Traveling meeting Light.

Journal

A traveling electric light has been used in Germany with much success. The arrangement is a very simple one. A dynamo, with an engine to drive it, is mounted on a wagon, something like that of a steam fire engine, containing boiler, fuel box and water tank, comwith wires fastened with stakes driven into the ground; the lamps are then and the engine is set in motion. The to fifty lamps can be operated, according to the power of the machine.
