Hood's Pills cure biliousness, indigestion.

Took It as a Hint.

A story is told of Senator Vest making a political speech in Sedalia, Mo., some time ago, when he was greatly embarrassed to see nearly every man in the house take out his watch at the same time. He had been speaking an hour, but the hint that he had exhausted the patience of his hearers was so palpable that he could scarcely ignore it, and he blurted out something in the way of regrets that he was keeping the crowd too long. No one in the hall seemed to understand why he stopped in the midst of his argument to make his apology and the incident was overlooked in a few minutes, for the political enthusiasm was sufficient to encourage the Senator to conclude his speech. After the meeting he spoke to the chairman about the remarkable anxiety on the part of the audience to ascertain the time just as the clock struck 9, and explained that he took it as a hint, because the aggressive striking of the clock seemed to obviate any necessity for watch consultation. He was informed that at noon and 9 p. m. the nearest approach to a local time, a gun was fired, and that everybody, as a matter of habit, consulted his watch at those hours to see if it was correct.

Marble Ponds of Persia.

That beautiful transparent stone called Fabriz marble, much used in the burial places of Persia and in their grand edifices, consists of petrified water of ponds in certain parts of the country. This petrification may be traced from its commencement to its termination; in one part the water is clear, in a second it appears thicker and stagnant, in a third quite black, and in its last stage it is white like frost. When the operation is complete a stone thrown on its surface makes no impression, and one may walk over it without wetting one's shoes. The substance thus produced is brittle and transparent, and sometimes richly striped with red, green and copper color. So much is this marble, which may be cut into large slabs, looked upon as a luxury, that none but the king, his sons and persons especially privileged are permitted to take it.

Dat's My LIT' Boy.

Dear keener how he rompin' roun'—
Fill de house wid joy!
Le' 'm play en has his way;
Dat's my LIT' boy!

Go ter school twell holiday,
Wld his book en toy;
"Beats de lan," de teacher say,
Dat's my LIT' boy!

Mammy gittin' of: I spec'
Soon she'll miss de joy
Er his 'me' cour' her neck;
Good-by, LIT' boy!
—Chicago Times-Herald.

THE DUTY OF MOTHERS.

Daughters Should be Carefully Guided in Early Womanhood.

What suffering frequently results from a mother's ignorance, or more frequently from a mother's neglect to properly instruct her daughter!

Tradition says "woman must suffer," and young women are so taught. There is a little truth and a great deal of exaggeration in this. If a young woman suffers severely she needs treatment and her mother should see that she gets it.

Many mothers hesitate to take their daughters to a physician for examination, but no mother need hesitate to write freely about her daughter or herself to Mrs. Pinkham and secure the most efficient advice without charge. Mrs. Pinkham's address is Lynn, Mass.

The following letter from Miss MARY F. JOHNSON, Centralia, Pa., shows what neglect will do, and tells how Mrs. Pinkham helped her:

"My health became so poor that I had to leave school. I was tired all the time, and had dreadful pains in my side and back. I was also troubled with irregularity of menses. I was very weak, and lost so much flesh that my friends became alarmed. My mother, who is a firm believer in your remedies from experience, thought perhaps they might benefit me, and wrote you for advice. I followed the advice you gave, and used Lydia E. Pinkham's Vegetable Compound and Liver Pills as you directed, and am now as well as I ever was. I have gained flesh and have a good color. I am completely cured of irregularity."

THE YORK MONUMENT.

Shaft Erected on Penn Park by the County Commissioners—Revenue Collector Hershey Begins to Weld the Ax—Middlesex Furnace to Resume—Carpenter Steel Company Shipping Big Projectiles.

One of the most important events of the historic town of York was the dedication of a monument to the memory of the soldiers and sailors of York county. The monument was erected on "Penn Park" by the County Commissioners, empowered by the act of Assembly. The details of the beautiful shaft were suggested to the architect by the Column of July, in Paris, France, and the new monument, West Point, N. Y. The monument, with exception of the four bronze figures and bas-reliefs of Barre, Vt., granite, it rises to a total height of 65 feet 6 inches, including the crowning figure of Victory. The contract price of the monument was \$23,500, and with the other necessary expenses the total cost will reach \$26,500. The formal dedication of the monument was a decided success. Veterans were present from every section of the county and neighboring cities. The parade was marshaled by Captain W. L. Beldinger, and was headed by a platoon of police, Jenkins Post, of Hanover, had a small brass cannon drawn by two ponies. Frequent salutes were fired. On East Market Street an immense American flag was raised, and as the school children passed it was unfurled, allowing about 400 miniature flags to fall among them.

Tax Warrant.

