

FARM NOTES.

LAMBS FOR THE EARLY SPRING MARKET.—The underground basement of a barn, if dry, furnishes proper quarters for raising winter lambs. It should be well lighted and lined inside with sheathing paper. Double walls filled in will not answer, for rats make havoc of the filling. The space should be divided into pens. The pens should be about 18x16 feet, with an alley through the center. Each pen will accommodate 15 ewes. A rack for fodder is placed in the center so that the sheep can go all around it. Feed troughs are fastened to its base on both sides in such a manner as to catch the leaves that fall off the fodder. The ewes are given clover, hay and corn fodder, all they will eat. Their grain ration is whole corn, oil meal and wheat bran, mixed equally by weight. Of which each ewe will consume about two quarts a day. In addition they will be fed the shepherds' turnips they are sent. The sheep will generate too much heat and the temperature is kept at about 66° by air shafts containing check-valves. Salt is kept constantly before them and water in pails. The gates are made so high from the floor that the lambs can escape into the alley, where there are feed troughs always supplied with the same grain ration.

The ewes are placed in the pens about December 1st, and are shorn immediately or the wool would soon commence to drop; besides, this rids them of annoying ticks. When lambs begin to drop the shepherd should be with his flock all the time he is not eating or sleeping. Young lambs daubed with the glutinous ointment should have it removed with warm soap-suds, and then be wiped dry. It should be the shepherd's aim not to lose one lamb. He must pet his sheep and lambs, and get them so they have no fear of him. Dogs, children and loud talking adults should not be allowed in the fold, and very few strangers. The commission merchant to whom the lambs are consigned will tell when and how to kill and dress lambs. This is high feeding, but it is nearly always in the superior condition the ewes are in for the butcher in early spring when mutton is scarce. For the best results these go to the stables as soon as dry, and a new flock is gathered for the next year.

THE VALUE OF A PEDIGREE.—The male animal, ram or bull, or male of whatever other class of farm stock needs improvement, must be himself good, from good parent, and the further back the continuous lines of excellent progenitors stretch the stronger reason we have for confidence that good results will follow his introduction. The lines may so stretch back without a break in the inheritance of excellence although we may not have the means of blood tracing them—in other words, the descent and the blood may be right, yet unrecorded. Our knowledge can not make any difference in the power or lack of power. Still, knowledge of the particulars of descent is worth having. It may prove very useful sometimes. Let us then, by all means, place the true value upon that knowledge, and have the pedigrees of our stock, if possible, and take pains to preserve records of descent for our own information and the information of those who may succeed us. I hold that pedigree the longer the better, is a thing to be desired, accompanying merit granted.

A CORRESPONDENT of the Maine Farmer takes great pains to give his cattle all the open air exercise they require throughout the winter on warm sunny days. Sunlight and exercise are two of the greatest factors in promoting health. Shut up human beings in a cotton, oil cloth or shoe factory, month after month, carrying them their food and allowing them no exercise at all, and how long before consumption will seize upon them? It is silly to think that cotton seed meal or any other highly concentrated food will originate tuberculosis or pleuro-pneumonia.

A MONTANA sheep breeder offers to rent ewes at fifty cents a year, the man taking them to have the wool and increase, but bound to return the full number at the end of the specified time. As the sheep are worth perhaps \$2.50 each, the capitalist makes twenty per cent for his money and risk. This seems large, but in the Territories farmers often pay higher rates than this. Two per cent a month is a frequent price for the use of money there. This is twenty-four per cent a year, and as it is often compounded several times in twelve months, it amounts to considerably more than this.

CLAUS SPRECKELS, the "ex-sugar-king" of the Sandwich Islands, who is now giving his attention to the encouragement of beet-sugar culture in Northern California, says that the beet-sugar industry can be established in almost every State in the Union, and that it will give a net profit of from fifty to seventy-five dollars an acre to the farmer.

Most every farmer is aware of the fact that a sheep must be fat to make the best mutton, but few conceive the idea that a properly and well fed sheep produces more and better wool than one poorly fed and cared for. Wool is a product from feeding, just the same as fat or flesh, and the flock should be fed and managed with a view to wool growth, and that of fine quality.

ACCORDING to Professor John Wilson, of the University of Edinburgh, than whom there is no higher authority, the Shropshires originated in the mixture of the blood of the Morfe Common sheep, the Southdowns, Leicesters and Cotswolds. Each of these had some special excellence to contribute. The Morfe Commons had good constitutions the Southdowns quality of flesh, the Leicesters symmetry of form, and the Cotswolds size.

