

**It Is Superior to Gunpowder.**  
The German military authorities are experimenting with a new explosive which its inventors claim is destined to supersede gunpowder. The explosive is a brown fatty substance. A spark or a shock does not set it off. Heat to a considerable degree does not affect it, scarcely any smoke and but little sound accompanies the explosion. When in guns the explosion is obtained through contact with another chemical compound. It is intended mainly for the anti-air branch of the service.

It is the troubles of to-morrow that make people heavy laden to-day.  
The man or woman who is profitably employed is generally happy. If you are not happy it may be because you have not found your proper work. We earnestly urge all such persons to write to R. F. Johnson & Co., Richmond, Va., and they can show you a work in which you can be happy and profitably employed.

A great many people are right in their hearts and wrong in their heads.  
For Dyspepsia, Indigestion and Stomach Disorders, use Brown's Iron Bitters—the Best Tonic. It rebuilds the blood and strengthens the muscles. A splendid medicine for weak and debilitated persons.

The taste of pie does not depend upon the size or the shape of the piece.  
We will give \$100 reward for any case of catarrh that cannot be cured with Hood's Catarrh Cure. Taken internally.  
F. J. CHENEY & Co., Props., Toledo, O.

Thinking will keep us from doing wrong.  
Malaria cured and eradicated from the system by Brown's Iron Bitters, which circulates the blood, tones the nerves, aids digestion, acts like a charm on persons in general ill health, giving new energy and strength.

During the most violent gales the sea is disturbed to a depth of 500 feet.  
Beecham's Pills are better than mineral waters. Beecham's—no others. 25 cents a box.  
There are thirteen elements in the body—five gaseous and eight solid.

Mrs. Theresa Hartson  
Albion, Pa.

**Misery Turned to Comfort**  
Kidney Troubles, Sleeplessness, Distress—All CURED.  
"Albion, Erie Co., Pa., Feb. 18, '03."  
"I can truly say that Hood's Sarsaparilla has done more for me than all the prescriptions and other medicines I have ever taken. For 14 years I have suffered with kidney troubles; my back being so lame at times that I could not raise myself up out of my chair. Now I am as well as I can be. I could not sleep, and suffered great distress with my food. I have taken 4 bottles of Hood's Sarsaparilla with the most gratifying results. I feel like a new person, and my terrible sufferings have all gone."  
**Life is Comfort**  
compared to the misery it used to be. I can now go to bed and have a good night's rest; I can eat heartily without any distress. I am

With Patent, Stoves and Ranges which stain the hands, before the iron and burn red. The Rising Sun Stove Polish is brilliant, odorless, durable, and the consumer pays for so little for glass packages with every purchase.

**REV. DR. TALMAGE.**  
The Eminent Brooklyn Divine's Sunday Sermon.

Subject: "Moses and Miriam on the Banks of the Red Sea."

TEXT: "And Miriam, the prophetess, the sister of Aaron, took a timbrel in her hand, and all the women went out after her with timbrels upon their heads, and dancing, and singing, and saying, 'Sing ye to the Lord, for He hath triumphed gloriously; the horse and his rider hath He thrown into the sea.'—Exodus xv, 20, 21.

Sermonizers are naturally so busy in getting to Israelites safely through the parted Red sea and the Egyptians submerged in the returning waters that but little time is ordinarily given to what the Lord's people did after they got well up high and dry the beach. That was the beach of the Red sea, which is at its greatest width 200 miles and at its least width 12 miles. Why is the adjective "red" used in describing this water? It is called the Red sea because the mountains on its western coast look as though sprinkled with brick dust, and the water is colored with red seaweed and has red zoophytes and red coral.

This sea was cut by the keels of Egyptian, Phoenician and Arabic shipping. It was no insignificant pond or puddle on the beach of which my text calls us to stand. I hear you say, "I have heard of the timbrel, but the timbrel was only another name—an instrument of music made out of a circular hoop, with pieces of metal fixed in the sides of it, which made a jingling sound, and over which hoop a piece of parchment was stretched, and this was beaten by the knuckles of the performer."

The Israelites, standing on the beach of the Red sea, were making music on their deliverance from the pursuing Egyptians, and I hear the Israelites men with their deep bass voices, and I hear the timbrel of Miriam as she leads the women in their jubilee. Rather lively instruments, you say, religious services, the timbrel or tambourine. But I think God sanctified it. And I rather think we will have to put a little more of the festive into our religious services and drive out the solemn and funeral, and the day may come when the timbrel will resume its place in the sanctuary. But that which occupied the attention of all the men and women of Israel, the host was the celebration of their victory. They had crossed. They had triumphed. They were free.

