Good Sense.

The school authorities of Chicago have determined that girls of the proper age who attended public schools shall study domestic cooking as part of their education. This is a sensible movement. The art of cooking, to know how to prepare wholesome and palatable food with economy in the use of the articles which enter into its preparation, is the most essential repulsite of housekeeping. Properly cooked food is an essential to health. but the average American girl, however accomplished in social requirements grows up in ignorance of the conditions requisite to the economical and scientific management of the cullinary department of the household. Even if, when placed at the head of a family, it is not necessary for her to do her own work, if her help is aware that the mistress knows how it should be done it will have a salutary effect.

Few men in this country are better or more favorably known to the drug and medicine trade than Mr. E. J. Schall, buyer in the proprietary medicine department of the Meyers Bros.' Drug Co., St Louis. He says: "My boy came home from school with his hand badly lacerated and bleeding, and suffering great pain. I dressed the wound and applied Chamberlain's Pain Balm freely; all pain ceased, and in a remarkably short time, it healed many friends. without leaving a scar. For wounds, sprains, swellings and rheumatism, I know of no medicine or prescription porch at the front of his stere and equal to it. I consider it a household necessity." For sale by J. H.