The disposition of swine is to pile up in cold weather, and the warmer we can keep it underneath them the less liable they are to do this, and unless they can be prevented from going it to a great extent disease is much more liable to break out among them.

HOUSEHOLD.

ROAST GOOSE.—Draw clean, and sluge the goose the same as a chicken. Wipe it inside and out with a damp towel. Fill with potato or onion stuffing. Sew it up and truss, being careful not to fill it too full, as dressing always swells while cooking. Place it in a baking pan, put a cup of water and a teaspoonful of salt in the pan, and place in a quick oven. Roast twenty-five minutes to every pound, basting every ten minutes; after the goose has been roasting one hour, cool the oven, and roast the remainder of the time at a moderate heat. Serve with giblet sauce made the same as for roast chicken.

CREAM CAKE PIE.—Beat the yolks of two eggs, one and a half cups of sugar, and three ounces of butter together until light, then add one cup (a half pint) of lukewarm water, mix and add two and a half cups of flour. Beat until very smooth, then add the well beaten whites of the two eggs and two large teaspoonfuls of baking powder. Mix thoroughly and bake in an oblong pan in a moderate oven for about forty-five minutes. When cold, split into two layers, and pour between and around them a soft custard, flavored with vanilla.

TO KEEP MILK SWEET.—Boil the pitcher or can in which the milk is to be put for ten minutes, take it from the boiling water, and without wiping it pour into it the milk. Then set the pitcher back in the boiling water. Remove and cover the pitcher with a layer of absorbent cotton and boil for five minutes. The boiling water destroys the germs on the sides of the pitcher, and the absorbent cotton keeps other germs from settling in the milk and causing fermentation. Pour out milk as it is needed, disturbing as little as possible the cotton covering. Milk for invalids and babies can thus be kept sweet for many hours.

LEMON CREAMS.—Dissolve two tablespoonfuls of cornstarch in a little water, add the juice and grated rind of one lemon, and one cup of sugar, on this pour two and a half cups of hot water, add the beaten yolks of three eggs, set on the stove and cook slowly, stirring till it thickens like custard, remove from the fire, and stir in the whites of the eggs beaten stiff, put in a dish and set away to get cold. It is nice for dessert with cake, and can be made the day before you want to use it.

LEMON PUFFS.—Powder and sift a pound and a quarter of loaf sugar and mix it with the grated rind of two fresh lemons. Then whisk the whites of three eggs to a stiff froth and add gradually to it the mixture of sugar and grated lemon. Whisk all thoroughly together until it becomes a thick paste. Then cut it into pieces of the desired shape, handling the paste as little as possible. Place the pieces upon oiled white paper, and bake on this in a moderate oven. Eight to ten minutes will suffice.

LOBSTER SALAD.—Take one hen lobster well boiled, two heads of lettuce (or any seasonable substitute), two slices of beet root, a small cucumber sliced, two eggs, salt and cayenne pepper moderately; then add the meat of the lobster carefully picked, reserving some of the meat for garnishing. You can ornament the dish either with sliced egg, leaves of lettuce or slices of beet, or with all combined if you have the time and taste.

SPONGE CAKE.—One heaping cup of coffee A sugar, the yolks of three eggs beaten with the sugar until light, then add a half cup of water and a tablespoonful of essence of lemon, a heaping cup of sifted flour with a teaspoonful and a half of baking powder mixed with the flour; the beaten whites of the eggs add last. This makes a very nice layer cake by putting either cocoanut, chocolate or jelly between.

CURRIED LOBSTERS.—Place in a stewpan four ounces of butter and melt it. Then throw in the lobster, cut up with a tablespoonful of curry powder. Let it simmer for one minute, stirring so as to prevent it burning. Squeeze a lemon on it, and serve on a warm dish.

BREAD PUDDING.—One pint of milk two eggs, one cup bread crumbs, one tablespoon of melted butter. Soak the bread crumbs in the milk, add yolks of the two eggs well beaten, then butter, and lastly the whites well whipped. Bake about the same as you would a custard and eat with sauce.

OATMEAL MUSH ROLLS.—Take cold oatmeal mush, and work lightly into it enough Graham flour to mold it into rolls. Do not overwork it, as too much kneading spoils the effect. Roll out the dough with the hands on the molding board into a long roll, about an inch and a half in diameter, cut off pieces three inches long, and bake on the grate of a quick oven half an hour. Serve warm or cold.

