

FARM NOTES.

THOSE SHEEP-KILLING DOGS.—A farmer who tries to keep 400 or 500 sheep on rough hills where they are his only source of profitable income writes to the National Stockman of one of his chief annoyances, the depredations of dogs.

"Dire necessity compels us to kill all the dogs we can, and it is not from a desire to destroy other men's property, but only to protect our own. If the dogs were kept off our premises they would be safe. Dog owners sometimes threaten private injury in return for the death of a worthless cur, but it is best to take such risk, as the owner might as well kill stock as for the dog to do it. We have no choice, as there is no law to protect our flocks, and we must protect them ourselves. Sheep are taxed to protect other property, but have no protection from worthless, untaxed dogs. It raises a terrible howl, and more mourning among some people, to have a dog killed than to hear of a loss of a hundred sheep killed by dogs. It is great cruelty to kill a dog, but there is no cruelty in a dog's tearing and mangling a whole flock of sheep."

The trouble and loss from the ravages of dogs seem to be increasing, if we may judge by the complaints which are coming from every part of the country. States which have no dog laws, or inadequate ones, should be stirred up to enact them. It is the height of absurdity to "spare the dog and spoil the sheep" when the value of the two is so vastly different.

GLADIOLUS SUPPORTS.—The best support for gladioluses are wires stretched from posts about two feet high, driven into the beds at each end. They are not seen, and the flower stalks get all the support that is required from them, without tying, if cross-wires or strings are used to prevent the stalks from falling down between the rows of wire. Where this plant is used in groups, instead of rows, one stake in the center is all that is necessary. We wind strings about the different stalks and fasten them to the stake. This allows the stalks to keep their naturally graceful positions, which would not be the case if each one were tied firmly to a support. The danger is not of the breaking of the stalks above the base of the plant, as some suppose. They are seldom broken except at the junction of stalk and bulb. If once beaten down by a strong wind they never assume an upright position of themselves.

WHAT DRAINAGE DOES.—The late John H. Kilham, author of a work on wheat culture, and for many years Secretary of the Ohio State Board of Agriculture, condensed the advantage of drainage under the following twelve heads: 1. The drainage removes stagnant water from the surface. 2. It removes surplus water from under the surface. 3. It lengthens the seasons. 4. It deepens the soil. 5. It warms the soil. 6. It equalizes the temperature of the soil during the season of growth. 7. It carries down soluble substances to the roots of plants. 8. It prevents heaving out or freezing out. 9. It prevents injury from drought. 10. It improves the quality and quantity of the crop. 11. It increases the effects of manures. 12. It prevents rust in wheat and rot in potatoes.

BEST SOIL FOR FOWLS.—The poorest and lightest sandy soil is considered better for fowls than any other. The rains carry downward all the impurities and such soil is always hard and free from mud, becoming dry in a short time. Diseases are not so frequent on light soils, especially roup, and gaps in young chicks seldom occur. This enables those possessing poor sandy soils to utilize them for poultry-raising, and in a short time the land may be fitted for growing crops. Trees are benefitted by poultry, not only from the droppings left on the ground, but also through the destruction of insects. Poultry and fruit should be the object, and there are many locations that could be made serviceable in that respect.

GOOD MUTTON AND WOOL.—A fact not to be forgotten in sheep husbandry, says a recent writer, is that while one may raise fine wool and very poor mutton, you cannot raise good mutton without raising good wool also. All authorities agree that the best feed sheep that fatten and mature in the shortest time make the best and soundest wool, so that this by-product from such sheep will always find a ready market. If we can raise mutton on the basis of making the meat pay the cost, we shall have the wool for clear profit.

BUCKWHEAT AND RYE.—J. H. Andre, in the Country Gentleman, recommends sowing four to six pecks of rye per acre with the buckwheat. The rye will spread over the ground, and instead of being a detriment to the buckwheat, will keep the ground cool while the crop is maturing and is benefitted by getting a better bill. By this mode one can generally get a good crop of rye at a cost of only seed and harvesting. Some of his best crops have been raised this way.

