Text: "Lest I should built upon another man's foundation."—Romans xv., 20.

After, with the help of others, I had built a work which must be done outside of the churches, and to that work I join myself for awhile, "Lest I build on another man's foundation."

The grandest life of usefulness that mun ever livel. We modern Christian workers are not act to imitate Paul. We build on other people's foundations. If we erect a church, we prefer to have it filled with families all of whom have been pious. Do we gather a Sanday-school class, we want good boys and girls, hair combed, faces washed, manners attractive. So a church in this city is apt to be built out of other churches. Some ministers spend all the spende and jerk out a Methodist, and throw the line into that church pond and jerk out a Methodist, and throw the line into that church pond and jerk out a Methodist, and throw the line into that church pond and jerk out a Methodist, and throw the line into that church whole school of fash swim off from that pond, and we take them all in with one sweep of the net. What is gained? Absolutely nothing for the general cause of Christ, It is only as in an army, when a regiment is transferred from one division to another, or from the Fourteenth Regiment to the Sixty-nint?

He feels hehas a special work to do, and the second is like to this—namely, thou is all the scaled to Him, "Well, Master, There are all the ropes and rockets, the boats, the machinery for getting people of ship wrecks. "Justification is purely a forensic act, the

act of a judge sitting in the focure, in which the Supreme Ruler and Judge, who is ac-countable to none, and who alone knows the manner in which the ends of His universal government can best be attained, reckons that which was done by the substitute, and not on account of anything done by them, but purely upon account of this gracious method of reckoning, grants them the full remission of their sine."

remission of their sins. Now, what is justification? I will tell you what justification is. When a sinner believes, God lets him off. One summer in Connecticut I went to a large factory, and I saw over the door written the words, "No admittance." I entered and saw over the next three churches in the same city, and not feeling called upon to undertake the superhuman toil of building a fourth church, Providence seemed to point to this place as the field in which I could enlarge my work, and I feel a sense of relief amounting to example. I got inside and found it a pin factory, and I lead to be a sense of relief amounting to example. The providence is the work of the work will grow I be a sense of relief amounting to example in the work will grow I be a sense of relief amounting to example in the work will grow I be a sense of relief amounting to example in the work will grow I be a sense of relief amounting to example in the work will grow I be a sense of relief amounting to example in the work will grow I be a sense of relief amounting to example in the work will grow I be a sense of relief amounting to example in the work will grow I be a sense of relief amounting to example in the work with the work with the work will grow I be a sense of relief amounting to example in the work of the work with the work wit aultation. Whereunto this work will grow I they were making pins, very serviceable, fine cannot prophesy. It is inviting and promising beyond anything I have ever touched. The churches are the grandest institutions this world ever saw, and their pastors have no-superiors this side of heaven, but there is written over the second door, "No admittance." written over the second door, "No admittance," and if he goes in over all the pew doors seems written, "No admittance," while the minister stands in the pulpit, hammering out his little niceties of belief, pounding out the technicalities of religion, making pins. In the most practical, common sense way. The church is a fortress divinely built, the technicalities of religion, making plans.

They cannot under millions, do not let us spend all our time derstand the Trinky or how God can by soron millions, do not let us spend all our time in taking care of a few people, and when the command comes. "Go into the world," say practically: "No; I cannot go. I have here a few choice cases, and I am busy keeping off the flies." There are multitudes to-day who have never had any Christian worker look them in the eye, and with earnestness in the accentuation say, "Come!" or they would long ago have been in the kingdom. My friends, religion is either a sham or a tremendous reality. If it be a sham, let us ceases to have anything to do with Christian association. If it be a reality, then great populations are on their way to the bar of God unfitted for the ordeal, and what are we doing?

In order to teach the multitude of outsiders we must drop all technicalities out of our religion. When we talk to people about the religion. When we talk to people about the darkness into one hour. Such men are not the command the Trinity or how God can b) sovereign and yet a man a free agent. Neither can I. They say: "I don't understand why a good God should have let sin eome into the world. Neither do I. You say: "Why was that child started in life with such disadvantages, while others have all physical and mental equipment?" I cannot tell. They go out of church on Easter moraing and say: "That doctrine of the resurrection confounded me." So it is to me a mystery beyond unravelment. I understand all the processes by which men get into the dark. I know them all. I have traveled with burning feet that blistered way. The first word which most children learn to utter is: "Papa," or "Mamma," but I think the first word I ever uttered was: "Wny?" I know what it is to have a hundred midnights pour their deraction of a process of the proces In order to teach the multitude of outsiders we must drop all technicalities out of our religion. When we talk to people about the appostatic union and French enzystopedian—am and erastianism and complittensianism, we are as impolitic and little understood as if a physician should talk to an ordinary patient about the pericardium and intercestal muscle and scorbutic symptoms. Many of us come out of the theological seminaries so loaded up that we take the first ten years to get our people how much we know, and the next ten years to get our people to know as much as we know, and at the end find that neither of us knows anything as we ought to know. Here are thousands of singing, struggling and dying people who need to realize just one thing—that Jesus Christ came to save them, and will save them now. But we go into a profound and claborate all the work there are not outside of the earned professions 5000 people in the United

