Patience for the Erring. God has a mother's patience for the erring. If one does wrong, first his associates in life cast him off; if he goes on in the wrong way, his business partner casts him off; if he goes on, his best friends cast him off-his father casts him off. But after all others have cast him off, where does he go? Who holds no grudge, and forgives the last time as well as the first? Who sits by the murderer's counsel through the long trial? Who tarries the longest at the windows of a culprit's cell? Who, when all others think ill of a man, keeps on thinking well of him? It is his mother. God bless her gray hairs, if she be still alive; and bless her grave if she be gone. And bless the rocking chair in which she used to sit, and bless the cradle that she used to rock, and bless the Bible that she used to read! So God, our mother, has patience for all the erring. After everybody else has cast him off, God, our mother, comes to the rescue. God leaps to take charge of a bad case. After all the other doctors have got through, the Heavenly Physician comes in. Human sympathy at such a time does not amount to much. Even the sympathy of the church, I am sorry to say, often does not amount to much. I have seen the most harsh, bitter treatment on the part of those who professed faith in Christ toward those who were wavering and erring. They tried on the wanderer sarcasm, and billingsgate, and caricature, and they tried tittletattle. There was one thing they did not try, and that was forgiveness. A soldier in England was brought by a Sergeant to the Colonel. 'What,' said the Colonel, bringing the man here again? We have tried everything with him.' were the Philistines, and his armor bearer, there's on his hands and knees, climbs up the same 'Oh, no,' said the Sergeant, 'there's one thing you have not tried. I would like you to try that.' 'What Lord throwing a great terror upon them. So is that?' said the Colonel. Said the it was then; so it is now. The two men of man: 'Forgiveness!' The case had not gone so far but that it might take that turn, and so the Colonel said: 'Well, young man, you have done so and so. What is your excuse?' 'I have no excuse, but I am very sorry,' said the young man. 'We took the spoils of the Ammonites, have made up our minds to forgive these Israelites seemed content to have you, said the Colonel. The tears no swords, no spears, no blacksmiths started. He had never been accosted in that way before. TEXT: " Note, there was no smith found throughout all the land of Israel," etc.-I Samuel xiii, 19-21.

My loving and glad salutation to this uncounted host, Chautauquans, Christian Endeavors, gospel workers and their friends from all parts of Wisconsin and America, saints and sinners! My text is gloriously appropriate. What a galling subjugation the Israelites were suffering! The Philistines had carried off all the blacksmiths and torn down all the blacksmiths' shops and abolished the blacksmith's trade in the land of Israel.

These Philistines had a particular grudge against blacksmiths, although I have always admired them and have sometimes thought I ought to have been one myself. The Philistines would not even allow these parties to work their valuable mines of brass and iron, nor might they make any swords or spears. There were only two swords left in all the land. Yea, these Philistines went on until they had taken all the grindstones from the land of Israel, so that if an Israelitish farmer wanted to sharpen his plow or his ax he had to go over to the garrison of the Philistines to get it done. There was only one sharpening instrument left in the land, and that was a file. The farmers and the mechanics having nothing to whet up the coulter, and the goad, and the pickax save a simple file, industry was hindered and work practically

disgraced. The great idea of these Philistines was to keep the Israelites disarmed. They might get iron out of the hills to make swords of, but they would not have any blacksmiths to weld this iron. If they got the iron welded, they would have no grindstones on which to bring the instruments of agriculture or the military weapons up to an edge. Oh, you poor, weaponless Israelites, reduced to a file, how I pity you! But these Philistines were not forever to keep their heel on the neck of God's children. Jonathan, on his hands and knees, climbs up a great rock beyond which rock, and these two men, with their two swords, hew to pieces the Philistines, the God on their knees mightier than a Philistine

host on their feet. I learn first from this subject how danger-ous it is for the church of God to all w its weapons to stay in the hands of its enemies. Israelites might again and again have obtained a supply of swords and weapons, as for instance, when they no grindstones, no active iron mines, until it "Where are

And then we want to discourse about the human ear, its wonderful integuments, membranes and vibration, and its chain of small bones, and its auditory nerves, closing with the question, "He that planted the ear, shall He

And we want some one able to expound the first chapter of Genesis, bringing to it the geology and the astronomy of the world, until, as Job suggested, "the stones of the field shall be in league" with the truth, and "the stars in their courses shall fight against "the stars in their courses shall fight against Sisera." Oh, church of God, go out and recapture these weapons. Let men of God go out and take possession of the platform. Let all the printing press of this country speak out for Christ, and the reporters, and the typesetters, and the editors and publishers swear allegiance to the Lord God of truth.

Ah, my friend, that day must come, and if the great body of Christian men have not the faith, or the courage, or the consecration to do it, then let some Jonathan on his busy hands and on his praying knees climb up on the rock of hindrance, and in the name of the Lord God of Israel siash to pieces those literary Philistines. If these men will not be converted to God, then they must be destroyed.

