REV. DR. TALMAGE

The Eminent New York Divine's Sun day Sermon.

Subject: "The Gates of Hell."

Text: "The gates of hell shall not prevail" against it."-Matthew xvi., 18,

of the law scrutinizing me, supposing no doubt I was a German and looking at those gates for adverse purposes. But measures

plates they smoked in the righteous annihilation, and yet a great deal of bad literature of the day is not gripped of the law. It is strewn in your parlors. It is in your libraries, Some of your children read it at night after they have retired, the gas burner swung as near as possible to their pillow. Much of this literature is under the title of scientific information. A book agent with one of these infernal books, glossed over with scientific nomencature, went into a hotel and sold in one day 160 copies and sold them all to women! It is appalling that men and women who can get through their family physician all the useful information they may need, and without any contamination, should wade chin deep through such to this infamy. Fathers and mothers, be not deceived by the title, "medical works," Nine-tenths of those books come hot from the lost world, though they may have on them the names of the publishing houses of New York, Chicago and Philadelphia. Then there is all the novelette literature of the day flung over the land by the million. As there are good novels that are long, so, I suppose, there may be a good novels that are sonr, and so there may be a good novels that are sonr, and so there may be a good novels that are sonr, and so there may be a good novelette of this day and keeps either integrity or virtue. The most of these novelettes are written by broken-downliterary men for small compensation, on the principic that, having failed in literature elevated and pure, they hope to succeed in the tainted and nasty. Ob, this is a wide gate of hell while the pusher on take the responsibility of pulling on the out. You would not. Not one of a support is death, but it is the exception. A book agent with out and they are the part of the gate of the would would mot. Not one of the substant of the sate of the part of the whole way one her sor. You would drie the pate of the gate of the gate of the gate of the gate of the gate

of one of its members, the amazed mother said to the officer of the law: "Why, I never supposed there was anything wrong. I never thought there could be anything wrong."

Then she sat weeping in silence for some time and said: "Oh, I have got it now! I know, I know: I found in her bureau after she went away a bad book. That's what slew her." These leprous booksellers have gathere i up the catalogues of all the male and female seminaries in the United States, catalogues containing the names and residences of all the students, and circulars of sin your doom is sealed, and world without death are sent to every one, without any exception. Can you imagine anything more deathful? There is not a young person, male or female, or an old person, who has not had offered to him or her a bad book or a bad picture.

Scour your house to find out whether there are not of the gates of These were carried off, the gates of These were battered down, the gates of the gates of These were battered down, the gates of the gates of These were battered down, the gates of These were battered and the are any of these adders coiled on your par-lor center table or coiled amid the toilet set on the dressing case. I adjure you before

A cold winter night in a city church. It on the dressing case. I adjure you before the sun goes down to explore your family libraries with an inexorable scrutiny. Remember that one bad book or bad picture may do the work for eternity. I want to arouse all your suspicions about noveleties. I want to put you on the watch against everything that may seem like surreptious correspondence through the postofilee. I want you to understand that impure literature is one of the broadest, highest, mightinest gates of the lost. est gates of the lost.

hour in recognizing the fact that there is a dissolute dance. You know of what I speak. It is seen not only in the low haunts of death, but in elegant mansions It is the first step to eternal ruin for a great multitude of both sexes. You know, my friends, what posters. You for a great multitude of both sexes. You "What are you doing here, Meg?" said the know, my friends, what postures and attitudes and figures are suggested of the devil. They who glide into the dissolute self." And then the rattling cough came, devil. They who glide into the dissolute dance glide over an inclined plane, and the dance is swifter and swifter, wilder and wilder, until, with the speed of lightning, they whirl off the edges of a decent life into a flery future. This gate of hell swings outs of the city, and passed on into the councares the asymptotic forms of source of the lightning outs of the city, and passed on into the councare of the asymptotic forms of source of the city, and passed on into the councare of the city of the city, and passed on into the councare of the city of the city, and passed on into the councare of the city of the city, and passed on into the councare of the city of the ci across the axminster of many a fine parlor and across the ballroom of the summer on the road, and she saw in the district on the road, and she saw in the district on the road, and she saw in the district on the road, and she saw in the district on the road, and she saw in the district on the road, and she saw in the district of the road, and the road, and the road, and the road, and the road of t brother, my sister, you have no right, my had been gleaming there every night an attitude to the sound of music which would be unbecoming in the absence of music. No Chickering grand of city parlor to the garden gate. She opened it and