MR. W. BRAZELTON, of Monticello, Iowa, writes to the Philadelphia Press that if a farmer desires hornless cows, he need not use a knife, saw, or other implement, but simply procure a penny's worth of caustic potash and apply it just as the horn is starting, when the calf is a few weeks old. This will stop all horn growth, and do no injury at the time or afterwards to the animal.

A MAINE farmer, vowing death to foxes, placed a carcass near his barn and then connected it by a wire under the snow with a bell in his bedroom. A fox could not do vigorous work on that piece of meat without ringing that bell, whereat the schemer would awake and go forth to the slaughter. He killed twenty-five foxes by that device during the winter.

If you notice a young bird in any brood that is especially nice, do not kill it, keep it a while longer to see what kind of a fowl it will make. The very best is none too good to keep for breeding.

Fall Housecleaning.

What is a broad and comprehensive view of a home, and what are the most essential duties of a housekeeper or homemaker? What are the principal objects to be ever kept in view, as the goal of her best and highest endeavors? Is it not so to arrange it as to give the greatest possible amount of comfort, the best state of health, the truest happiness and the wisest growth for all its inmates, in return for the expenditure of money, strength, thought and time expended upon it?

There are plenty of good and sufficient reasons why a most thorough overhauling of the contents of every nook and corner of our houses is not only desirable, but an actual necessity, at least once a year, and, in some cases, twice. The most important consideration of any being the sanitary condition positively essential to maintain for the healthfulness of its inmates: This can be done in the most thorough manner, without making it such an uncomfortable upheaval as to not only annoy but to disgust, beyond patient endurance, every member of the family, and often tax the physical resources of the housewife beyond her power of recuperation for many months—sometimes, alas—for ever.

To do this in an orderly, systematic way, is a question well worthy the serious consideration of every thoughtful woman; and I contend that she, who, under the ordinary circumstances and conditions of housekeeping, does her most thorough cleaning and renovating in the spring, does so from force of habit and not because her reason or best judgment tells her it is wise, or sanctions the course. The cellar alone of all parts of a house, has need of its most thorough renovation in the spring of the year. Most people, particularly those who live in the country, have more or less vegetables stored in their cellars during the winter months; and, as nothing in the whole list of nuisances is more unhealthy than the odor arising from damp and decaying vegetables, the source of it cannot be too quickly or too thoroughly removed. And the manner in which our New England grandmothers routed all this and had their cellars annually whitewashed, on their sides and overhead, with a wash of unslaked lime, to which had been added a weak solution of copperas, as a better disinfectant, has never been improved upon by any modern scientific wisdom. But above the cellar it were wise for us to inaugurate a domestic revolution on their methods.

After obtaining every possible help to lighten the labor of this onerous task—and also doing it in the most approved and deliberate way—there are still very few women who are not compelled to overtax their strength during the side of the year when this is undertaken, at a time when the physical system is weakened by a long and exhausting winter, serious results will often follow. Aside from this aspect of the matter, it surely is the part of wisdom to do it when we can reap the greatest benefits from our labors, and not when dust is insinuating itself through every possible crevice; when the cunning fly, which neither screens nor the watchful eye of the housewife can effectually keep out of doors, and who seems to have an intuitive gift at finding the freshest air, and on which to take up his temporary quarters, and so manages to keep the overworked super-sensitive housemother in a constant state of irritation and worry. It is not a far wiser course to thoroughly dust and put away all the heavy carpets and curtains, if, happily, we are fortunate enough to have lighter ones—or wise enough to do without any—to do only what cleaning is necessary in the spring, and leave all renovating of paper and paint until the cool fall months, when both the annoyance of dust and flies are, in great part, done away with; and during the summer months, if compelled to stay at home, stay indoors only as much as absolutely necessary for the accomplishment of your work; such work, I mean, as cannot be taken out on the piazza, but spread your family table there, or under the shady trees on the lawn; swing in the hammock, or throw a blanket down and take an invigorating sun bath. Rest, rest, rest, with never a worry about the devastation the flies are making indoors, but with, now and then a pleasant day-dream of the fresh and attractive rooms to be made ready by and by, for a long winter of enjoyment.—Table Talk.

