Pink Pearl Turns Green

Seattle (Wash.) Spe. Chicago Tribune: When Lieutenant Whipple, while at dinner at the Waldorf Astoria bit into a pearl of wonderful size concealed in a big oyster, he recovered a gem that has since puzzled the lapidarists of the country. That pearl has recently betrayed Irish tendencies which are unaccountable. When first brought to public view it was of a pale pink hue. This color was supposed to be the result of the baking process to which it had been

0-I-C

When a preparation has an advertised reputation that is world-wide, it means that preparation is meritorious. If you go into a store to buy an article that has achieved universal popularity like Cascarets Candy Cathartic for example, you feel it has the endorsement of the world. The judgment of the people is infallible because it is impersonal. The retailer who wants to sell you "something else" in place of the article you ask for has an ax to grind. Don't it stand to reason? He's trying to sell something that is not what he represents it to be. Why? Because he expects to de-rive an extra profit out of your credulity. Are you easy? Don't you see through his little game? The man who will try and sell you a substitute for Cascarets is a fraud. Beware of him! He is trying to steal the honestly earned benefits of a reputation which another business man has paid for, and if his conscience will allow him to go so far, he will go farther. If he cheats his customer in one way, he will in another, and it is not safe to do business with Beware of the Cascaret substitutor! Remember Cascarets are never sold in bulk but in metal boxes with the longtailed "C" on every box and each tablet stamped C. C. C.

The Tennessee convict coal mine is a paying institution. It is estimated that the enterprise will show a profit of over \$100,000 for the past six months.

Ladies Can Wear Shoes One size smaller after using Allen's Foot-Ease, a powder for the feet. It makes tight or new shoes easy. Cures swollen, hot, sweating, aching feet, ingrowing nails, corns and bunions. At all druggists and shoe stores, 25c. Trial package FREE by mail. Address Allen S. Olmsted, Le Roy, N. Y.

WOMAN'S SECOND GROWTH.

Her Most Beautiful and Fruitful Years

Are Late in Life. Since woman is in the main but a bundle of paradoxes, it is not so surprising to hear that a normally healthy woman is younger, mentally and physically, at 50 than at 40. The reason is somewhat recondite, but still one to be rendered in plain words. This rejuvenation comes from a sort of second growth of nerve tissue, or, more accurately, a new arrangement of nerve cells, which takes place commonly in the decade between 35 and 45. The rearrangement is somewhat analogous to the root-making of a rose or a flowering shrub. Almost every one has noted how the riotous vitality of the vernal impulse wreaths rose trees in blossom up to the period of midsummer. Then, though the blooming continues laggardly, the flowers are poor and small, as though the tree were tired of fashioning them and fretful beneath the strain. By and by, as August yields to September, the flowers, though they may be fewer, swell to more than the glory of spring. They are truly royal, loose-leafed.longstemmed, heavy-headed blossoms, full of every virtue-size, fragrance, color and endurance. Then the gardener tells you it is because in the height of the warm weather the rose struck new roots, and is full of the rich juices of a second growth. It is somewhat the same with fruit trees-which, indeed occasionally blossom and let fall crops of young fruit. Invariably they make new wood, which, if only it harden sufficiently, is the best of all wood for either cuttings or grafts-because, say the orchardists, "it has more life in it." Grape vines, too, have a trick of putting forth new blooms in the fall If they chance to be very abundant new wine in the cask which has ceased

REV. DR. TALMAGE.

THE EMINENT DIVINE'S SUNDAY DISCOURSE.

Subject: The Mission of Christ - How Divine Power Will Heal the World-Jesus the Surgeon Who Will Extirpate the Disease of Sin.

[Copyright 1900.]

WASHINGTON, D. C .- In this discours Dr. Talmage puts in an unusual light the mission of Christ, and shows how divine power will yet make the illnesses of the world fall back; text, Matthew xi, 5, "The blind receive their sight, and the lame walk, the lepers are cleansed and the deaf hear."

