Representative Nesbit, of Allegheny | Time was when the "glorious clicounty, has presented in the legislature mate of California" did not attract a bill which provides that thirty days tourists. But year after year the tide after the passage of the act the court of of travel sets in stronger and stronger common pleas in each county shall ap- every fall and winter toward this fapoint a competent person, for a term vored region. There is no climate of three years, to serve as a county sup- like it on this continent for a winter erintendent to be elected afterward as resort, and the usual fine service on other county officers are.

The bill also provides as follows: ruary three commissioners for terms of tion which leaves nothing to be desirone, two and three years, and after- ed. ward one each year for a term of three years. These shall elect three of their number, who, with the county superintendent, should constitute a board of directors to investigate roads and also be a board of viewers for location and vacation. The township commissioners shall meet the township auditors the first Monday in March, and appoint an outside person as treasurer, who shall levy a tax not exceeding ten mills for road purposes. Every male taxable worth \$100 shall work one day on the roads under the proper superintendent or pay in cash. The commissioners of one township may join with those of another in the construction of

roads or bridges. Any state appropria-

tion shall be divided between counties

in proportion to work being done.

The ice that hes frozen on the river and its tributaries above Lock Haven, according to the papers of that city, is the heaviest for years past, and there is likely to be great damage done by the breakup, should it occur before the spring weather softens the ice. The streams are all below low water mark and a heavy rain that would cause rise enough to float the ice would certainly result in ice gorges and jams that would destroy much property on the low lands. At Driftwood the ice on Sinnemahoning is 22 inches thick, and at Clearfield the Susquehanna is frozen to the bottom excepting where there are deep holes. The ice there is 36 inches thick. The average thickness of the ice on the creeks is 20 inches, which is much heavier than has frozen for many years.

It is said that the city editor of a Chicago daily instructed the members of the city force to hunt up their most disreputable and seedy clothing and attend the "stylish" churches on a recent Sunday. The experience of two of the reporters is given, one of whom was almost frozen to death by the stiffness of the reception he encountered, while the other was cordially greeted and every effort put forth to make him comfortable. This would only seem to prove that there are "stylish" churches, just as there are "stylish" men and women, whose hearts beat warmly for humanity, while there are others that judge a fellow-being by the sort of clothes he wears. Nor is there anything wonderful in this.

THE MINER LAW, under which Michigan chose her presidential electors in 1892 will be repealed, a bill to that effect having already passed the senate. It was passed for partisan purposes and is being repealed for partisan purposes. Nevertheless we hold that the district system of choosing electors is the fairest, always provided that the districts have been honestly constructed. But just here is where the trouble comes in. Few districts are made up by the rule of fair play. Partisan advantage is sought in nearly every case, and yet it is seldom gained by such methods. The above is from the Altoona Tribune, Rep., and we endorse its sentiments.

The Kansas Populists have ousted four Republicans from the legislature, and are not near done yet, they say. It wouldn't be a healthy place at all for Andrews.

bad mix between the Republicans and Dr. King's New Discovery for Conthe Populists. The organization of the legislature and the election of a U. S. senator, are the unsettled things.