that which God hath cursed.
Gate the Third—Indiscreet apparel. The attire of woman for the last few years has en beautiful and graceful beyond anything I have known, but there are those who will always carry that weich is right into the extraordinary and indiscreet. I charge Christian women, neither by style of dress nor adjustment of apparel, to become administra-tive of evil. Perhaps none else will dare to tell you, so I will tell you that there are multitudes of men who owe their eternal damnation to what has been at different times the boldness of womanly at-Show me the fashion ny age between this ar time of Louis XVI of France and Henry VIII of England, and I will tell you the type of morals or immorals of that age or that year. No exception to it. Modest apparel means a righteous people. Immo lest apparet al-ways means a contaminated and depraved society. You wonder that the city of Tyre was destroyed with such a terrible destruction. Have you ever seen the fashion plate of the city of Tyre? I will show it to you: "Moreover, the Lord saith, because the

daughters of Zion are haughty and walk with stretched forth necks and wanton ever walking and mincing as they go, and making a tinkling with their feet, in that day the Lord will take away the bravery of their tinkling ornaments about their feet, and their cauls, and their round tires like the moon, the rings and nose jewels, the changeable suits of apparel, and the mantles, and the wimples, and the crisping

That is the fashion plate of ancient Tyre. And do you wonder that the Lord God in His indignation blotted out the city, so that fishermen to-day spread their nets where that city once stood?

Gate the Fourth-Alcoholic beverage, Oh, world rejected. the wine cup is the patron of impurity! The officers of the law tell us that nearly all the men who go into the shambles of death go in intoxicated, the mental and the spiritual abolished, that the brute may triumph. Tell New Year's.

me that a young man drinks, and I know the whole story. If he becomes a captive of the wine cup, he will become a captive of all other vices. Only give him time. No one ever runs drunkenness alone. That is a carrion crow that goes in a flock, and when you see that beak ahead you may know the other beaks are coming. In other words, the wine cup unbalances and dethrones one's better judgment, and leaves one to prey of all the evil appetites that may choose to alight upon his soul. There is not a place of any kind of sin in the Entranced, until we could endure no more United States to-day that does not find its of the splender, we have often gazed at the chief abetter in the chalice of inebriety. shining gates, the gates of pearl, the gates of heaven. But we are for awhile to look in the opposite direction and see, swinging open and shut, the gates of hell.

There is either a drinking bar before or one underneath. These people escape legal penalty because they are all licensed to sell liquor. The was going on that I stood one day in Paris license gambling houses, license libertinism. was so absorbed in the sculpture. was so absorbed in the sculpturing at the top of the gates—the masonry and the bronze—that I forgot myself, and after awhile, looking down I saw that there were officers of the law says tracking the same tracking tracking the same tracking tracking the same tracking tracking tracking the same tracking tracki

of the law scrutinizing me, supposing no doubt I was a German and looking at those gates for adverse purposes. But, my friends, we shall not stand looking at the outside of the gates of hell. In this sermon I shall tell you what those gates are made of. With the hammer of God's truth I shall pound on the brazen panels, and with the lantern of God's truth I shall flash a light upon the shining hinges.

Gate the First—Impure literature. Anthony Comstock seized twenty tons of bad books, plates and letterpress, and when our Professor Cochran, of the Polytechnic Institute poured the destructive acids on those plates they smoked in the righteous annihilation, and yet a great deal of bad literature of the day is not gripped of the law. It is side of the gate of hell and shown us how they swing in to allow the entrance to the doomed. Will you not, please, before you get through the sermon, tell us how these gates of hell may swing out to allow the escape of the penions of the though the sermon, tell us how these gates of hell may swing out to allow the escape of the penions of the sermon tell and shown us how they swing in to allow the entrance to the doomed. Will you not, please, before you get through the sermon. Tell us how these gates of hell may swing out to allow the escape of the lest.

How the lost.

But you say: "You have described these gates of hell and shown us how they swing in to allow the entrance to the doomed. Will you not, please, before you get through the sermon. Tell us how these gates of hell may swing out to allow the escape of the law:

You not, please, before you get through the sermon. Tell us how these gates of hell may swing out to allow the escape of the lost.

But you say: "You have described these gates of hell and shown us how they swing in to allow the entrance to the doomed. Will you not, please, before you get through the sermon. Tell us how these gates of hell and shown us h

newspaper. Every hinge is the interjoined type of a corrupt printing press. Every bolt or lock of that gate is made out of the plate of an unclean pictorial. In other words, there are a million men and women in the United States to-day reading themselves into When in one of our cities a prosperous the church wakes up matters will get worse family fell into ruins through the misdeeds of one of its members, the amazed mother

our transgressions."

