The operations of -ome of the more important bureaus of the Treasury Department during the last fiscal year are briefly outlined as follows:

The year has te n one of unusual interest and importance to the United States reveauecutter service. It has performed spec al .e .vices of a conspicuous nature Among these are noted the search for the Ivanhoe, suppesed to have foundered on the 28th of September last off Cape Flattery, on the Pacific, in which three of the vessels, viz. Grapt, Rush and Corwin, joined. In its winter cruising operations during the unu-ualy severe weather of the last season it rendered ervices to distressed shipping of more than ordinary value and importance. The Dallas alone assisted during the month of February twonty vessels imperiled by ice, a d during the month of March twenty-three while the Crawford rendered a like service to fifteen during the former month.

A law has been secured placing on "permanent waiting orders" all officers of the service who are "permanently incapacitated to perform efficiently the duties of their offices." In carrying into effect the provisions of this law it is claimed that the service has been greatly benefited by the removal from the active list of a large number of officers who, through no sault of theirs, are no longer capable of performing duty and promoting younger men to the vacancies thus created. Measures have also been instituted and are in course of execution looking to new appointments to again fill the complement of officers on the active list.

#### FIREPROOF WOOD.

#### The Naval Construction Bureau Discovers a Composition to Prevent Combustion.

As the result of experiments running through three months at the Boston Navy Yard, conducted by Naval Constructor Hanscom, the Construction Bureau has at last succeeded in finding a means of rendering the woodwork of the interior of men-of-war

The sap of the wood is extracted in vacum in large iron tanks, and the pores of the wood are then filled under heavy pressure by a chemical composition of borax, boracie acid and muriate and sulphate of ammonia. Thus treated the wood may be subject to flames without taking fire. The color and tex ure of the wood is unaltered and none of the de-

sirable qualities is impaired. The same process may be used to fireproof cloth fabrics, such as spare sails, hammocks, ropes and all the material going into a ship of war. The Construction Bureau thinks so weil of the process that it has recommended that the department adopt it and fit out all of the new ships with woodwork so treated instead of abandoning woodwork in lavor of compositions of cork and other substances.

The Hon. Emily Jane Mercer, dowager Marchioness of Lansdowne and mother of the present Marquis of Lansdowne, who was formerly governor-general of Canada, and recting that her sister, Mrs. Ganate, and the jate governor-general of India, is dead in England, aged seventy six years.

n New York city, Charles Miller, Atrabam Mills and Katle Shay were seriously burned. Considerable property in Adair county, Misscuri, was destroyed by a hail and rain storm. Mrs. Stewart and her infant daughter were drowned in the overflow of Sugar ereek.

The body of R. Stuart Littlepage, of Balti, more, who d sappeared from one of the Sound steamers in February last, was found in the East river, at College Point, Long I-land.

A car of the Dartmouth and Wesport Street Railway Company left the track at the foot of Smith Mills Hill, near New Bedford, Mass., and toppled over. The car contained flity passengers, seventeen of whom were injured, one fata ly.

The post exchange building, on the Presidio Military Reservation, a San Francisco despatch says, was destroyed by fire, and Frank Roth, a sutler's employe, was pro ably fata ly injured. This is the second incendiary fire there within a week.

An engine on the Carol na, Cumberland Gap and Chicago Road, going from a rock quarry to Elgeneld Courthouse, South Carolina, for water, ran over spikes driven in the track. It was thrown down a 15-loot embankment, Hugh Wetherford and Albert Brunson, colored, were ki led ; Wal ace Holloway probably intally injured ; Engineer Parker and Fireman Cherry were badly bruised and scalded.

#### PRICE LYNCHED.

The Murderer of Sallie Dean Hanged at Denton.

Marshall E. Price, the condemned murderer of Sallie D-an, was taken from the jull at Denton, Md., by a number of masked men and hangel to a tree.

At 10 o'clock a large number of persons had ga hered, a few at a time, in o the towa and then it was known there was to be a lynching. Price was told of their presence and said to a guard: "For God's sake let me out. I will hide, I will not run away." But every avenue of escape was guarded, and the sheriff had been notified not to take Price away.

The mob had no difficulty in entering the jail, where they found the crouching and terrifled man. H, was quickly forced out of the building, and a short distance from the jail stan is the tree to which he was bauged.

This termination was not unexpected. After a fair and impartial trial had been accorded Price, and after he had been convicted of a foul and trutual murder upon testimony which was deemed conclusive, the people of Caroline county thought the law should take its course. When the lawyers from Baltimore came down and asked for a new trial and then after that motion was overruled by the court and the appeal was taken murmutings were heard and complaints of the law's delays were made by people all over the county. This feeling was intensified this morning when the reprieve granted by the Governor arrived. Many misunderstood the nature and meaning of a reprieve. They thought that it was in effect some kind of pardon or a commutation of punishment which would result finally in the gallows being cheated and the escape of the murderer. Then there was talk of the removal of the prisoner to Baltimore and then the cl max was reached.

## EX-PRESIDENT PEIXOTO DEAD.

#### He Raled Brazil During the Great Nava Rebellion.

Ex-President Peixoto, who hal been in ill health for several months past, is dead.

Marshal Fioriano Psixoto, ex-President o the republic of the United State, of Brazil, was the son of Lieuz-Col. Hanoel Vierra d Araujo Peixoto. He was born on April 30 1833, in the State of Alagoas. He was chiefly distinguished for the suppression of the revolution which broke out in Brazil in the summer of 1893. Soon af.er the return of Admiral de Mello and Admiral da Game from the naval review at New York in 1893 the naval fore s broke away from the rule of Peixoto and indirectly uniting with the insurgents in the province of Rio Grande d Sul, succeeded in organizing a rebellion formidable in its aspects. After a number of sharp contests in the harbor at Rio de Janeiro, President Peixoto and his associates in office and in the army practically succeeded in stamping out the revolt, though desultory fighting has been kept up on both sides ever since, though the death of De Gama a few days ago will probably end the revolt.

Owing to the rejection of the land and in come taxes assessment bill the Parliamen of New South Wales will be dissolved.
