So the Camaanites stand on one bank, and they look across and see Joshua and the Israelites, and they laugh God comes and rouses him. How does ment in the army of Joshua. They say: "What's the matter now? Why, there must going to fly, or perhaps they are going to try to march across the river Jordan. Joshua is a lunatic." But Joshua the allowed in the sales and sales and sales and sales and sales are that was not his battle. If he had been in it, he would have gone on to victory. He gathers his troops around him and says:

But no sooner have they reached the bank than the waters begin to dash and roar, and with a terrifle rush they break loose from toward the salt sea. But as the hand of the Lord God is taken away from the thus uplifted waters—waters perhaps uplifted half a to stop. "Forward, march!" cries Joshua to mile—as the Almighty hand is taken away the troops. There is the city of Gibeon. It let us come through and kept them parted to lef us go back if we are defeated?" My friends, God makes no provision for a Christian's retreat. He clears the path all the way to Canaan. To go back is to die, The same gatekeepers that swing back the amethystine and crystalline gate of the Jordan to let Israel pass through now swing shut the amethystine and crystalline gate of the Jordan to keep the Israelites from going back. I declare it in your hearing to-day, victory ahead, water forty feet deep in the rear. Triumph ahead, Canaan ahead; behind you death and darkness and woe and hell. But you say, "Why didn't those Canaanites, when they had such a splendid chance—standing on the to—of the back thirty or forty feet high—completely demolish those poor israelities down in the river?" There shall be no swords, no shields, no battering ram. There

shall be only one weapon of war, and that a ram's horn. The horn of the slain ram was sometimes taken and holes were punctured in it, and then the musician would put the instrument to his lips, and he would run his fingers over this rude musical instrument, and make a great deal of sweet harmony for the people. That was the only kind of weapon. Seven priests were to take these rude rustic musical instruments, and they were to go around the city every day for six days—once a day for six days, and then on the seventh shall be only one weapon of war, and that a sun's rays or by the stopping of the whole and the city every day for six days—once and ay for six days, and then on the seventh day they were to go around blowing these rude musical instruments seven times, and then at the close of the seventh blowing of the rams' horns on the seventh day the peroration of the whole scene was to be a days. The "gallant Thirteenth," as this regiment is generally and appropriately called, has gathered to-night for the worship of God and to hear the annual sermon. And first I look with hearty salutation into the faces of the veterans, who, though now not in active service, have the same patriotic and military enthusiasm which characterized them when, in 1863, they bade farewell to home and loved ones and started for the field and risked all they held dear on earth for the re-establishment of the falling United States Government. "All that a man hath will he give for his life," and you showed yourselves willing to give your lives. But no sooner have they reached the bank than the waters begin to dash and roar, and while I hear the huzza of the Israelites and while the groan of the Camanites, Joshua hears something louder than it all, ringing and schoing through his soul, "There shall not their strange anchorage. Out yonder they have stopped: thirty miles up yonder they achoing through his soul, "There shall not halted. But this is no place for the host to stop. Joshua gives the command. "Forward, march!" In the distance there is a long grove of trees, and at the end of the grove is a city. It is a city of arbors, a city with walls seeming to reach to the heavens, to buttress the very sky. It is the great metro-

And I suppose that night in the encampment with the rotten or staff as though it words and the knocking down of the wall? It isn't philosophy."

And I suppose there were many wiseacres who stood with their brows knitted, and the story of what he has been through, and with the forefluger of the left hand, arguing it all out and show how the old battles were won, so Joshua garound its dying couch, and he tells them around his dying couch, and the story of what he has been through, and as he lies there. Big Prices for Trifles. A party of auctioneers en route from Chicago to Buffalo were in the smoking room of a Lake Shore sleeper the other night telling stories. "Selling right," said one, "all right, but for genuine fun give me the private sale of a rich man's furniture. When Anthony Drexel died there were a lot of things which had personal reminiscences conpected with them which everyone wanted. It was finally decided to hold a family auction and sell them to the highest bidder. The first thing I put up was a small clock, worth, I suppose, about \$20.

"'I'll give \$500," was the first bid. It came from a nephaw. "'Make it \$1,000,' interjected a

the nephew.

"The nephew won and got the twenty-dollar clock for money with which he could have bought the finest clock in Philadelphia. I never knew what the history of the clock was, but it must have had a peculiar one. Then I put up a big arm chair. It was the chair Drexel had sat in for over twenty years, and it had a valuable association for each one of the family. A married daughter and young Anthony Drexel were the ones who wanted it the most, and the bidding, which opened at \$1,000, was spirited and lively. I finally sold the chair to Anthony for \$6,500. The day's sales brought in over

"I never had anything as good as that," said another auctioneer, "but I sold the Childs effects the same way. The chief contest was over one of those eld-fashioned talk clocks. One Hundred Years of War.

A highly interesting study of what a hundred years of war have cost France in human life has just been made publie by Dr. Lagneau, member of the Academy of Medicine of Paris, and is found in the Lancet. When the revolution broke out France's effective army was only 120,000 men. For the wars waged during ten years in Belglum, on the Sambre, the Meuse, the Rhine, the Alps, the Pyrenees, in the Vendee, and in Egypt there were called out 2,800,000. At the census made in the ninth year of the republic there remained of these only 677,598. In killed and in dead by disease the wars of the first republic cost France 2.122,-402 men. From 1801 to Waterloo 3,-157,398 men scarcely sufficed to fill the blanks which in an incessant war against combined Europe France incurred at Austerlitz, Jena, Auerstadt, Friedland, Saragossa, Eckmuhl, Essling, Wagram, Taragona, Smolensk, Moscow, Lutzen, Bautzen, Dresden, Leipzig and Waterloo. Under the restoration, Louis Phillippe, and the second republic, in spite of the war in Spain (1823), the conquest of Algiers (1830), and the taking of Antwerp, France passed through a period of comparative calm. The army numbered about 213,748, and the mortality averaged 22 per 1,000. In 1853-'55 commenced the epoch of the great warsthe Crimea, Italy (1859-'60), China (1860-'61), Mexico (1862-'66), and the disasters of 1870. In the Crimea, out of 500,000 there died 18,673; in China, 950; and in Cochin China 48 per 1,000. The second empire cost France about 1,600,000 soldiers. According to Dr. Lagneau's demographic tables the century from 1795 to 1895 witnessed the death in battle or by disease of 6,000,-000 French soldiers.

His lordship cracked many a joke with Bauchie, who, in return, indulged in a good deal of freedom; but the former, on a particular occasion, determined to puzzle the ferryman, and put New York a little to the west, and, having got across the river, his lordship leaped out of the boat without Buffalo division is the shortest route | so much as putting his hand into his pocket.