More wonder was this victory and defeat than when the hosts of Richard overcame the hosts of Saladin at Azous, than when at Bannockburn Scotland was set free; than when the Earl of Northumberland was driven back at Branham Moor, than when at the battle of Wakefield York was slain, and when at Bosworth Field Richard was left dead, than when the Athenians under Miltiades at Marathon put the Persians to flight, for this victory of my text was gained without sword or catapult or spear. "The weapon was lifted and prostrated sea." "And Miriam, the prophetess, the sister of Aaron, took a timbrel in her hand, and all the women went out after her with timbrels and dancing." And Miriam answered them, "Sing ye to the Lord, for He hath triumphed gloriously; the horse and his rider hath He thrown into the sea."

Brooklyn Tabernacle to-day feels much as Moses and Miriam did when they stood on the banks of the Red sea after their safe emergence from the waters. By the help of God and the generosity of our friends here and elsewhere, our \$140,000 of Boston church debt is forever gone, and this house, which, with the ground upon which it stands, represents \$410,000, I this day reconsecrate to God the Father, God the Son and God the Holy Ghost. A stranger might ask how could this church get into debt to an amount that would build several large churches? My answer is, Waves of destruction, stout as any that ever rolled across the Red sea of my text.

Examine all the pages of church history and all the pages of the world's history and show me an organization, sacred or secular, that ever had to build three great structures, two of them destroyed by fire. Take any of your biggest life insurance companies, or your biggest banks, or your biggest newspaper establishments, and then have to build three times on the same foundation, and it would cost them a struggle if not demotion. My text speaks of the Red sea once crossed, but one Red sea would not have so much over us. It was with us Red sea after Red sea. Three Red seas! Yet to-day, thanks be to God, we stand on the shore, and with organ and cornet in absence of a timbrel we chant "Sing ye unto the Lord, for He hath triumphed gloriously; the horse and his rider hath He thrown into the sea."

But why the great expense of this structure? My answer is the immensity of it and the firmness of it. It cost over \$24,000 to dig the cellar before one stone was laid, reaching as the foundation does from street to street, and then the building of the house was constructed in a way, we are told by experienced builders who had nothing to do with it, for durability of foundation and wall such as characterizes hardly any other building of this city. To the day of your death, and mine, and for our children and grandchildren after us, it will stand here a house of God and a gate of heaven.

For me personally this is a time of gladness more than tongue or pen or type can ever tell. For twenty-four years I had been building churches in Brooklyn and seeing them burn down until I felt I could endure the strain no longer, and I had written my resignation as pastor and had appointed to it two Sabbaths ago and close my work in Brooklyn forever. I felt that my chief work was yet to be done, but that I could not do it with the Alps on one shoulder and the Himalayas on the other. But God has interfered, and the way is clear, and I am here and expect to be here until my work on earth is done.

My thanks must be first to God and then to all who have contributed by large gifts and small to this emancipation. Thanks to the men, women and children who have helped, and sometimes helped with self sacrifice that I might have won the applause of the heavens. If you could only read with me a few of the thousands of letters that have come to my desk in The Christian Herald office, you would know how deep their sympathy and large their sacrifices have been. I have sold my bicycle and now send you the money," is the language of one noble young man who wrote to The Christian Herald. "This is my dead son's gift to me, and I have been to send it to you," writes a mother in Rhode Island.

lant note is the moment the last Israelite puts his foot on the sand on the parted inland ocean. Alas, that when God's mercies have such swift wings our praises should have such sudden feet!

Notice that Miriam's song in my text had for its burden the overthrow cavalry. It was not so much the infantry or the men on foot over whose defeat she rejoiced with dancing timbrel to make merry. Her song was back—the mounted troops! "The horse and his rider hath He thrown into the sea." Tremendous arm of war is the cavalry! Josephus says that in that host that crossed the Red sea there were 60,000 cavalrymen. Egyptian on dromedaries rode to battle with 5000 cavalrymen and Alexander with 7000. Marborough depended on his cavalry for the triumph at Blenheim. It was not alone the cavalry that despoiled the French armies in retreat from Moscow, but the mounted Cossacks. Cavalrymen decided the battles of Leuthen and Leipzig and Winchester and Hanover Court House and Five Forks. Some of you may have been in the relentless raids led by Forrest or Chalmers or Morgan or Stuart of the southern side, or Pleasanton or Wilson or Kilpatrick or Sheridan of the northern side. The army saddles are the thrones of battle. Hurricanes in stirrups are the cavalrymen.

