WHAT WE EAT.

Dr. Wiley, chief chemist of the United States department of agriculture, in his testimony before the Senatorial Pure Food Investigating committee, recently in session in Chicago, declared that fully ninety per cent. of food and drink articles made and used in this country are frauds. This includes all dairy products, nearly all condiments, and food stuffs in widest household use, even coffee in the berry being adulterated. From milk the fats are abstracted, and even what is left is watered, small amounts of preservatives being added to prevent souring. Lard is adulterated by mixing in vegetable fats, and for expensive oils cottonseed oil is substituted. These adulterations, and also others, are often not injurious; a costly article is simply replaced by one less costly, to the business advantage of the dealer. Fully seventy per cent. of the beer used in this country, said the witness, is not made of malt.

A NEW POTATO PEST.

A new potato pest, said to be worse than the striped bug, is reported from some sections of the state. For want of a better name it is called the "potato louse." The insect is very small, so small as to be hardly visible to the naked eye, and they cover the potato leaves so that scarcely any of the leaf can be seen. They eat the leaf and in a few days it will wither. Farmers have tried in various ways to get rid of them, but without success. The insects cannot be shaken off, and Paris green does not appear to have any effect on them.

IT'S WORTH REMEMBERING.

An exchange says: Raising the left arm as high as you can will relieve choking much more rapidly than being thumped on the back. Very frequently at meal time and when they are at play children get choked while eating and the customary manner of relieving them is to slap them sharply on the back. The effect of this is to set the obstruction free, so that it can be swallowed. The same thing can be brought about by raising the left hand of the child as high as possible and the relief comes much more rapidly.

Are Having a Delightful Trip. Bellefonte's editorial lads, in the past few weeks roaming through Oregon, Washington and British Columbia, write they are having a delightful trip and enjoying princely hospitality from the people. We know it, having been there. Portland, Tacoma, Seattle, and other cities, gave them the freedom of the cities.

A postal to the Reporter says: "Are enjoying wonderful sights. We have no use for money; the people are giving us their best."

Another postal says: "Arrived at Seattle this, Wednesday, evening, 12. Find it a bustling city with elaborate preparations for our entertainment. All well."

The Roseburg, Or., Daily Review, 10, heads off thus: "The visiting editors enjoy a triumphal tour through Web-foot Land. A Flower Strewn Journey. Luscious Fruits and choice viands served by Beauty's Hands, wherever their special friends tarry."

The Portland, Seattle and Tacoma dailies go off in the same strain.
