WILD RUMORS OF LOSS OF LIFE.

Many Perch in Treetops Until Exhausted and Then Fall into the Flood-Yuma Completely Ruined. 1,400 People Homeless and 250 Houses Wrecked.

YUMA, Ariz., March 2.-Over 250 houses are in ruins in this place and

The common loss has brought all classes of citizens together and all have worked with a will, first in trying to save the town by constructing a rule levee, and, when that effort proved futile, in saving as much as possible from the ruins. The old town will probably not be rebuilt, as both merchants and residents will erect their stores and houses on the hill in order to

be out of reach of any further deluge.

Reports from the valley of the Colorado below this place state that hundreds of the Cocopah Indians have been drowned. They are located about sixty miles south of here and their tribe is about 3,000 strong. Their villages are all in water, and as there are no hills on which the Indians could take refuge, an immense number must have been caught in the flood and swept away. The water rose six feet in twelve hours and came on them almost without

In this city the ruin has been most complete, the Catholic church being the only building left standing on the main street. The convent and adjoining school stood the wear of the waves for many hours, but finally crumbled into ruins. The Yuma Sentinel moved its office four times Saturday, but finally succeeded in getting out on time. Times, was less fortunate and its office and material went down in the wreck.

Loss of Life Denied.

San Francisco, March 2 .- The report that there has been a great loss of Yuma appears to be without foundation. General Manager Towne, of the Southern Pacific, has been in communication with Yuma all day and he has heard nothing of any loss of life. All the ranchers near Yuma were warned in time to escape to the high ground. YUMA, Ariz., March 3.—The river bas

The statement is made that the great loss of life here is untrue and absolutely incorrect. One man so far is known to be drowned. Reports of the death of others in the valley are made, but not vet cenfirmed.

The Mississippi Threatening.

NEW ORLEANS, March 2. — Col. Wright, of The Vicksburg Commercial, telegraphs that the high stage creates uneasiness throughout that section. A rise in the Ohio, accompanied with one from the Arkansas, would put the levees to a severe strain. R. F. Rey-nolds said: "I have been in communication today by wire with all points be-tween this city and Memphis, and the conclusion arrived at is that the present condition of the Mississippi river and tributaries threatens a disastrous over-flow from Memphis to New Orleans."

cratic vote in the state legislature for United States senator. In March, 1835, he was appointed United States senator by Governor Stoneman, in place of John F. Miller, and in January, 1887, he was elected for the succeeding term. In addition to his mining interests Senator Hearst was one of the largest real estate owners in California and he was the proprietor of The San Francisco Examiner till 1887, when he presented it to his only son. SENATOR BLAIR BANISHED.

The New Hampshire Reformer Made Minister to China.

Washington, Feb. 28.—The president yesterday appointed Henry W. Blair, of New Hampshire, envoy extraordinary and minister plenipotentiary to China. The nomination was promptly confirmed by the senate.

Washington, March 3.—It transpires that the Chinese government will refuse to accept Senator Blair as minister of the United States, and that it is the fear of such an occurrence that deters Blair from accepting. In all his term as senator, Blair has manifested the greatest antipathy towards the Chinese, and in speeches on the floor of the sen-ate has spoken of them as a race with the utmost bitterness. On the night following his appointment and confirmation the attaches of the Chinese legation hunted up his record, and on the following morning it was caoled in full to the Chinese court. Mr. Blair had no intimation that the president was thinking of conferring the appointment upon him, and it is unlikely that in view of the circumstances he will

The month closed very cold, preceded general rains throughout the entire wheat region, but owing to the backward condition of the crop it is probable that no serious injury will result from this sudden freeze. There is an excess of moisture throughout the greater portion of the wheat region, and the month of March opens with general snows throughout northwest, and conditions favorable to rain covering the central valleys.