The Township Committee of Lumberton Township have had issued a tax warrant against all persons who have not paid their taxes for the years 1896 and 1897, and directed Constable B. L. Thompson to collect the same. A notice issued reads: "On and after the 2d day of July I will call at the house of delinquent taxpayers, and will inventory their personal property and will sell as much as will pay the said tax and cost. All those who have no personal property to levy upon will be taken to jail. Pay your taxes and save costs and the constable will not appear at your house."

Political Changes.

Jacob Strickhouser, Deputy Revenue Collector of York county, appointed by Collector Shearer four years ago, and who refused to hand in his resignation to Revenue Collector Hershey, was informed that he would not be re-appointed after July 1. His place will be taken by Richard H. Liggett, of Fawn, York county. Strickhouser is the first to go, but others who have not handed in their resignations will be asked to vacate soon.

Furnace Will Resume.

"The Fabrie" Furnace, at West Middlesex, will resume operations at a near date, after an idleness of two years. The furnace will probably be operated by B. L. Kimberly and E. A. Wheeler, of Sharon. The output will be used by New Castle, Greenfield, Sharon and Cleveland concerns.

Projectiles For Our Navy.

The Carpenter Steel Company Thursday sent 300 6-inch and 200 8-inch shells to Washington. The works are to be enlarged. Two granite melting furnaces will be built at once, doubling the capacity of the crucible department.

Brevities.

A company with a capital of \$80,000 has received a charter to manufacture textile fabrics at Newville.

Several thousand people witnessed the laying of the cornerstone for the new building of the Hanley Hose Company at Chester.

George Fidler, of Fritztown, fell dead at market while seated at his stall. Death was due to heart disease.

George C. Wagenseller, who was several weeks ago recommended for the appointment as postmaster for Selin's Grove, has been appointed.

Israel Mellinger, a butcher, was struck by an express train at the railroad crossing at Sinking Spring and was carried about 300 yards on the cowcatcher before he fell to the ground. He was seriously injured.

J. P. Hies, of Doylestown, his wife and four daughters were taken violently ill on a train from Harrisburg, because of the stewed peaches they ate at a camp meeting near Harrisburg, which poisoned them.

Counsel for Jonas Preston, Jr., the Doe Run wife murderer, argued a motion for a new trial. The attorneys for the defense believe that Preston is insane. The Court deferred a decision.

An aerolite fell on the farm of J. W. Russell, near Sharon. It appeared glowing red and left a luminous trail, like a comet of the ground. A piece weighing eleven pounds was found which, when assayed, will be sent to the Smithsonian Institute at Washington.

Professor Wallace Peter Dick, who for three years has been president of Metzger College, in Carlisle, has resigned that position to accept the professorship of Greek and pedagogy at the State Normal School at West Chester. He is a graduate of Brown University.

An attempt to wreck a coal train was made on the Pennsylvania & Reading Road near Minersville. Two engines were coming down from the Lytle colliery with twenty loaded coal cars. The train was moving rapidly, and at a point on a curve, where there is an embankment nearly forty feet high, the conductor, who was on the forward engine, noticed several spikes and a brake shoe laid on the rails ahead. The alarm was given and the train finally brought to a standstill, but not until it had run over several of the spikes.

Russia is pressing on in Asia. She has absorbed three of the richest Chinese provinces and gained a group of ice-free ports and impregnable fortresses for the terminus of her great Siberian railroad. One might think, to see these plans on paper, that America and Great Britain were to be summarily crowded out of that quarter of the world. But it will not be so. The fact is that the Anglo-Saxon race is dominant in China and Japan, above all other aliens, and is likely to remain so. The vast preponderance of foreign trade of those empires is with Great Britain and the United States.

LEITER A LOSER.

Young Chicago Speculator Says He Has Been Caught in His Big Deal.

A Chicago special says: The famous wheat deal of Joseph Leiter went to pieces Monday. It has gradually been getting into position for such a collapse for a week past. Cash wheat has dropped \$1 in thirty days, July wheat 50 cents and September wheat more than 25 cents.

Monday young Leiter was closeted at the Illinois Trust and Savings Bank with his father, L. Z. Leiter, and after the consultation admitted that he had lost money as the outcome of the day's sensational "slump." He also admitted that his father had withdrawn his support, and that he would not be able to put up the margins which were called for as the result of the drop in prices. He declared, however, that the embarrassment was temporarily, and that he would make no assignment.

An intimate friend of Mr. Leiter and one who is believed to know much about his Board of Trade business said: "Mr. Leiter has not failed, nor has he made an assignment, and I do not think he will do so."

