WITHOUT BRAINS

REMARKABLE CONDITION OF A WATSONTOWN MAN.

Physician's Knife Reveals a Medical Wonder.-- No Brains yet a Man Has all Faculties.

At the request of a number of prominent physicians of Philadelphia, Dr. S. S. Koser, of Williamsport, on January 19th held a post mortem examination of the remains of John Bly, of Watsontown, son of William Bly, who died Friday night. For a long time Bly, who was twenty years of age, suffered with a tumor which grew into the very base of the brain and occasioned his death. The growth had a visible effect upon his brain, and the case became a curiosity to the medical profession. The tumor was imbedded too deeply into the brain tissue to admit of an operation for its removal and the autopsy was awaited for developments.

ing the case says it was found that the tumor was nearly as large as a billiard ball. It was so located as to demoralize the nerves of the sight centre, and as a consequence young Bly was blind for over three years. But the most singular fact developed was that the entire brain had been hollowed out by the action of the tumor. The cavity was at least five inches in length, and was filled with pus. All that was left of the brain was a thin shell, composed of the tougher tissues where the brain matter gathers into nerves, which were less susceptible to the process of decay. When an incision was

Ex-Boss Clarkson, of the Republican National Committee, was in Washington when Mr. Harrison was, last week, but he did not call on him. In fact, it is pretty well known that the two men are not in love with each other.
