different grades of sugar at prices far below the market value, making 90 per cent of pure sugar, with a loss in weight of not over 5 per

The entire contract is based upon a secret process. The company absolutely bound itself in no way to attempt to find out what the secret was. The Friends were to remain in possession of the secret, and any attempt on the part of the company, their employes, agents or lawyers to find out the secret forfeited all their rights and any stock they may have held.

It was also a condition that the request of stockholders for the secret or any attempt to force it by legal process should work a forfeiture, and in case Professor Friend died the conditions should remain unchanged as securing the rights of Mrs. Friend. The contract was signed on behalf of the com-pany by R. N. Woodworth, president; W. H. Cotterill, secretary; and on the part of the Friends by Henry C. Friend and Olive C. Friend. The witnesses are W. E. Howard and Emily Howard, Milan. On the con-tracts are indorsements of ten payments aggregating \$100,000. The payments were made between June 30 and Nov. 17, 1884. It is now feared that President Cotterill is

as deep in the mud as the Friends and Howarda. His past record is being brought to light and it is not calculated to inspire confidence in him. Neither is the fact that he pending constitutional amendment, providing for the abolition of the liquor traffic of the state, and urges the necessity of action

Decker, of this city, secured a special train and went to Stanfordville, where it was said the Italians were working, but when they got there they were told that the men they wanted had gone to Italy. The detectives returned to New York on an afternoon train

A TALE OF TWO CITIES.

Rev. Mr. Lathbury Borrowed Mrs. Chan dler's Child, Will Not Return It.

NEW HAVEN, Jan. 8 .- There was a spicy hearing in the probate court, before Judge A. Heaton Robertson, over the posse a child now in the custody of the Rev. Mr. Lathbury, of the Summerfield Methodist church.

Seven years ago Henrietta Chandler, a very pretty young lady of Newarz, N. J., of round coal. It is used in six seams in the child, and the infant was spirited away. Mr. Lathbury was the pastor of the Brooklyn Msthodist church, and in his flock was Mrs. Catherine Goldby, the wife of a principal in one of the Brooklyn public schools. Mr. Lathbury was removed by the Methodist conference to New Haven. and he induced Mrs. Goldby to allow him to take the child to New Haven to keep his wife company. Once securing possession of the child, he refused to give her up, and infuced Miss Chandler to sign a paper delivering the child to him. He informed Miss Chandler that Mrs. Goldby only wanted the child to sell. Mrs. Goldby has brought the matter into court to secure possession of the little one. She produced letters written to her by the minister, which are far from creditable to him. In addition to the court proceedings Mrs. Goldby has presented charges against the Rev. Mr. Lathbury to the presiding elder of this district.

Falling Rock at Niagara.

NIAGARA FALLS, Ont., Jan. 8 .- On last

Friday night a large mass of rock fell from the precipice of the Horseshoe or Canadian falls, and on Saturday night at 10 p. m. another mass broke away. In both cases the noise made by the falling rock alarmed the residents in the vicinity on the Canadian side. The massive stone building known as the Table Rock house was jarred to such degree that the doors were thrown open and the occupants who had retired jumped out of bed greatly excited by the unusual noise and vibration of the building, resembling severe shocks of earthquake. The same sensations were experienced at the residence of Gate-keeper Whistler, on Ced r Island, and also half a mile up the river where Gardner Mc-Cameron lives. The effect of these displacements on the contour of the falls is quite marked, the change being from an angle to the original horseshoe shape.

Terms of the "Q" Settlement.

CHICAGO, JED. 8 .- The seal of secrecy was last night removed from the terms of agreement between the Chicago, Burlington and Quincy Railroad company and the conference committee of the Brotherhood of Loconotive Engineers. The terms are, in effect, that the company will not follow up, black-list or in any manner attempt to proscribe those who were concerned in the strike, but, on the contrary, will give to all who have not been guilty of violence or other improper conduct letters of introduction, showing their record, and in all proper ways assist them in finding employment. Vice Fresident Stone, of the Burinoton, stated that the agreement contained all inat the men had claimed and all that the company was asked to concede.

Touring Journalists Return.

NEW YORK, Jan. 8.-The French steamship La Normandie, which arrived from Havre, had as passengers Charles A. Dana, of The Sun, and Ballard South, of The World.

