

On to Success in
1901.

WE'VE made our mark in the past dozen years and we've sold all the way from 10,000 to 30,000 pairs of shoes a year, and we expect to sell more in 1901 than in any previous year.

Our plans are perfected. We have formed connections with the best manufacturers in the country. From them we buy as cheap as any concern in the country, large or small.

We carry stocks that are unsurpassed anywhere. We name prices that are seldom matched and rarely beaten.

We freely right every wrong—no sale is completed until you are satisfied.

Profitable Rain.

The earth for the past week was in a condition to receive and retain much of the rain which fell during that time. This condition is very favorable to crop growing later on in the season. Last spring the early rains fell on frozen ground, the soil receiving no benefit whatever from them, which caused the growing crops during May to suffer greatly. When the earth is well filled with water the capillary action of the soil furnishes much moisture for growing plants, but when the earth's reservoirs are empty this action is impossible and plant life suffers, unless there are very frequent showers.

BOILER BURST.

At the Dooty Saw Mill, Near Rebersburg—The Fireman Badly Injured.

The boiler of the engine at the saw mill of Wm. Dooty, near Rebersburg, burst Tuesday morning. The explosion wrecked about one-third of the building, and seriously injured three of the workmen at the mill. The fireman, Henry Wolfert, was thrown fifteen feet through a door and sustained serious injuries. He was picked up more dead than alive. A later examination proved that his leg was broken between the knee and thigh, and that he was bruised and cut in many places. Wallace Blerly, who was also in the mill at the time, had his nose broken by the flying debris and was badly scalded. Reuben Musser was also more or less injured.

The exact cause of the explosion has not been ascertained. Investigation revealed that a number of stay bolts of the boiler had been previously broken, which greatly weakened the fire box. The men about the mill and the fireman assert that the water gauge indicated that the boiler was three-quarters full of water. It is altogether likely that the connections were clogged, and that the water gauge did not represent the true condition of affairs, and that the boiler burst on account of lack of water. The accident occurred before six o'clock.

The engine was a twenty horse power, with a boiler of the five-box pattern. The explosion tore the boiler completely from the engine and pitched it exactly seventy-two feet over an embankment. In its flight to its final resting place, the boiler passed through the roof of the building and over the heads of Sawyer Reedy and the truckman. Recovering from their fright in a moment, they went to the rescue of their fellow workmen whom they saw needed assistance.

The mill after the wreck looked greatly dilapidated, and will require the expenditure of considerable money to be put into running order again. The mill is the property of Wm. Dooty, who is doing business near Centre Hall, and was operated by his brother, A. H. Dooty, on a tract of woodland located one and one-half miles south west of Rebersburg, in Kleckner's Gap, recently purchased from 'Squire Reifsnnyder.

The young man who was so severely injured is married and lives in Rebersburg. His physician hopes for his recovery barring anything unforeseen at this stage.

The appearance of a number of citizens frightened the burglars away before they could empty the safe which contained besides the usual funds \$15,000 to pay off railroad employees.
