CENTRE HALE, PA., THURS. FEB. 23,

THE CROWNING ACHIEVEMENTS OF THE TELEPHONE.

ment in the line of telephony have recently taken place in New York City. The first one signalized the opening of the telephone line from New York to Chicago. The next one was a public exhibition of the capacity of that line given by the transmission of music over the thousand miles intervening between that city and the City of the motion? Lakes. The music was so perfectly reproduced as to be heard by members of a large audience. To day New York is in telephonic communication with Chicago, and the oral transmission of intelligence has become an be put in communication with each enteen years ago. After the developphonic transmitters for short, distance work had become an acknowledged strument. As in the case of many other things in this world, it was found desired results. The construction of an absolutely first-class copper line of large caliber wire and of the most perfect details of mounting has removed the thousand miles intervening between New York and Chicago effectually, and now conversation can be held with Chicago even better than ordinarily with New York City connections. The success of long distance telephoning in the present case is merely one of the additional triumphs

On February 7 of the present year, a still greater achievement was com- is right at hand unmistakably plain. memorated. On that day was witnessed the opening of the telephone line from Boston to Chicago. Tele- and Saturday was not wholly unexphoning is successfully carried on over 1,250 miles of wire, owing to a somewhat circuitous route followed by the line. All distances hitherto covered are insignificant compared to this. The possibilities it holds for the future cannot well be overestimated. A step beyond Chicago and the banks of the Missouri will be reached, and we may yet see Omaha and San Francisco connected by a line which will form the final link in a chain bringing San Francisco and New York within speaking range of each other. When conversation is carried on perfectly as it now is over 1,250 miles of wire, the extension of distance becomes a matter of detail.

of the best,

THE tendency toward extravagance on the part of Executive Commissioner Farquhar, in the management of Pennsylvania's interests in the Columbian exhibition, is shown in the dinner given to certain parties in Philadelphia at a cost of \$477.25, which he would like to pay for out of the states appropriation. The governor has informed the commissioner that he is uncertain as to who should pay the bill, which is pretty broad hint that the cost should not come out of the state funds. His royal highness is reported to have said that he would pay the bill himself rather than have any trouble about it. Let him do it, The lesson may do kim good. The appropriation was not made to pay for costly dinner and of their standing alone in the field ren-

COWS AND CONSUMPTION.

Where Milk is Not Used the Disease is Un-

Consumption is the result of drinkeveryday affair. When the telephone ing cows' milk," Rather a sensational was first introduced, it was believed that it would never have a very extensive application. It conventions are applications of the conventions of tensive application. It seemed impos- an authoritative source and is meant sible that all the leading business of to stand alone and unqualified Dr. fices in such a city as New York should | Charles A. McQueston, secretary of the United States Board of Examining other in any practical way by the al- Surgeons, and well-known practicing most impracticable invention of sev- physician of San Francisco, is the authority. He made this statement, and ment of the telephone with micro- then followed it with yet stronger statements.

"I mean exactly what I say; no more fact, the troubles offered by induction no tess. The primary cause of conand the static capacity of long lines sumption is the drinking of cows' milk. caused many to believe that the tele- Of course I don't mean to say that phone could never be a long range inutable directly to the patient's having imbibed infected cows' milk though that the best appliances secured the even so strong a statement as that is very nearly true-but I do mean to say that if the American people stopped using cows' milk and butter and cheese made from cows' milk, tubercular consumption would soon disappear.

"Let me put it another way; in countries where cows' milk is not used tubercular consuption is not known. The scientific world is awakening to this fact, and soon we may expect a more rigid inspection of our daily milk supply. But I must say it is taking us an unconscionably long time to discover this simple truth. And the proof

The raid made on Reading Friday pected by financiers. There have been signs in financial circles of its coming for several days. The attack comes from eastern monied powers in revenge for the attempt of Reading to enter. their fields, and it was so fiercely waged the first day as to cause a loss in Reading shares and securities of over five millions of dollars. If Reading succeeds in weathering the storm she will gain a great victory; if she fails the magnificent plans of President McLeod must collapse and a receivership probably follow. The crucial test through which she is now passing simply means financial life or death.

The Reading collapsed on Monday and went into the hands of receivers-President McLeod, Chief-justice Paxson of the state supreme court, and Elisha Wilbur have been appointed receivers. Chief Justice Paxson has sent his resignation as chief-justice to Gov. Pattison,

The Reading's affairs has caused tremendous excitement in money circles.

Shipping Logs to Europe.

Mr. William Johnson, of Mill Hall, is engaged in the enterprise of cutting and preparing for shipment to Europe, walnut logs. Mr. Johnson obtains the logs from the farms in Nittany and Bald Eagle valleys, and only those cut from the largest trees are taken. The walnut trees cut for the purpose thus far grew to immense size, and the fact ders the wood so much finer grain | By order of Board. than forest trees. In Europe the logs will be cut up for veneering purposes. About fifty logs are now ready for shipment and are splendid specimens of on? Because they think it will wear away.