The music that night in the sanctuary Gate the Second-The dissolute dance, You shall not divert to the general subjet of dancing. Whatever you may think of the parlor dance or the methodic motion of the worshiped God in the village church. The body to sounds of music in the family or the service over, the minister went down the social circle. I am not now discussing that alsle. She said to him: "Were those words ad circle, I am not now discussing that stion. I want you to unite with me this for me? 'Wounded for our transgressions, is in recognizing the fact that there is a Was that for me?' The man of God under-

ballroom of the summer on the road, and she saw in the distance You have no right, my light in the window. Ab, that light in the window. music. No Chickering grand of city parior or fiddle of mountain picnic can consecrate passed up the path where she played in childhood. She came to the steps and looked in at the fire on the hearth. Then she put her fingers to the latch. Oh, if that door had been locked she would have perished on the threshold for she was near to death! But that door had not been locked since the time she went away. She pushed opened the door. She went in and lay down on the hearth by the fire. The old house dog growled as he saw her enter, but there was something in the voice he recognized,

t different pushed her down in his joy.

In the morning the mother came down, and the but when the face was unlike the control of the but when the face was unlike the control of the cont but when the face was uplifted, she knew it, and it was no more old Meg of the street. Throwing her arms around the returned prodigal, she cried: "Oh, Maggie!" The child threw her arms around her mother's neck and said, "Oh, mother!" And while they were embraced a rugged form towered above them. It was the father. The soverity all gone out of his face, he stooped and took her up tenderly and carried her to mother's room and laid her down on moth-er's bed, for she was dying. Then the lost one, looking up into her mother's face, said "'Wounded for our transgressions, and bruised for our iniquities!' Mother, do you think that means me." "Oh, yes. my darling," said the mother. "If mother is so glad to get you back, don't you think God is glad

to get you back?"

And there she lay dying, and all their dreams and all their prayers were filled with the words, "Wounded for our transgressions, and bruised for our iniquities," until, just face lighted up, showing the pardon of God had dropped upon her soul. And there she slept away on the bosom of a pardoning Jesus. So the Lord took back one whom the

LIGHTS THE WORLD.

Brush's Patents of Electric Lighting.

The streets of the biggest cities of every continent blaze at midnight through the genius of Charles F Brush. Still the world knows but little about him. With all his genius he is modest in the extreme. He early adopted the policy of keeping out of print. He has contributed little to scientific journals, and the world knows him only through his work. It has no idea of the man, and there are few who appreciate his wonderful character and the wide extent of his achievements. His big mansion on Euclid avenue, Cleveland, is one of the finest houses in the United States and one of the most comfortable homes. It is located in the best part of the avenue, which is one of the finest streets in the world, and it is surrounded by seven acres of magnificent lawn, where the land is so valuable you have to carpet it with greenbacks to buy it.

CHARLES F. BRUSH.

There are tons of storage batteries in the bouse, and the power which charges these batteries with electricity is an enormous windmill which he has erected in the rear. Every breeze that blows produces light for the house, and the batteries are so large that if there should be a dead calm for a whole week they would still contain enough electricity to run all the lights.

"I was always experimenting with something, and while I was in the High School in Cleveland I made microscopes and telescopes, grinding the lenses and turning out some very fair instruments."

mo-electric machine. I showed this at Philadelphia the next year at the Franklin Institute. The first arc lighting machines had to have one dynamo to each light. My invention was the first that proposed a series of are lights working from one dynamo, and it was upon this that all the street lighting and all the arc lighting systems of the present day are based."

BRUSH'S RESIDENCE.

"Will we ever get electricity directly from coal?"

'I think so," replied Mr. Brush. 'In fact I have already gotten it, but not in such a way as to make the invention commercially profitable. It is now twenty years since I succeeded in getting electricity directly from coal. It was in 1874. The fields of invention are vast. We stand just on the threshold, and there will be new inventions as long as man has mind to create and the will to investhe possibilities of their combina-

tion. "The electric force is still to a large extent a secret from us all. Of late years there have been few new fundamental inventions in electric light ning. There have been many improvements and modifications of the old ones. The light is stendily being made better, but it is the same light just, as for instance, we have had locomotives drawing trains ever since we were born, but the locomotive of to-day is a far different machine from that of forty years ago. Still it embodies the same fundamental princi-

ples." "Where is the chief work being

done in electricity to-day ?" "It is in the field of thermo-electricity, or heat electricity. It is now thought, you know, that all light and heat are produced by electrical force, and it is in these branches that the best work is now being done."