No wonder that Miriam was chiefly grateful that the Egyptian cavalrymen, pursuing the Israelites, had to make merry on the sea, were unaided, unassisted, unhorsed.

And I have to tell you, O child of God, that the Lord, who is on your side now and forever, has at His disposal and under His command all the powers of nature, all time and all eternity. Come, look me in the face while I utter the word God commands me to speak to you, "No weapon formed against you shall prosper, and every tongue that shall oppose you shall be brought down. You shall tread upon the lion and the adder; you shall trample upon the asp and the viper; you shall overcome the lion and the bear." "Sing ye to the Lord, for He hath triumphed gloriously; the horse and his rider hath He thrown into the sea."

I expect to have a good laugh with you in heaven, for the Bible says in Luke, sixth chapter, twenty-first verse, "Blessed are ye that weep now, for ye shall laugh." We shall not spend all eternity psalm singing, but sometimes we shall sing of heaven as Christ says, we shall laugh. There is nothing wrong in laughter. It all depends on what you laugh at, and when you laugh. Nothing, it seems, will more thoroughly kindle heavenly hilarities after we have got inside the pearly gate than to see how in this world we got scared at things which ought not to have frightened us at all.

How often we were scared into a great stew about nothing! The Red sea before me may be deep, and the Egyptian cavalry behind us may be mounted, but if we trust in the Lord we will go through no more hurt by the water than when in boyhood we rolled our garments to the knee and bare-foot crossed the meadow brook on the old homestead. The odds may seem to be all against us, but if we trust in the Lord, we will go through no more hurt by the water than when in boyhood we rolled our garments to the knee and bare-foot crossed the meadow brook on the old homestead. The odds may seem to be all against us, but if we trust in the Lord, we will go through no more hurt by the water than when in boyhood we rolled our garments to the knee and bare-foot crossed the meadow brook on the old homestead.

Oh, crimson floods roll over them and drown them, and drown them forever! In this world we have so little time for that, I feel, and I feel toward to eternal destinies. To be with God and never sin against Him. To be with Christ and forever feel His love. To walk together in robes of white with those with whom on earth we walked together in black raiment of mourning. To gather up the members of our scattered families and embrace them with no embarrassment, though all heaven be looking on.

A minister of Scotland caved in and caught amid the rocks a young man who in a few days was to have been united in holy marriage. No one could get heart to tell his affianced of the death of her beloved. Some one made her believe that he had changed his mind about the marriage and willfully disappeared. Fifty years passed on, when one day the miners delving in the earth suddenly came on the body of that young man, which had all those years been kept from the air and looked just as it was the day of the calamity. Strong, manly, noble youth, he sat there looking as on the day he died. But no one recognized the silent form.

After awhile they called the oldest inhabitants to come and see if any one could recognize him. A woman with her hair and her hair snowy white with years came last, and looking upon the silent form that had been so completely preserved gave a bitter cry and fell into a long swoon. It was the one to whom half a century before she was to have been wedded, looking then just as when in the days of their youth their affections had commingled. But the emotion of her soul was too great for mortal endurance, and two days after those who fifty years before were to have joined hands in wedlock were at last married in the tomb, and side by side they wait for the resurrection.

My friends, we shall come at last upon those of our loved ones who long ago halted in the journey of life. They will be as fair and beautiful—yes, fairer and more beautiful than when we parted from them. I see them now—the glorified—assembled for a celebration mightier and more jubilant than that on the banks of the Red sea, and from all lands and ages, on banners aloft and thrones above thrones, in circling sweep of 10,000 miles of surrounding and upheaved splendor, while standing before them on "sea of glass mingled with crystal," the "rehearsal of the multitudinous chorus, crying: 'Sing! Sing! Sing ye to the Lord, for He hath triumphed gloriously; the horse and his rider hath He thrown into the sea.'"

**THE BODY AND ITS HEALTH.**

**BRAIN AND CLIMATE.**—The scientific assertion seems to be borne out by recent investigations, viz., that the average weight of the brain of a man has a definite relation to the climate in which he lives, a heavier brain weight being found in cold than in warm countries. Thus it is found that, in proportion to their stature, the Lapps have the largest heads in Europe, the Norwegians next, then come the Swedes, Germans, French and Italians. In the Arab, the head is found to be smaller than any of those named.