No Cure No Pay. It is a pretty severe test of any doctor's skill when the payment of his fee is made conditional upon his curing his patient. Yet after having, for many years, observed the thousands of marvelous cures effected in liver, blood and lung diseases, by Dr. Pierce's Golden Medical Discovery, his manufacturers feel warranted in selling it, as they are now doing, through all druggists, the world over, under a certificate of positive guarantee that it will either cure or cure in every case of disease for which they recommend it, if taken in time and given a fair trial, or money paid for it will be promptly refunded. Torpid liver, or "biliousness," impure blood, skin eruptions, scrofulous sores and swellings, consumption (which is serofula of the lungs), all yield to this wonderful medicine. It is both tonic and strength-restoring, and alterative or blood-cleansing.

Chronic Nasal Catarrh positively cured by Dr. Sage's Remedy. 50 cents, by druggists. A new process in shot-making does away with the tall lowers. A strong current of air is forced on the lead as it falls into the water. The record of cures accomplished by Hood's Sarsaparilla can never be completely written. The peculiar curative powers of Hood's Sarsaparilla are successful when everything else has failed. If your blood is impure, your digestion out of order, try Hood's Sarsaparilla. Let your horse stand loose if possible, without being tied up in the manger. Pain and weariness from a confined position induce bad habits. Cannon's Kidney Cure for Dropsy, Gravel, Diabetes, Bright's, Heart, Urinary or Liver Diseases, Nervousness, &c. Cure guaranteed. 831 Arch Street, Philad'a. \$1 a bottle, 6 for \$5, or druggist. 1000 certificates of cures. Try it. A Western dairyman thinks that dairy farmers as a class do not fully appreciate the importance of the speedy withdrawal of the animal heat from fresh milk.

Rapture cure guaranteed by Dr. J. B. Mayer, 831 Arch St., Phil'a, Pa. Ease at once, no operation or delay from business, attested by thousands of cures after others fail, advice free, send for circular. A box wind matches free to smokers of "Tan-sill's Punch" Cig. Clear.

Out of Sorts

Is a feeling peculiar to persons of dyspeptic tendency, or it may be caused by change of climate, season or life. The stomach is out of order, the head aches or does not feel right, appetite is capricious, the nerves seem overworked, the mind is confused and irritable. This condition finds an excellent corrective in Hood's Sarsaparilla, which, by its regulating and toning powers, soon restores harmony to the system, and gives that strength of mind, nerves, and body, which makes one last perfectly well. N. B.—Be sure to get Hood's Sarsaparilla

Sold by all druggists, \$1.50 for 60. Prepared only by C. L. HOOD & CO., Apothecaries, Lowell, Mass. 100 Doses One Dollar

RADWAY'S READY RELIEF. THE GREAT CONQUEROR OF PAIN.

Applied externally, instantly relieves and quickly cures Sprains, Bruises, Backache, Pains in the Chest or Sides, Headache, Toothache, or any other pain, CONGESTIONS, INFLAMMATIONS, Rheumatism, Neuralgia, Lumbago, Sciatica, Pains in the Small of the Back, etc.

LIVER, STOMACH OR BOWELS. Purely Vegetable, Perfect Purgatives, Act Without Pain, Always Reliable and Natural in Their Operations they will restore health and renew vitality. Price 25 cts. a Box. Sold by All Druggists.

YOU WILL SAVE MONEY Time, Pain, Trouble and will CURE CATARRH

Ely's Cream Balm Apply Balm into each nostril. ELY BROS., 66 Warren St., N. Y.

CHICHESTER'S ENGLISH PENNYROYAL PILLS. Red Cross Diamond Brand. The only pills that can be called "The Cure for CATARRH OF THE HEAD."

OPHIUM. A. W. GRAY & SONS, Philadelphia, Pa.

FRIED CORN.—Roasting ears are best for this purpose. Cut the corn from the cob, add salt and pepper, and put it in a large pie pan containing hot butter. Set it where it will cook slowly, and stir it often. If it should stick to the dish, add a little water, but not unless it does, for water is no improvement.