Gas Made from Fats.

In France a very good gas is made from the fatty materials contained in the soap suds after washing wools and yarns. The wash water of a woolen mill with 20,000 spindles will

Blunt Old Bismarck.

Baron Prokesch, the Austrian plenipotentiary and president of the Diet, in the early days at Frankfort, was much in the habit of bullying. One evening, when at a large social gathering, Bismarck and Prokesch, surrounded by a brilliant group of diplomats. were discussing a protocol based on certain equivocations, Prokesch said. looking straight at Bismarck: "If that were not true, then I, in the name of my imperial master, should have been guilty of lying!" Returning his gaze without a symptom of faltering, "Precisely so, your excellency," slowly said Bismarck. The group, thunderstruck and embarrassed, scarcely knew which way to turn. Prokesch moved away: but later, at the supper-table, he came over to Bismarck with a glass of champagne and "Well, let us make peace." "Assuredly," said Bismarck, "but the protocol must be altered." And it was.

Matting.

Pneumatic matting, for use under stair carpets, is a recent invention. It saves the carpet, and reduces the noise made in ascending or descending the stairs.

Throat Paralysis.

(From the Courier-Herald, Saginaw, Mich.) It was publicly talked all over Clare County, Michigan, for some time before the Courier-Herald sent a reporter to Dover to fully investigate the Coulter matter. He finally went, and we publish to-day his full report. The Coulters are prominent people. though Mrs. C. in response to the question whether she objected to being interviewed, said, "Certainly not," Her story follows:

"About 14 years ago we decided to take up our abode in Dover and everything went along smoothly for several years, business progressed, and being of a saving temperament we accumulated quite an amount. Our family increased as the years rolled by and we now have 5 children living, the oldest 15, youngest 3, but sickness made its way into our household, and doctors' bills flooded upon us, until we have nothing left but our home and these sweet children. Everything went to satisfy the claims of physicians. 'About three years ago I had a miserable

feeling at the back of my ears, my right hand became paralyzed and the paralysis extended to my arm and throat, and would affect my bead and eyes, sometimes for days I would lose my sight, my face was deformed. lifeless as it were, my nose was drawn to one side, and I presented a pitiable appearance and never expecting to regain my natural facial expressions. I employed the best physicians that could be procured, expending thousands of dollars for their services, but could not obtain relief. At last, they stated my case was beyond the reach of medical skill, and it would be but a short time until the end would come. This certainly was not very encouraging to me, but I never gave up hope. In connection with receiving the atndance of physicians I have tried every edicine known to the apothecary but never received any relief until Dr. Williams' Pink Pills for Pale People came to my assistance.

could not walk across the room without assistance, in fact he would fall all over himself, but after taking a few boxes of Or.
Williams' Pink Pills, St. Vitus' dauce entrely left him, and no trace of the affliction is These Pills are worth their weight in You may say in this connection that I am willing at any time to make affidavit to the truth of these statements, and furthermore, I will answer any communication con-cerning my case, as I consider it nothing more than right and just that I should assist

Dr. Williams' Pink Pills contain all the elements necessary to give new life and rich-ness to the blood and restore shattered nerves. They are for sale by all druggists. or may be had by mail from Dr. Williams' Medicine Company, Schenectady, N. Y., for 50 cents per box, or six boxes for \$2.50.

We See All Sides of the Sun.

The inhabitants of this earth never get a glimpse of but one side of the moon, but in the course of a year every portion of the sun's surface is turned toward us. This is because the sun's equator is almost coincident with the plane of the ecliptic, the inclination being only about seven degrees.

There is only one thing prettier than the sunrise, and that is an early mornlow nap.

SOME ODDITIES OF MARRIAGE.

Widows and Widowers Generally Avoid Single Life and Mate Again.

It has been remarked that times of speculation are invariably accompanied the eminent statistician, hazards therefore, the suggestion that it is the spirit of speculation itself that leads many to embark on matrimony at such times. Another reason, which he is careful not to ignore, is the increased prosperity that induces and sometimes seems to accompany what he calls the periodical epidemics of speculation. A great war, after it is over, is good for marriage. So is a good harvest, so is the estabfishment of new industries or the extension of old ones. The reason is the same in all these instances; the increased prosperity of the general body of the people. So intimately is matrimony associated with national welldoing that it has come to be styled the barometer of prosperity. Its indications, however, are more for the future substantiate what was said of marriage as speculation. The nation is sometimes extraordinarily sanguine, and when this is the case marriages are plentiful. Great popular leaders inspire this feeling. A statesman of genius at the head of affairs perceptibly ncreases the marriage rate. In a word the great fluctuations in the marriages. are the result of peace after war, abundance after dearth, high wages after want of employment, speculation after | the candle is again ready to burn anlanguid enterprise, confidence after dis other hour. trust, and national triumphs after national disasters.