'Doctor," I said to a distinguished surgeon, "do you not get worn out with constantly seeing so many wounds and bro-ken bones and distortions of the human body?" "Oh, no," he answered; "all that is overcome by my joy in curing them."
A sublimer and more merciful art never came down from heaven than that of surgery. Catastrophe and disease entered the earth so early that one of the first wants of the world was a doctor. Our crippled and agonized human race called for surgeon and family physician for many years before they came. The first surgeons The first surgeons who answered this call were ministers of religion—namely, the Egyptian priests. And what a grand thing if all clergymen were also doctors, all D. D.'s were M. D.'s, for there are so many cases where body and soul need treatment at the same time. onsolation and medicine, theology and therapeutics. As the first surgeons of the were also ministers of religion, may these two professions always be in full sympathy! But under what disadvantages the early surgeons worked, from the fact that dissection of the human body was forbidden, first by the pagans and then by the early Christians! Apes being the brutes most like the human race, were dissected, but no human body might be unfolded for physiological and anatomical exploration, and the surgeons had to guess what was inside the surgeons had to guess what was inside the temple by looking at the outside of it. If they failed in any surgical operation, they were persecuted and driven out of the city, as was Archagathus because of his bold but unsuccessful attempt to save a patient.

But the world from the very beginning kept calling for surgeons, and their first skill is spoken of in Genesis, where they employed their art for the incisions of a sacred rite, God making surgery the predesacred rice, God making surgery the prede-cessor of baptism, and we see it again in II Kings, where Ahaziah, the monarch, stepped on some cracked latticework in the palace, and it broke, and he fell from the upper to the lower floor, and he was so hurt that he sent to the village of Ekron for aid, and Aesculapius, who wrought such wonders of surgery that he was dei-fied and temples were built for his worship at Pergamos; and Epidaurus and Podelirius introduced for the relief of the world phlebotomy, and Damocedes cured the dislocated ankle of King Darius and the cancer of his queen, and Hippocrates put successful hand on fractures and introduced amountains and Programmer. duced amputation, and Praxagoras re-moved obstructions, and Herophilus began dissection, and Erasistratus removed tu-mors, and Celsus, the Roman surgeon, removed cataract from the eye and used the Spanish fly; and Heliodorus arrested disease of the throat, and Alexander of Tralles treated the eye, and Rhazas cauterized for the prevention of hydrophobia, and Percival Pott came to combat diseases of the beine, and in our own century we have had, among others, a Roux and a Larray in France, an Astley Cooper and an Abernethy in Great Britain and a Valentine Mott and Willard Parker and Samuel. D. Gross in America, and a galaxy of liv-bg surgeons as brilliant as their predeces-ors. What mighty progress in the baf-fling of disease since the crippled and sick acient cities were la treets, that people who had ever been burt or discretered in the same way might suggest what had better be done for the

But notwithstanding all the surgical and nedical skill of the world, with what tennedical skill of the world, with what tenacity the old diseases hang on to the human race, and most of them are thousands of years old, and in our Bibles we read of them—the carbuncles of Job and Hezekiah, the palpitation of the heart spoken of in Deuteronomy, the sunstroke of a child carried from the fields of Shunem, crying, "My head! my head!" King Asa's disease of the feet, which was nothing but gout; defection of teeth, that called for dental surgery, the skill of which, almost equal to anything modern, is still seen in the filled molars of the unrolled Egyptian mummies; the ophthalmia caused by the juice of the newly ripe fig, leaving the peomummies; the ophthalmia caused by the juice of the newly ripe fig, leaving the people blind by the roadside; epilepsy, as in the case of the young man often falling into the fire and oft into the water; hypochondria, as of Nebuchadnezzar, who imagined himself an ox and going out to the fields to pasture; the withered hand, which in Bible times, as now, came from the destruction of the train artery or from paralysis of the cnief nerve; the wounds of the man whom the thieves left for of the man whom the thieves left for dead on the road to Jericho, and whom the good Samaritan nursed, pouring in oil and wine-wine to cleanse the wound and oil to soothe it. Thank God for what sur-gery has done for the alleviation and cure of human suffering!

human suffering! But the world wants a surgery without pain. Drs. Parre and Hick man and Simpson and Warner and Jackson, with their amazing genius, came forward, and with their anaesthetics benumbed the patient with narcotics and ethers as the ancients did with hasheesh and mandrake, and quirted him for a hile, but at the return of consciousness distress returned. The world has never seen but one surgeon who world has never seen but one surgeon who could straighten the crooked limb, cure the blind eye or reconstruct the drum of a soundless ear or reduce a dropsy without pain, and that surgeon was Jesus Christ, the mightiest, grandest, gentlest and most sympathetic surgeon the world ever saw or ever will see, and He deserves the confidence and love and worship and hosanna of all the earth and halleluiahs of all beaven. "The blind receive their sight and the lame walk; the lepers are cleansed and the deaf hear."

and the deaf hear."