FROZEN MILK.—It is said, may be kept in a fresh state indefinitely, and steam refrigerators in which milk and other foods are preserved for any desired length of time. To-night and To-morrow Night, you can get at all druggists Kemp's Balsam for the Throat and Lungs, acknowledged to be the most successful remedy ever sold for the cure of Coughs, Croup, Bronchitis, Whooping Cough, Asthma, and Consumption. Get a bottle to-day and keep it always in the house, so you can check your cold at once. Price 50c and \$1. Sample bottles free.

A mastodon's tooth measuring 14 inches in circumference, and weighing 1 pound 14 ounces, was unearthed near Louisville recently.

"The days of miracles are past." That may be, and yet some of the most wonderful things ever witnessed by the human family have occurred within the last decade. Not the least of these wonders is the success which the agents of B. F. Johnson & Co., Richmond, Va., are meeting with in curing their patients. They will show you how to work wonders.

Half of the wear to tools, on some farms, comes from unnecessary exposure to sun, and wind, and rain. A convenient shelter is far cheaper and looks less shiftless.

If not about being taught by a man, take this good advice. Try Jobbins' Electric Soap next Monday. If you don't like it, you will know for yourself just how good it is. Be sure to get no imitation. There are lots of them.

Benzene or naphtha will remove grease from paint without removing the latter, if used quickly and carefully.

FITS: All Fits stopped free by Dr. King's Great Nerve Restorer. No Pain after first day's use. Marvelous cures. Treatise and \$2.00 trial bottle free to all. Send to Dr. King, 351 Arch St., Phila., Pa.

It is stated that the roadside fences are being rapidly removed in the vicinity of Boston, adding much to the rural beauty of the suburbs.

Frazer Axle Grease. The Frazer Axle Grease is the best and, intrinsically, the cheapest. Don't work your horses to death by the poor axle grease. Try it.

It is not so honorable to descend from a high ancestry as to ascend from a low one.

Afflicted with sore eyes use Dr. Isaac Thompson's Eye-water. Druggists sell at 25c per bottle.

The less tenderness a man has in his nature, the more he requires from others.

The best cough medicine is Pisco's Cure for Consumption. Sold every-where. 25c.

Pigs can be reared so as to have seventy-five per cent. of lean meat in them by feeding bran and middlings. Skim-milk will also be fed.

HOUSEHOLD.

INEXCUSABLE BLUNDERERS.—A few days ago, a woman living almost within a stone's throw of the University was heard to ask, in the presence of her children, who was vice-president of the United States now. Another woman—a woman of wealth and leisure—said that she never allowed herself to read exciting novels like "Robert Elsmere." She had read "The Hidden Hand," and that was all she cared to read of such novels. This same mother informed an astonished guest that she had read "Ben Hur" several years ago when she was a little girl, but had not yet found time to re-read it. At a recent gathering of literary people, mention was made in the course of conversation, of Becky Sharp.

"Becky Sharp—Becky Sharp!" repeated a lady with knitted brows, "seems as if I had heard that name before. Wasn't she a spy in the rebel army?"

At the Falls of Minnehaha, the other day, a lady was heard to ask her companion if he had ever read the poem about Minnehaha and Hiawatha that Tennyson wrote. He gravely informed her that he had never had that pleasure.

There are many women, who were once well informed, who now show very little evidence of culture. One of them was asked why she had allowed herself to become so retrogressive. She answered that it was because she had for so long been thrown into less cultivated society than she had been accustomed to. There are many persons who make similar excuses for not keeping up with the times. They fancy that they can make no improvement unless stimulated by competition. A woman has no right to let her mind be entirely diverted from intellectual topics by the chatter of illiterate companions. There is as much reason, and more, why an intellectual woman should bring her companions to her level, than that she should sink to theirs. There is no woman so busy that she can not find a little time to read if she really cares to do so. The fault is wholly with herself if her tendencies become less intellectual. The desire for mental improvement that is aroused or stimulated only by competition will never make a very intellectual woman. If there is nothing within herself that makes her "want to know," she should remember that it is the duty of every mother to keep herself as well informed as possible on the topics of the day.