**MIXED OR HYBRID NATIONALITIES.**—From observations of the mulatto race, extending over a period of more than thirty years, Dr. W. A. Dixon states that tuberculosis exists to an excessive degree among the descendants of mulattoes—they are inferior also in vitality, intelligence and morality, and show a high rate of mortality. He has found it quite noticeable that mulatto girls develop much younger than either white or negro girls, and that as women they fade much sooner, with the additional fact, that after the second generation of pure mulatto breeding, practically all the children born are girls. Dr. Dixon remarks that it has already been proved in other races that human hybridity cannot be maintained without reversion or fresh supply from parental blood. The possibility is suggested, too, of the danger that tendencies to tuberculosis and other strumous diseases may be increased in the United States by the large mixture of nationalities which is constantly going on—the immunity of the Jews and other unmixed races to such affections being quite in point.

**MOST DIGESTIBLE OF ALL FOODS.**—In a lecture by M. Ch. Richet on the influence of the gastric juice on various kinds of food, the digestibility of milk is declared to exceed that of all other alimentary substances, and after ingestion of a pint of that liquid, scarcely a trace is to be found in the course of an hour. It appears probable, M. Richet remarks, that milk contains some principle not yet isolated by chemists, the action of which is very similar to that of pepsin, and adds its influence to that of the latter in the phenomenon of digestion—the milk also supplying, at the same time, during this function, a certain amount of lactic acid which co-operates with the acid of the gastric juice. Further the milk of the cow is, during the function of digestion, precipitated in coarse clots of casein, while that of woman and mares' milk are precipitated in much finer granulations, that are considerably easier to digest; hence the inapplicability of cow's milk to the nutrition of very young children, and also the advantage of mares' milk or asses' milk for cases of dyspepsia in persons of delicate constitution. For the young child, all authorities agree that the mother's milk can be replaced by nothing.

**THE CAUSES OF INFLUENZA.**—There is an interesting contribution on this subject in the March number of the *Zeitschrift für Hygiene* by Dr. R. Pfeiffer, of the Institute for Infectious Diseases at Berlin. After describing the bacillus of influenza, the best methods of staining and the manner in which he overcame the difficulties, hitherto insurmountable, in cultivating this enemy of mankind, Dr. Pfeiffer details the results of numerous investigations and points out the following practical deductions to be made from them. The bacillus grows very rapidly in pure cultures on a suitable soil, but no growth takes place at a temperature under 26 degrees C. (78.8 degrees F.), or over 43 degrees C. (109.4 degrees F.). In water at ordinary temperatures (60 degrees F.) the bacillus dies rapidly (in eight hours). In bouillon it retains its vitality from fourteen to eighteen days. Hence sputum, etc., if not allowed to dry, is probably infectious for at least fourteen days; and we may here find the explanation of cases, recorded by competent observers, in which the infection appears to have been communicated by means of letters, clothing, etc. The bacillus is very rapidly affected by drying. Cultures exposed to dry air at a temperature of 37 degrees C. did not survive for more than two hours, and even in moist air usually not more than eight hours and never more than twenty. Sputum, if dried, was quite sterile in thirty-four to forty hours. Dr. Pfeiffer draws the following conclusions from these facts: (1) The bacillus is not capable of multiplication outside the human body, either in water or in earth. (2) The spread of influenza by dry sputum can occur but seldom. (3) Infection is, as a rule, effected by means of the still moist secretions of the air-passages. Dr. Pfeiffer considers the catarrhal form of influenza to be by far the most frequent. In mild cases, scarcely to be distinguished from ordinary catarrh, he found the bacillus in enormous numbers in the secretions of the nose, whereas in cases of simple catarrh the secretion is almost sterile and certainly contains no bacterium to be mistaken for influenza bacillus. During the acute stage the bacillus is present in the expectoration in large numbers. It sometimes persists in it for weeks, or even months, thus explaining those cases of prolonged convalescence which have been noted especially among the tuberculous individuals. The general symptoms are to be regarded as the result of the absorption of influenza toxin. The bacillus may reach the pleura and there excite a pleuritis. No animal is known to be spontaneously affected by influenza. Guinea pigs are very susceptible to the influenza toxin, exhibiting symptoms of fever, dyspnoea, and extreme muscular weakness, strikingly resembling the clinical appearances in man. In conclusion, Dr. Pfeiffer points out the importance of thorough ventilation in all places where many people are assembled, such as theatres, schools and barracks, since every cough or sneeze expels infectious material into the air. He further suggests the use of disinfecting washes for the nose and mouth and the inhalation of antiseptic vapors, and concludes by expressing the hope that the knowledge of the cause of this remarkable disease may lead to the discovery of a specific remedy. [Lancet.]