MUTTON STEAKS, FRIED.—Make a batter of grated bread crumbs, milk and one egg. Put it into a shallow dish. Have some mutton steaks cut from the loin, with the bone cut short. Have ready in a frying pan hot butter or dripping. Dip each steak twice in the batter, then fry them brown and send to the table very hot.

The secret of frying small fish crisp and brown, without either egg or bread crumbs, is to fry it well, flour both sides (do not be niggardly with the Indian meal), and plunge it into plenty of boiling fat. Be sure the fat is boiling, and plenty of it, as upon that depends the crispness and brownness of the fish.

TAPIOCA JELLY.—One half pint of tapioca, one quart of water, the juice and grated rind of a lemon. Soak the tapioca over night in water, sweeten and boil it for an hour in a farina kettle. When nearly done stir in the lemon and pour it into molds. Serve with cream sweetened.

FINANCIAL ITEM.—"What has become of the cashier of the National Bank?" asks Jones, who has just returned after a brief absence. Smith—Gone straight to Canada. "Gone straight to Canada, has he? Well, do you know I always suspected that there was something crooked about him."

THE colored servant in the South is occasionally good at repartee. Mrs. Yerger found her servant, Belindy, reposing in the rocking chair reading a newspaper. "You seem to think you are the lady of the house," said Mrs. Yerger, sarcastically. "No, mum, I's brack, but I's no sich a fool as dat."

THEY were at the theater and she had thoughtlessly eaten at dinner some soup with the flavor of onion in it. "Oh, Mr. Howlingsworth," she said admiringly, putting a morsel of perfumed lace and cambric to her face. "do you notice that some one near us has had the bad taste to eat onions before coming in the theater tonight?" "Why, no, Miss Clara, I hadn't until you spoke."

Prepare for Spring

Now is the time to prepare for spring, and your own system is of first importance. If you do not feel well during the winter, you have been overworked, or closely confined in badly ventilated rooms or shops, you need a good tonic and blood purifier like Hood's Sarsaparilla. Take it early and you will ward off attacks of disease or escape the effects of impure blood and that tired feeling, so common in the spring. Do not delay. Take Hood's Sarsaparilla now.

"I wish to state the benefit I derived from Hood's Sarsaparilla. I have used it in the spring for three years for debility and can say that I gained in flesh and strength after using one bottle. It has also cured me of sick headache," Mrs. F. H. ANDREWS, South Woodstock, Conn.

"I took Hood's Sarsaparilla for loss of appetite, dyspepsia, and general languor. It did me a vast amount of good, and I have no hesitation in recommending it." J. W. WILL-FORD, Quincy, Ill.

A BOY'S IDEA.—A little boy whose parents were always discussing ways and means in his presence was constantly reminded of the expense of everything until the early lessons of domestic economy were sunk deep in his soul. When he was three years old some friends visited the family, having with them a year old baby. This was such a fund of delight that the small boy's parents remarked that they should like such a baby in their own household, and they looked at him to see how he would take the suggestion. What was their surprise when he answered gravely: "You know you couldn't afford it!"

A STRAY LAMB.—A bright little fellow in a neighboring city was visiting his grandparents, very religious and devout people. The family prayers were tiresome to the young visitor and he showed his impatience every evening. Finally, at the close of the exercises one evening, he said to his grandmother: "I wish I didn't have to stay to hear grandpa every night." "Why?" said the grandmother in surprise. "Don't you have family prayers at your house?" "Yes," replied the young American, "father does after I go to bed, but he doesn't bother us children with them."

ILLUSTRATING IT. Willie Popinjay—Sis, what is meant by "unconscious humor?" Angelina Popinjay—I can't give you an exact definition of it, Willie, but I can give you an example. "Well, give us an example." "When pa came into the room where ma was trying to nail up that bracket yesterday, and said: 'Well, what are you driving at now?'"

AS IT APPEARED.—One of our girls, three years old, who had been quite interested in the painting of her home, was taken on the cars for a short trip and the train ran over a cow. When the little one saw the bleeding animal taken from under the wheels she cried: "Oh, mamma, look at the paint running out of that poor cow!"

A Sensible Man. Would use Kemp's Balsam for the Throat and Lungs. It is curing more cases of Coughs, Colds, Asthma, Bronchitis, Croup and all Throat and Lung Troubles, than any other medicine.