History tells us that when Rome was founded, on that day there were 12 vultures

founded, on that day there were 12 vultures flying through the air, but when a transgressor dies the skies is black with whole flocks of them. Vultures! When I see sin robbing so many people, and I see them going down day by day and week by week, I must give a plain warning. I dare not keep it back lest I risk the salvation of my own soul. Hover, the pirate, pulled down the warning bell on Incheape rock, thinking that he would have a chance to despoil vessels that were crushed on the rocks, but one night his own ship crashed down on this very rock, and he went down with all his cargo. God declares, "When I say to the wicked thou shalt surely die, and thou givest him not warning, that same man shall die in his iniquity, but his blood will I require at thy hands."

I learn from this subject what a sad thing

large amount of the church's resources is actually hidden and buried and undeveloped. The Bible intimates that that was a very rich land—this land of Israel. It says, "The stones are iron, and out of the hills thou shalt dig brass," and yet hundreds of thousands of dollars' worth of this metal was kept under the hills. Well, that is the difficulty with the church of God at this day. Its talent is not developed. If one-half of its energy could be brought out, it might take the public iniquities of the day by the throat and make them bite the dust. If human eloquence were consecrated to the Lord Jesus Christ, it could in a few years persuade this whole earth to surrender to God.

There is enough undeveloped Christian energy in the United States to bring the whole world to Christ, but it is buried under strata of indifference and under whole mountains of sloth. Now, is it not time for the mining to begin, and the pickaxes to plunge, and for this buried metal to be brought out and put into the furnaces and be turned into howitzers and carbines for the Lord's host? The vast majority of Christians in this day are useless. The most of the Lord's battalion belong to the reserve corps. The most of the crew are asleep in the hammocks. Sleep in Disused Quarries.

One of the most curious and deplorable sights in connection with pauperism during the winter in Paris is the influx of peripatetic beggars who invade at night the disused quarries of Argenteuil and Montmartre, where they huddle together, as close as they safely can, to the limekilns, in order to obtain a little warmth. Along the suburban roads in the direction of Paris they can be seen in twos and threes bent double almost and hungry, hurrying on and footsore, in the hope of being in time to obtain a night's shelter in the isiles de nuit--night refuges-of the capital. But in those buildings, seconding to the Philadelphia Ledger, there is not sufficient room to accommodate all applicants. Their hospitable doors are open only for a short time late at night, and when once they are closed all entreaties for admission are rigorously unheeded. In the disused quarries they can find plenty of room. A whole army of He lies. The music turns out to be a groan. The fruits burst the rind with rank poison. The filigree is made up of twisted snakes. The couch is a grave. Small allowance of rest, small allowance of peace, small allowance of comfort. Cold, hard, rough—nother but allowed to the control of the cold. mendicants could easily obtain shelter in their long galleries-a warm corner to huddle up in and a convenient stone for a pillow. Moreover, there are no awkward questions asked as at the aisles de nuit, such as "Who art thou? From whence cometh thou? What is thy calling?" And so from all directions leading toward Paris they come in large numbers at night, mud-beshattered, hollow-cheeked, worn out with fatigue, and numbered by hundreds as they descend into the quarries, where, pressed pell mell one against the other, they endeavor by contact to keep out the cold. The wealth of Europe see another infidel die. Philistine iniquity had promised him all the world's garlands, but in the last hour of his life, when he needed solacing, sent tearing largest number and deepest of these disused quarries are in the neighborhood of Argenteuil, and there it is that across his conscience and his nerves a file, a the police often make their raids when in search of some criminal who has escaped capture, and who, it is thought, may be hiding among the "malfrats."

Barefooted Among Snakes.

While we are telling snake stories the following good one comes to us from the mountain regions, E. T. Dulin standing as authority. The country between Little Big Black Mountain is a ginseng region, and the Parker family are noted as "sengers." The girls go out barefooted in the mountains, though the country is infested with rattlesnakes and copperheads, and dig the ginseng, for which they get good prices at the stores, and from which it is taken to Pennington Gap for shipment.

But along Clover Gap and up Rattlesnake Creek there are numberless reptiles. Beckie Parker is a girl, about nineteen years of age, strong, healthylooking and handsome, but with a very determined face. She is a splendid rifle shot and is often seen with her Winchester.

She goes after ginseng barefooted and often alone. The roots are gathered in May and September, and during the month just past she did a thriving business. One day, however, she came across a den of rattlesnakes, She had only stones and sticks with which to fight the desperate battle. Some of the snakes were larger than a man's arm, and few of them as large as the calf of a man's leg. For hours she fought them as they hissed and writhed and rattled around her. But the brave, determined girl battled with them until she exterminated every one that did not succeed in hiding among the crevices of rocks and in the dense underbrush. When she had crushed the last one to be seen she counted the dead, and there were just sixty-three. —Fredericksburg (Va.)

A Queer Proposition.

How could two persons be born at the same time and die at the same time at the end of fifty years, and yet one of them live one hundred days more than the other?

The answer turns upon the familiar fact that a person who goes around the world toward the west loses a day, while the person who travels in the of posite direction gains a day.

We will suppose, then, that the two men in question were born at the same instant in Dublin, from whence a trip around the world may easily be made once a year. One of them goes always toward the west, the other toward the east. One loses a day every year, the other gains a day every year. When the men die at fifty years of age one has seen one hundred days more than the other.