Queen Victoria's crown is worth \$1,200,000.

**Of Importance to All Who Do Business.**  
Send a check or a postal or express money order for \$3.75 to The Trade Co., 230 Devonshire St., Boston, and you will receive by prepaid express a copy of a handsomely printed and securely bound book telling you how to increase business; how to decorate your store windows; how to advertise in newspapers; about circulars, cards and posters; the cost and use of engraving of every class; the expense of lithographs and their value; how to produce effective billheads, cards and other commercial printing; with information on the management of employees and everything pertaining to business publicity—the only work of its class in the world; indispensable to every business man whether he be an advertiser or not. Written by Nath'l C. Fowler, Jr., the expert at business and advertising. 518 large pages, handsomely illustrated. You take no risk; if after receiving the book you don't want it you can return it and get your money back.

**Wanted to Amuse the Boys.**  
George Butler, Canon of Winchester Cathedral, was the son of Dr. Butler, headmaster of Harrow. The boy grew up to be a dignified and serious man, a power in philanthropy and the church, but that he had a demure sense of humor is shown by one anecdote of his earliest years. Doctor Butler wore a fine suit of black, with knee-breeches and cloth gaiters, and with his powdered hair was a figure to move any school-boy to admiration and awe.

One morning little George watched him, as he set out for school, and observed that his father wore one gaiter. When Doctor Butler returned, he said to the lad: "You were here, George, when I went away this morning. Didn't you see that I had only one gaiter?" "Yes, papa." "Then why didn't you tell me?" "Because," answered George, innocently, "I thought it would amuse the boys!"

**The Queerest of Railroads.**  
One of the queerest railroads on this continent is the Salisbury and Havey, in New Brunswick. It is but twenty miles long, and although it connects with the Intercolonial Road, an admirably constructed line, it is confessedly unsafe. A printed notice hung up in the cars cautions passengers that it is well to get out and walk on reaching a certain bridge, and it was long the custom to push the cars over this crazy structure before the mighty engine was trusted upon its rotten timbers.

**A Novel Scheme.**  
Frederick Douglass has organized a company for the purpose of establishing a large manufacturing enterprise near Newport News, Va., building a town and giving employment to young negro men and women.

**These Are Queer Words.**  
Fillbuster, freebooter and buccaneer are words curiously interrelated. The French and the English sea adventurers once made common cause against Spanish settlements in the new world, and all three of these words came in time to describe the ruffian sea soldiers who despoiled the Spanish main, and the towns upon the coast of the Spanish possessions. Fillbuster is said to be the result of an attempt to make a French word of freebooter, and the English borrowed it back from the French because it sounded less frankly brutal than the English word. Buccaneer was originally French in form, and it meant at first one who hunted the boucan or wild cattle and hogs of the West Indies; then one who made jerked meat of their flesh, and finally, because this meat was used to provision the ships of the sea rovers, a fillbuster or freebooter.

The man who will not improve his talents steals from himself.

**A Matter of Health**

IT costs more to make Royal Baking Powder than any other, because its ingredients are more highly refined and expensive. But the Royal is correspondingly purer and higher in leavening strength, and of greater money value to the consumer. The difference in cost of Royal over the best of the others does not equal the difference in leavening strength, nor make good the inferior work of the cheaper powders, nor remove the impurities which such powders leave in the food.

Where the finest food is required, the Royal Baking Powder only can be used. Where the question of health is considered, no baking powder but Royal can be used with safety. All others are shown by official analyses to contain lime, ammonia or alum.

**"August Flower"**

"For two years I suffered terribly with stomach trouble, and was for all that time under treatment by a physician. He finally, after trying everything, said my stomach was worn out, and that I would have to cease eating solid food. On the recommendation of a friend I procured a bottle of August Flower. It seemed to do me good at once. I gained strength and flesh rapidly. I feel now like a new man, and consider that August Flower has cured me."  
Jas. E. Dederick, Saugerties, N. Y.

**MEND YOUR OWN HARNESS**  
WITH  
**THOMSON'S**  
SLOTTED  
**CLINCH RIVETS.**

No tools required. Only a hammer needed to drive and clinch them easily and quickly, leaving the harness absolutely smooth. Requiring no hole to be made in the leather nor injury to the rivets. They are strong, tough and durable. Millions now in use. All leathers, uniform or assorted, put up in boxes. Also packed in 100, 250 and 500 lb. casks. In stamps for a box of 100, assorted sizes. **KNOWLEDGE**

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs. Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance. Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.