STEWED CORN.—Sweet corn is never so good as when cooked within a few minutes after having been gathered. When boiled, it should not be allowed to remain in the water after it is done; in fact, it should be served at once, no matter in what way it may be cooked, for standing spoils it. There is a great difference of opinion regarding the length of time required for cooking, some claiming that when boiled on the cob it requires an hour, others that it requires not more than a quarter of that time. Of course, a great deal depends on its age and whether it is cooked in hard or soft water. The water should not be allowed to stop boiling after the corn has been put into it, and the corn is improved if the water be made as salt as for mush. After it is done, mere boiling hardens it. I like to drop it into the boiling water, and if the kernels have not attained their full size, fifteen or twenty minutes will cook it to suit me. There are people who do not consider it done unless it is hard enough to be as indigestible as leather. Many cooks strip back the husk, remove the silk, then replace the husk, tie it in place and boil it all together. They claim that the flavor is thus better preserved.

STEWED CORN.—Cut your corn from the cob, put it in a basin, and add enough milk to cover it. Stir it frequently. Let it cook for fifteen minutes, the more you heat this, the better it will be. Bake it slowly for an hour in a covered dish, removing the cover for ten or fifteen minutes before it is to be served, that it may brown. This is very nice as a side dish. It is also made without eggs, and preferred by many who do not like the taste of eggs with corn. In this case the corn is cut from the cob, mixed with only a teaspoonful of rich cream to a quart of the corn, and half a cupful of butter. Pepper, salt, and sugar are added to taste, and the pudding is baked an hour and a half.

GREEN CORN PUDDING.—Grate the corn from one dozen large ears, and mix it well with the beaten yolks of five eggs. Then add one-third of a teaspoonful of butter, a little salt, one tablespoonful of sugar, one quart of milk and, last, the well beaten whites of five eggs. The more you heat this, the better it will be. Bake it slowly for an hour in a covered dish, removing the cover for ten or fifteen minutes before it is to be served, that it may brown. This is very nice as a side dish. It is also made without eggs, and preferred by many who do not like the taste of eggs with corn. In this case the corn is cut from the cob, mixed with only a teaspoonful of rich cream to a quart of the corn, and half a cupful of butter. Pepper, salt, and sugar are added to taste, and the pudding is baked an hour and a half.

WHOLE PRESERVED PEACHES—Select large, juicy, ripe peaches, pare carefully and throw at once into cold water to prevent discoloration. When you have about four pounds pared, weigh them, and allow one pound of granulated sugar and a half dozen peach kernels to each pound of peaches. Put a layer of the peaches on a large dish and then cover them with a layer of sugar, then another layer of peaches and another layer of sugar, having but two layers on each dish; stand aside for about two hours or they can stand overnight, then put them in a porcelain-lined kettle, add the kernels and bring quickly to boiling point. Skim, and simmer gently until the peaches are tender and clear. This may take thirty or forty minutes. When done, lift them carefully, one peach at a time, and put them in glass tumblers or jars, and stand aside to cool, while you boil the syrup over them and let them stand uncovered until next day, then cover the tops with two thicknesses of tissue paper, neatly pasted down. Brush over the top paper with water, so that when it dries it will shrink, thus making a better cover. Keep in a cool, dark place.

TO HEAL ALL BLOOD CONTAGION.

Eight years ago a cancer came on my lower lip. I had it cut out while it was very small, and it healed up apparently, but soon broke out again, and commenced eating very rapidly. It took off my neck 1/2 inch from one side to the other, and down to my chin. I had it treated by burning, and got so weak that I did not think that I could stand it much longer. After much suffering I discarded all other treatment, and began taking Swift's Specific, and the cancer soon began to heal, and in a short time it was completely healed and I was entirely well. It is now over three years since I got well, and there has been no sign of any return of the disease. I know it is cancer, and I know it was cured solely by S. S. S. E. V. FERRARD, Houston, La.