I notice this surgeon had a fondness for thronic cases. Many a surgeon, when he has had a patient brought to him, has said: "Why was not this attended to five years ago? You bring him to me after all power of recuperation is gone. You have waited until there is a complete contraction of the muscles, and false ligatures are formed, and ossification has taken place. It ought to have been attended to long ago." But Christ the Surgeon seemed to prefer inveterate cases. One was a ago." But Christ the Surgeon seemed of prefer inveterate cases. One was a semorrhage of twelve years, and He stopped seemorrhage of eighteen prefer inveterate cases. One was a permorrhage of twelve years, and He stopped 4. Another was a curvature of eighteen years, and He straightened it. Another was a cripple of thirty-eight years, and he walked out well. The eighteen-year patient was a woman bent almost double. If you could call a convention of all the surgeons of all the centuries, their combined skill could not cure that body so drawn out of shape. Perhaps they might stop it from getting any worse, perhaps they might contrive braces by which she might be made more comfortable, but it is, humbly speaking, incurable. Yet this divine surgeon put both His hands on her, and from that doubled up posture she began to take on a healthier bue, and the muscles began to relax from their rigidity, and the spinal column began to adjust it self, and the cords of the neck began to be more supple, and the eyes, that could see only the ground before, now looked into the face of Christ with gratitude and up toward heaven in transport. Straight! After eighteen weary and exhausting years, straight! The poise, the gracefulness, the beauty of lealthy womanhood reinstated. The thirty-eight years' case was a man who law an a mattress near the mineral

baths at Jerusalem. There were five apartments where lame people were brought, so that they could get the advan-tage of these mineral baths. The stone basin of the bath is still visible, although basin of the bath is still visible, although the waters have disappeared. probably through some convulsion of nature. The bath, 120 feet long, forty feet wide and eight feet deep. Ah, poor man, if you have been lame and helpless thirty-eight years, that mineral bath cannot restore you. Why, twenty-eight years is more than the average of human life. Nothing but the grave will cure you. But Christ the Surgeon walks along those baths, and I have no doubt passes by some patients have no doubt passes by some patients who have been only six months disordered or a year or five years, and comes to the mattress of the man who had been nearly four decades helpless, and to this thirty-eight years' invalid said, "Wilt thou be made whole?"

The mightiest scientists have put their skill to its retuning and sometimes they stop the progress of its decadence or remove temporary obstructions, but not more than one really deaf ear out of 100,

It took a God to make the ear, and it takes a God to mend it. That makes me curious to see how Christ the Surgeon suc-

ceeds as an aurist.

We are told of only two cases He oper ated on as an ear surgeon. His friend Peter, naturally high tempered, saw Christ insulted by a man by the name of Man-chus, and Peter let his sword fly, aiming at the man's head, but the sword clipped and hewed off the outside ear, and our Surgeon touched the laceration and an-other ear bloomed in the place of the one that had been siashed away. But it is not the outside ear that hears. That is only a funnel for cathering sound and pouring it into the hidden and more elab orate ear. On the beach of Lake Galiles The patient dwelt in pernetual silence and was speechless. He could not hear a note of music or a clap of thunder. He could not call father or mother or wife or children by name. What power can waken that du'll tympanum or reach that chain of small bones or revive that auditory nerve or open the gate between the brain and the outside world? The Surgeon put His fingers in the deaf ears and agitated them, and kept on egitating them until the vibration gave vital energy to all the dead parts, and they responded, and when our Surgeon withdrew His fingers from the ears the two tunnels of sound were clear for all sweet voices of music and friendship.
For the first time in his life he heard the
dash of the waves of Galilee. Through the
desert of painful silence had been built a king's highway of resonance and acclama-tion. But yet he was dumb. No word had ever leaned from his lip. Speech was chained under his tongue. Vocalization and accentuation were to him an impossi-bility. He could express neither love nor indignation nor worship. Our Surgeon, having unbarred his ear, will now unloose the shackle of his tongue. The Surgeon will use the same liniment or salve that He used on two occasions for the cure of hlind people - namely, the moisture of His own mouth. The application is mad-and lo, the rigidity of the dumb tongue is relaxed, and between the tongue and to the was born a whole vocabulary and words flew into expression. He not only heard, but he talked. One gate of his body swung in to let sound enter, and the other gate swing out to let sound depart. Why is it that, while other surgeon

used knives and forceps and probes and stethoscopes, this Surgeon used only the ointment of His own line? To show that all the curative nower we ever feel comes straight from Christ. And if He touches us not we shall be deef as a rock and dumb as a tomb. Oh. Thou greatest of all artists, compel us to hear and help us to

