

FARM NOTES.

Row radishes at intervals of a week...

With early lambs now selling at \$6 each...

The second planting of peas may be made as soon as the first lot are up...

The horseshoe of the present should be improved. There needs to be something which will save the hoof from an undue wear and breakage...

MEALY bug, which does so much damage to house plants, and especially to coleus, may be prevented or removed by washing the plants once a week with soap-suds...

A NEW use for skim milk is recommended by some farmers in New England...

The bees that come out early will be thinned out during the prolonged wet weather. If caught in a shower when they are a distance from the hive they are liable to be destroyed.

In the garden, if the plot is small, a saving of labor may be made by the frequent use of the rake, which will effectively destroy young and tender weeds...

The plot intended for celery should be well manured now, and if soap-suds are thrown on the plot, so as to soak in to the soil, it will be all the better for the growing plants when they are put out to grow.

It is claimed that ten pounds of cloverseed make the correct amount of seed for an acre. This is true only under certain conditions.

CARE OF YOUNG LAMBS.—Great care must be taken not to let the lambs out from under cover on raw, damp days, or when rain is falling...

THE TRENCH SYSTEM.—The Trench system is simply the use of trenches, but involving a heavy dressing of chemical fertilizers, placed so as to be available all through the season.

There is more experience, time, and brain-work represented in the preparation of Hood's Sarsaparilla than in any other medicine.

Modern needles first came into use in 1645. Physicians recommend "Tanall's Punch." Give your fruit trees a good soil. They cannot feed and thrive on nothing.

HOUSEHOLD.

WHERE animals—horses and sheep, to wit—have their teeth sound and complete, it is claimed there is no advantage to be gained by crushing their grain rations.

EXPERIMENTS show that for mere sustenance a cow of 1000 pounds weight must digest about eight pounds of nutritive material from her food.

GROW roots for your stock. Beets, carrots and turnips are highly relished by all animals in the winter as an agreeable change from the dry food.

THE Dorset sheep bear lambs twice a year and twins are frequent. They are the most prolific of all breeds.

EARLY varieties will not produce early crops unless the ground is rich. Everything that can be done to force the growth should be considered.

To get a full crop of potatoes use plenty of manure or fertilizer. If manure, let it be fine and well rotted and applied liberally in rows.

WINDOW plants may be grown any season of the year in the following manner: Soak a large piece of coarse sponge in water, squeeze half dry, and sprinkle in the openings red clover seed, millet, barley, grass, rice and oats.

If any of our readers have a graft they desire to bear early, if they will bend it over and tie it fast to a branch below it, or tie a weight to a string suspended from it, the gradual bending of the graft will check the growth of it, and cause it to put out fruit spurs, and an early bearing will result.

WHEN the farmer churns his milk, and sells butter he does not deprive his soil of fertility. The buttermilk may be fed to swine and poultry with profit, but when meat and eggs are sold the fertility of the soil goes also.

THE better the quality of the manure the less cost of handling it. Bulk does not give quality and this is especially the case with manure.

A BREED cannot well be tested by selecting an individual of that breed to compare with an individual of some other breed, as all animals differ, no two being alike in every respect.

Parisian ladies of fashion have introduced the faintest shade of pink visiting cards. It is very important in this age of vast material progress that a remedy be pleasing to the taste and to the eye, easily taken, agreeable to the stomach and healthy in its nature and effects.

One million dollars gold coin weighs 3,685.8 pound avoirdupois. A Superior Not Possible.

The St. Bernard Vegetable Pills stimulates torpid livers, kidneys, lungs and bowels, removes congestion, purifies the blood and promotes healthy digestion, nutrition, secretion and excretion.

Cann's Kidney Cure for Dropsy, Gravel, Diabetes, Bright's, Heat, Urinary or Liver Diseases, Nervousness, &c.

When asparagus is planted in rows, they should be four or five feet apart.

Use the Frazer Axle Grease, "the best in the world"—will wear twice as long as any other. Ask your dealer for it, and take no other.

All kinds of dried fruit and oranges are selling at unusually high prices.