Swift's Specific Company, Drawer 3, Atlanta, Ga.

CAUTION

W. L. DOUGLAS' name and the price are stamped on the bottom of all shoes advertised by him before leaving his factory; this protects the wearers against high prices and inferior goods. Take note unless so stamped, nor be deceived by others claiming to sell direct to factory, and receive no money for mail order, wide or narrow toe, size and width, and enclose price with order. Prompt delivery and satisfaction guaranteed. Address W. L. DOUGLAS, Brockton, Mass.

W. L. DOUGLAS \$3 SHOE FOR GENTLEMEN. Our claims for this shoe over \$3 all other shoes advertised are: It contains better material. It is more stylish, better fitting and durable. It gives better general satisfaction. It saves more money for the consumer. Its great success is due to merit. It cannot be duplicated by any other manufacturer. It is the best in the world, and has a larger demand than any other \$3 shoe advertised. \$5.00 will be paid to any person who will prove the above statements to be untrue. The following line of shoes will be found to be of the same high standard of excellence: \$2.50 GENUINE HAND-NEWEDED SHOE. \$4.00 HAND-NEWEDED WELT SHOE. \$2.50 GENUINE HAND-NEWEDED SHOE. \$2.50 EXTRA VALUE CALF SHOE. \$2.25 WORKINGMAN'S SHOE. \$2.00 GOOD-WEAR SHOE. \$2.00 and \$1.75 BOYS' SCHOOL SHOES. All made in Congress, Boston and Mass.

W. L. DOUGLAS \$3 AND \$2 SHOES FOR LADIES. Both Ladies' Shoes are made in sizes from 1 to 7, including half sizes, and E. C. D, E and EE widths. STYLES OF LADIES' SHOES. "The French Opera," "The Spanish Arch Opera," "The Millionaire's Comfort House." All made in Boston in the Latest Styles. Also French Opera in Front Lace, on \$3 shoe only. SPECIAL. W. L. DOUGLAS \$3 GRAIN SHOE (laced) for Gentlemen, with heavy top sole and strictly waterproof. It is just what you need. W. L. DOUGLAS, Brockton, Mass.

PISCO'S CURE FOR CONSUMPTION. Best Cough Medicine. Recommended by Physicians. Cures where all else fails. Pleasant and agreeable to the taste. Children take it without objection. By druggists.

A WET HEN. The man who has invented from three to five dollars in a Rubber Coat, and at his first half hour's experience in a storm finds it so narrow that it is hardly a better protection than a mere quilted coat, not only feels chagrined at being so badly taken in, but also feels if he does not look exactly like a hen.

LATEST IMPROVED HORSE POWER. Machines for THRESHING & CLEANING Grain, also Machines for SAWING WOOD with Circular and Cross-cut Saws. Acknowledged by all to be THE BEST. EASY DRAFT, DURABILITY & QUANTITY OF WORK. Free by page pamphlet. A. W. GRAY & SONS, PATENTERS AND SOLE MANUFACTURERS, RIDDLAND'S SPRING, TN.

MORWITZ'S BEST LOW-PRICED GERMAN DICTIONARY. PUBLISHED AT THE REMARKABLY LOW PRICE OF Only \$1.00, Postpaid, 650 Pages, Or only \$1.50, Postpaid, 1224 Pages. This Book contains 650 Finely Printed Pages of Clear Type on Excellent Paper, and is Handsomely yet Serviceably Bound in Cloth. It gives English words with the German equivalents and pronunciation, and German words with English definitions. If you know a German word and desire to know its meaning in English, you look in one part of the Book while if the English word is known and you want to translate it into German, you look into another part of the Book. It is invaluable to Germans who are not thoroughly familiar with English, or to Americans who wish to learn German. You know how easily you can master German with the aid of this Dictionary if a half hour per day is devoted to study, how much benefit can be derived from the knowledge, and heated to send for this first-class book. You will never regret it. Can be had at any Bookstore, at the office of this paper, or by applying to MORWITZ & CO., 614 Chestnut Street, PHILADELPHIA.