There are many persons who doubt whether young Leiter has really lost money. They believe that he has simply unloaded at a loss in order to clear his skirts of the whole deal.

If, on the other hand, he has really been caught, there are many explanations. One rumored sensation was that he had been victimized by smooth associates in Minneapolis, and hence the shrinkage in value of the cereal merchandised to European ports.

Leiter, at the end of May, had profits of \$5,000,000 to \$7,000,000 in his trade. He then had more than 10,000,000 bushels, and had handled more than 40,000,000 bushels. In all the fifteen months' campaign a good part of Leiter's cash wheat that has been shipped from here and the seaboard is sold for July delivery in Europe at high prices, so that the collapse at this end is looked upon as the cleaning up of the last of his trades.

His interests in wheat have been small since the close of the May deal. He has shipped his wheat out, and there are only about 750,000 bushels of cash wheat here.

His sales are placed at between 8,000,000 and 10,000,000 bushels, mostly September, of which 3,000,000 bushels are on puts sold through Lamson. Armour has taken Leiter's June wheat off his hands, about 250,000 bushels being transferred from Leiter, Grier, Leiter's chief broker, Leiter also transferred a lot of September to Lamson, but it has no significance except to enable them to settle trades.

Leiter made no attempt to conceal the fact that he had sold out all his holdings in futures. When it came out that he had transferred most of his trades in futures to other well-known houses and that they were well protected by margins, it was seen that whatever losses there were should fall upon Leiter.

A NEW FLYING SQUADRON.

Schley is to be the Leader of the Proposed Expedition to Spanish Waters.

A naval officer at Newport News says that one of the most daring movements in the history of naval warfare, with Commodore Schley to put it into effect, is a strong probability of the near future. This venture, which has been hinted at, is the sending of a new flying squadron to Spanish waters to locate Spain's reserve fleet, should the fleet remain in Cadiz harbor.

The plan of the department, it is said, contemplates the dispatch of a second or reinforcing squadron to Spanish waters, and the capture or annihilation of the Cadiz fleet. The second fleet would probably consist of two battle ships, several cruisers and a number of colliers.

There is no doubt that a new squadron will soon be formed in Hampton Roads, and all indications point to the fact that it will be sent across the Atlantic, if the Spanish reserve fleet does not make a quick move for Cuba or Porto Rico. This step may not be inaugurated, however, until Cervera's fleet is either captured or destroyed.

It is said that the new squadron will be composed of the cruisers Brooklyn, Commodore Schley's flagship, New York, Minneapolis, Columbia, St. Paul, Yale, St. Louis and Harvard. All of these ships, except the Brooklyn, New York and Columbia, are now here or in Hampton Roads. All have a speed of more than twenty-one knots, and they would form as fast and strong a flying squadron as could be organized from the American navy. Their coal carrying capacity ranges from 2,000 to 4,000 tons.

BOLD LIUT. BLUE.

He Travels Seventy Miles and Distinctly Sees the Spanish Warships.

Santiago de Cuba, (via Kingston, Jamaica,) Special.—The delay in the arrival of the troop transports has been ascribed here to a far in Washington that after all Admiral Cervera's fleet might not be in Santiago harbor. Once for all, Admiral Sampson decided to settle this question officially, and last Saturday he sent Lt. Victor Blue, of the gunboat Sawanee, to investigate. Lieutenant Blue is a South Carolinian.

The officer proceeded with guides to the hills overlooking the harbor and the city. He distinctly saw and definitely located four Spanish armored cruisers and two torpedo-boat destroyers. He saw also three small cruisers or submarines.

The result of his expedition he reported to Admiral Sampson on the deck of the flagship New York. Lieutenant Blue traveled about seventy miles, following the eastward line of the city. He brought to the flagship a copy of a Santiago paper issued last Saturday, in which complaint is made that the navy and army are falling to distribute to the residents their portions of the provisions remaining in the city.

Lieutenant Blue's report has definitely exposed the fiction that any of Cervera's cruisers was in the Bahamas, or in a position to attack the transports, which are now confidently expected at an early date. Admiral Sampson complimented him upon his daring and successful mission.

A Bid For German Aid.

The Spanish press has lately increased its optimism, based on the belief that Germany intends to prevent a bombardment of Manila by making a naval demonstration. The newspapers urge sacrifices, with the view of securing Germany's assistance. Political leaders express themselves in favor of offering Germany the following concessions in return for her "making the initiative" in checking America: Firstly, naval stations and coaling depots in Spanish Oceania; secondly, Spanish concurrence in the development of Germany's commercial and political relations with Morocco.

A Fatality Avoided.

From the Democrat, Goshen, Ind.