But what were the Surgeon's fees for all these cures of eyes and ears and tongues and withered hands and crooked backs? The skill and the nainlessness of the operations were worth hundreds and thou-

Do not think that the cases He took were all moneyless. Did He not treat the noblemen's son? Did He not doctor the ruler's daughter? Did He not effect a cure in the house of a centurian of great wealch who had out of his own pocket built a

They would have paid Him large fees and there were hundreds of wealthy people in Jerusalem and among the merchant castles alone Lake Tiberias who would have given this Surgeon houses and lands and all they had for such cures as He could

For critical cases in our time great surgeons have received \$1000, \$5000, and in one case *know of \$50,000, but the Surgeon of whom I speak received not a shekel, not a penny, not a farthing.

In His whole earthly life we know of His having had but 62½ cents. When His taxes were due, by His omniscience He knew of a fish in the sea which had swallowed a piece of silver money as fish are

lowed a piece of silver money, as fish are apt to swallow anything bright, and He sent Peter with a book which brought up that fish, and from its mouth was extracted a Roman stater, or 621/2 cents, the only money He ever had, and that He paid out for taxes.

This greatest Surgeon of all the centuries gave all His services then and offers all His services now free of all charge. "Without money and without price" you may spiritually have blind eyes opened and your dumb tongues loosened, and your wounds bested and your wounds. healed, and your soul saved. If Christian people get hurt of body, mind or soul, let them remember that surgery is apt to hurt, but it cures, and you can afford present pain for future glory.

Besides that, there are powerful anaesthetics in the divine promises that soothe and alleviate. No ether or chloroform or coccaine ever made one so superior to distress as a few drops of that magnificent anodyne: "All things work together for good to those who love God." "Weeping may endure for a night, but joy cometh in the magnificent."

What a grand thing for our poor hu-man race when this Surgeon shall have completed the treatment of the world's wounds! The day will come when there will be no more hospitals, for there will be no more sick, and no more eye and ear infirmaries, for there will be no more blind inhrmaries, for there will be no more blind or deaf, and no more deserts, for the round earth shall be brought under arboriculture, and no more blizzards or sunstrokes, for the atmosphere will be expurgated of scorch and chill, and no more war, for the awords shall come out of the foundry bent into pruning hooks, while in the heavenly country we shall see the victims of accident or malformation or heavefulars, the contract of the country we shall see the victims of accident or malformation or heavefulars. into pruning hooks, while in the heavenly country we shall see the victims of accident or malformation or hereditary ills on earth become the athletes in Elysian fields. Who is that man with such brilliant eyes close before the throne? Why, that is the man who, near Jericho, was blind and our Surgeon cured his ophthalmia! Who is that ercet and graceful and queenly woman before the throne? That was the one whom our Surgeon found bent almost double and could in nowise lift up herself, and He made her straight. Who is that listening with such rapture to the music of heaven, solo melting into chorus, cymbal responding to trumpet, and then himself joining in the anthem? Why, that is the man whom our Surgeon found deaf and dumb on the beach of Galilee, and by touches opened ear gate and mouth gate. Who is that around whom the crowds are gathering with admiring looks and thanksgiving and cries of "Oh, what He did for me! Oh, what He did for the world!" That is the Surgeon of all the centuries, the oculist, the aurist, the emancipator, the Saviour. No pay He took on earth. Come, now, and let all heaven pay Him with worship that shall never end and a love that shall never die. On His head be all the crowns, in His hands be all the scepters and at His feet be all the worlds!

Much interest will center in the pronosed Spanish-South American congress which is to meet, as now planned, in Madrid in October next. The political results of such a gathering will not be serious enough to arouse any excitement or affect the policy of the United States, but it will be interesting to note how close in sympathy and political alliance the South American states can get to the mother country, now that so many years have elapsed since they took the sword and cut the apron strings. Englishmen have declared that the school histories of the United States are responsible for the fact that Young America continues fighting John Bull at Concord, an operation
