

Everybody Pleased --

A Big Surprise!

All who visited our store, to see the

Men's \$7.50 Suits We Advertised Last Week

Were more than surprised at the Great Values shown. Not a man who saw them but said they are better, much better than he expected to see. The very few, who to make comparisons visited other stores, returned to us, even better pleased than those who bought at once. This is an offer that will bear inspection. The more you investigate, the more certain you will be of our Clothing Supremacy. This great sale will continue just as long as the goods last, but they are not likely to last long, as every garment offered is positively the kind other stores are asking from Ten to Fifteen Dollars for, and most of them the Fifteen Dollar kind. They are all priced here at \$7.50.

This means a saving of not less than Five Dollars to you, and better clothes than you will find any place in Centre County. If you have not been here, ask your neighbor. It's more than likely that he has. He can tell you if it is worth your while to investigate. See us is all we ask.

SPRING MILLS.

What Our Correspondent from that Busy Town Finds of Interest.

D. H. Ruhl, our village landlord was seriously ill last week, but is convalescing.

All our merchants report business during April quite satisfactory. Commercial agents passing through this place, report trade on the road from fair to middling.

Charles Miller of this place, had some "hen fruit" last week that was worth having. He showed me an egg measuring lengthwise eight inches, with a circumference of six and one-eighth inches, and weighing five ounces. Rather much egg that.

C. A. Krape of the shoe emporium, has just received a complete line of elegant oxfords and stylish shoes for the summer season; soft as velvet and guaranteed to wear for about seven ages. Mr. Krape is also fitting up his new croquet grounds for the especial amusement of his patrons and friends.

Bicycles are becoming quite numerous on the pike, and many of the riders are young ladies and quite a number of them display considerable skill in managing their "bikes." Collisions are not very frequent, but last week one did occur, but with no serious results. Both gentlemen discovered themselves sprawling on the road, covered with dust and dirt. After recovering their breath, they arose and stood for a moment like Ajax defying thunder, with the addition of a few expletives of a sulphurous character. On examination one of the gentlemen was forced to shoulder his "bike," and move in the direction of a bicycle repairing shop, while the other went on his way rejoicing.

Mr. Charles E. Dagle, employe of the Linden Hall Lumber Co., visited his parents in Sunbury over Sunday.

Mr. A. P. Wieland, of Syracuse, N. Y., visited at the home of his mother a few days last week; he was on his

way to his future home in West Virginia.

On Wednesday last week Mr. Crissman took a train load of men into the mountains to fight fire, and on their arrival, to their sorrow, no fire was to be found.

The many friends of Miss Clara Campbell will be pleased to learn of her recovery from the operation she underwent, at the Presbyterian hospital, Philadelphia.

Where to Affix Postage Stamps.

The proper place for a postage stamp on mail matter is on the upper right hand corner of the address side. Stamps placed elsewhere, and especially on the back, are liable to be overlooked, and the matter treated as unpaid, and perhaps delayed in dispatch; therefore, unless impracticable, stamps should be affixed on the "face" of all mail matter. The department does not hold postal officials responsible for delay in dispatch or wrong treatment resulting from the improper placing of postage stamps.

Creamery Statistics.

Editor Reporter:—In your issue of May 3, of the REPORTER, in commenting upon the checks received by various farmers in Haines township, from the Howard Creamery Co., you very properly gave the reason for the apparently large checks as being "the proper care of the cows." But further stated that this showed the "advantages of the Howard Creamery system."

Will you further explain to the public, how any creamery system will add to the amount of butter any cow, or herd of cows will give? Being interested in both creamery and stock, I know of no way in which the creamery helps the stock (as to amount of butter, etc.) but well understand how the creamery depends upon the stock.

I could furnish you a number of cream patrons receiving equally as large checks for their products of the cow, from the Spring Mills Creamery Co., but consider such information worthless, unless conditions are mentioned, as to how large the stock, etc.

How would information like the following strike you? I have before me the record of a cream patron of the Spring Mills creamery for the year 1899, for the cream of three cows, brought at his door, the sum of \$180.91 being \$60.30 per cow, saying nothing of the calves raised, butter and milk used by a family of five persons.

I give you the above as local news, and not as an "ad," showing the advantages of any creamery system, but shall be very glad to demonstrate to any farmer or number of farmers, either public or private, the advantages of the cream gathering system.

The ancients believed that rheumatism was the work of a demon within a man. Any one who has had an attack of sciatic or inflammatory rheumatism will agree that the infliction is demoniac enough to warrant the belief. It has never been claimed that Chamberlain's Pain Balm would cast out demons, but it will cure rheumatism, and hundreds bear testimony to the truth of this statement. One application relieves the pain, and this quick relief which it affords is alone worth many times its cost. For sale by J. H. Ross, Linden Hall; S. M. Swartz, Tusseyville; F. A. Danger of Self Medication.

Chemical analysis shows that most of the medicines taken into the stomach for rheumatism, neuralgia, and headache contain opium, morphine, acetone, chloral or acetanilid, all of which are direct poisons, which may produce death. They stop pain, it is true, by destroying the sense of perception, so that the patient loses the power of feeling. They mask the symptoms instead of eradicating the trouble. Local or general paralysis, or even death may follow their habitual use. The H. H. H. is used externally, so that the stomach and the intestines are not affected by it. It is therefore safe and reliable for the speedy relief of sprains, swellings, rheumatic and neuralgic pain and headache. As cheap imitations of valuable remedies are sometimes substituted, take none except that which has the signature and portrait of D. Dodge Tomlinson, 400 North Third Street, Philadelphia, Pa., on the wrapper around every bottle. For sale by J. D. Murray.