THE EMPRESS OF AUSTRIA.

At One Time One of the Most Beautiful

Women in Europe.

types of loveliness as did that now passing

away. Twenty-five years ago the empress of Austria, for instance, was simply dazzling. She would have been noted for her beauty

had she been a barmaid or a ballet girl. The

slender, graceful figure, the finely molded

features, the large, brilliant dark eyes, the beautifully formed head crowned with a

wealth of black silken tresses, all went to

make up an ensemble of physical perfection.

I saw her once at that period, when I was staying at the Archduke Charles hotel at

Vienna. The radiant Elizabeth came there

with her imperial husband to call upon the

Countess of Flanders, the sister-in-law of the

king of the Belgians. She passed in front of

eager to catch a glimpse of the famous royal

beauty. With true queenly courtesy she

paused for a moment 'on beholding the

group, and stood there for a brief but ap-

preciable space of time, as if to say: "You

wanted to see me-here I am!" Then, with a stately inclination of her beautiful head,

she turned away and rejoined her husband.

leaving every one of the spectators in rapt-

ures with her loveliness. She was attired in

a costume of transparent muslin and Valen-

ciennes lace, with a broad sash in violet silk

a large window opening upon the balcony. and on that balcony was stationed a party of Americans, one of which was myself, all

I do not think that the present generation of young royal ladies can present as exquisite

M. d'Andrimont. The area of its concess is 4,170 acres. The colliery employs 961 workmen underground and 273 at the surface. Its output in 1886 was 232,742 tons. The seams worked vary from 2 feet to 4 feet 1 inch in thickness, and the coal is of a semibituminous character. A notable feature in the working of the mine is the use of the Plom and d'Andrimont excavator, an ingenious contrivance for increasing the useful effect of blasting. The shot hole is drilled in the ordinary manner and the excavator is introduced, which hollows out a space at the back of the hole much greater than the diameter of the hole. This enlarged powder chamber is found to greatly increase the usefal effect of blasting and also the proportion colliery, and has also been adopted at Lens, France. The coals are not brought to the surface of the shafts, but only to the level of 400 feet, whence an endless chain road, two miles long, extends to Bay Bonnet.

The Saint Andre du Poirier mine claims to be the deepest coal mine in the world. It has a royalty of 864 acres, and a yearly production of 200,000 to 250,000 tons. There are two coal drawing shafts, the one 2,052 feet deep, the other 3,083 feet deep. The first shaft is being deepened to 3,149 feet. Each of the pits is ventilated by a Guibal fan working in a second shaft. A remarkable feature in the working at these mines is the compara tively low temperature experienced. The maximum temperature is 75 degs. Fahr., and it is very often considerably lower; the air passing along the "face" is not warm. This tends to show that elevation of temperature is by no means the greatest obstacle in working very deep mines.-Age of Steel.

Intelligence of Whales.

Whales are very human and very knowing, too. I have seen those gigantic whale mothers sporting with their calves and rolling in clumsy play with them within pistol shot of the schooner. A whale has some senses finer than ours. They seem to have some sort of electric communication between them, though far apart. At times, if one whale, though half a mile from his companions, is struck, the rest seem instantly to know it. and dash madly off. A whale in swimming leaves a slight ooze or streak of oil behind on the water's surface. The whalers call it the "slick." Now, this "slick" does afford some sort of communication to the whale when it is touched by any foreign substance, and the whalemen in their boats will avoid crossing it when they see it, for it seems as if it conveyed warning to a whale they are desirons of approaching.

The "calf" sometimes lagged a few yards behind the "cow" while our boats were in chase, and if by accident our boat header put his iron into that calf the mother instantly knew it, and then, and not till then, would she turn furiously on the boat. When she was roused man was no match at all for for her. For wounding her calf a "cow" chased one of our boats ashore, and for an hour she lay "on and off," blockading their port of safety and waiting for them to put off, that she might have another whack at them. They did not put off until she had gone,-Prentice Mulford in New York Star.

The Boyal Glass Eye.

Young men in America who go in for single eyeglasses simply because it is done by distinguished individuals whom they have seen or heard about will be cheered to learn that Prince George of Greece has taken to wearing one, and that the crown prince of Sweden is imitating him, though neither of these royal young gents is troubled with de-fective eyesight.-London Cor.