The marriage returns invariably show a corresponding increase for any augumentation in the duties paid upon malt, wine and spirts. They in the same way keep pace with the consumption of tea, sugar, coffee and tobacco, and with the imports of raw silk, cotton, wool and timber. The one increase is not, however, the cause of the other; "When did you first appreciate that your electric light might have a commercial value?"

"I think it was about 1876," replied Mr. Brush. "It was at this time that I completed my first dynamo-electric machine. I showed this paratively much greater than in the lat-"A short time since my little boy John was afflicted with St. Vitus' dance. He by high prices, licenses and banns being by high prices, licenses and banns being regarded as the prospective badges of capital and labor-not without important exceptions, however. Autumn is the favorite season everywhere; with a few spring is preferred. Half the weddings throughout the country are celebrated on Wednesday and Thursday. Saturday has more than the average number. Friday is not a favorite, as few marriages are celebrated on that day. Widowers are more inclined to marry than bachelors. Widows are more inclined to marry than spinsters. Both facts are eloquently in favor of the comparative advantages of matrimony. For one bachelor that marries between the ages of 50 and 55 seven widowers remarry between these ages. These are marriages out of an equal number of each class; the actual number of bachelors married will be greatest only in proportion as they exceed by seven to one the actual number of widowers living at these ages. Under the same conditions, for every spinster married between 30 and 65 two widows are remarried.-New York Dispatch.

Eggs.

Among reptiles the eggs exhibit great variety. The eggs of the allegator are elongated and almost cylinderical, evenly rounded at both ends, and about the size of an ordinary duck's egg. The eggs of the sea turtle are as large as a small apple, rounded, and have a flexible shell. Those of the snapping turtle are much smaller, but also rounded. Those of the terrapins and other genera are oblong, as also are those of lizards. In common black and yellow-dotted American fresh-water terrapins, and in the painted terrapin, the eggs require four years of growth before they are laid. Take a sevenyear-old turtle of this kind. It will contain only very small eggs, all of uniform size. An eight-year-old tortoise of the same kind will have two sets of eggs, one larger and one smaller. One of nine years will have three sets of eggs, the oldest set being the size of a small pea, A tortoise of ten will have four sets of eggs, and in that year she will lay for the first time, and give birth to the most mature sets.

A Standing Cavalry Order.

An old cavalryman says that a horse will never step on a man intentionally. It is a standing order in the English cavalry that, should a man become dismounted, he must lie down and keep perfectly still. If he does so the entire troop will pass over him without his being injured A horse notices where he is going, and is on the lookout for a firm foundation to put his feet on. It s an instinct with him, therefore, to step over a prostrate man. The injuries caused to human beings by a runaway horse are nearly always inflicted by the animal knocking them down, and act by his stepping on them .- Boston Soldiering in the Orchestra

The last echo of one of Sousa's overtures was just dying away over the sandhills south of the Fair grounds when Gen. Schofield stepped in front of the band and saluted the distinguished by increase of marriages. Dr. Farr, leader. Sousa returned the salute and sent one of his men to escort the General up into the band stand, "That music was beautiful—beautiful!" exclaimed the General, as he shook Sousa's hand warmly. "I am astonished, sir, that you get such results with so little discipline." There is nothing that Sousa. prides himself more on than being one of the strictest of disciplinarians, and he was naturally nettied at the General's criticism. "Why, General, my men are under perfect control. I'm sure they are thoroughly drilled, and I can hardly believe that there is any lack of discipline. I haven't noticed it." "No. that's just it; you don't see it," persisted the General. "I saw it, though. Do you know that as soon as you turn your back on one side of your band to shake your baton at the other those fellows than for the present, dealing rather all quit playing? Of course, you don't with the expected and anticipated than see it, for as soon as you turn around with the actual. But this only goes to they begin again."-San Franciso Chronicle.

New Candle,

A new candle has been brought out which extinguishes itself in an hour. This it does by means of a tiny extinguisher of tin, which is fastened in the wax by wires, and which effectually performs its task. It is only necessary to remove this diminutive extinguisher when its work is done, and