"Oh, So Tired!"

is the cry of thousands every Spring. For that Tired Feeling take

Ayer's Sarsaparilla and recover Health and Vigor. It Makes the Weak Strong. Prepared by Dr. J. C. Ayer & Co., Lowell, Mass.

OPIUM

HABIT. Only Certain and T. L. STEPHENS, Lebanon, O. Spool Holder. NEW PATENT. Saves time and trouble.

FRAZER AXLE GREASE. BEST IN THE WORLD. Its wearing qualities are unsurpassed.

FITS STOPPED FREE. Insane Persons Restored. Dr. KLINE'S GREAT NERVE RESTORER.

THE WONDERFUL WILBURG CHAIR. COMBING 5 ARTICLES OF FURNITURE. INVOLVED SAVINGS AND WHEELS.

PENNYROYAL PILLS. RED CROSS DIAMOND BRAND. Best Drug for Stomach Brains, Head, etc.

PISO'S CURE FOR CONSUMPTION. CURE WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes good. Use in time.

SOLDIERS. Home Study. Book-keeping, Business Forms, Penmanship, Arithmetic, Short-hand, etc.

ROCKWOOD'S PORTRAITS. A carte de visite, tintype or daguerotype can be copied to a life size portrait for \$1.00.

PATENTS—PENSIONS—How to get a Pension of Pension and Bounty laws. Send for Inventor's Guide or How to get a Patent.

WANTED—Reliable men to sell Nursery stock, local or traveling. G. D. Brown & Co., Syracuse, N. Y.

PREPARING for planting is now the most important work on the farm. For the reason already stated, this will necessitate prompt and systematic action.

All foods for plants must be soluble to be available. Do not remove the mulch from trees and plants too early.

Ground bone is a good fertilizer to put around trees in setting them.

Our Hannah Jane. Our Hannah Jane was thin and weak. And she had her hair and chest sore.

A solution of corrosive sublimate (a rank poison) is one of the best things to apply to the rails and cracks in bedsteads to keep out bugs.

Use the Frazer Axle Grease, "the best in the world"—will wear twice as long as any other. Ask your dealer for it, and take no other.

GOOD BREAD MAKING.

We always prefer bread made with good home made liquid yeast, but as it is a good deal of trouble to have this always just right we are glad to find in Good Housekeeping the following recipes for making bread from compressed yeast.

Our family have been noted for their good bread for years. And coming from an old New England family, I was brought up to think that unless the bread was perfect there was nothing in the house that would take the place of it.

To make wheat bread, take two quarts of finely sifted flour, put into the bread pan. Mix with this flour (with the ends of the fingers) a tablespoonful of lard and a piece of butter the size of an English walnut, one teaspoonful of salt and two of sugar.

Take two quarts of flour, one quart of sweet milk, less one gill, half a small cake of yeast, one teaspoonful of salt, and one gill of luke warm water. Put the yeast in the water to soak.

Take two quarts of flour, one quart of sweet milk, less one gill, half a small cake of yeast, one teaspoonful of salt, and one gill of luke warm water. Put the yeast in the water to soak.

A FINE JELLY—Cover two ounces of gelatine with cold water, and let soak one hour, add a pound of sugar and a pint of boiling water, stir until the sugar is dissolved and add a pint and a half of cranberry juice.

All kinds of dried fruit and oranges are selling at unusually high prices.

WHAT HURTS HORSES' HOOFS.—

To accustom a horse to work of a given character and then keep him in idleness (the circulation of the foot being thereby completely changed) is to cause any latent disease of the feet to become active and to even induce disease in a foot previously healthy.

You Need It Now

To impart strength and to give a feeling of health and vigor throughout the system, there is nothing equal to Hood's Sarsaparilla.

EXPERIMENTS show that for mere sustenance a cow of 1000 pounds weight must digest about eight pounds of nutritive material from her food.

GROW roots for your stock. Beets, carrots and turnips are highly relished by all animals in the winter as an agreeable change from the dry food.

THE Dorset sheep bear lambs twice a year and twins are frequent. They are the most prolific of all breeds.
