### HORTICULTURE EXHIBIT.

Will Be One of the Principal Features of the Exposition.

Horticulture, viticulture and floriculture are linked together in one great class. In the midst of a country of orchards and vineyards the Pan-American Exposition will have abundant material close at hand and of the finest quality from which to make an exhibit worthy of the great event. The extensive floral decorations of the grounds constitute a rich display in floriculture, and several acres, including hundreds of beds, are devoted to the exhibits made by leading florists of the country. Flowers in profusion will welcome the earliest visitors and breathe out their fragrance and display their incomparable beauty the season through. Thousands of trees and shrubs flourish throughout the grounds. Double rows of thrifty trees surround the principal buildings. Foliage and flowers there will be in great profusion. In the horticultural embellishment of the grounds the Pan-American will far surpass the efforts of all former expositions.

In the handsome and commodious Horticultural Building all the popular fruits of the different countries represented in the Pan-American Exposition will be displayed. With a suitable refrigerating room upon the grounds, it will be possible for the management to make a daily fresh display of fruit. Throughout the term of the Exposition, when certain fruits are at their best, special displays will be made of certain varieties. The exhibit from southern California will be particularly large, and New York and other states will be represented befittingly. Bottled productions will also have a place here, the wine growers of the Chautauqua, central New York and Hudson river regions having applied for space for extensive exhibits. The opportunity for a timely display of choice native fruits will be improved. Dried and preserved fruits will be exhibited here. Articles and appliances used in horticulture will also be shown in this division. The exhibits of nursery stock, including orchard and ornamental trees, shrubs and evergreens, will be unquestionably among the finest, if not the finest, ever made. The most prominent nurserymen in the country have interested themselves and will aim to outdo any former show of the kind. No less interest is taken by the leading florists, who are arranging exceptionally fine displays. Many large beds of flowers were planted some months ago, and they will aid in beautifying the scene from the early days of the Exposition.

### The Maine Building.

The resources of the State of Maine will be exhibited at the Pan-American Exposition next summer in a building at once unique and appropriate. It

MAINE STATE BUILDING.

will be circular in form, with projecting entrances, and the decorations will be typical of things in the Pine Tree State. The building will challenge the attention and win the admiration of every visitor to the Exposition.

### Automobiles at Exposition.

The automobile has been developed since the Columbian Exposition at Chicago. What marvels may be exhibited and in practical daily use at the Pan-American Exposition can only be dimly conjectured. The railway, vessel and vehicle exhibits at Buffalo this year will outrival in interest anything that has been possible in the past.

The sum asked of the state for the national guard is \$775,000.