Thomas Chalmers was once a skeptle Robert Hall a skeptic, Robert Newton a skeptic, Christmas Evans a skeptic. But when once with strong hand they took hold of the chariot of the gospel they rolled it on with what momentum! If I address such men and women to-day, I throw out no scoff. I implead them by the memory of the good old days, when at their mother's knee they said, "Now I lay me down to sleep," and by those days and nights of searlet fever in which she watched you, giving you the medicine at just the right time and turning your pillow when it was hot, and with hand-that many years ago turned to dust soothed away your pain, and with voice that you will away your pain, and with voice that you will never hear again, unless you join her in the better country, told you to never mind, for you would feel better by and by, and by that dying couch, where she looked so pale and talked so slowly, catching her breath between the words, and you felt an awful ioneliness coming over your soul—by all that I beg you to come back and take the same religion. It was good enough for her. It is good enough for you. Nay, I have a better plea than that. I plead by all the wounds and tears and blood and groans and agonies and death throes of the Son of God, who approaches you this moment with torn brow, and lacerated hand, and whipped back, and saying, "Come unto Me, all ye who are weary and

heavy laden, and I will give you rest."

Again, there is a field of usefulness but litthe touched occupied by those who are astray in their habits. All northera Nations, like those of North America and England and Scotland—that is, in the colder climates—are devastated by alcoholism. They take the fire to keep up the warmth. In southern countries, like Arabia and Spain, the blood is so warm they are not tempted to flery liquids. The great Roman armies drauk anything stronger than water tinged with vinegar, but under our northern climate the temptation to heating stimulants is most mighty, and millions succumb. When a man's habits go wrong, the church drops him; the social circle drops him; good in-fluence drops him; we all drop him. Of all the men who get off track, but few ever get on again. Near my summer residence there is a life saving station on the beach. There are all the ropes and rockets, the boats, the machinery for getting people off shipwreeks. One summer I saw there fifteen

I'st of Spain Nearly Wiped Out By a Great Fire-Estimated Loss 4,000,000.

A despatch from Port of Spain, Trinidad,

This city narrowly missed total destruction by a great fire which will cause a loss of \$4,000,000, the chief Lusiness section having been the centre of the conflagration. Nearly 20,000 people would have been homeless if it had not been for the assistance given by the sailors from the Unite ! State : North Atlantic Squadron and H. M. S. Buzzard in extinguishing the flames.

Soon after the flames began to get h adway in the town Rear Admiral Meade signaled from the New York to the Raleigh and the Cincinnatti to land as many men as could be spared, and simultaneously the flagship's boats went into the water. There was a lively rivalry among the men from each ship to reach the scene of the fire first. especially as the British cruiser Buzzard, having a nearer anchorage, was also bestirring herself to land a party. No Such Thing.

The quality of endurance of or Indifference to what in other men produces shock or repulsion is said to belong to men without nerves. There is no such thing and caunot be. The finer the physical development the keener perhaps is the sensibility to pain. Let neucalgia put on its harness for a raid and get after such men, the nerves will be found all quivering at once. A Bank Failure.

AN INVESTIGATION DEMANDED.

A general banking business is done be the human system, because the blood de posits in its vaults whatever wealth we may gain from day to day. This wealth is laid up against "a rainy day" as a reserve fund—we're in a condition of healthy prosperity if we have laid away sufficient capital to draw upon in the hour of our greatest need. There is danger in getting thin, because it's a sign of letting down in health. To gair in blood is nearly always to gain in tehole tome flesh. The odds are in favor of the germs of consumption, grip, or pneumonia if our liver be inactive and our blood impure, or if our flesh be reduced below a healthy standard. What is required is at increase in our germ-fighting strength. Dr Pierce's Golden Medical Discovery euriches the blood and makes it wholesome, stops the waste of tissue and at the same time builds up the strength. A medicine which will rid the blood of its poisons, cleanse and invigorate the great organs of the body, vitalize the system, thrill the whole being with new energy and make permanent work it, is surely a remedy of great value. Bu when we make a positive statement that 68 per cent. of all cases of consumption can, if taken in the early stages of the disease, be CURED with the "Discovery," it seems like a bold assertion. All Dr. Pierce asks is that you make a thorough investigation and satisfy yourself of the truth of his assertion. By sending to the World's Dispensary Medical Association, Buffalo, N. Y., you can get a free book with the names, addresses and photographs of a large number of those cured of throat, bronchial and lung diseases, as well as of skin and scrofulous affections by the "Golden Medical Discovery." They also publish a book of 160 pages, being medical treatise on consumption, bronchitis, asthma, catarrh, which will be mailed on receipt of address and six cents in stamps,