When neuralgia is accompanied by a dull, heavy pain near the heart, frequently becoming intense, it generally terminates fatally. Mrs. Nancy Flynn, who lives near Goshen, Indiana, survived such an attack and her advice is worth heeding.

"In the fall of '92," she said, "I began to have trouble with my heart. There was a sharp pain in my breast which became rapidly worse. The doctor was puzzled and put me under the influence of opiates. These sharp attacks followed one another at intervals and I became weak and had a haggard look. I was constantly in pain, seldom slept and had no appetite. I said: 'At the end of two years I was confined to my couch most of the time and the doctors agreed that my death was only a matter of a short time.'

"One day in a newspaper an item about a woman having been cured of neuralgia of the heart by Dr. Williams' Pink Pills for Pale People and I concluded to try them.

"When I had finished one box I noticed an improvement in my condition, and when I had taken twelve boxes I was completely cured. 'These pills have done for you what we could not do,' said one of my physicians, 'they have saved your life.'

"That was two years ago and my heart has not troubled me since. I believe I owe my life to Dr. Williams' Pink Pills for Pale People, and I take pleasure in telling others about them."

Among the many forms of neuralgia are headache, nervousness, paralysis, apoplexy and locomotor ataxia. Some of these were considered incurable until Dr. Williams' Pink Pills for Pale People were formulated. To-day thousands testify to having been cured of such diseases by these pills. Doctors frequently prescribe them and all druggists sell them.

MARRIAGE OF OFFICERS.

The Articles of Europe Have Various Rules Regulating It.

The restrictive conditions at present in force with regard to the marriage of officers in the Russian army forbid this privilege under any circumstance in the case of officers under the age of 23. Between the ages of 23 and 25 years the dot of an officer's wife must amount to a sum representing the minimum income of 250 roubles yearly. On comparison of these conditions with those regulating the same question in other European armies, it may be noted that in the Austro-Hungarian army the number of officers authorized to contract marriage is limited by a fixed proportion assigned to each grade, and these totals being reached, all further marriages must be deferred pending the occurrence of vacancies in the married establishments. The Italian army regulations, which fix the income of the fiancée at a minimum of 1,200 to 2,000 lire, would appear to be more rational in their operation. Italian officers, however, apply a somewhat liberal interpretation to this law, with the result that the number of marriages occurring under actual provisions does not exceed more than an eighth of the total number, seven-eighths of the officers being united under conditions of the religious ceremony only, and thus exposing themselves to all the inconveniences which attend a marriage not recognized by civil law. Similar disabilities would now appear to be incurred by Russian officers, and suggestions have been made by the press in Russia that a general revision of the law is becoming necessary. The question is assuming some importance from the fact that Russian officers, reaching a total number of nearly 40,000, represent one of the most important classes in the state.—Brooklyn Citizen.

Ethel—Oh, Clarence! Do you really mean what you say—that you will do anything I ask of you? Clarence Sophomore—Darling, you have heard me swear it. Ethel—Then, dearest, please, please get yourself appointed center rush on the Yale football team next year.—Puck.

WOMEN-FOLK OF THE SENATE.

Amusing Remarks Are Often Addressed to Those in Official Life.

Mary Nimmo Balentine writing of the "Women of the United States Senate," in the Woman's Home Companion, tells some amusing incidents in the experiences of Senatorial families which require great tact and self-command to be passed over without contempts.

"Women whose husbands and fathers are in political life enjoy interesting experiences and meet with curious people at times. It is asserted that the women in the families of candidates for office often assist in determining the outcome of elections. When this is true it is because of the quiet tact and domestic virtues of the women rather than of any specially brilliant performances on their part. The wife of a prominent Senator, recalls with much mirth the days of her father's campaign. She and her sister used to accompany him when he went to make speeches, and wrapped in waterproof cloaks the young ladies would mingle with the crowd to hear the comments of the people. The two were noted wags and wits, and were feared for their fun-making proclivities. The elder was invited once to visit with her father a valued constituent whose farm was near the county town. They went and enjoyed the day fully, visited the county fair, and were interested in all they saw. At night, when the young lady had retired to her room and was partially undressed, there came a knock at the door. She peeped out and saw the daughter of the house, 'May I come in?' 'Certainly,' replied the other, opening the door. 'Do you know I was awfully afraid to have you come here? 'Why, then, did you ask me to come? 'Oh, your pa and my pa are such friends that I couldn't help it. But I just made up my mind that if you acted a bit stuck up or put on any airs over it I was just bound to tell you of it. I'm right glad now that you did come.' This frank certificate of amiability was much prized by the recipient."

Every man is valued in this world as he shows by his conduct he wishes to be valued.—Bryce.
